international seminar series

ecobiosocial complexities:

encounters, critiques, integrations

International seminar series organised within the framework of the Swiss National Science Foundation Ambizione Project « Constructing the Biosocial: an engaged inquiry into epigenetics and post-genomic biosciences »

Wednesday, February 15, 2023 - GEO 2215

Immunopolitics, immunosociality, and production of failing forms of life

Sergei Yu Shevchenko, Independent Researcher/Russian Academy of Science

Thursday, March 30, 2023 - GEO 2215

The Evolution of ACEs: From Coping Behaviors to Epigenetics as Explanatory Models for the Biology of Adverse Childhood Experiences

Ruth Müller, Technische Universität München
Martha Kenney, San Francisco State University

Wednesday, April 12, 2023 - GEO 2215

Caring with Haunted Microbes

Astrid Schrader, University of Exeter

Monday, April 24, 2023 - GEO 2218

Dirty parenting and toxic terroir: The symbiopolitics of securing intergenerational microbial transmission

Beth Greenhough & Jamie Lorimer, University of Oxford

Wednesday, Mai 24, 2023 - GEO 2215

Why the microbiome, why now? Historicising the post-genomic turn in social theory (with an attention to fermentation)

Jamie Lorimer & Joshua Evans, University of Oxford

University of Lausanne
Géopolis Building
12h00 to 13h30
In presence and Online

Informations : secretariat.stslab@unil.ch

Organisers :

Cécile Fasel, Luca Chiapperino, Francesco Panese
