

# Jacobs Design Showcase

# Technology Design Foundations

Wednesday, May 5, 2021 | 2:10 - 4:00 PM

Virtual presentations and poster session by premiere MDes cohort!

Join at <http://bit.ly/TDF-Showcase> | Visit <https://jacobsinstitute.berkeley.edu/design-showcase/> for full listing

## About the course:

Technology Design Foundations, offered this semester for the first time to an MDes cohort, introduces design and technology frameworks essential to the creation of products, services, and experiences enabled by emerging technologies. The course follows a human-centered design process that includes research, concept generation, and prototyping, with an emphasis on iteration and refinement through digital fabrication. A technical semester-long project challenges students to create a product-service system leveraging hardware and digital technologies to address a well-defined need. Join us during the design showcase to see the results of these explorations!

Titus Ebbecke  
George Grigoriadis  
Kailin Li  
Julia Park  
David Zhou

Xiaobai Ji  
Effe Jia  
Eli Lee  
Jan Veicht
