Nucci, and Kenneth R. Lee help you diagnose neoplastic and non-neoplastic lesions of the female reproductive tract with their comprehensive update of Diagnostic Gynecologic and Obstetric Pathology. This 2nd Edition provides all of the latest guidance needed to accurately evaluate pathologic features and morphologic patterns. With 650+ new color images, an appendix with algorithms for the use of biomarkers, key points, diagnostic pearls, and more... this title is a must-have for today's pathologist. Find distinct diagnostic/differential diagnostic criteria for any potential obstetric/gynecologic specimen encountered in practice. Integrate exfoliative cytology, immunohistochemistry, and molecular/genetic testing together with findings gleaned from the traditional open surgical biopsy. Examine the cytologic features of specimens taken from the uterine cervix and corpus, following the Bethesda classification of these lesions. View more than 2,250 full-color photographs and photomicrographs, ideal for side-by-side comparison to the specimens seen in the laboratory. Make better decisions regarding complex pregnancy situations with a new chapter devoted to the "Placental Correlates of Unanticipated Fetal Death." Experience easier reference with key points and diagnostic pearls at the end of each chapter, and a new appendix on algorithms for the use of biomarkers. Update your cancer assessment skills with the restructured section on pelvic epithelial malignancies, including a new chapter on "Assessing Pelvic Cancer Risk and Intercepting Early Malignancy." Gain the professional insights of new co-editor Dr. Marissa Nucci, an associate professor in pathology at the Harvard Medical School.

[Ecotoxicology: The Study of Pollutants in Ecosystems, F. Moriarty](#) , 1999, 0125067631, 9780125067638. Ecotoxicology, Third Edition discusses the ecological effects of pollutants: the ways in which ecosystems can be affected, and current attempts to predict and monitor such effects. The emphasis is on ecosystems; therefore toxicological approaches are critically assessed. Following a brief introduction to the principal characteristics of both pollutants and ecosystems, the various ecosystem components are considered in more detail. Populations, communities and gene pools are examined with an emphasis on the ways in which pollutants affect them specifically. The indirect effects of pollution are considered separately in a new chapter with particular attention paid to the mechanisms and biological effects of global warming. A discussion of the methods used to predict and to monitor the effects of pollutants, some illustrative examples of pollution problems and a final summary discussion, complete the book. Key Features\* A classic proven by its 2nd edition.\* Still the

only book to properly integrate ecological principles with chemistry/biochemistry\* Focuses on the interaction between ecology and toxicology\* Designed for use by toxicologists with no ecology training, and for ecologists with no toxicology training\* There is a new chapter on pollutants in habitats and global warming

[The Art of War, Sun Tzu](#) , 2010, 8184950888, 9788184950885. DISCOVER THE SPIRITUALLY INCISIVE STRATEGIES FOR PEACEFULLY RESOLVING CONFLICT IN THIS MASTERPIECE OF MILITARY STRATEGY. Written 2,500 years ago by Chinese general Sun Tzu, The Art of War is a poetic and potent treatise on military strategy still in use in war colleges around the world. Yet its principles transcend warfare and have practical applications to all the conflicts and crises we face in our lives in our workplaces, our families, even within ourselves. Thomas Huynh guides you through Sun Tzus masterwork, highlighting principles that encourage a perceptive and spiritual approach to conflict, enabling you to: Prevent conflicts before they arise Peacefully and quickly resolve conflicts when they do arise Act with courage, intelligence and benevolence in adversarial situations Convert potential enemies into friends Control your emotions before they control you Now you can experience the effectiveness of Sun Tzus teachings even if you have no previous knowledge of The Art of War. Insightful yet unobtrusive facing-page commentary explains the subtleties of the text, allowing you to unlock the power of its teachings and help prevent and resolve the conflicts in your own life.

[The Doctor's Daughters, Nell Sutton Jordan](#) , 2007, 0971047375, 9780971047372. The middle of five daughters, Nell recalls growing up in Arkansas and Oklahoma at the beginning of the 20th century, where her father was a country doctor who made house calls from the back of a horse and--more often than not--was paid in chickens rather than cash. The book provides an eye-witness account of the life of a rural doctor between 1909-1934. Most of the book is set in and around Elizabeth, Arkansas (1909-1917). Dr. Sutton next went to Keokuk Falls, Oklahoma in 1917. He then moved his family to Milfay, Oklahoma, where he set up his final practice. Anyone researching the Oklahoma and Arkansas regions during the early part of the 20th century should find a treasure trove of small details ranging from daily life to the cost of pulling a tooth to delivering a baby.

This book reports the majority of lectures given during the NATO Advanced Study Institute ASI-982996, which was held at the European Scientific Institute of Archamps (ESI, Archamps France) from November 15 to November 27, 2007. The ASI course was structured in two parts: the first was dedicated to what is often called teletherapy, i. e. radiotherapy with external beams, while the second focused on internal radiotherapy, also called brachytherapy or curietherapy in honour of Madame Curie who initiated the technique about a century ago. This ASI took place after the European School of Medical Physics, which devoted a 3 week period to medical imaging, a subject complementary to the topics of this book. Courses devoted to nuclear medicine and digital imaging techniques are collected in two volumes of the NATO Science Series entitled Physics for Medical Imaging Applications (ISBN 978-1-4020-5650-5) and Molecular imaging: computer reconstruction and practice (ISBN 978-1-4020- 8751-6). Every year in autumn ESI organises the European School of Medical Physics, which covers a large spectrum of topics ranging from Medical Imaging to Radiotherapy, over a period of 5 weeks. Thanks to the Cooperative Science and Technology sub-programme of the NATO Science Division, weeks four and five were replaced this year by the ASI course dedicated to Physics of Modern Radiotherapy & Brachytherapy. This allowed the participation of experts and students from 20 different countries, with diverse cultural background and professional experience.

libraries and cultural rights, a topic that has received relatively little attention in the past, but which librarians and others concerned with human rights are beginning to recognize and talk about. Librarians have long been concerned with individual rights and have worked tirelessly - indeed making it a basic tenet of the profession - to protect and preserve those rights. Little has been written about the role that libraries can play in protecting and promoting group rights, specifically cultural rights. This book examines this shortfall by exploring the relationship between libraries, cultural rights, and community life and identity.

[Zen Questions: Zazen, Dogen, and the Spirit of Creative Inquiry, Taigen Dan Leighton](#) , 2011, 0861716450, 9780861716456. Whether speaking of student or master, Zen hinges on the question. Zen practice does not necessarily focus on the answers, but on finding a space in which we may sustain uncertainty and remain present and upright in the middle of investigations. Zen Questions begins by exploring "The World of Zazen,"--the foundational practice of the Zen school--presenting it as an attitude of sustained inquiry that offers us an entryway into true repose and joy. From there, Leighton draws deeply on his own experience as a Zen scholar and teacher to invite us into the creativity of Zen awareness and practice. He explores the poetic mind of Dogen with the poetry of Rumi, Mary Oliver, Gary Snyder, and even "the American Dharma Bard" Bob Dylan. What's more, Leighton uncovers surprising resonances between the writings of America's Founding Fathers--including Thomas Jefferson and Ben Franklin--and the liberating ideals at the heart of Zen.

[What Went Wrong?: Western Impact and Middle Eastern Response, Bernard Lewis](#) , 2001, 0199826633, 9780199826636. For many centuries, the world of Islam was in the forefront of human achievement--the foremost military and economic power in the world, the leader in the arts and sciences of civilization. Christian Europe, a remote land beyond its northwestern frontier, was seen as an outer darkness of barbarism and unbelief from which there was nothing to learn or to fear. And then everything changed, as the previously despised West won victory after victory, first in the battlefield and the marketplace, then in almost every aspect of public and even private life. In this intriguing

volume, Bernard Lewis examines the anguished reaction of the Islamic world as it tried to understand why things had changed--how they had been overtaken, overshadowed, and to an increasing extent dominated by the West. Lewis provides a fascinating portrait of a culture in turmoil. He shows how the Middle East turned its attention to understanding European weaponry and military tactics, commerce and industry, government and diplomacy, education and culture. Lewis highlights the striking differences between the Western and Middle Eastern cultures from the 18th to the 20th centuries through thought-provoking comparisons of such things as Christianity and Islam, music and the arts, the position of women, secularism and the civil society, the clock and the calendar. Hailed in The New York Times Book Review as "the doyen of Middle Eastern studies," Bernard Lewis is one of the West's foremost authorities on Islamic history and culture. In this striking volume, he offers an incisive look at the historical relationship between the Middle East and Europe.

[Utilitarianism and Other Essays, Jeremy Bentham, John Stuart Mill](#) , 2004, 0141908211, 9780141908212. One of the most important nineteenth-century schools of thought, Utilitarianism propounds the view that the value or rightness of an action rests in how well it promotes the welfare of those affected by it, aiming for 'the greatest happiness of the greatest number'. Jeremy Bentham (1748-1832) was the movement's founder, as much a social reformer as a philosopher. His greatest interpreter, John Stuart Mill (1806-73), set out to humanize Bentham's pragmatic Utilitarianism by balancing the claims of reason and the imagination, individuality and social well-being in essays such as 'Bentham', 'Coleridge' and, above all, Utilitarianism. The works by Bentham and Mill collected in this volume show the creation and development of a system of ethics that has had an enduring influence on moral philosophy and legislative policy.

[Israel Potter: his fifty years of exile, Herman Melville, Robert Levine](#) , 2008, 014310523X, 9780143105237. The authoritative edition of Melville's only historical novel Based on the life of an actual soldier who claimed to have fought at Bunker Hill, Israel Potter is unique among Herman Melville's books: a novel in the guise of a biography. In telling the story of Israel Potter's fall from Revolutionary War hero to peddler on the streets of London, where he obtained a livelihood by crying Old Chairs to Mend, Melville alternated between invented scenes and historical episodes, granting cameos to such famous men of the era as Benjamin Franklin (Potter may have been his secret courier) and John Paul Jones, and providing a portrait of the American Revolution as the rollicking adventure and violent series of events that it really was. This edition of Israel Potter, which reproduces the definitive text, includes selections from Potter's autobiography, Life and Remarkable Adventures of Israel R. Potter, the basis for Melville's novel.

He eventually was stationed in Guam which was the home base for rotation to Korea and the Far East, an area he would visit often as a business man. When Orv Manke was transferred to his company's International Division, his new position involved travel to various parts of the world. In the mid 1960s, he was transferred to Bangkok, Thailand, where he was, technically, responsible for all of the Far East and Southeast Asia. With the war ravaging in Vietnam, life's end was always one step away. In 1967, he met a lovely Thai woman in Bangkok, whom he later married. Follow his footsteps as he takes you on a journey you will not forget. Orv Manke is retired and lives in Las Vegas with his wife Luksana. He enjoys playing golf with his friends.

[Species Management: Challenges and Solutions for the 21st Century, John M. Baxter, Colin A. Galbraith](#) , 2010, 0114973482, 9780114973483. This is the latest book in the Natural Heritage of Scotland series from Scottish Natural Heritage (SNH). The book contains the papers read at SNH's 2008 conference on the subject and provides the reader with valuable, high quality, up-to-date information and research on the subject, interspersed with stunning full colour images. The long-term aim for all species management is for thriving and self-sustaining, self-regulating populations of native species throughout their natural ranges. The challenge is to achieve this in the face of increasing pressures from developments, exploitation, habitat loss and climate change. This book explores the challenges and solutions to species management for species conservation, the control of invasive non-native species, resolving conflicts of interest between native species, and the sustainable use of species, with contributions from a range of international experts including scientists, conservationists and managers.

Khor explains the economic globalization process, showing how it is failing to either increase economic growth or decrease poverty. A critique of Western governments for their domination of the international policy process ensues, where Khor exposes the flaws in the "one size fits all" policy prescriptions of the World Bank, IMF, and WTO. Arguing that Third World countries need room to maneuver, this book proposes innovative and realistic policies.

With emphasis on practical aspects of engineering, this bestseller has gained worldwide recognition through progressive editions as the essential reliability textbook. This fifth edition retains the unique balanced mixture of reliability theory and applications, thoroughly updated with the latest industry best practices. Practical Reliability Engineering fulfils the requirements of the Certified Reliability Engineer curriculum of the American Society for Quality (ASQ). Each chapter is supported by practice questions, and a solutions manual is available to course tutors via the companion website. Enhanced coverage of mathematics of reliability, physics of failure, graphical and software methods of failure data analysis, reliability prediction and modelling, design for reliability and safety as well as management and economics of reliability programmes ensures continued relevance to all quality assurance and reliability courses. Notable additions include: New chapters on applications of Monte Carlo simulation methods and reliability demonstration methods. Software applications of statistical methods, including probability plotting and a wider use of common software tools. More detailed descriptions of reliability prediction methods. Comprehensive treatment of accelerated test data analysis and warranty data analysis. Revised and expanded end-of-chapter tutorial sections to advance students practical knowledge. The fifth edition will appeal to a wide range of readers from college students to seasoned engineering professionals involved in the design, development, manufacture and maintenance of reliable engineering products and systems. Writing in Bereavement is a practical creative handbook that will assist counsellors, volunteers and others in their work with bereaved adults. Writing is a powerful outlet for the emotions that accompany grief and it is therefore a valuable therapeutic tool to help those who are bereaved communicate their experiences and adjust to life after their loss. Jane Moss provides imaginative creative writing exercises for groups and individuals, using a variety of genres and literary forms and techniques. She offers advice on how to plan and run successful workshops with the bereaved, and how to evaluate their effectiveness. Using the techniques in this book, counsellors can help grieving individuals find a voice to cope with profound changes in their life, complete unfinished conversations, write for remembrance, use creativity as a respite from sadness, and finally begin to move forward from grief and imagine the future.

[Shadow Gospel: Rowan Williams and the Anglican Communion Crisis, Charles Raven](#) , 2010, 0946307784, 9780946307784. "There have been other discussions of the Archbishop of Canterbury's theology, but this is the first serious attempt to link it with his ecclesiastical policy. The parallel seems to be drawn very tellingly." The Revd Dr Roger Beckwith, formerly warden of Latimer House, Oxford. "Charles Raven has provided convincing evidence about the real problem facing us in the Church of England and how this has affected the wider Anglican Communion. He argues that we are experiencing not so much an ecclesial deficit as a confessional one. His book is an excellent introduction to the deeper issues that sooner or later will affect us all." Rt. Rev John Ellison, Retired Bishop of Paraguay. "Archbishop Rowan Williams is the most significant theologian influencing the Anglican Communion at the moment. Therefore it is important for orthodox Anglicans to understand his thinking. Charles Raven has performed a great service by going through Archbishop Williams' work carefully and helping us to see the foundations of his thought and the direction in which he is going." Canon Dr Vinay Samuel, Church of South India and Convenor of GAFCON Theological Resource Group. Charles Raven is Rector of Christ Church Wyre Forest, an Anglican church plant near Kidderminster in Worcestershire, and is a widely read commentator on the Anglican Communion as Director of SPREAD (The Society for the Promotion of Reformed Evangelical Anglican Doctrine). He also serves as a member of the GAFCON Theological Resource Group. Educated at Oxford and Durham Universities, he was ordained into the Church of England in 1988 after working in the banking industry. The bodies God gives are instruments for experiencing a fulfilling life on earth, for doing good works, for spiritual development. To do the work individuals are meant to do, they need to keep in shape. They must maintain a sound mind, body, and soul. Yet in the modern world, it is all too easy to let one, two, or all three of these slip. LOOK GREAT, FEEL GREAT presents Joyce's twelve-key plan to address the epidemic of "self esteem drought" that appears to be a factor in perpetuating habits that create poor health. Additionally, Joyce will provide helpful resources, like the "Ounce of Prevention Checklist," for self-maintenance.

[The Insulin-like growth factors: structure and biological functions, Paul N. Schofield](#) , 1992, 0198542704, 9780198542704. The past decade has seen an explosion in our understanding of the factors regulating cell proliferation and differentiation. One of the most exciting advances has been the recognition of the pivotal role of the peptide growth factors in these processes. The insulin-like growth factors, discovered in 1958 by Salmon and Daughaday, are now among the best characterized growth factors. This comprehensive work describes the recent advances in knowledge of their receptors and binding proteins together with their purification and cloning. This provides exciting insights into the role of these factors in the physiology of normal growth, embryonic development and areas of pathology such as wound healing and cancer. In this book an international group of contributors reviews the most up-to-date information on all aspects of the insulin-like growth factors, and critically discusses models for IGF action in their own systems. The book is a valuable source of information and ideas for researchers, and an accessible introduction to the subject for students and clinicians.

[Did Jesus Exist?: The Historical Argument for Jesus of Nazareth, Bart D. Ehrman](#) , 2012, 0062089943, 9780062089946.

For years Bart Ehrman has been routinely bombarded with one question: Did Jesus Exist? As a leading Bible expert, fans and critics alike have sent letters, emails, posted blogs, and questioned Ehrman during interviews wanting his opinion about this nagging question that has become a conspiracy theorist cottage industry the world over. The idea that the character of Jesus was an invention of the early church and later a tool of control employed by the Roman Catholic Church is a widely held belief and Ehrman has decided its time to put the issue to rest. Yes, the historical Jesus of Nazareth did exist. Known as a master explainer with deep knowledge of the field, Ehrman methodically demolishes both the scholarly and popular mythicist arguments against the existence of Jesus. Marshaling evidence from within the Bible and the wider historical record of the ancient world, Ehrman tackles the key issues that surround the popular mythologies associated with Jesus and the early Christian movement. Throughout *Did Jesus Exist?* Ehrman establishes the criterion for any genuine historical investigation and provides a robust defense of the methods required to discover the Jesus of history. Those committed to the non-existence theory will need to read this formidable scholar's counter argument while the more traditionally minded will enthusiastically support Ehrman's definitive answer to the question. Perfect for the vigorous online debating community, this eBook original will be a must read for anyone interested in Jesus, the Bible, and the birth of Christianity.

[The Braided Cord: Tough Times in and Out, Liz Kulp](#) , 2010, 0984200711, 9780984200719. I was born an addict and

ever since I was tiny I have overdone, overlooked or overwhelmed myself. I was born with fetal alcohol spectrum disorders, otherwise known as FASD. That means my mom drank while I was trying to grow in her stomach and because of her drinking some of my parts got mixed up and didn't grow too well. My differences are hidden and that's a real pain, because it is easy to judge a person by what you see. The most difficult parts of my life are caused from my brain which was probably the most affected. I have trouble learning new things and I live in a world that is louder, softer, harder, scratchier, noisier, shakier, slippery and more chaotic than most of the people reading this. I want you to imagine what it is like to feel the seams of your socks, the label on your clothes, the flicker of fluorescent lights, the mumblings and rumblings of every noise around you, and then try to learn new things. Overwhelming. Yes, that is what it is often for me. My mom's drinking ripped away who I was to be and helped create who I am today and what I am able to be. If she had known how it would change my life I bet she would have made a different choice. But she didn't, and we can't change how things are. I am as I am. I can't even talk to her about it. She's dead. I was a foster baby and then adopted. ... I had to fail first in order to succeed. And I failed over, and over, and over again. ... I am just one of hundreds of thousands of people whose lives are affected each year by alcohol consumption before breathing your first breath of air. For those of you who were not pickled before birth, who believe you are wiser than I am, I ask you to take my thoughts and use your brains to make a difference.

[The 8th Confession, James Patterson](#) , 2012, 009957618X, 9780099576181. Behind the closed doors of San Francisco's grandest mansions, beautiful people party the nights away in a heady mix of money, drugs, drink and sex. But the rich and famous aren't the only ones with the keys to these most exclusive of addresses, someone else is intent on crashing the party. A rock star, a fashion designer, a software tycoon and a millionaire heiress. Each is glamorous, stunningly attractive and incredibly rich, but their similarities don't end there, they have something else in common too. They are all dead. Just as the rich and famous are the talk of the town when they're alive, interest in them certainly doesn't die when

they do, and Detective Lindsay Boxer is quickly assigned to the case. In stark contrast, few people seem as interested when a local hero, Bagman Jesus, is brutally murdered. Reporter Cindy Thomas soon becomes interested in his story: his work with the homeless of San Francisco was admirable. He was loved by so many - who would want to kill him? Could the down-and-out Samaritan have been hiding a dark secret? It isn't just Cindy who has questions that need answering, Lindsay fiercely depends on Claire's help to crack her case. Both seek guidance from their friends, but in doing so, they are forced to confront feelings they'd buried away. Things aren't so simple for Yuki either, as she falls quite literally head over heels in love; but the man of her dreams isn't quite who he seems. The Women's Murder Club need each other more than ever but with tensions running high will the friends be strong enough to stick together or will the strain tear them apart?

[Strategic Information Management, Robert D. Galliers, Dorothy E Leidner](#) , 2013, 1136363149, 9781136363146.

'Strategic Information Management' has been completely up-dated to reflect the rapid changes in IT and the business environment since the publication of the second edition. Half of the readings in the book have been replaced to address current issues and the latest thinking in Information Management. It goes without saying that Information technology has had a major impact on individuals, organizations and society over the past 50 years or so. There are few organizations that can afford to ignore IT and few individuals who would prefer to be without it. As managerial tasks become more complex, so the nature of the required information systems (IS) changes - from structured, routine support to ad hoc, unstructured, complex enquiries at the highest levels of management. As with the first and second editions, this third edition of 'Strategic Information Management: Challenges and strategies in managing information systems' aims to present the many complex and inter-related issues associated with the management of information systems. The book provides a rich source of material reflecting recent thinking on the key issues facing executives in information systems management. It draws from a wide range of contemporary articles written by leading experts from North America and Europe. 'Strategic Information Management' is designed as a course text for MBA, Master's level students and senior undergraduate students taking courses in information management. It provides a wealth of information and references for researchers in addition.

What are the hopes and fears of someone living with this disease? How does he want to be treated? How does he feel as the disease alters his brain, his relationships, and ultimately himself? Richard Taylor provides illuminating responses to these and many other questions in this collection of provocative essays. Diagnosed with Alzheimer's disease at age 61, the former psychologist courageously shares an account of his slow transformation and deterioration and the growing division between his world and the world of others. With poignant clarity, candor, and even occasional humor, more than 80 brief essays address difficult issues faced by those with Alzheimer's disease, including the loss of independence and personhood unwanted personality shifts communication difficulties changes in relationships with loved ones and friends the declining ability to perform familiar tasks This rare, insightful exploration into the world of individuals with Alzheimer's disease is a captivating read for anyone affected personally or professionally by the devastating disease. Individuals with early-stage Alzheimer's disease will take comfort in the voice of a fellow traveler experiencing similar challenges, frustrations, and triumphs. Family and professional caregivers will be enlightened by Taylor's revealing words, gaining a better understanding of an unfathomable world and how best to care for someone living in it.

This information about the techniques of advanced yoga is open to all, but it is of special interest to persons who meditated for years either in this or in a past life, and who now want to get to the culmination of yogic mysticism. If there ever was a post graduate study and application of yoga, then Patanjali's Sutras are it. They map the path, show the way and reveal the elevated stages which are hard to reach even for those who mastered astral projection and third eye perception. Chapter 1 gives the description and layout of samadhi transcendence accomplishment. Chapter 2 explains practice accomplishment. Chapter 3 shows the glory which may be attained by a persistent yogi. Chapter 4, the last, tells the yogi how to make the segregation accomplishment where the core-self is disconnected from its perception equipments and realizes itself as itself. In the last chapter, there is an explanation of how to safely unify again with the perception equipments after the core-self is isolated from these. At the time of publication, there is no other media that goes into so much detail about advanced yoga practice.

[What We Bought: The New World: Scenes from the Denver Metropolitan Area, 1970-1974, Robert Adams](#) , 2009, .

denver and What We Bought, together with The New West, form a loose trilogy of Robert Adams work exploring the rapidly developing landscape of the Denver metropolitan area from 1968 through 1974. In the former two books, Adams created a comprehensive document that was resolute in its avoidance of romantic notions of the American West and dispassionately honest about mans despoliation of the land. Both books demonstrate the artist at the height of his powers as a documentary photographer and a poetic sequencer of images. The photographs featured in denver and What We Bought show tract housing with mountain ranges in the distance, trailer lots devoid of people, suburban streets through generic windows, shopping mall interiors, and parking lots: subjects distinctly unspectacular, familiar, and banal. Adams compositions are straightforward and democratic, and it is this precise turn from sentimentality that has made Adams one of the most influential figures in the history of American photography. These exquisite new editions, printed in

rich tritones, celebrate this landmark work. denver also includes new and previously unpublished photographs from the project, chosen and sequenced by Adams himself.

[Homer's Odyssey \(BC Classic Library Edition\), Homer](#) , 2011, 1926606493, 9781926606491. Having spent ten years fighting in the Trojan War, Odysseus embarks on his journey back to Ithica. To get there he must deceive a giant Cyclops, face Poseidon's wrath, escape cannibalism, defeat the witch-goddess Circe, skirt the land of the Sirens, sail between a six-headed monster and a raging whirlpool, and escape captivity on the island of Calypso. But perhaps his biggest threat is his prolonged absence from home, as 108 suitors are vying for his wife's hand in marriage. Composed near the end of the eighth century BC, The Odyssey was intended to be sung by an epic poet. One of the most impressive elements of the text is that events depend equally on the choices made by women and serfs as on the actions of fighting men. The story has had a profound influence on cultures around the world, so much so, that the word odyssey has come to refer to an epic voyage in many languages. In this edition of Samuel Butler's translation, the names of the gods and characters have been restored from Latin to the original Greek.

[Still in Print: The Southern Novel Today, Jan Nordby Gretlund](#) , 2010, 1570039437, 9781570039430. In Still in Print, eighteen southern novels published since 1997 fall under the careful scrutiny of an international cast of accomplished literary critics to identify the very best of recent writings in the genre. These essays highlight the praiseworthy efforts of a pantheon of novelists celebrating and challenging regionality, unearthing manifestations of the past in the present, and looking to the future with wit and healthy skepticism. Organized around shared themes of history, place, humor, and malaise, the novels discussed here interrogate southern culture and explore the region's promise for the future. Four novels reconsider the Civil War and its aftermath as Charles Frazier, Kaye Gibbons, Josephine Humphreys, and Pam Durban revisit the past and add fresh insights to contemporary discussions of race and gender through their excursions into history. The novels by Steve Yarbrough, Larry Brown, Chris Offutt, Barry Hannah, and James Lee Burke demonstrate a keen sense of place, rooted in a South marked by fundamentalism, poverty, violence, and rampant prejudice but still capable of promise for some unseen future. The comic fiction of George Singleton, Clyde Edgerton, James Wilcox, Donald Harington, and Lewis Nordan shows how southern humor still encompasses customs and speech reflected in concrete places. Ron Rash, Richard Ford, and Cormac McCarthy probe the depths of human existence, often with disturbing

results, as they write about protagonists cut off from their own humanity and desperate to reconnect with the human race. Diverse in content but unified in genre, these particular novels have been nominated by the contributors to Still in Print for long-term survival as among the best modern representations of the southern novel.

[The Statistical Analysis of Experimental Data, John Mandel](#) , 1984, 0486646661, 9780486646664. The increasing importance in laboratory situations of minutely precise measurements presents the chemist and physicist with numerous problems in data analysis. National Bureau of Standards statistics consultant John Mandel here draws a clear and fascinating blueprint for a systematic science of statistical analysis -- geared to the particular needs of the physical

scientist, with approach and examples aimed specifically at the statistical problems he is likely to confront. The first third of "The Statistical Analysis of Experimental Data" comprises a thorough grounding in the fundamental mathematical definitions, concepts, and facts underlying modern statistical theory -- math knowledge beyond basic algebra, calculus, and analytic geometry is not required. Remaining chapters deal with statistics as an interpretative tool that can enable the laboratory researcher to determine his most effective methodology. You'll find lucid, concise coverage of over 130 topics, including elements of measurement; nature of statistical analysis; design/analysis of experiments; statistics as diagnostic tool; precision and accuracy; testing statistical models; between-within classifications; two-way classifications; sampling (principles, objectives, methods); fitting of non-linear models; measurement of processes; components of variance; nested designs; the sensitivity ratio, and much more. Also included are many examples, each worked in step-by-step fashion; nearly 200 helpful figures and tables; and concluding chapter summaries followed by references for further study. Mandel argues that, when backed by an understanding of its theoretic framework, statistics offers researchers "not only a powerful tool for the interpretation of experiments but also a task of real intellectual gratification." "The Statistical Analysis of Experimental Data" provides the physical scientist with the explanations and models he requires to impress this invaluable tool into service.

[A Wilderness of Words: Closure and Disclosure in Conrad's Short Fiction, Theodore Billy](#) , 1997, 0896723895, 9780896723894. Beginning with a detailed discussion of Conrad's ambivalence toward the function of language and the meaning of fiction, Ted Billy explores the problematical sense of an ending in Conrad's tales and novellas. A Wilderness of Words is unique in its exclusive focus on Conrad's shorter narratives, ranging from the undisputed masterpieces (e.g., Heart of Darkness, The Shadow Line, "The Secret Sharer") to less familiar works such as "The Informer," "Karain," and "The Return." Billy demonstrates that Conrad's endings, instead of reinforcing the meaning of narrative or lending finality, actually provide a contrasting perspective that clashes with the narrative's general drift. Hence, Conrad's artistic endgames celebrate indeterminacy and uncertainty both in life and in the fictions we create to give our lives meaning. Billy also grounds his study of Conrad's paradoxical strategy in a theoretical consideration of how the concept of closure has evolved since the Victorian novel. Ultimately, Billy maintains, Conrad wrote with two distinct audiences in mind: the conventional reader who relishes the sustained illusion of a comforting coda, and the more sophisticated reader who would appreciate the clash of contradictory perspectives.

[Korean American Evangelicals: New Models for Civic Life, Elaine Howard Ecklund](#) , 2008, 019537259X, 9780195372595.

In this book Ecklund widens the inquiry to look at how Korean Americans use religion to negotiate civic responsibility, as well as to create racial and ethnic identity. She compares the views and activities of second generation Korean Americans in two different congregational settings, one ethnically Korean and the other multi-ethnic. Surprisingly, she finds that the Korean churches de-emphasize ethnicity. They look like other evangelical congregations and are concerned about evangelizing in the context of providing social services. Multiethnic churches, in contrast, use evangelical Christianity to legitimate a political and social justice consciousness that values ethnic diversity and individualized understanding of faith in the context of a conservative Christianity. Korean Americans in both kinds of churches are deeply concerned about helping those in their local community, including non-Koreans and non-Christians. In multiethnic churches, however, Korean Americans also develop an awareness of local politics and a concern with social justice for other ethnic and racial minorities. Ecklund's work is based on ethnographic data from two congregations in one impoverished, primarily non-white city on the east coast, which provided the opportunity to compare how members of each practiced community service in the same urban context. She also conducted more than 100 in-depth interviews with Korean American members of these and seven other churches around the country, and draws extensively on the secondary literature on immigrant religion, American civic life, and Korean American religion.

[Stan Douglas: Midcentury Studio ; \[... Vancouver photographer and video artist Stan Douglas (born 1960) has been celebrated since the late 1980s for his politically freighted retrievals of obsolete technologies and failed utopias. The emphatically narrative character of his films and photographs has made for comparisons with his Vancouver contemporary Jeff Wall, but Douglas also laces his work with a literary engagement, in references to works by Proust, Beckett and other writers. Midcentury Studio sees Douglas pursue a new direction. It chronicles the burgeoning discipline of press photography in North America during the postwar period, for which Douglas assumes the role of a fictional photographer, creating a series of images hypothetically produced between 1945-1951. Douglas constructed a "mid-century studio" using authentic equipment as well as actors to produce carefully staged, black-and-white photographs that painstakingly emulate the period's obsession with crime scenes, dance, gambling and technology. This volume juxtaposes actual photographs from the era with Douglas' superb photo-fictions.

[The Episcopal Church in Crisis: How Sex, the Bible, and Authority are Dividing the Faithful, ISSN 1934-290X, Frank G. Kirkpatrick](#) , 2008, 0313346623, 9780313346620. The current debate in the Episcopal Church in the United States (ECUSA) over its relationship with the worldwide Anglican Communion has been building for some time. Some Episcopalians (including priests, bishops, and dioceses) have broken or are considering breaking their historic affiliation with the current authoritative bodies of ECUSA because they believe they have betrayed the historic teachings and morality of the Anglican tradition. The author places this emerging crisis in context: historical, moral, theological, cultural, and ecclesiological. He explores how the rift between Episcopalians in the United States originated, how it is being played out now in the rift between the official representatives of ECUSA and the Anglican Communion, what the arguments are for and against all sides, and what are the prospects for either reconciliation at some level between the opposing parties or deepening schism in the future. Kirkpatrick explores the variety of contentious issues, rather than focusing just on the one that gets the most media attention: homosexuality. The crisis in the Church goes much deeper than that, however, and involves issues of church, tradition, and biblical authority. The author provides necessary background but focuses primarily on the events that have occurred since 2003 when ECUSA approved the election and consecration of an openly gay bishop. While the situation continues to evolve and change, the book provides readers with an up-to-date account of the history of the crisis, an analysis of the conflicting arguments, and a contextual guide for understanding what might come next in this unfolding story.

The interaction between demography and the economy has been at the centre of the debate on the performance of African economics in recent years. Africa has in the past decade or so shown some of the highest population growth rates in the world, at a time when the economic crisis has become deeper and deeper. One school of thought blames the present economic crisis on rapid population growth, another regards this growth as a stimulus to economic development. What emerges from this volume is that the quality of African labour is certainly a barrier to rapid economic growth. The rate of increase in the skill endowment of African labour is accordingly seen as both a constrain

and a potential source for accelerated development in the future.

[Jane Austen's Anglicanism, Laura Mooneyham White](#) , 2011, 1409418634, 9781409418634. In her re-examination of Jane Austen's Anglicanism, Laura Mooneyham White suggests that engaging with Austen's world in all its strangeness and remoteness reveals the novelist's intensely different presumptions about the cosmos and human nature. While Austen's readers often project postmodern and secular perspectives onto an Austen who reflects their own times and values, White argues that viewing Austen's Anglicanism through the lens of primary sources of the period, including the complex history of the Georgian church to which Austen was intimately connected all her life, provides a context for understanding the central conflict between Austen's malicious wit and her family's testimony to her Christian piety and kindness. White draws connections between Austen's experiences with the clergy, liturgy, doctrine, and religious readings and their fictional parallels in the novels; shows how orthodox Anglican concepts such as natural law and the Great Chain of Being resonate in Austen's work; and explores Austen's awareness of the moral problems of authorship relative to God as Creator. She concludes by surveying the ontological and moral gulf between the worldview of Emma and Oscar Wilde's *The Importance of Being Earnest*, arguing that the evangelical earnestness of Austen's day had become a figure of mockery by the late nineteenth century. - Publisher.

[Organizational Behavior: A Diagnostic Approach, Judith R. Gordon](#) , 1999, 0139228241, 9780139228247. This is not a cut-and-dry approach to OB: Gordon's underlying viewpoint assumes that more than one perspective in OB can be right. She prepares students to analyze organizational situations in a variety of ways, rather than just one. To this end, she presents her acclaimed diagnostic approach, integrating diagnosis--describing, understanding and explaining behavior--and action--controlling, managing or influencing behavior--to bridge the gap between comprehension and understanding. A strong emphasis on diversity issues, such as multiculturalism, gender, and multinationalism, has been retained. The "Sixth Edition" also continues to integrate theory, research and applications, while it updates and enhances coverage to include the most recent trends, techniques and examples in the field today.

[A Student's Guide to Fourier Transforms: With Applications in Physics and Engineering, John Francis James](#) , 2002, 0521004284, 9780521004282. Fourier transform theory is of central importance in a vast range of applications in physical science, engineering, and applied mathematics. This new edition of a successful student text provides a concise introduction to the theory and practice of Fourier transforms, using qualitative arguments wherever possible and avoiding unnecessary mathematics. After a brief description of the basic ideas and theorems, the power of the technique is then illustrated by referring to particular applications in optics, spectroscopy, electronics and telecommunications. The rarely discussed but important field of multi-dimensional Fourier theory is covered, including a description of computer-aided tomography (CAT-scanning). The final chapter discusses digital methods, with particular attention to the fast Fourier transform. Throughout, discussion of these applications is reinforced by the inclusion of worked examples. The book assumes no previous knowledge of the subject, and will be invaluable to students of physics, electrical and electronic engineering, and computer science.

[Innovation and research strategy for growth, Great Britain: Department for Business, Innovation & Skills](#) , 2011, 0101823924, 9780101823920. The UK has the potential to be world leader in innovation. The strength of UK universities and the wider knowledge base is a national asset being the most productive in the G8. But the challenges are great. To succeed in the global innovation economy, the UK must strengthen its ability to accelerate the commercialization of emerging technologies, and to capture the value chains linked to these. We have already made clear our commitment by maintaining the annual 4.6 billion budget for science and research programmes, with 150 million each year support university-business interaction. The UK's universities are increasingly collaborating with each other and with external organization to develop and commercialise knowledge, last year securing over 3 billion from external sources. This paper outlines a series of measures to make it easier for individuals, businesses and the public sector to innovate alone or in partnership. As part of a package of support the Government is relaunching the popular Smart brand and will increase the funding to the Technology Strategy Board. Research Councils UK will establish a principles-based framework for the treatment and submission of multi-institutional funding bids. Also the Government will continue to look for other ways to encourage more relationships between universities and business and will work with NESTA to establish a price centre to run, design and facilitate new inducement prices. The Government has also commissioned independent groups of academics and publishers to review the availability of published research, and to develop action plans for making this freely available. It will also create an Open Data Institute to develop semantic web technologies.

[Demos: The Discovery of Classical Attika,](#) , 1985, 0521267765, 9780521267762. Demos is a study of a classical city-state. It is the first attempt to provide an integrated account which gives due attention to the countryside as well as the urban areas of a polis. Concentrating on classical Athens, for which the literary and archaeological evidence is richest, Dr Osborne establishes the nature of settlement in the countryside and explores how this relates to the farming of the land, the exploitation of mineral resources, and the nature of political participation in both local and central politics. Further studies reveal the way in which the countryside was structured by religious institutions and cults and by the nature of the family.

[Looking Eastward, Daniel Weissbort](#) , 2003, 0953382494, 9780953382491. Weissborts intention was to end his tenure with the series Modern Poetry in Translation with an issue devoted, in part, to Eastern Europe, as the first book in the MPT series (1965) was largely devoted to this region or, more precisely, to the first post-War generation of poets, such as Zbigniew Herbert, Miroslav Holub, and Vasko Popa. In this most recent volume of MPT, Weissbort explores the changed landscape of the past thirty years, including interviews with writers of succeeding generations and a few survivors from the Herbert generation. Other features of Looking Eastward include a broad selection of MPT cofounder Ted Hughes unpublished translations from various languages and time periods, and a selection of work from student translators.
