

## STEVENS CREEK PEDESTRIAN BRIDGE CROSSING CLOSURE NOTICE | December, 2021

#### **UPCOMING ACTIVITIES AND LANE CLOSURE**

On December 15, Caltrain will begin bridge barrier installation work in Mountain View that will require a temporary closure of portions of the Stevens Creek pedestrian bridge. A temporary closure is required due to construction equipment and crews conducting Bridge Barrier installation work on the Stevens Creek pedestrian bridge located between W. Evelyn Avenue and the Central Expressway.

# Work will take place from December 15 to December 23 with work hours between 9 p.m. to 5 a.m.

The Stevens Creek pedestrian bridge will be partially closed during construction.

Directional signs will direct pedestrian traffic to use either the north portion or the south portion of the Stevens Creek pedestrian bridge as a detour during construction. Only one side will be closed at a time. The south portion of the bridge will remain open when work requires closure of the north side. Once work in the north portion of the bridge is complete, crews will then close the north side and open the south portion of the bridge for pedestrian detour traffic.

Detour maps for pedestrian traffic are provided on the reverse of this notice.

#### **CONSTRUCTION ACTIVITIES**

During the closure, crews will install screen mesh and protection screen panels along the bridge overcrossing at De La Cruz Boulevard to ensure the safety of pedestrians and electrical infrastructure for Caltrain Electrification. Work will consist of the cutting of concrete, restoration, and the installation of bridge barrier components.

Crews will also be working along the Caltrain corridor to install foundations outside of the closure hours noted above. Work may take place during the day and at night, with night work occurring between 9 p.m. and 5 a.m. There may also be occasional 24-hour work on weekends.

Caltrain will work with contractors to minimize night work to limit the impact to surrounding communities; however, some work must be performed at night in order to maintain regular Caltrain service. To mitigate noise and other impacts during night activities, the field team will utilize acoustical noise barrier blankets and will position lights away from residential and business areas. Caltrain has established a dedicated project hotline and email for residents concerned about these potential impacts.

#### **PROJECT OVERVIEW**

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2024, will electrify and upgrade the performance, operating efficiency, capacity, safety, and reliability of Caltrain's commuter rail service.

Caltrain electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled with an electric train system for services between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric trains.

#### **CONTACT INFORMATION**

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**.

The project e-mail is <a href="mailto:calmod@caltrain.com">calmod@caltrain.com</a>
