Treasurer's Report

F

I've invited Julian with the following to MBM, so will call you on your mobile phone, - we all may be in a Hangout concurrently. I'll also add this to the agenda.

+Julian Dumitrascu Aside from potential positive connotations/generations of 'community' (in the senses of connectedness and 'communitas') on the Web, and pragmatically here, a good place to begin 'language communities' in each of all 7097 living languages (per Ethnologue, and re "mutual intelligibility" as a simple definition of language), could be in a combination of G+ with Google Hangouts. This could involve moderators (eg the woman from Texas who started the 'Language Practices' or similarly named group which is large, still active, and from which she has withdrawn) and teachers (eg Peter Bothe). From these groups, translators and coders for an universal translator could emerge too. And WUaS would eventually

seek to hire from such groups too (which Wikipedia has done too from their volunteer communities). And the IT architecture of G+ is still fairly "wiki" fast, and open. Creating a kind of Stanford culture - which I'll call excellent, kind of hippy California open (even in the 2010s), and laid back too - could have merit in such language communities too. Shall we explore this idea further thinking through how we could best grow the Romanian language Hangout which meets on Saturdays (and +Peter Bothe 's English and German Hangouts) as examples - perhaps even with topics such as someone like +Ajit Mishra from India - but eg a MIT Professor or Romanian teacher - talking about Logistics in a Hindi language community group, as an example of a pragmatic & business topic)? World University and School might reach out through such language communities to let prospective students know of degree possibilities too. Would you be available to talk further about this in today's WUaS Monthly Business Meeting at 9am Pacific? I'll add this to the agenda nevertheless.
