	About NAC-Tech					
	NAC-Tech has been conceiver "employable" workforce, hence who will be seeking employmen	l as an in creating a t opportunit	Justry standard assessment and certification program to ensure the transformation of a "trainable" workforce into an obust and continuous pipeline of talent for the IT/Engineering Industry. It is targeted at final year and pre-final year students, es in the IT / Engineering sector.			
	The intent behind assessing the them on areas they need to wor	se students k on to imp	is to identify the level of talent which is available across India, especially in Tier II and Tier III cities and provide feedback to rove their employability.			
	Conceptualization of NAC-Te	ch				
	In-depth meetings with the large recruiters in the industry were conducted to understand their recruitment practices, cause of attrition desired skills in a candidate, etc. Based on this, a job-skill matrix was developed which formed the basis for the design of this assessment program. Core and Working Committees from the industry were formed and constant interactions were made to make sure that the program was in line with the industry requirements. An evaluation committee was set up to finalize the vendors and decide on the approach to the pilot. Multi-tier evaluation of the vendors happened after the initial interaction. The identified vendors provided the content and technology to run the test. The companies that have helped develop the assessment program are - TCS, Wipro, Infosys, Accenture, Cognizant and HCL.
