[Being Visual: Raising a Generation of Innovative Thinkers, Bette Fetter](#) , 2012, 0982209487, 9780982209486. The majority of our school population depends on their visual skills to learn. These visual-spatial, right-brained thinkers are not just the art kids, but our future scientists, engineers and mathematicians. Our visual students, however, are struggling in a test-heavy education system that favors left-brain linear thinkers. For over 20 years, Young Rembrandts has helped tens of thousands of visual-spatial students reach their potential in the arts as well as the classroom. In Being Visual, Bette Fetter, the founder of Young Rembrandts, discusses strategies to increase your visual learners success in school, identifying: Three key learning styles Visual study techniques Effective writing strategies Visual needs of students with autism, ADD and dyslexiaFetter also presents a fresh case for art class as a critical must-have for students dependent on their visual skills to learn. Training in the technical skills of art provides tools for creative endeavors, while developing essential visual skills and learning activities in all children.

[Billy the Kid: The Story - The Trial, Randy Russell](#) , 1995, 0964447630, 9780964447639. During the late 1870s, the Lincoln County War raged in the southeastern part of the New Mexico Territory. The most notorious character in this saga was a young man called "Billy the Kid." Much has been written about his short, turbulent life & the part he played in this war. These stories have grown over time, obscuring factual information & resulting in a legend based on widely conflicting versions of his life & times. Born in New York City in 1859 as Henry McCarty, he was later to become known as "Billy the Kid." The historical debate has always centered around whether or not Billy the Kid was an unrepentant bandit or an impressionable teenager caught between powerful factions in a war in which he was destined to become the scapegoat. IN ADDITION TO THE STORY OF THE KID'S EXPLOITS IN THE LINCOLN COUNTY WAR...Contained in this book are copies of the original court documents which record the events which transpired during the Lincoln County War. The author discovered these documents in 1969 stored in a small, dusty cardboard box at the Dona Ana County Court Clerk's office in Las Cruces, New Mexico, where they had been misplaced since the 1881 trial.

[Athletic Development: The Art & Science of Functional Sports Conditioning, Vern Gambetta](#) , 2007, 0736051007, 9780736051002. Athletic Development offers a rare opportunity to learn and apply a career full of knowledge from the best. World-renowned strength and conditioning coach Vern Gambetta condenses the wisdom he's gained through more than 40 years of experience of working with athletes across sports, age groups, and levels of competition, including members of the Chicago White Sox, New York Mets, and U.S. men's 1998 World Cup soccer team. The result is an information-packed, myth-busting explanation of the most effective methods and prescriptions in each facet of an athlete's physical preparation. Gambetta includes never-before-published and ready-to-use training approaches in - sport-specific demands analysis, - work capacity enhancements, - movement skills development, - long- and short-term training program progressions, and - rest and regeneration techniques. Athletic Development explains what works, what doesn't, and why. Gambetta's no-nonsense approach emphasizes results that pay off in the competitive season and reflect his work at the highest echelons of sport. Merging principles of anatomy, biomechanics, and exercise physiology with sports conditioning applications and four decades of professional practice, this is the definitive guide to performance-enhancing training.

increasing self-awareness in four pillars of leadership. By integrating the concepts of reinvention, servant leadership, and business transformation into a single framework that has been validated in research, The Self-Aware Leader emphasizes taking a calculated approach to change rather than merely reacting to change. The Self-Aware Leader also helps readers recognize three basic truths which are crucial to success within organizations: approaches to management have a shelf life; middle managers are frequently caught between a rock and a hard place ; and, with conservatism on the rise, becoming and remaining an effective leader is extremely complex. This book offers two key takeaways; (1) a new mental framework on leadership more appropriate for today s business conditions; and (2) a functional, practical plan for putting the newly learned concepts presented into daily practice."--Www.amazon.com description.

[Democracy Deficit: U.S. Democracy Promotion Efforts in the Arab World, Amy W. Hawthorne](#) , 2002, 0944029760, 9780944029763. During the 1990s, as "democracy building" rose to become one of the key global U.S. foreign policy objectives, issues of democracy and human rights in the Arab world largely continued to take a back seat to core American policy interests in that region. Yet, responding to signs of political reform in the Arab world and influenced by the international trend of external engagement as a means of encouraging democratic development, the U.S. launched

"democracy promotion" initiatives from Morocco to Yemen, spending more than \$300 million in democracy aid. This groundbreaking study, documenting U.S.-supported democracy aid initiatives in the Arab world implemented during the 1990s, examines the evolution of U.S. policy toward democratic reform across the Arab world and explains how Washington envisioned such reform would help advance U.S. interests in some parts of the region. Drawing on extensive research, including interviews with current and former U.S. and Arab government officials as well as American and Arab participants in democracy aid programs, the author analyzes the underlying assumptions, methodology, and often disappointing results of these efforts. The book's conclusion argues that democracy promotion should form a more prominent component of U.S. policy toward the Arab world, and offers recommendations as to how future democracy promotion policies and programs can have a deeper impact.

Permacs people, the Tokorellans, developed the ability to read and influence the emotions of others, while Linsoras people, the Khizarans, never learned the secret. Permac constantly has to watch his back as Linsoras knife wielding society has raised her to believe that the only good enemy is a dead one. However, circumstances force them to work together to discover what truly happened in the past, while outside forces attempt to stop their efforts. Clues throughout the galaxy lead them to realize that their respective governments have deceived their people for years. But to what end? A war could cause total annihilation of both worlds. As they attempt to trust each other, love eventually enters their lives. But when death enters the equation will the mystery be solved or will other forces win out?

[The Twilight Years: Paris in the 1930s, William Wiser](#) , 2001, 0786709367, 9780786709366. For the artists and

expatriates, the aristocrats and arrivistes, Paris in the 1930s lost none of its magical allure, as this lavishly illustrated chronicle of a fascinating decade in the city's cultural history shows. At salons, galleries, palaces, and cafes, Henry Miller, Helena Rubinstein, Anais Nin, Coco Chanel, Salvador Dalí, and Katherine Anne Porter joined illustrious exiles of the twenties like Gertrude Stein, Sylvia Beach, Pablo Picasso, Janet Flanner, and Man Ray. Jazz orchestrated the city nights, surrealism flourished, haute couture reinvented itself. James Joyce redefined modern literature with Finnegans Wake and at her Chez Josephine Baker redefined the derrière. In a lively narrative, which is accompanied by a superb selection of period photographs, the award-winning author William Wiser follows Elsa Schiaparelli, T. S. Eliot, Peggy Guggenheim, the Windsors, Colette, Jean Cocteau, and a host of other colorful celebrities and literary luminaries through the ten years that continued to foster the creative revolution of the expatriate era in Parisian era that began extravagantly with Elsa Maxwells famous masquerade ball and ended with perhaps the grimdest event in modern French history: the fall of Paris and the Nazi occupation in 1940.

[The Art of Humane Living: Martial Arts as a Path to Peace, Michael R. Foley](#) , 2004, 0974581100, 9780974581101. It's brave to author a book, in today's world, that professes to bring about peaceful living. It's especially courageous if you happen to be a Black Belt Martial artist. But that's exactly what Dr. Michael R. Foley has accomplished, and he has done a fine job of it. Teaching us the fight that leads to peace, the art of gentle power, and how to punch and kick and still be kind, Dr. Foley takes us on a journey of paradoxes that ultimately show us tangible, accessible ways to create peace--within ourselves and outside ourselves with people we encounter every day. His focus is on our children, the leaders of tomorrow, and how important it is to ensure that they learn the power of love and respect--beginning with themselves. While he embraces the value of physical skills, Dr. Foley believes that these skills become more valuable when students learn to enhance their mental skills as well, creating a balance between the two. Without self-esteem and an expression of understanding toward other human beings, physical skills do nothing to help create a peaceful world. Without the ability to learn and live with mutual respect, our children are destined to suffer the same obstacles to peace that have plagued humankind for generations. With captivating photos of children of all ages practicing their forms--both girls and boys--Dr. Foley opens the door to a fresh perspective on the martial arts. It is one that will intrigue you and make you wish that you were one of the children in the photos, just now stepping out into the world with the greatest weapon of all--your mind.

Do you feel something is wrong and have voiced your concerns to your doctor, only to have your doctor brush you off? Or have you been told that your child has pervasive developmental disorder, autism, or mental retardation? If so, this book is for you. Written by Dr. Golder Wilson, a pediatrician/medical geneticist whose own child has a disability, this book offers hope and inspiration. In this book, Dr. Wilson tells the story of six mothers who have children with disabilities. These women not only tell their story, but also give advice on what to do and how best to handle different situations for other families and health professionals. Dr. Wilson then gives his perspective to help physicians better relate to families with disabled children. You will read how these women and their families have incorporated these children into their lives, dealt with the sadness, met obligations, and moved on to happy, fulfilling lives. Six Mothers - Six Stories of disAbility is a must read for parents of disabled

The list grew to include the fifty-two amazing people now gathered in Heroes for My Son, a book that parents and their children sons and daughters alike can now enjoy together as they choose heroes of their own. From the Wright Brothers, who brought extra building materials to every test flight, planning ahead for failure, to Miep Gies, who risked her life to protect Anne Frank and her family from the Nazis during World War II, Heroes for My Son brings well-known figures together with less famous ones, telling the inspiring, behind-the-scenes stories of the moment that made them great. They are a miraculous group with one thing in common: each is an example of the spectacular potential that can be found in all of us. Heroes for My Son is an unforgettable book of timeless wisdom, one that families everywhere can share again and again.

[Untapped: creating value in underserved markets, John Weiser](#) , 2006, 1576753727, 9781576753729. Most companies mistakenly dismiss low-income markets as commercial wastelands. Yet many top corporations -- including IBM, Ford, Hewlett Packard, and Texas Instruments -- have discovered that investing in and partnering with underserved communities can yield significant profits. Based on rigorous research spanning seven years and 50 cases, "Untapped" shows how serving consumers and suppliers at the bottom of the pyramid can be the key to addressing corporations' pressing needs: increased sales, a qualified workforce, marketable innovations, reduced costs, and increased quality. But as corporations benefit, so too do communities, through better products, prices, and services, more meaningful job opportunities, and an increased market for their own goods and services. The authors' blend of proven strategies, practical tools, case studies, and cogent insight shows managers how to maximize profits while helping community residents increase income and assets, creating a relationship of mutual gain.

The second Sherman Contemporary Art Foundation Forum explores the current and future role of private foundations in sustaining contemporary art in the Asia-Pacific region during a time of rapid development, transition, and change. The participants address the nature and economics of giving while taking into account the regional and international context in which art is produced and circulates. Nicholas Jose is chair of Australian studies at Harvard University. Other contributors include Elaine W. Ng, Carrillo Gantner, Britta Erickson, and Gene Sherman.

[Two Hundred and Forty Years of New Zealand Painting, Gil Docking, Michael Dunn, Edward Hanfling](#) , 2012, 1869538048, 9781869538040. "This landmark book on New Zealand artists and their work was first published in 1971, then extended to 1990 by art historian Michael Dunn and now again to 2010 by art historian, writer and lecturer Edward Hanfling. The original text by Gil Docking, former director of the Auckland City Art Gallery, covers the period from European discovery up until 1969, and is presented in its completely original form, making for a fascinating look at what was being thought and written about New Zealand paintings thirty-something years ago. Michael Dunn's narrative takes over to complete the picture through the 1970s and 1980s, and then Edward Hanfling looks at New Zealand painting and its evolution over the last twenty years, when many painters saw their medium as a vehicle for addressing issues or generating a range of meanings, rather than dealing with visual or formal concerns. In total, this new edition features more than 200 paintings. This book is an ideal introduction to the development of New Zealand painting from its very beginning, and also the development of critical thinking about the work of New Zealand artists over the last 40 years. Detailed bibliography and index makes this an ideal book for students." --Ubsbooks.co.nz.

This collection of essays, edited by Graeme Murdock, Penny Roberts, and Andrew Spicer, developed from a one-day conference 'Religion and Violence in Early Modern France: The Work of Natalie Zemon Davis' which was held in June 2008 at the Shakespeare Institute, Stratford-upon-Avon. Five of the papers published here

were initially delivered on that occasion, but the conference also sought to learn from the differing perspectives of violence outside sixteenth-century France. This concern is also reflected in this collection, which seeks to offer new insights and approaches to the relationship and significance of religion and violence as well as paying tribute to the immense contribution made in this field by the writings of Natalie Zemon Davis.

[Buoyancy Effects in Fluids, J. S. Turner, John Stewart Turner](#) , 1979, 0521297265, 9780521297264. The phenomena treated in this book all depend on the action of gravity on small density differences in a non-rotating fluid. The author gives a connected account of the various motions which can be driven or influenced by buoyancy forces in a stratified fluid, including internal waves, turbulent shear flows and buoyant convection. This excellent introduction to a rapidly developing field, first published in 1973, can be used as the basis of graduate courses in university departments of meteorology, oceanography and various branches of engineering. This edition is reprinted with corrections, and extra references have been added to allow readers to bring themselves up to date on specific topics. Professor Turner is a physicist with a special interest in laboratory modelling of small-scale geophysical processes. An important feature is the superb illustration of the text with many fine photographs of laboratory experiments and natural phenomena.

[Vertigo and Dizziness, Bla Bki, Alexander A. Tarnutzer](#) , 2013, 0199680620, 9780199680627. Vertigo and dizziness rate among the most frequently occurring presenting complaints in neurology and in general medical practice. Since most patients do not have acute complaints at the time of examination, the clinician requires keen judgment in making a diagnosis, as patients often report confusing, real, or hypothetical causes of their problems. An improvement in the scientific understanding of vestibular physiology in recent years has led to the development of new diagnostic tests and more effective therapies. However, many of these advances have been slow to be adopted into routine clinical practice. Part of the Oxford Neurology Library (ONL) series, Vertigo and Dizziness helps clinicians improve their management of

patients with these conditions. The text provides an overview of clinical vestibular physiology as well as of the latest developments in bedside examination, diagnosis/differential diagnosis, and state-of-the-art therapy. Vertigo and Dizziness serves as an essential clinical guide for neurologists, otorhinolaryngologists, and trainees in those disciplines, and for general practitioners and medical students.

[Dance and the Nation: Performance, Ritual, and Politics in Sri Lanka, Susan Anita Reed](#) , 2010, 029923164X, 9780299231644. Around the globe, dances that originate in village, temple, and court rituals have been adapted and transformed to carry secular meanings and serve new national purposes. In stage performances, dance competitions, and festivals worldwide, dance has become an emblem of ethnicity and an index of national identity. But what are the backstage stories of those dances chosen to bear such meanings, and what have been the consequences for their communities of origin? In Dance and the Nation, Susan A. Reed brings to light the complexities of aesthetic politics in a multi-faceted exploration and analysis of Kandyan dance in Sri Lanka. As the national dance of Sri Lanka, Kandyan dance is identified with the majority Sinhala ethnic group and heavily supported by the state. Derived from thekohomba kankariyaan elaborate village ritual performed by men of the hereditary drummer caste the dance was adopted by the state as a symbol of traditional Sinhala culture in the post-independence period. When state officials introduced the dance into the school curriculum, it was opened to individuals of all castes, and high-caste women have emerged as prominent teachers and performers. Reeds evocative account traces the history and consequences of this transition from ritual to stage, situating the dance in relation to postcolonial nationalism and ethnic politics and emphasizing the voices and perspectives of the hereditary dancers and of women performers. Although Kandyan dance is related to other south Asian dance forms, it is unique, distinguished by an elegant, energetic style, and lively displays of acrobatics and agility. The companion DVD includes unparalleled footage of this vibrant dance in ritual, stage, and training contexts, and features the most esteemed performers of the Kandyan region. [Driving Around the USA: Automobiles in American Life, Martin W. Sandler](#) , 2003, 0195132300, 9780195132304.

Capturing the excitement of a nation as it became a driving force -- in more ways than one -- Driving Around America is the story of how America's romantic, restless spirit found its counterpart in the automobile. With Henry Ford's assembly lines lowering the price of cars, ordinary people began to travel where and when they pleased with a freedom never before known -- and the nation would never be the same. People moved farther from their work, creating suburbs; the demand for gasoline increased, spurring the growth of the petroleum industry; and individual members of families moved far from each other, changing the social fabric of the nation. From the auto's early beginnings to the commonplace use of cars in all aspects of life today, Driving Around America is a fascinating portrait of how America transformed as its citizens were on the move more and more.

Pern's last best chance to rebuild the decimated dragon population lies with a group of young dragonriders and their dragons left stranded on an unexplored island. Leadership of these dragons and riders falls to Xhinna, female rider of a blue dragon, who, as the most experienced dragonrider in the new Weyr, must earn the respect of all who follow her, as not everyone is ready to accept a female wingleader. She must solve the problem of how to get sufficient numbers of dragon eggs, although her newfangled ideas, like letting green dragons mate and lay eggs to hatch new dragons, cause uproar. All the while she must protect her people and baby dragons from the predators and, worse, traitors or all hope for Pern will be lost!

[Who Can Save Us Now?: Brand-New Superheroes and Their Amazing \(Short\) Stories, Owen King, John McNally](#) , 2008, 1416566813, 9781416566816. Twenty-two of today's most talented writers (and comics fans) unite in Who Can Save Us Now?, an anthology featuring brand-new superheroes equipped for the threats and challenges of the twenty-first century -- with a few supervillains thrown in for good measure. Edited and with contributions by Owen King (We're All in This Together) and John McNally (America's Report Card), Who Can Save Us Now? enriches the superhero canon immeasurably. With mutations stranger than the X-Men and with even more baggage than the Hulk, this next generation of superheroes is a far cry from your run-of-the-mill caped crusader. From the image-conscious and not-very-mysterious masked meathead who swoops in and sweeps the tough girl reporter off her feet; to the Meerkat, who overcomes his

species' cute and cuddly image to become the resident hero in a small Midwestern city; to the Silverfish, "the creepy superhero," who fights crime while maintaining the slippiest of identities; to Manna Man, who manipulates the minds of televangelists to serve his own righteous mission, these protectors (and in some cases antagonizers) of the innocent and the virtuous will delight literary enthusiasts and comic fans alike. With stunning illustrations by artist Chris Burnham, Who Can Save Us Now? offers a vibrant, funny, and truly unusual array of characters and their stories.

Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the tension and compression forces in timber is also provided to help the reader understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps the reader select the right chainsaw and personal protection equipment. Troubleshooting charts are included to help solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.

Construction of the town's dog track on an island in the Mississippi River is jeopardized, threatening Jackson's financial future. Even more ominous, city officials learn that the existing floodwall and levee system might fail to protect the city itself. With little time to lose, the

people of Jackson must set aside old grievances and long-held prejudices to work together. Tensions build while they debate whether to add to the system, and as they argue, the river continues to rise.

[Coming from the Silence: Quaker Peacebuilding Initiatives in Northern Ireland 1969-2007, Felicity McCartney](#) , 2011, 0956820301, 9780956820303. Members of the Religious Society of Friends, commonly known as Quakers, have had a long history of involvement in peace and relief work in many parts of the world. During the Troubles in Northern Ireland Quakers were involved in a series of projects. 'Coming from the Silence' describes the work of four major projects and a number of smaller initiatives taking place between 1969 and 2007. It sets the work in a wider Quaker context and analyses it from an international development perspective. The four major projects described are: Quaker House, a conciliation project based in Belfast; the Ulster Quaker Service Committee, a family support service working initially at Maze/Long Kesh prison; the Centre for Neighbourhood Development, a Belfast based community development agency; and the Quaker Peace Education Project, a Derry based initiative working mainly with children and young people.--Publisher's description.

[Regime Change: U.S. Strategy Through the Prism of 9/11, Robert Litwak](#) , 2007, 0801886422, 9780801886423. The 9/11 terrorist attacks starkly recast the U.S. debate on "rogue states." In this new era of vulnerability, should the United States counter the dangers of weapons proliferation and state-sponsored terrorism by toppling regimes or by promoting change in the threatening behavior of their leaders? Regime Change examines the contrasting precedents set with Iraq and Libya and provides incisive analysis of the pressing crises with North Korea and Iran. A successor to the author's influential Rogue States and U.S. Foreign Policy (2000), this compelling book clarifies and critiques the terms in which today's vital foreign policy and security debate is being conducted.

[A History of Cant and Slang Dictionaries: Volume 2: 1785-1858, Julie Coleman](#) , 2004, 0199254702, 9780199254705. The second volume of Julie Coleman's fascinating and entertaining history of the uses and the recording of slang and criminal cant takes the story from 1785 to 1858 and explores its first manifestations in the USA and Australia. During this period glossaries of cant are thrown into the shade by dictionaries of slang, which now include the language of thieves and cover a broad spectrum of non-standard English. Cant represented a practical threat to life and property. Slang, the author reveals, was a threat to the moral core of society, insidiously seductive to a wide section of the public. Julie Coleman shows how Francis Grose's Dictionary of the Vulgar Tongue revolutionised lexicography of non-standard English. She explores the earliest Australian and American slang glossaries, whose authors included the thrice-transported James Hardy Vaux and George Matsell, New York City's first chief of police.

[Where the Spirit of the Lord Is, Pastor Jacqueline Flowers](#) , 2011, 0963419668, 9780963419668. Man can only enjoy freedom, the ultimate liberty, through submission to the authority of God. Submission to God is obedience to the Word of God. There are things about Christ we will know only as we obey Him. Obedience will lead us into greater insight into the person of Christ, and greater revelation of the endless possibilities we enjoy just because of our union with Christ. Where the Spirit of the Lord Is will bring you into full awareness of the liberty extended to everyone who accepts Jesus Christ as Savior and Lord. The ministry of Jesus Christ is a ministry of liberation, not manipulation, abuse, seduction, or control. It is the ministry of freedom. It is absolutely essential that we each have a firm grasp on the liberty we enjoy in Christ. If we are void of a sound understanding of this liberty, we will be a candidate for deception, never enjoying the fullness of our rights in Christ. The devil's aim is to lure us down a path of deception. God does not want to bind us. He sent His Son so that we would experience the ultimate freedom! Where the Spirit of the Lord is, there is freedom! Jacqueline T. Flowers is Pastor of Time of Celebration Ministries Church, Inc. in Houston, Texas. Jacqueline is the wife of Reverend Jerry W. Flowers, Sr. and the mother of three. She is author of Woman Be Whole, Women in Ministry, Where Are the Men?, In His Presence, Fashioned for His Glory, and Where the Spirit of the Lord Is. Jacqueline shares the Word of God with boldness and conviction as she ministers to the wounded and hurting. Her focus is on seeing every member of the Body of Christ become a complete functional believer, contributing to the establishment of God's kingdom in this earth.

She is determined to encourage the people of God to strive together to establish order in this earth, because they know who they are, what they are called to do and because their particular contribution is of great importance. She emphasizes, "Nothing will be restrained from the people of God which they have imagined to do, because they are one."

[Psychic Politics: An Aspect Psychology Book, Jane Roberts](#) , 1999, 0966132742, 9780966132748. "The ego rises from the civilization of the psyche just as a leader rises from the masses of the people: appointed, chosen, or taking control according to an inner politics first existing within the greater inner mind." Jane Roberts, *Psychic Politics* is Jane Roberts's search for the rules that govern our inner life—the links between daily, subjective experience and the greater Reality that nourishes all of our existence. This is not only her most challenging book, but a very personal investigation in which the sources of dream and myth, and the creative wellsprings of sex and spirituality, appear in their full and breathtaking relationship to daily life. And, here for the first time, Roberts introduces her theories of "counterparts," the "library," and the "codicils," concepts that are key to understanding her entire body of work.

[Housework and Housewives in American Advertising: Married to the Mop, Jessamyn Neuhaus](#) , 2011, 023011489X, 9780230114890. Housework and Housewives in American Advertising traces the surprisingly persistent depiction of housework as women's work in advertising from the late 1800s to today. Jessamyn Neuhaus shows advertising to be our most significant public discourse about housework, analyzing print ads and TV commercials, as well as ad agency documents and trade journals, to demonstrate how the housewife figure framed household labor as exclusively feminine care for the family. Paying particular attention to the transitional decades of the 1970s and 1980s, Neuhaus demonstrates that even when overtly stereotypical images of housewives became unmarketable, advertising continued to gender housework with the more racially diverse and socially acceptable 'housewife moms' of today.
