[Important News Notices](#)

Please be advised that a required fire flow test will take place Tuesday, April 27th. Crews will be testing the fire pump systems on South Street. Because these tests will take place on main transmission lines, customers may notice some discoloration during and after the tests throughout town. Any discoloration that may occur will eventually dissipate. Please check your water before using it. You may need to run your cold water line to clear your internal pipes after the test is complete.

You can also follow us on Twitter @hopkintonwater for instant department updates. In addition you can subscribe to our notice feed here: <https://groups.google.com/a/hopkintonma.gov/g/watersewer> to receive up to date information.

Regards,

Eric Carty

Water and Sewer Manager
