## What is Community Engagement?

Community engagement enables our College community to have a say on matters that may impact or interest them in relation to the education of their child. It is planned, two-way information sharing with the purpose of working with our stakeholders to make better informed decisions.

## Why are we engaging?

We are committed to gathering the College community's views, alongside other information - including technical, financial and legislative - to help us make better decisions. Our stakeholders have a wealth of knowledge to contribute. In return we want to ensure the decisions we make provide the best outcome for them.
