There are no words in the Class Book, so children can concentrate on developing listening skills by linking the illustrations with what they hear. A range of activities - drawing, craft work, games, and music - caters for different teaching techniques and situations while keeping young learners interested and involved. Each unit has a story in the accompanying Story Book. The children follow the pictures and listen either to the teacher or the cassette in an enjoyable whole-class activity. The children have the pleasure of a shared experience, and the teacher is able to keep the ending a surprise. The humorous, colourful illustrations maintain a high level of motivation.

[Munich Memoir: Dan Alon's Untold Story of Survival, Dan Alon](#) , 2012, 0985643609, 9780985643607. Nothing had prepared Israeli fencer Dan Alon for what he would face when he finally qualified and made it to the Munich Olympics. Despite the years of preparation, the training and the dedication, he could not have known how a single Black September day would shatter his dreams and fracture his life. Surviving the Munich Massacre was the beginning of Dan's 40-year struggle to understand why he was spared, why his was not among the mangled remains of murdered Israeli Olympic athletes left on the tarmac at Feldenfurstenbruck Airport. After years of suffering, Dan found that telling his tale freed him to rejoin the living. This is that story, a story of courage, of hope, and, ultimately a story of love. This is Dan Alon's Munich Memoir.

[Great Answers to Difficult Questions about Death: What Children Need to Know, Linda Goldman](#) , 2009, 1846429579, 9781846429576. Death is never an easy subject for discussion and adults often struggle to find the right words when talking about it with children. This book explores children's thoughts and feelings on the subject of death and provides

parents and other caring adults with guidance on how to respond to difficult questions. The author explores some of the most common questions children ask about death and provides sensitive yet candid answers, phrased in a way that children will be able to understand and relate to. Each chapter is devoted to a particular issue, such as religious beliefs, coming to terms with terminal illness, and the fear of forgetting someone when they are gone. The book recognizes the emotions and reactions of children and family members and includes separate conclusions for parents and children. This guide offers useful advice for parents and carers and will also be of interest to counsellors and other professionals working with children.

[Psychology: A Very Short Introduction, Gillian Butler, Freda MacManus](#) , 1998, 0192853236, 9780192853233. Psychology is part of everyone's experience: it influences the way we think about everything from education and intelligence to relationships and emotions, advertising, and criminality. People readily behave as amateur psychologists, offering explanations for what we think, feel, and do. But what exactly are psychologists trying to help us understand? What

scientific grounding do they have for their approach? In *Psychology: A Very Short Introduction*, Dr. Gillian Butler and Dr. Freda McManus provide an understanding of some of psychology's leading ideas and their practical relevance. The authors answer some of the most frequently asked questions about psychology including: What is psychology? How do we use what is in the mind? How does psychology work? How do we influence each other? What can or can't a psychologist do for you? Psychology is a large part of our everyday experience, and this elemental guide is a stimulating introduction for anyone interested in understanding the human mind. About the Series: Combining authority with wit, accessibility, and style, Very Short Introductions offer an introduction to some of life's most interesting topics. Written by experts for the newcomer, they demonstrate the finest contemporary thinking about the central problems and issues in hundreds of key topics, from philosophy to Freud, quantum theory to Islam.

The highest hurdle that stands before most call center managers today is the shortage of qualified agents. To help you prepare for booming call center growth and the demands of the emerging multichannel environment, *Call Center Recruiting and New Hire Training* compiles the best articles, ideas and tools from the monthly newsletter *Call Center Management Review* to give you the foundation for a forward-thinking approach to agent recruitment and new-hire training. The increase in call center openings, low employment and intense rivalry for multiskilled agents will add up (if it doesn't already) to a management nightmare unless you have an effective recruitment and new-hire training program in place. Selected for their educational value, practicality and timeless recruiting and new-hire principles, these articles provide innovative practices, programs and strategies to get the right people with the right aptitudes and abilities in place before training commences... and then cultivate those new hires into high-performance agents equipped and ready for the challenges ahead.

This handbook is intended for anyone interested in developing and teaching parenting and childrearing classes to parents of children up to and including 3 years of age. Part One, chapters 1 through 9, offers an overview of how to become an effective group leader. Part One, chapter 10 explains the format in which specific childrearing information will be presented in the rest of the book. Subsequent sections concern teaching about children at various ages. Specifically, Part Two focuses on major topics of importance to parents of 1- to 6-month-olds; Part Three concerns topics for parents of 7- to 14-month-olds; Part Four describes topics for parents of 15- to 24-month-olds; and Part Five

centers on topics for parents of 2- to 3-year-olds. Part Six concerns general topics of interest relating to the first 3 years of life. Each topic in the various sections contains background information on the subject and describes teaching materials and strategies. Part Seven provides appendices mentioning resources and including additional information and forms (such as reading lists, sample publicity and registration forms, parental interest forms, sample orientation forms and series outlines, and others). [Bridges to Baghdad: The U.S. Navy Seabees in the Iraq War, Charles R. Kubic, James P. Rife](#) , 2009, 0981992951, 9780981992952. The story of the U.S. Navy Seabees and the First Marine Expeditionary Force Engineer Group during Operation Iraqi Freedom. Bridges to Baghdad tells the story of the "fighting Seabees" and their role in the Iraq War, focusing upon their individual experiences from the time they "snuck" into Kuwait in the fall of 2002 through their redeployment to Iraq as part of Operation IRAQI FREEDOM II in 2004. Bridges to Baghdad also recounts the Seabees' operations at the command level from the perspective of their commander, Rear Admiral Chuck Kubic, including the story of the creation and employment of a new division-level organization, the First Marine Expeditionary Force Engineer Group (I MEG). This was the first such Naval Expeditionary Engineer formation of its kind since World War II. I MEF Commanding General, Lieutenant General James Conway, later summed up the Seabee's value to the war effort when he told a key MEG task force commander that "the determination and skill that your Sailors displayed was nothing short of magnificent!"

[Lessons Learned Over Time: Innovative Earthquake Recovery in India, ,](#) , 1999, 0943198968, 9780943198965. This publication is a major contribution to earthquake recovery literature. It focuses on the Government of Maharashtra's housing rebuilding program, financed in large part through a World Bank credit, following the September 1993 Maharashtra, India earthquake. The project is one of the largest ever attempted in the world, particularly with its emphasis on nonengineered, unreinforced masonry construction. Ultimately, 27,000 new houses were built and another 189,000 were repaired. The sheer volume of houses rebuilt, repaired, or strengthened is impressive in speed, quantity, and general quality. These houses were rebuilt within the context of an even larger rehabilitation program that included other social and economic elements as well as the preparation of a disaster management plan. This report highlights observations that may be useful to earthquake risk reduction professionals. While this is a project carried out in a developing country with different construction materials and practices from developed countries, many of the strategies adopted are appropriate for consideration in all contexts.

[Islamist Terrorism and Democracy in the Middle East, Katerina Dalacoura](#) , 2011, 1139498673, 9781139498678. What were the reasons behind the terrorist attacks of September 11th? Does the cause of Islamist terrorism relate to the lack of democracy in the Middle East? Through detailed research into the activities of both radical and moderate organizations across the Middle East, such as the Muslim Brotherhood, Hamas and Hizbullah, and via interviews with key personnel, Katerina Dalacoura investigates whether repression and political exclusion pushed Islamist entities to adopt terrorist tactics. She also explores whether inclusion in the political process has had the opposite effect of encouraging Islamist groups toward moderation and ideological pragmatism. In a challenge to the conventional wisdom, she concludes that Islamist terrorism is not a direct consequence of authoritarianism in the Middle East and that there are many key factors that generate radicalism.

Chronicling the unforgettable and improbable triumph of Jack Nicklaus in the 1986 Masters, this celebration recounts how the tarnished Golden Bear, with his eldest son Jackie as his caddy, won the most prestigious golf tournament for the sixth time at the astonishing age of 46. Though he was not a favorite to win--ranked 160th on the PGA Tour money list and six years without a win at a major championship--Nicklaus found redemption in competition and reasserted his golf legacy with an inspiring win that many still regard as the most exciting Masters ever. Hanging on for the first three rounds of the tournament, Nicklaus charged ahead in the final round, securing a heart-pounding and history-making victory. This book is full of details about the crowning achievement of Nicklaus's career, the Masters championship itself, and profiles of some of the finest golf players in the sport at the peak of their careers, such as Seve Ballesteros, Tom Kite, and Greg Norman.

[Murder Gone Cold, Tamara Shaffer](#) , 2006, 0976607271, 9780976607274. "In 1956, three days after Christmas, two Chicago girls, Barbara Grimes, fifteen, and her thirteen-year-old sister Patricia, left home to see Love Me Tender, the first movie starring the heartthrob of the day, Elvis Presley. They never made it home, intercepted somewhere between the Brighton Theater and their house on South Damen Avenue. Twenty-six days later, following a series of bizarre reports of sightings far and wide, they were found dead on a road southwest of the city, their bodies frozen and marked by rodents. While Chicago residents reeled with shock and parents tightened reins on their children, a full -scale investigation ensued, but a fresh snowfall at the deathsite and disputes over jurisdictional authority marred its progress from the start. In the end no one was ever brought to trial." -- Back cover.

[The Devil's Elbow, Edward Londergan](#) , 2013, 0989304906, 9780989304900. Set in colonial Massachusetts, The Devils Elbow follows Jack Parker from his orphan childhood days as an apprentice to a greedy and brutal Boston merchant to the isolated pioneer settlement of Brookfield, where he ends up in the fight of his life to protect the people and place he loves. The knowledge Jack's father gave him, that the measure of a man is how he deals with the worst life can throw at him, the support of the powerful man who becomes his friend, and deep, unshakeable love for the childhood girlfriend who becomes his wife, fuel Jack's determination and will to survive. All Jack has learned on his eight year journey meets its greatest test when he and ninety-eight others are trapped in a four-room tavern for three hot, humid August days, fighting for survival against 400 once-friendly Indians, who are determined to wipe them out and reclaim their land and

way of life.

[The River Flows North: A Novel, Graciela Limn](#) , 2009, 1558855858, 9781558855854. "There is a pathway traveled by migrants that cuts away from the Mexican border as it slithers north through the Arizona desert up to Interstate 8. Migrants know this highway as la Ocho , the road that takes them to a better life, but the trail that leads to that highway

is ruthless and unforgiving." In Sonora, a group of immigrants circles around a coyote, Leonardo Cerda, who will, for a price, lead them across the treacherous desert to the United States. Fearful that Cerda may be one of those who will collect their money up front and then leave them stranded to die, the travelers ultimately are forced to put their trust in him and begin the dangerous crossing to a new life. Afraid even of each other, they initially avoid eye contact or conversation. But as the three-day passage across the blistering landscape progresses, the fight to survive the grueling trip ensures that their lives, and deaths, are linked forever. While trudging along, placing one exhausted foot in front of the other, the travelers each remember their lives and the reasons they have been forced to abandon their land, homes and loved ones. Among the immigrants is Menda Fuentes, a salvadorea, the only member of her family to survive a massacre during her country's civil war. Then there is Julio Escalante and his young grandson Manuelito, who pay the full fee even though they plan to go only halfway. By their side is Encarnacin Padilla, an ancient indigenous woman who has survived ostracism and her involvement in the Zapatista uprising. Next to her walk Nicanor and Borrego Osuna, two brothers who suffer the ultimate indignity just to make it to the United States. Finally, there is Armando Guerrero, shifty, suspicious-looking, and clearly different from the rest because of his fancy clothes as well as the mysterious bag to which he clings. In addition to confronting their own internal demons, they must also face the dangers that they encounter on the trail: poisonous snakes, debilitating dehydration and exhaustion, and a ferocious sandstorm that tears the group apart. This riveting novel explores the lives behind the news stories and confirms Limón's status as one of the country's premiere Latinas writing about issues that affect us all.

[Phantom Shanghai](#), 2007, 0973973919, 9780973973914. Shanghai is a city in the process of dismantling its history to accommodate China's new cosmopolitan vision of itself. Greg Girard, as Shanghai modernizes and seeks acceptance as an international city, buildings and neighborhoods that were once preserved simply by lack of intervention are now being purposefully demolished. Phantom Shanghai is a spectacular look at a Shanghai that won't survive the vision the country has for itself. For the past five years, Greg Girard has been photographing the city's buildings, shops, homes, and neighborhoods. This stunning photographic journey is a look at present-day Shanghai, where politically inspired neglect meets politically inspired development. Greg Girard is a Canadian photographer living in Shanghai since 1998. Largely self-taught, he combines anthropology with a lyrical realism in his work. He is represented in North America by Monte Clark Gallery in Toronto. His editorial work appears in publications such as TIME, Newsweek, Fortune, and The New York Times Magazine. William Gibson is an American-born Canadian science fiction author. He has been called the father of the

cyberpunk subgenre of science fiction. He is credited with coining the term cyberspace. His first novel, *Neuromancer*, has sold more than 6.5 million copies worldwide since its publication in 1984. He is also responsible for *Pattern Recognition* and the screenplay for *Johnny Mnemonic*.

[With Pleasure: Thoughts on the Nature of Human Sexuality, Paul R. Abramson, Steven D. Pinkerton](#) , 2002, 0195146093, 9780195146097. Challenging everything from the mandates of the Catholic Church to the hotly debated ethics of pornography, and from the controversy surrounding gay rights to issues of gender and feminism, *With Pleasure* explores a new theory of human sexuality that ignites every hot topic in the public domain. What role, authors Paul Abramson and Steven Pinkerton ask, does sexual pleasure play in our lives? Is the pursuit of sexual enjoyment in our blood? Our brains? Our very nature? Regardless of the source, it can be agreed that the joys of sex are widely appreciated. Why, then, is pleasure so often overlooked in discussions of sexual behaviour, and why do cultural, historical, and religious treatises so often fail to emphasise, or outright ignore, this obvious aspect of human sexuality? Responding to these and many other questions about our most private affairs, *With Pleasure* provides a profoundly original challenge to the cherished truisms of human sexuality. Abramson and Pinkerton proclaim the paramount importance of pleasure, while at the same time overthrowing traditional ideas about gender, pornography, contraception, homosexuality, abortion, and much more. Supported by rigorous research and co-written by one of the foremost authorities on sex, *With Pleasure* argues that human sexuality cannot be understood if its significance is limited to reproduction alone. The authors posit that in humans reproduction itself occurs as a byproduct of pleasure--not the other way around--and that it is the strong drive for pleasure that makes people overcome many obstacles--and even life-threatening dangers such as AIDS--to have sex. Ranging from discussions about the church to current debates about pornography, and from evolutionary theory to questions about the future of sex and pleasure, Abramson and Pinkerton argue persuasively that the pleurability of sex cannot be restricted to purely reproductive behaviour. *With Pleasure* advances a startling and original new theory about

human sexuality, one which the authors believe will replace all existing notions about sex. The book, standing in direct and deliberate opposition to traditions that try to confine sexuality to procreation, is sure to ignite a firestorm of controversy.

Fought under the cover of elaborate deceptions and ruthless lies, the deadly intelligence operations of World War II produced victories and defeats that were often as important as any reached on the battlefield. A behind-the-scenes history of the war, this book offers an exciting picture of the whole range of clandestine activities, the various forms of intelligence, espionage and sabotage, subversion and counter-espionage--the entire secret war conducted apart from conventional warfare. The major exploits of the O.S.S., M.I.5, Abwehr, and the Deuxieme Bureau are described in colorful detail by an author considered one of the foremost civilian experts on intelligence during the war. Ladislas Farago's account of Allied and Axis spymasters at work offers compelling reading about real traitors and heroes in cloak-and-dagger-dom.

[Abnormal Psychology, Deborah C. Beidel, Cynthia M. Bulik, Ph.D., Melinda Anne Stanley](#) , 2009, 0132216124, 9780132216128. Real Science. Real Life. Presents a balanced Scientist - Practitioner - Educator approach to understanding Abnormal Psychology. Several features distinguish this text from other textbooks currently available. First, the base of abnormal psychology rests on knowledge generated through scientific studies and clinical practice. This text emphasizes this rich blend throughout. Second, it is increasingly clear that most forms of adult abnormal behavior either begin in childhood or have childhood precursors. This text highlights what is known about the developmental trajectory of each condition. Such a focus is instrumental in helping students gain some insight into the etiology of maladaptive conditions. Third, Beidel integrates biological findings with findings from social and behavioral sciences to foster the perspective that abnormal behavior is complex and subject to many different forces, and highlight how these variables often interact in a reciprocal fashion. Fourth, scientific findings with respect to race and gender are discussed with respect to each condition. This includes a discussion of prevalence, differences in symptom manifestation, and any known etiological differences. Importantly, an effort is made to bring to life the nature of these conditions by providing vivid clinical descriptions. In addition to short descriptions used liberally throughout each chapter, a fully integrated case study is presented at the end of each chapter, again illustrating the interplay of biological, psychosocial and emotional factors. MyPsychLab contains study tools such as flashcards, self tests, videos, as well as Speaking Out: DSM in Context which ties real patient interview videos to specific content from the DSM-IV, helping students understand how the DSM-IV criteria applies to real people experiencing disorders. [City levels, Ally Ireson, Nick Barley](#) , 2000, 3764363150, 9783764363154. City Levels slices through the urban environment at a number of different levels. At street level, the mechanics of city life are familiar, but a cross-section taken fifty meters in the air shows another city: people living in high-rise blocks or working in offices; thousands of passengers travelling in helicopters and airplanes. Below ground, trains, secret tunnels, pipes and cables form unseen, intricate networks. Even rivers and animal life exists underground. The increasing value of land and the rise of the post-industrial city as a place of consumption rather than production are creating both an economic and political drive towards taller buildings and deeper underground excavations.

[Meyebela: My Bengali Girlhood, Taslima Nasrin](#) , 2002, 1586420518, 9781586420512. This groundbreaking book throws open a window on a world unknown to most Westerners. Taslima Nasrin revisits her early years from her auspicious birth on a Muslim holy day to the threshold of womanhood at fourteen in a small rural village during the years East Pakistan became Bangladesh. Set against the background of the fight for independence, Nasrin's earliest memories alternate between scenes of violence and flight and images of innocent pleasures of childhood in her extended family. A precocious child, Nasrin's acute awareness of the injustice and suffering endured by her mother and other Muslim women cause her to turn from the Koran in early adolescence, and to begin a journey to redefine her world. Her growing awareness of the class discriminations, gender disparities, and growing religious orthodoxy and intolerance in her family and her rural village parallel the broader social and cultural upheaval emerging in the new nation, and foreshadow the growth of a feminist dissident courageous enough to defy the fundamentalist Muslim clerics. "Nasrin's voice is the voice of humanism everywhere."-- Wole Soyinka "I am sure you have become tired of being called 'the female Salman Rushdie' . . . but please know that there are many people in many countries working to . . . defend you against those who would cheerfully see you dead. . . . In the West, there are too many eloquent apologists working to convince people of the fiction that women are not discriminated against in Muslim countries or that, if they are, it has nothing to do with religion."-- Excerpt from an open letter from Salman Rrushdie to Taslima Nasrin

[Numerical Methods for Delay Differential Equations, Alfredo Bellen, Marino Zennaro](#) , 2013, 0199671370, 9780199671373. The main purpose of the book is to introduce the readers to the numerical integration of the Cauchy

problem for delay differential equations (DDEs). Peculiarities and differences that DDEs exhibit with respect to ordinary differential equations are preliminarily outlined by numerous examples illustrating some unexpected, and often surprising, behaviours of the analytical and numerical solutions. The effect of various kinds of delays on the regularity of the solution is described and some essential existence and uniqueness results are reported. The book is centered on the use of Runge-Kutta methods continuously extended by polynomial interpolation, includes a brief review of the various approaches existing in the literature, and develops an exhaustive error and well-posedness analysis for the general classes of one-step and multistep methods. The book presents a comprehensive development of continuous extensions of Runge-Kutta methods which are of interest also in the numerical treatment of more general problems such as dense output, discontinuous equations, etc. Some deeper insight into convergence and superconvergence of continuous Runge-Kutta methods is carried out for DDEs with various kinds of delays. The stepsize control mechanism is also developed on a firm mathematical basis relying on the discrete and continuous local error estimates. Classical results and a unconventional analysis of "stability with respect to forcing term" is reviewed for ordinary differential equations in view of the subsequent numerical stability analysis. Moreover, an exhaustive description of stability domains for some test DDEs is carried out and the corresponding stability requirements for the numerical methods are assessed and investigated. Alternative approaches, based on suitable formulation of DDEs as partial differential equations and subsequent semidiscretization are briefly described and compared with the classical approach. A list of available codes is provided, and illustrative examples, pseudo-codes and numerical experiments are included throughout the book.

[Corruption in Africa: Causes, Consequences, and Cleanups, John Mukum Mbaku](#) , 2010, 0739113178, 9780739113172.

Corruption in Africa makes a significant contribution to the study of the impacts and eradication of corruption in African societies. John Mukum Mbaku offers a comprehensive analysis of the causes of public malfeasance in African countries and provides a number of practical and effective policy options for change. This book demonstrates the destructive relationship between corruption and the abrogation of economic freedoms and entrepreneurship, a system that has clearly left Africa as one of the most deprived regions in the world. Utilizing the tools of public choice theory, Mbaku emphasizes the important role that institutions have in corruption control and he recommends reconstructive democratic constitutions as the most effective means of development. Until African states provide their people with institutional arrangements that adequately constrain the state and enhance wealth production, the living standards in the continent will continue to deteriorate. Corruption in Africa is a fascinating and informative text that will appeal to those interested in African studies and developmental policies.

[Built by Animals: The Natural History of Animal Architecture, Michael Henry Hansell, Mike Hansell , 2009, 0199205574, 9780199205578.](#) From termite mounds that in relative terms are three times as tall as a skyscraper, to the elaborate nests of social birds and the deadly traps of spiders, the constructions of the animal world can amaze and at times humble our own engineering and technology. But how do creatures with such small brains build these complex structures? What drives them to do it? Which skills are innate and which learned? Here, Mike Hansell looks at the extraordinary structures that animals build - whether homes, traps, or courtship displays - and reveals the biology behind their behaviour. He shows how small-brained animals achieve complex feats in a small-brained way, by repeating many simple actions and using highly evolved self-secreted materials. On the other hand, the building feats or tool use of large-brained animals, such as humans or chimps, require significantly more complex and costly behaviour. We look at wasp's nests, leaf-cutting ants, caddisflies and amoebae, and even the extraordinary bower bird, who seduces his mate with a decorated pile of twigs, baubles, feathers and berries. Hansell explores how animal structures evolved over time, how insect societies emerge, how animals can alter their wider habitat, and even whether some animals have an aesthetic sense.

[Musical Movie Posters: Images from the Heshenson-Allen Archive, Bruce Hershenson , 1999, 1887893318, 9781887893312.](#) "While the subject of this book, movie musicals, is one of the most popular genres of film, it is difficult to describe exactly what constitutes a musical. Most films have soundtracks. And many include a few musical numbers, but how much musical content does a film need before it is officially a musical? Since there are no clear-cut rules, I based this book on a few simple guidelines. First, I excluded all silent films, for obvious reasons. Second, I excluded movies where the musical numbers were not performed by the stars of the film, or movies that are basically comedies or dramas, but include a little music. Third, I excluded concert films or any films that did not have a plot. Finally, since this is a book of images, I tried to always give preference to posters that depict people singing or dancing. It is clear that early movies were dominated by a relatively small group of wonderful performers such as Alice Faye, Betty Grable, and,

of course, Fred Astaire and Ginger Rogers." -- Taken from the Introduction by Bruce Hershenson.

[Valuable Bible Plays: Old Testament Characters, Darlene Resling](#) , 2011, 0967439485, 9780967439488. Involve the whole church in a creative visual Bible study depicting Old Testament characters and events. As part of the VALUable Bible Tools line of products, the goal is to show how valuable these men and women were to God, as well as noting their personal values, abilities, and sometimes lack of abilities to meet the challenges that God presented. Using historical research, humor and creativity, each play can stand alone as an individual play, or it can flow naturally into the next historical event. They are meant to be a fun way to experience Gods Word for both the actors and audiences. VALUable Bible Plays Book One includes Adam and Eve, Noah, Abraham, Joseph, Moses, Joshua, Samuel & Saul. With Gods Word being presented in such a viable, fun and loving capacity, it would be impossible for there to be an unsuccessful practice or performance. In fact, script- line flow will encourage memorization, and emergency (forgetting the script- line) ad-libbing will not harm the message. Remember, God loves us, mistakes and all and He is the most important audience. He delights in watching His children as they share the Word in such a creative way. Plays may be presented in chronological order, or with a time-oriented explanation, perhaps correlating with Bible study or Sunday school lessons. Likewise, these Biblical events re-enacted will not only bring the ancient stories to life, but will enrich todays current events, along with geographical awareness. VALUable Bible Plays may also be adapted to any size church with any type of budget and there are no age limits to be involved. In fact, all the plays are meant to include as many church participants, of all ages, as possible. Parts are written for the experienced, mature actor as well as for the toddlers who become hopping frogs in the Egyptian plague.

[Introduction to Autonomous Mobile Robots, Roland Siegwart](#) , 2004, 026219502X, 9780262195027. Mobile robots range from the teleoperated Sojourner on the Mars Pathfinder mission to cleaning robots in the Paris Metro. Introduction to Autonomous Mobile Robots offers students and other interested readers an overview of the technology of mobilitythe mechanisms that allow a mobile robot to move through a real world environment to perform its tasksincluding locomotion, sensing, localization, and motion planning. It discusses all facets of mobile robotics, including hardware design, wheel design, kinematics analysis, sensors and perception, localization, mapping, and robot control architectures.The design of any successful robot involves the integration of many different disciplines, among them kinematics, signal analysis, information theory, artificial intelligence, and probability theory. Reflecting this, the book presents the techniques and technology that enable mobility in a series of interacting modules. Each chapter covers a different aspect of mobility, as the book moves from low-level to high-level details. The first two chapters explore low-level locomotory ability, examining robots' wheels and legs and the principles of kinematics. This is followed by an in-depth view of perception, including descriptions of many "off-the-shelf" sensors and an analysis of the interpretation of sensed data. The final two chapters consider the higher-level challenges of localization and cognition, discussing successful localization strategies, autonomous mapping, and navigation competence. Bringing together all aspects of mobile robotics into one volume, Introduction to Autonomous Mobile Robots can serve as a textbook for coursework or a working tool for beginners in the field.

[The Fear: Robert Mugabe and the Martyrdom of Zimbabwe, Peter Godwin](#) , 2011, 0316123315, 9780316123310.

Journalist Peter Godwin has covered wars. As a soldier, he's fought them. But nothing prepared him for the surreal mix of desperation and hope he encountered when he returned to Zimbabwe, his broken homeland. Godwin arrived as Robert Mugabe, the country's dictator for 30 years, has finally lost an election. Mugabe's tenure has left Zimbabwe with the world's highest rate of inflation and the shortest life span. Instead of conceding power, Mugabe launched a brutal

campaign of terror against his own citizens. With foreign correspondents banned, and he himself there illegally, Godwin was one of the few observers to bear witness to this period the locals call The Fear. He saw torture bases and the burning villages but was most awed as an observer of not only simple acts of kindness but also churchmen and diplomats putting their own lives on the line to try to stop the carnage. THE FEAR is a book about the astonishing courage and resilience of a people, armed with nothing but a desire to be free, who challenged a violent dictatorship. It is also the deeply personal and ultimately uplifting story of a man trying to make sense of the country he can't recognize as home.

We will explore the facets of whom He is as a Trinity. In all the wonders of the living Bible, none is more challenging to grasp than this one. There are countless books and messages on the Trinity, but what we are exploring here is the practical reason of why God is a trinity. If we ask why one God is expressed in His threeness, we ought also to ask why a man is designed with three key parts. We will learn that each and all of man's three parts are for functioning in his world and functioning in a way to practically know and love God, even as he learns to receive and walk in His love.

[Borneo Log: The Struggle for Sarawak's Forests, William W. Bevis](#) , 1995, 0295974168, 9780295974163. After a year as exchange professor at a Tokyo university, William Bevis spent part of the next year traveling in Sarawak, a Malaysian state located on the northern part of the island of Borneo. About the size of New York, it has a population of 1.7 million people living, outside of a few towns, in a world of jungle and brown rivers. There the rainforest is being cut rapidly, local corruption and greed siphon off most of the profit, native rights and land uses are being obliterated, and much of the fine timber is shipped to Japan to become plywood forms for concrete that are thrown away after two uses. This book is a travel narrative and also a serious environmental study of exploitation of third-world resources. During his stay in Sarawak, the author lived with both native activists and timber camp managers, seeking to understand the motives and actions of Japanese companies, Chinese entrepreneurs, and the native population most affected by the timber trade. Borneo Log is not simply a book about environmental politics in a far-away place. The power of the book lies in the author's extraordinary ability to bring home the related global disasters of the destruction of the world's rainforests and its indigenous peoples. This is a personal and passionate account of how ordinary men and women are fighting to defend a way of life that is rapidly disappearing along with their country's resources, and how the problems of their lives echo in our own.

Written as "true fiction" The 15% Solution's focuses on the threat of fascism, "American style," posed now by Christian fundamentalism operating within the confines of the Republican party. Its primary purpose is to show how a theocratic authoritarianism can be gradually introduced into any country, even the "world's greatest democracy," and behind a facade of legality, no less. In that sense it follows the tradition established by its major forebears: Jack London's The Iron Heel and Sinclair Lewis' It Can't Happen Here, as if those authors had written those books with 20/20 hindsight.

[Raised Right: How I Untangled My Faith from Politics, Alisa Harris](#) , 2011, 0307729656, 9780307729651. Meet the new breed of Christians shaping our culture. Alisa Harris grew up in a family that actively fought injustice and moral decay in America. She spent much of her childhood picketing abortion clinics and being home-schooled in the ways of conservative-Republican Christianity. As a teen she firmly believed that putting the right people in power would save the nation. But as she moved into adulthood, Alisa confronted unexpected complexities on issues that used to seem clear-cut. So, she set about evaluating the strident partisanship she had grown up with, considering other perspectives while staying true to the deep respect she held for her parents and for the Christian principles that had always motivated her. Raised Right is not only an intriguing chronicle of Alisa's personal journey; it also provides a fascinating glimpse into the worldview of a younger generation of faithfollowers of Christ who believe that the term Christian is not synonymous with a single political party or cultural issue. Whether you are moderate, conservative, or progressive, Raised Right will prompt you to consider more deeply what it means to affirm Christ-like justice, mercy, and righteousness in the current cultural landscape. And it will give you a deeper understanding of how the new generation of Christians approaches the

intersection of faith and politics.

This well-illustrated book examines nymphs as both religious and mythopoetic figures, tracing their development and significance in Greek culture from Homer through the Hellenistic period. Drawing upon a broad range of literary and archaeological evidence, Jennifer Larson discusses sexually powerful nymphs in ancient and modern Greek folklore, the use of dolls representing nymphs in the socialization of girls, the phenomenon of nympholepsy, the nymphs' relations with other deities in the Greek pantheon, and the nymphs' role in mythic narratives of city-founding and colonization. The book includes a survey of the evidence for myths and cults of the nymphs arranged by geographical region, and a special section of the worship of nymphs in caves throughout the Greek world.

[Half-Assed: A Weight-Loss Memoir, Jennette Fulda](#) , 2008, 1580052789, 9781580052788. After undergoing gall bladder surgery at age twenty-three, Jennette Fulda decided it was time to lose some weight. Actually, more like half her weight. At the time, Jennette weighed 372 pounds. Jennette was not born fat. But, by fifth grade, her response to a school questionnaire asking "what would you change about your appearance" was "I would be thinner." Sound familiar? "Half-Assed" is the captivating and incredibly honest story of Jennette's journey to get in shape, lose weight, and change her

life. From the beginning--dusting off her never-used treadmill and steering clear of the donut shop--to the end with her goal weight in sight, Jennette wows readers with her determined persistence to shed pounds and the ability to maintain her ever-present sense of self.

Darren Bryce learns this all too well in the fourth book of his controversial memoir series when he returns to FSU and discovers a world that is very different from the life he left behind. Little did Bryce know that the dramatic events that would unfold over the next month would scar his life forever. Stories include: Hell Week, date rape, vile pranks, vengeance, betrayal, and the lowliest of campus humor. This is the uncensored and unabashed truth about college life from a student who lived it to the extreme.

[One of the Gang: Nurturing the Souls of Children with Food Allergies, Gina Clowes](#) , 2008, 1434369978, 9781434369970.

Families of children with food allergies know that this invisible condition requires constant vigilance. The necessity of keeping these children safe cannot be overstated; however, their emotional well-being is equally important. Food is used in almost every type of celebration, and is often a focal point of these events. Even in day-to-day life, food is everywhere. Children who have food allergies may be excluded from many of these activities. Some seem to take it in stride, while others feel varying degrees of sadness, anger, or fear. This book was meant to shed light on the emotional side and to help children cope with these challenges. It also serves as a reminder that even though this condition must be managed on a daily basis, it need not stop them from enjoying a wonderful life and becoming everything they were meant to be. I hope this book will validate the feelings these children may have and encourage them to talk about them. It is also my sincere desire that some of the words and photographs will allow others a glimpse at the way that these children experience the world. Maybe next time, you will be one of the grown-ups who allow an allergic child to be one of the gang!

Blister'd be thy tongue, For such a wish! he was not born to shame: Upon his brow shame is ashamed to sit; 90 For't is a throne where honor may be crown'd Sole monarch of the universal earth. Oh, what a beast was I to chide at him! Nurse. Will you speak well of him that kill'd your cousin? Jul. Shall I speak ill of him that is my husband? Ah, poor my lord, what tongue shall smooth thy name, When I, thy three-hours' wife, have mangled it?--But wherefore, villain, didst thou kill my cousin? That villain cousin would have kill'd my husband. loo Back, foolish tears, back to your native spring; Your tributary drops belong to woe, Which you mistaking offer up to joy. My husband lives that Tybalt would have slain; And Tybalt's dead that would have slain my husband: All this is comfort; wherefore weep I then? Some word there was, worser than Tybalt's death, That murder'd me. I would forget it fain; But oh! it presses to my memory, Like damned guilty deeds to sinners' minds. 110 Tybalt is dead, and Romeo--banished; That--banished, that one word--banished. Hath slain ten thousand Tybalts. Tybalt's death Was woe enough, if it had ended there; Or, if sour woe delights in fellowship And needly will be rank'd with other griefs, Why follow'd not, when she said Tybalt's dead, Thy father, or thy mother, nay, or both, Which modern lamentation might have mov'd? But, with a rearward following Tybalt's death, 120 Romeo is banished, --to speak that word, Is father, mother, Tybalt, Romeo, Juliet, All slain, all dead. Romeo is banished!--There is no end, no limit, measure, bound, In that word's death; no words can that woe sound.--Where is my father and my m...

[Hard Questions, Real Answers, William Lane Craig](#) , 2003, 1433516845, 9781433516849. Why doesn't God answer my prayers? If God is so powerful, why does evil exist? And if He is so good, why do we suffer? Nonbelievers, and even Christians, are often troubled by questions about suffering, doubt, failure, and unanswered prayer. Yet careful, compassionate answers are hard to find, in part because evangelicals have not taken the life of the mind seriously enough. The intellectual currents of our day are just too strong for simplistic responses. In *Hard Questions, Real Answers*, William Lane Craig doesn't offer trite phrases or pat answers-he offers honest insights gained from a life of study and ministry. Readers in the midst of doubt and confusion will find real answers to these perplexing questions and learn to stand on the only sure foundation for hope-God Himself. This expanded new edition includes chapters on abortion and homosexuality to help readers know how to think about these volatile social issues.

contemporary poetry in Britain, Ireland, and America, *The Modern Poet* shows how many successive generations of poets have needed to collaborate and to battle with academia.

[The Catholic Revolution: New Wine, Old Wineskins, and the Second Vatican Council, Andrew M. Greeley](#) , 2004, 0520938771, 9780520938779. How, a mere generation after Vatican Council II initiated the biggest reform since the Reformation, can the Catholic Church be in such deep trouble? The question resonates through this new book by Andrew Greeley, the most recognized, respected, and influential commentator on American Catholic life. A timely and much-needed review of forty years of Church history, "The Catholic Revolution" offers a genuinely new interpretation of the complex and radical shift in American Catholic attitudes since the second Vatican Council (1962-1965). Drawing on a wealth of data collected over the last thirty years, Greeley points to a rift between the higher and lower orders in the Church that began in the wake of Vatican Council II-when bishops, euphoric in their (temporary) freedom from the obstructions of the Roman Curia, introduced modest changes that nonetheless proved too much for still-rigid structures of Catholicism: the "new wine" burst the "old wineskins." As the Church leadership tried to reimpose the old order, clergy and the laity, newly persuaded that "unchangeable" Catholicism could in fact change, began to make their own reforms, sweeping away the old "rules" that no longer made sense. The revolution that Greeley describes brought about changes that continue to reverberate-in a chasm between leadership and laity, and in a whole generation of Catholics who have become Catholic on their own terms. Coming at a time of crisis and doubt for the Catholic Church, this richly detailed, deeply thoughtful analysis brings light and clarity to the years of turmoil that have shaken the foundations, if not the faith, of American Catholics.

[The Penguin Book of Lesbian Short Stories, Margaret Reynolds](#) , 1994, 0140240187, 9780140240184. And more than that - sometimes women love women. Like Queen Victoria, the world has preferred to believe that sex between women is impossible, resulting in a long silence between the writings of Sappho and the flowering of talent produced by feminism and the sexual revolution. Lesbian writing has come a long way since Virginia Woolf's famous essay of 1928. Since then women have challenged traditional forms of expression and subject matter in an extraordinarily rich and varied discourse to give voice to the lesbian imagination. In this wide-ranging anthology, Margaret Reynolds has brought together the work of thirty-two women from Britain, continental Europe, and the Americas - including three specially commissioned pieces - that covers nearly a century of lesbian writing, from Sarah Orne Jewett (1897) to Jeanette Winterson (1993). The collection ranges from Frances Gapper's pastiche of a Romantic melodrama, through the wry humor of Merrill Mushroom's description of butch and femme courting rituals, to the wit of Alison Bechdel's cartoon strip. The anxiety of unresolved desire is present in many stories - Radclyffe Hall's Miss Ogilvy is unable truly to find herself in this world, Djuna and Lillian hold back from each other in Anais Nin's "Cities of the Interior, " and the energy and commitment that should go into a loving relationship are stifled by convention in Jane Rule's story of passion outside marriage. But here are brave spirits, too - Renee Vivien's Sarolta and her Prince(ss) live forever in a vision of ideal tenderness, Colette's heroines preserve the sanctity of their little white bed, and Jewelle Gomez's bulldagger society survives far from the haunts of men. There are coming-out stories, stories about cross-dressing, vampire tales, science fiction, parody, and romance. Each story is quite different from the others, yet each acknowledges a particular facet of lesbian history and makes it real.

The theme of the meeting, Ports, Hubs and Bridges: Key Links in Anthropological Theory and Practice, is a reference to the important interconnections found not only within the discipline among the various types of anthropologies, but also between the anthropological professional and those whom anthropologists teach, rely on for information, or otherwise focus on in their research. The papers in this volume elaborate upon bridges that can be or have been built in theory, pedagogy, and practice, and in a variety of cultural contexts. They are organized in three groups. Part I consists of papers that emphasize theory and conceptual issues; part II is for papers about teaching and practice; and, part III is for papers with an ethnography focus.

An irresistibly compelling from the internationally bestselling author Ten-year-old Floriana is captivated by the beauty of the magnificent Tuscan villa that overlooks the sea just outside her small village. She likes to spy from the crumbling wall into the gardens, and imagine that one day she'll escape her meagre existence and live there. One day, Dante, the son of the villa's powerful industrialist owner, invites her inside. From that moment on Floriana knows that her destiny is there, with him. But as they grow up they cross an unseen line, jeopardising the very thing they hold most dear. Decades later and hundreds of miles away, a beautiful old country house hotel on England's Devon coast has fallen on hard times. Its owner, Marina,

advertises for an artist-in-residence to stay the summer and teach the guests how to paint. Rafael Santoro is charismatic and wise, and soon begins to pacify the discord in her family. However, Rafa is not who he seems. He has his own agenda. Whether to destroy, to seduce, or to heal, it is certain to affect them all. Spanning four decades and sweeping from the Italian countryside to the English coast, this new story by Santa Montefiore is a moving and mysterious tale of love, forgiveness and the past revealed. [One True God: Historical Consequences of Monotheism, Rodney Stark](#) , 2003, 0691115001, 9780691115009. Western history would be unrecognizable had it not been for people who believed in One True God. There would have been wars, but no religious wars. There would have been moral codes, but no Commandments. Had the Jews been polytheists, they would today be only another barely remembered people, less important, but just as extinct as the Babylonians. Had Christians presented Jesus to the Greco-Roman world as "another" God, their faith would long since have gone the way of Mithraism. And surely Islam would never have made it out of the desert had Muhammad not removed Allah from the context of Arab paganism and proclaimed him as the only God. The three great monotheisms changed everything. With his customary clarity and vigor, Rodney Stark explains how and why monotheism has such immense power both to unite and to divide. Why and how did Jews, Christians, and Muslims missionize, and when and why did their efforts falter? Why did both Christianity and Islam suddenly become less tolerant of Jews late in the eleventh century, prompting outbursts of mass murder? Why were the Jewish massacres by Christians concentrated in the cities along the Rhine River, and why did the pogroms by Muslims take place mainly in Granada? How could the Jews persist so long as a minority faith, able to withstand intense pressures to convert? Why did they sometimes assimilate? In the final chapter, Stark also examines the American experience to show that it is possible for committed monotheists to sustain norms of civility toward one another. A sweeping social history of religion, One True God shows how the great monotheisms shaped the past and created the modern world.

[Speaking of Jane Roberts: Remembering the Author of the Seth Material, Susan M. Watkins](#) , 2000, 0966132777, 9780966132779. "Don't let them make a god out of me, " Jane Roberts told her husband before she died. As one of the most important psychics of the twentieth century and the author of the Seth material-which had already sold millions of copies-her fear was not unreasonable. In this revealing memoir, writer Susan M. Watkins sees to it that Roberts, her friend and mentor, is presented not as a saint or a god, but as a complex human being. Through the many varied people who knew her-from her first husband to the young "devotee" who visited her nearly everyday before her death; from those who loved her most and those who didn't-Watkins reveals a person whose beliefs allowed her to create the highly original Seth material and also caused her to suffer from debilitating health issues throughout her adult life. For any one

interested in "channeled" material, human psychology, or the power of our beliefs, Speaking of Jane Roberts is a powerful, multi-dimensional memoir. Susan Watkins's is a former newspaper journalist. She writes in many genres and her work has been published in many national and local magazines and newspapers. Speaking of Jane Roberts is her third published book.

The reader peeks around pages to find Dick and Pamela perplexed, sweaty, misplaced, dancing and buried in their belongings and passion. There is not one whit of violence or naughty language in Tender Waters, but there is passion. More to the point, there are the questions and concerns of two traditional people of faith as they deal with adolescent passion while living in their beyond-adolescent bodies.

[Le calvaire, Octave Mirbeau](#) , 1995, 0946626995, 9780946626991. Le Calvaire is a thinly veiled autobiographical novel, which recounts the tortured and traumatic coming of age of the narrator Jean Mintie. It paints a nightmarish picture of late nineteenth century French society: from the stultifying boredom of bourgeois provincialism, to the horrors of the Franco-Prussian war, the grotesque avarice of shameless women and the moral bankruptcy of their compliant victims. Mintie's progress through life is a descent into Hell, a plumbing of the lower depths, the martyrdom of a godless man in a godless age. The publication of Le Calvaire in 1886 marked a brilliant beginning for the Angry Young Man of the Age, who went on to flay the Establishment in *Torture Garden* and *The Diary of a Chambermaid*.

Many software engineering principles discussed here have been rediscovered in eXtreme Programming, including (re)factoring, modularity, bottom-up and incremental design. Here you'll find all of those and more, such as the value of analysis and design, described in Leo Brodie's down-to-earth, humorous style, with illustrations, code examples, practical real life applications, illustrative cartoons, and interviews with Forth's inventor, Charles H. Moore as well as other Forth thinkers.

[Dialogues of the Word : The Bible as Literature According to Bakhtin: The Bible as Literature According to Bakhtin, Department of English Emory University Walter L. Reed Professor and Chairman](#) , 1993, 0195359887, 9780195359886. Drawing on the theory of language developed by the Soviet critic Mikhail Bakhtin, this book argues that the historically

diverse writings of the Bible have been organized according to a concept of dialogue. The overriding concern with an ongoing communication between God and his people has been formally embodied, Reed shows, in the continuous conversation between one part of the Bible and another. Reed looks beyond the close readings of recent accounts of the Bible as literature to larger paradigms of communication in the Hebrew Bible and the Christian New Testament. He considers the Bible in its different canonical states, distinguishing the genres of law, prophecy, and wisdom in the Hebrew Bible and describing how these earlier forms of divine and human communication are appropriated and answered by the New Testament genre of gospel. The dialogic character of the Bible is also discovered within individual books: patriarchal answers to primeval failures in Genesis, cross-talk between justice and providence in Job, and orchestration of judgment and worship in Revelation. Throughout this wide-ranging study, Reed demonstrates the surprising relevance of Bakhtin's ideas of literature and language to the biblical writings as they assume formal coherence within the canon.

[If I Should Die Before I Wake, Han Nolan](#) , 2003, 0152046798, 9780152046798. Hilary hates Jews. As part of a neo-Nazi gang in her town, she's finally found a sense of belonging. But when she's critically injured in an accident, everything changes. Somehow, in her mind, she has become Chana, a Jewish girl fighting for her own life in the ghettos and concentration camps of World War II. Han Nolan offers powerful insight into one young woman's survival through the Holocaust and another's journey out of hatred and self-loathing. Reader's guide and an interview with the author included.

[Exit Strategy: Maximizing the Value of Your Business, Thomas W. Lyons](#) , 2004, 0975302507, 9780975302507. At some point in life, every business owner will need to transfer ownership of his or her business. For most business owners, this is an extremely emotional and sometimes overwhelming event. Many business owners have built the company or owned it for years, even decades; they work night and day, 24/7. They think about the business constantly, cultivating customer relationships; solving problems even while out to dinner with family and in the middle of the night while family sleeps. They live the business and it usually defines them more than they realize. It is no surprise then, that selling the business is an emotional process. Its also a complex process. There are financials to audit, profitability to demonstrate, operations to tighten, confidentiality to maintain, titles to transfer, a price to negotiate and much more. In addition to all of that, owners must continue to operate the business during the sale process. The broad complexities are made even more apparent in this book. Bracketed within the critical function of the business broker who should serve as the sellers guide and confidant, and filled with personal and professional anecdotes and callout quotes, Exit Strategy walks the reader through the process of selling a business utilizing comprehensive professional representation. By professional representation, we mean guidance by experts in the mergers and acquisitions (M&A) industry, including a business broker, financial planner, estate planning attorney, an insightful and knowledgeable Certified Public Accountant (CPA) and

M&A attorney. Because Exit Strategy advocates strongly for professional representation, it is not a "how to" book. Rather, it demystifies a complex and often esoteric process, revealing what every business owner needs to know about obtaining the broad and comprehensive representation enjoyed by large corporations.

[Robert B. Parker's Wonderland, , Ace Atkins](#) , 2013, 0399161570, 9780399161575. Henry Cimoli and Spenser have been friends for years, yet the old boxing trainer has never asked the private eye for a favor. Until now. A heavy-handed developer is trying to buy up Henry's condo on Revere Beach and sends thugs to move the process along. Soon Spenser and his apprentice, Zebulon Sixkill, find a trail leading to a mysterious and beautiful woman, a megalomaniacal Las Vegas kingpin, and plans to turn to a chunk of land north of Boston into a sprawling casino. Bitter rivals emerge, alliances turn, and the uglier pieces of the Boston political machine look to put an end to Spenser's investigation. Aspiration, greed, and twisted dreams all focus on the old Wonderland dog track where the famous amusement park once fronted the ocean. For Spenser and Z, this simple favor to Henry will become the fight of their lives.
