LIES take the form of traditions that we dare not question, generational fears passed on from well-meaning family members, cultural perceptions and perceived professional limitations. This book discusses the origins of LIES and reveals LIES that we might not have recognized as such. Once we've identified our LIES, LIES That Limit provides solutions and straight talk to recognize and confront untruths that keep us locked in roles and mindsets that are unsatisfying and in some cases destructive. LIES That Limit shares stories of real-life people who's tales we can see ourselves in and it forces us to ask questions that we didn't know we needed to ask. Begin your journey to find truth! LIES That Limit gives you permission to follow your dreams - your spirit and purpose - find happiness in places that we recognized as children, but have lost sight of as adults. Drawing forms the starting point of Egan's work, with a sketchbook providing a repository for the noting down of ideas and experimentation with forms that are developed into autonomous drawings, collages, sculptures and films. Ideas are triggered through observations made during everyday life, but also by memories of childhood experiences and works of literature. Often inchoate, these are atmospheric and sensory triggers that lack narrative definition and carry through into her practice through a subtle and intuitive working process. For example, it was the aura of tightness, a certain tension, that reading Jean Rhys's novel *Good Morning, Midnight* left her with, and it was this quality that she sought to engender in a sculptural form *Character*, 2010, although quite different from the drawing that Egan made after reading this story, does retain some of its characteristics.

[Henry of Harclay: Ordinary Questions, XV-XXIX, , , Henry \(of Harclay.\), Mark Gerald Henninger](#) , 2008, 019726381X, 9780197263815. This volume completes the first full edition of the later work of the medieval philosopher and theologian Henry of Harclay. In collaboration with Raymond Edwards, an English translation is printed on facing pages, making this work available to a much wider audience. The twenty-nine Quaestiones Ordinariae cover a range of topics in metaphysics, theology, physical science, philosophical anthropology and ethics, which were among the most important of those debated in the early fourteenth century. The articles provide a window to this era, as Harclay discusses many of the main questions of his day: whether and why we choose what is evil, how God can know the future and we can still be free, what a virtue is, whether the human soul survives death, whether all things are made up of atoms. This edition enables us to evaluate Harclay, not only in relation to other notable thinkers of his time (such as John Duns Scotus and William of Ockham) but to appreciate the inner coherence of his own thought. An extensive introduction to Harclay's life, works and doctrine is provided. The volumes will also benefit scholars following the debates among lesser-studied thinkers such as William of Alwicks, Thomas of Sutton, Nicholas Trivet, and Robert Walsingham, whom this edition shows to have been in dialogue with Harclay during the years of the composition of his Quaestiones, 1310-1317. Because of the clarity of Harclay's thought and style, now mirrored in the English translation, the Quaestiones Ordinariae are an ideal way to introduce students to key problems in medieval philosophy, as well as to enable scholars to deepen their knowledge of the debates of this period. Questions 1-14, together with an extensive introduction, were published as volume XVII in the Auctores series.

Showcasing the newest generation of black women writers, including ZZ Packer, Edwidge Danticat, and Shay Youngblood, Shaking the Tree gathers twenty-three voices that came of age in the wake of the civil rights, black arts, gay rights, and feminist movements. Their literature embodies the tragedies and triumphs of contemporary black women in their struggle to negotiate a sense of individual identity beyond the limited scope of gender and race. Shaking the Tree offers a panorama of both fiction and memoir, revealing perspectives as diverse as they are dynamic: asha bandele recounts how she fell in love with a prisoner charged with murder; Rebecca Walker explores a childhood split between disparate racial and cultural landscapes; ZZ Packer remembers her near-abduction from summer camp at a time when local black children were being found murdered; Danzy Senna and Carolyn Ferrell tell tales about being young and biracial in a society that sees only in black and white. This anthology is as urgent as it is historical—these voices are the future of American literature.

[The Lupus Book: A Guide for Patients and Their Families, Daniel J Wallace](#) , 2008, 019537309X, 9780195373097. The symptoms are puzzling, intermittent, and frequently seem unrelated: mysterious rashes, sore joints, fatigue, headaches. It can take years to properly diagnose, often leaving its victims suffering not only from the disease, but from the uncertainty about whether they have the disease and from the not-insignificant problem of finding a physician to treat them. The disease is lupus, which, simply put, is what happens to the body when it becomes allergic to itself. It is quite widespread and it is highly deadly, claiming the lives of thousands of patients yearly. Now patients and their families can turn to The Lupus Book, a clear, reassuring guide that explains virtually every aspect of the disease. Written by Daniel J. Wallace, M.D., one of the world's leading experts on the subject, The Lupus Book is packed with useful, easy-to-understand information and practical guidance for the sufferer. Here the reader will discover clear descriptions of the symptoms that most commonly afflict victims of lupus, a helpful survey of all aspects of diagnosis—from why the disease is so difficult to recognize to the latest, most innovative tests—and background information on the cause of the disease, which researchers now believe is genetic in origin. Wallace shows how lupus may affect different organ systems in the body, including the brain, heart, and lungs; he offers well-informed advice on how patients can work with their doctors to take an active role in fighting the disease through exercise, diet, and medication; and perhaps most important, he

answers the questions he is most often asked by his patients, including queries on prevention, cure, sun exposure, pregnancy, and many other concerns. Throughout the book, Wallace reveals a talent for communicating difficult concepts to the general reader as he illustrates his discussion with numerous anecdotes culled from his years of clinical experience (he has treated over one thousand lupus patients). Nearly one million people suffer from lupus in the United States alone. More common than leukemia, multiple sclerosis, cystic fibrosis, and muscular dystrophy combined, lupus is a pervasive and little-understood condition. With *The Lupus Book* in hand, lupus sufferers as well as their families, friends, and physicians have a reliable guide that will answer their questions and help them to better manage their day-to-day fight against this debilitating disease.

[New Culture, New Right: Anti-Liberalism in Postmodern Europe, Michael O'Meara](#) , 2013, 1907166971, 9781907166976.

New Culture, New Right is the first English-language study of the identitarian movements presently reshaping the contours of European politics. The study's focus is Alain de Benoist's GRECE (Groupement de Recherche et d'Etude pour la Civilisation Europeenne), which Paul Piccone of Telos described as the most interesting group of continental thinkers since the existentialists of the 1950s and which elsewhere is seen as the leading school of contemporary Right-wing thought. Made up of veterans from various nationalist, traditionalist, far Right, and regionalist movements, the GRECE

began as an association of French intellectuals committed to restoring the crumbling cultural foundations of European life and identity. Due to the quality of its publications and its philosophically persuasive reformulation of the Right project, it attracted an immediate audience. By the late 1970s it had recruited an impressive array of Continental thinkers to its ranks. In Italy, Germany, Belgium, and a number of other European countries, there have since emerged organizations and publishing concerns either directly linked to the Paris-based GRECE or involved in analogous endeavors. As a result of these diffusions, GRECE-style identitarianism has come to form the chief ideological alternative to the regnant liberalism. The European New Right to which the GRECE gave birth is new, however, not in the modernist sense of being novel, but in the traditionalist sense of reappropriating an origin whose meaningful possibilities remain open for realization. Such a revolutionary return to Europe's roots has never seemed so urgent. After a half century under the liberal-democratic regimes imposed by the United States in 1945, Europeans now face extinction as a race and a culture. In opposition to the ethnocidal forces of the American Occupation and its European collaborators, New Rightists appeal to the primordial in their people's heritage, aiming to awake a spirit of resistance and renaissance in them. The result, as documented in this introduction to their ideas, is one of the most formidable critiques ever made of the liberal project. Michael O'Meara, Ph.D., studied social theory at the Ecoles des Hautes Etudes en Sciences Sociales, and modern European history at the University of California. He is the author of *Guillaume Faye and the Battle of Europe* (2013), also published by Arktos.

Planet U places the university at the forefront of the sustainability movement. Questioning the university's ability to equip society to deal with today's serious challenges such as economic growth, democratic citizenship and planetary survival, it calls for a new social movement to take a lead in reforming the university. The book reviews the university's 900-year history from medieval religious philosopher, to Renaissance nation-builder, to its modern function as training grounds for the world's managerial class and the world's largest industry. It examines diverse campus initiatives across North America and Europe and their traditional concerns of green buildings, renewable energy and transportation demand management. But it also demonstrates the promise for social and ecological progress open to the planetary university once the university takes its place seriously and discovers its new mission: to create diverse models of local and global innovation centered around tough new questions about what universities and their societies can achieve: How might the university help move us to a post-automobile, energy-saving society? How might universities help refashion the city to be sustainable? How might universities be governed for sustainability? Lively, engaging and perfectly timed for the UN Decade for Sustainability in Education launched in 2005, Planet U will have wide appeal. [Introduction to Digital Audio Coding and Standards, ISSN 0893-3405, Marina Bosi, Richard E. Goldberg](#) , 2003, 1402073577, 9781402073571. Foreword by Leonardo Chiariglione. The topic of digital audio coding is of interest to a wide audience, including engineering and industrial professionals working in telecommunications, hardware design, music, and software product development. Introduction to Digital Audio Coding and Standards provides a detailed introduction to the methods, implementations, and official standards of state-of-the-art audio coding technology. In the book, the theory and implementation of each of the basic coder building blocks is addressed. The building blocks are then fit together into a full coder and the reader is shown how to judge the performance of such a coder. Finally, the authors discuss the features, choices, and performance of the main state-of-the-art coders defined in the ISO/IEC MPEG and HDTV standards and in commercial use today. The ultimate goal of this book is to present the reader with a solid enough understanding of the major issues in the theory and implementation of perceptual audio coders that they are able to build their own simple audio codec. There is no other source available where a non-professional has access to the true secrets of audio coding. Introduction to Digital Audio Coding and Standards is based on a graduate course at Stanford University going into its 7th year. The subject material has been fine-tuned through this process to be accessible to readers of vastly differing backgrounds, levels of preparation, and interests. Exercises that apply the concepts covered are included at the end of each chapter.

By rediscovering the most ancient of all building materials earthforward-thinking homebuilders can now create structures that set new standards for beauty, durability, and efficient use of natural resources. Rammed earth construction is a step forward into a sustainable future, when homes will combine pleasing aesthetics and intense practicality with a powerful sense of place. Rammed earth homes are built entirely on-site, using basic elementsearth, water, and a little cement. The solid masonry walls permit design flexibility while providing year-round comfort and minimal use of energy. The builder and resident of a rammed earth house will experience the deep satisfaction of creating permanence in a world dominated by the disposable.

This commentary has been written for the average individual. In this commentary on Revelation, author Fred DeRuvo draws back the curtain on chapters five through twenty-two, presenting information in an easy-to-understand style, written for the average person. Whether he succeeds or not is up to each reader to decide. One thing is certain regarding the book of Revelation. Because of its prophetic nature, Christians will continue to debate aspects of it until such a time as we can know for certain. Either the

things found within Revelation are yet to come to pass, and that alone will prove their veracity, or they will not come to pass. Only time will tell. Probably the most often-missed point of Revelation is the fact that it reveals the Lamb of God for who He is; King of Kings and Lord of Lords! We must never forget that the book of Revelation is first and foremost about Jesus Christ, God the Son. He is the Alpha and Omega, the Beginning and the End. Without Him, there would be no Revelation! All eyes on the King!

Through close readings of Beckett's "pentalogy," the author shows how these novels, written between 1935 and 1950, strikingly anticipate many of the defining themes and ideas of Barthes, Foucault, and Derrida - from madness and the cogito to the "death of the author" and the "end of the book," from difference and unnamability to the "end of man" and the "beginning of writing."

Ancient humans were peaceful - modern violence is avoidable. That's the basic message contained in "Saharasia," a controversial "marriage of heresies" over 10 years in the making. Perhaps the most ambitious and systematic scientific evaluations of human behavior and history ever undertaken, with hundreds of maps and illustrations, reviewing conditions in over 1000 cultures world-wide. Saharasia presents the first world geographical review of standard cross-cultural, anthropological, archaeological and historical findings, a survey of human family life and social institutions, tracing social violence back in time to specific times and places of first-origin. Starting in the 1980s, author DeMeo identified the Saharasian Desert Belt as the most violent large territory on Earth, today recognized as homeland of the modern Islamic terror brigades. If you really want to know the "why" of the current Islamofascist march-to-war, this book will provide answers.

Here for Generations: The Story of a Maine Bank and Its City tells the remarkable tale of a town and a bank that have moved in concert for 150 years, and captures their history through triumph and tragedy. Together, Bangor Savings Bank and Bangor have seen the rise and fall of the great lumber economy and survived the economic depression of the 1870s that nearly killed the bank. They experienced the Flood of 1902, rebuilt following the Great Fire of 1911, and hung tough during the Great Depression. And they watched the city become the region's premier service and retail hub. You will also find the bank's rise from its simple origin as a nineteenth-century repository for Bangor widows, orphans, and daily laborers to a statewide leader in the twenty-first century-a prime source of financial services, mortgages, and the capital that fuels the economic engine of the Pine Tree State. It has been a remarkable ride.

[Drugs and Justice: Seeking a Consistent, Coherent, Comprehensive View, M. Pabst Battin](#) , 2008, 0195321014, 9780195321012. This compact and innovative book tackles one of the central issues in drug policy: the lack of a coherent conceptual structure for thinking about drugs. Drugs generally fall into one of seven categories: prescription, over the counter, alternative medicine, common-use drugs like alcohol, tobacco and caffeine; religious-use, sports enhancement; and of course illegal street drugs like cocaine and marijuana. Our thinking and policies varies wildly from one to the other, with inconsistencies that derive more from cultural and social values than from medical or scientific facts. Penalties exist for steroid use, while herbal remedies or cold medication are legal. Native Americans may legally use peyote, but others may not. Penalties may vary for using different forms of the same drug, such as crack vs. powder cocaine. Herbal remedies are unregulated by the FDA; but medical marijuana is illegal in most states. Battin and her contributors lay a foundation for a wiser drug policy by promoting consistency and coherency in the discussion of drug issues and by encouraging a unique dialogue across disciplines. The contributors are an interdisciplinary group of scholars mostly based at the University of Utah, and include a pharmacologist, a psychiatrist, a toxicologist, a trial court judge, a law professor,

an attorney, a dietary specialist, a physician, a health expert on substance abuse, and Battin herself who is a philosopher. They consider questions like the historical development of current policy and the rationales for it; scientific views on how drugs actually cause harm; how to define the key notions of harm and addiction; and ways in which drug policy can be made more consistent. They conclude with an examination of the implications of a consistent policy for various disciplines and society generally. The book is written accessibly with little need for expert knowledge, and will appeal to a diverse audience of philosophers, bioethicists, clinicians, policy makers, law enforcement, legal scholars and practitioners, social workers, and general readers, as well as to students in areas like pharmacy, medicine, law, nursing, sociology, social work, psychology, and bioethics.

[Leaders' Personalities and the Outcomes of Democratic Elections, Anthony King](#) , 2002, 0198297912, 9780198297918. The conventional wisdom purveyed by the press and television and accepted as true by most politicians is that elections throughout the democratic world are personal clashes between individual presidential candidates and party leaders. Almost everyone assumes that election outcomes are frequently determined by the major candidates' personal characteristics. In the United States, Al Gore in 2000 came over as aloof and arrogant--and failed to win his expected victory. In Great Britain, Tony Blair in 2001 came across as dynamic and personable--and won a second term. So personal charisma appears to yield electoral success. This study by eminent scholars on both sides of the Atlantic suggests that the conventional wisdom is wrong. Survey research conducted in recent decades indicates that relatively few voters are swayed by candidates' personal characteristics. Far more important are voters' longstanding party loyalties, their views on issues, and their judgments of how well or badly presidents and parties have performed--or will perform--in office. The votes of even the few electors who are swayed by candidates' personalities usually cancel each other out. As a result, election outcomes are seldom decided by individual candidates' personal images. Occasionally, but not often. Ronald Reagan and Bill Clinton owed their election victories more to economics than to charm. At the end of World War II, the charismatic Winston Churchill lost the 1945 British general election; the colorless Clement Attlee won. Chancellor Helmut

Kohl remained in power in Germany for a generation-but was never personally popular. Russian voters reckoned that Boris Yeltsin could not hold his drink- but nevertheless elected him. The implications of the authors' analyses are profound. They suggest that modern democratic politics is not nearly as candidate-centered and personality-oriented as is often supposed. They also suggest that parties' policies and their performance in office usually count for far more than the men and women they choose as their leaders. Not least, the authors suggest that the efforts of political consultants, advertising agencies, and spin doctors are often misdirected.

[Gold Street, Joseph Pestana](#) , 1996, 0965582809, 9780965582803. Joseph Pestana has been praised by leading poets & critics as one of the "strongest new voices in contemporary American poetry." An outdoorsman & naturalist, his poetry focuses equally on relationships & the self. In both his real & symbolic landscapes we find enormous imaginative vitality, revealing him as a sensitive listener & watcher, with a wonderful eye. His precise & economical images reinforce his incisive view of the natural world, & we constantly find in his lean, strong, lines a quiet sureness that reveals to us, "This is how it is done; this is how a new season occurs; this is how nature knows us & teaches us to know about ourselves." An outdoorsman & naturalist, his poetry focuses equally on relationships & the self. In his sensuous imagery we find an intensity & feeling which compares with the finest works of this type.

[Frequency Standards: Basics and Applications, Fritz Riehle](#) , 2006, 3527605959, 9783527605958. Of all measurement units, frequency is the one that may be determined with the highest degree of accuracy. It equally allows precise measurements of other physical and technical quantities, whenever they can be measured in terms of frequency. This

transportation that more than a century later historians still struggle to disentangle fact from Clarke's tragic fiction. The novel charts the misfortunes of Richard Devine, falsely accused of murder, through the worst Australian penal settlements, the notorious Macquarie Harbour, Port Arthur, and Norfolk Island, retaining his humanity and spiritual dignity through all the degradations that cruelty and inhumanity could devise. Clarke's novel is indeed a phantasmagoria of horrors - of murder, mutiny, flogging, child-suicide, homosexual rape, and cannibalism; yet it is also a powerful story of moral courage and heroic resistance to dehumanization. His *Natural Life*, usually published as *For the Term of His Natural Life* but here restored to the title Clarke gave it, is the grand epic of the transportation system, and has been described as the greatest nineteenth-century Australian novel.

[Alban Berg: Master of the Smallest Link, Theodor W. Adorno](#) , 1991, 0521338840, 9780521338844. Adorno's study of Alban Berg is a unique document. Itself now a part of music history, it is a personal account, by a pre-eminent philosopher and aesthete, of the life and musical works of his mentor, friend and composition teacher. Shortly after Berg's death in 1935, Adorno contributed several analyses to the first Berg biography. Thirty years later he incorporated these chapters and several subsequent essays into one volume. Beyond analyses of individual pieces, the book explores the historical and cultural significance of Berg's music, its relationship to that of other twentieth-century composers, and to the larger issues of contemporary life. This is a classic study, made available here for the first time in English, and it provides a key to understanding Adorno himself as well as offering an individual perspective on one of the major composers of the twentieth century.

[The Trumpet of Conscience, Martin Luther King, Jr.](#) , 2011, 0807001708, 9780807001707. From the Dust Jacket: In November and December 1967, Dr. Martin Luther King, Jr., delivered five lectures for the renowned Massey Lecture Series of the Canadian Broadcasting Corporation. The collection was immediately released as a book under the title *Conscience for Change*, but after King's assassination in 1968, it was republished as *The Trumpet of Conscience*. The collection sums up his lasting creed and is his final testament on racism, poverty, and war. Each oration in this volume encompasses a distinct theme and speaks prophetically to today's perils, addressing issues of equality, conscience and war, the mobilization of young people, and nonviolence. Collectively, they reveal some of King's most introspective reflections and final impressions of the movement while illustrating how he never lost sight of our shared goals for justice. The book concludes with "A Christmas Sermon on Peace"-a powerful lecture that was broadcast live from Ebenezer Baptist Church on Christmas Eve in 1967. In it King articulates his long-term vision of nonviolence as a path to world peace.

[Red Clay and Roses, S. K. Nicholls](#) , 2013, . Set in the Deep South during a period of civil unrest, *Red Clay and Roses* is a fictional account of a true story. The discovery of an old ledger opens a window into life in a time when women were supposed to keep quiet and serve, abortion was illegal, adoption difficult, and racism rampant. Mystery, rape, murder, racial tension, drama, and forbidden love are encountered as the origin of the ledger unfolds. Sybil reveals that she was an unconventional, independent, high spirited young white woman in the 1950s-60s in a world that belonged to the white man. Sybil defies the norm and sets out to open her own business. She becomes the love interest of Nathan, an African-American man, in a summer romance that leaves her mournful. Nathan is a medical student whose father is employed as handyman to the local chiropractor. Nathan's sister is missing and he cannot know why. The community does not seem to care. His life is altered forever. Nathan becomes directly involved in the Civil Rights Movement and Sybil is torn between living the mundane life of her peers or a life that involves fastening herself to a taboo relationship. The seeds of prejudice have been sown by a society that seethed with bigotry. [Polymer Electrolyte Fuel Cell Durability, Felix N. Bchi, Minoru Inaba, Thomas J. Schmidt](#) , 2009, 038785536X, 9780387855363. This book will cover one of the most important aspects of fuel cell research and development, fuel cell durability. The rather broad topic of fuel cell durability will be covered from different viewpoints. First, the durability and degradation issues of catalyst materials (both anode and cathode catalysts) will be described in individual contributions as well as stability aspects from carbon support materials. A following chapter is completely dedicated to important topics from membrane materials, i.e., chemical and physical degradation as well durability from newly developed hydrocarbon membranes. After discussion of stability and durability topics from gas diffusion layer materials and bipolar plate

materials, a large part of the book will cover various aspects from membrane electrode assemblies, i.e., low and high temperature MEAs as well as DMFC MEAs. Since MEA Cost and Durability are heavily linked, this topic will be discussed one contribution. In the consecutive chapter on MEA and stack operation, the impact of contaminants (e.g. in the gas streams or water for humidification) on MEA and stack lifetime will be described. Furthermore, some information will be given on reliability and predictive testing of MEAs and stacks.

[Music in Korea: Experiencing Music, Expressing Culture, Donna Lee Kwon](#) , 2012, 0195368274, 9780195368277. *** Music in Korea is one of several case-study volumes that can be used along with Thinking Musically, the core book in the Global Music Series. Thinking Musically incorporates music from many diverse cultures and establishes the framework for

exploring the practice of music around the world. It sets the stage for an array of case-study volumes, each of which focuses on a single area of the world. Each case study uses the contemporary musical situation as a point of departure, covering historical information and traditions as they relate to the present. ***Despite its longstanding position as a distinct cultural force in East Asia, Korea continues to be underrepresented in world music texts. Music in Korea is the first brief, single-volume text to provide a thematic, succinct introduction to the music of Korea--a region whose volatile political climate has often overshadowed its rich cultural and musical traditions. Based on author Donna Lee Kwon's extensive fieldwork, the text features interviews with performers, eyewitness accounts of performances, and vivid illustrations. Kwon uses three themes--Korea as a transnational player in East Asia, the intersection of Korean music and cultural politics, and Korea's maintenance of its strong cultural identity through both musical and aesthetic continuity--to survey the region and draw parallels and contrasts between its various traditions. Each theme lends itself to a discussion of Korea's classical musical customs and its contemporary developments. Packaged with an 80-minute audio CD containing musical examples, the text features numerous listening activities that engage students with the music. The companion website (www.oup.com/us/globalmusic) includes supplementary materials for instructors.

[Luso-American Literature: Writings by Portuguese-speaking Authors in North America, Robert Henry Moser, Antonio Luciano de Andrade Tosta](#) , 2011, 0813550572, 9780813550572. Portuguese and Cape Verdean immigrants have had a significant presence in North America since the nineteenth century. Recently, Brazilians have also established vibrant communities in the U.S. This anthology brings together, for the first time in English, the writings of these diverse Portuguese-speaking, or "Luso-American" voices. Historically linked by language, colonial experience, and cultural influence, yet ethnically distinct, Luso-Americans have often been labeled an "invisible minority." This collection seeks to address this lacuna, with a broad mosaic of prose, poetry, essays, memoir, and other writings by more than fifty prominent literary figures--immigrants and their descendants, as well as exiles and sojourners. It is an unprecedented gathering of published, unpublished, forgotten, and translated writings by a transnational community that both defies the stereotypes of ethnic literature, and embodies the drama of the immigrant experience.

Wildflowers of Nova Scotia, New Brunswick & Prince Edward Island is a splendid pictorial record of Atlantic Canada's freshest blooms. For years Mary Primrose pursued her passion for wildflowers. From early spring when there was still snow on the ground through to late fall, she sought out the plants that grow in the wild. From her collection of thousands of colour slides, Mary carefully selected her best images for this book. There are 179 images in all, of 98 different plants, arranged in order of flowering season, from spring to fall. Accompanying the photographs are brief notes prepared by biologist Marian Zinck, along with information to help identify each plant and suggestions for where to look for each variety.

Consumed by guilt over his part in the wrongful death of his closest friend, Paul Revere's oldest son is thrust into the drama unfolding on the streets of Boston in the 1770s. A senseless shooting, the Massacre on King Street, the dumping of tea in the harbor, the near-fatal ride by his father, and the slaughter of Patriots on Lexington Green all define the struggle for liberty for the younger Paul. Pitted against Andrew Carlton, a ruthless Tory and father of the girl he loves, Paul learns to forgive himself for the tragedy that has haunted him from an early age. In his unique position as Revere's son, Paul reveals the complexities of his courageous father who accomplished far more than a midnight ride on a borrowed horse. This novel centers on oppression and rebellion, and the selfless love between a son and his remarkable father, Paul Revere.

[Makeda, Prue Sobers](#) , 2011, 0987210408, 9780987210401. Review 'Rich, warm, captivating, evocative - wonderful.'
Desney King Product description From Australian best-selling author, Prue Sobers - a novel inspired by a medieval text and its ancient tale of sexual conquest. A woman stands in a hooded cloak, feet drenched and muddied, at the entrance of the great hall as thunder reverberates through the palace walls. In the gloom he cannot see her clearly. It is before the Common Era, the year 961. He is Solomon the Wise, thwarted by protocol, impatient for his work. She is the beautiful and spirited Makeda, Queen of Sheba and all Ethiopia who has risked life and limb in a bid to talk trade. Against a glittering backdrop of pomp and opulence, and the shadows of slavery and the politics of the times, as strangers, they embark on an uncharted course. She is not what he expects and takes him by surprise. He is everything she has heard. Behind the closed doors of privilege and power, both are about to face more than they bargain for. Brimming with imagery, taut with intrigue, Makeda is alight with incident and glamour. In her compelling novel of obsession and self-discovery, Prue Sobers brings to life two of the world's most illustrious icons, rendering them enthralling in all their dazzling otherness, yet as human and palpable as legends of our day. Feisty and engaging, the novel takes the reader into the minds of its characters, foiling all the energy of sovereignty and might with the exquisite eroticism of attraction and desire. Emotionally rich and evocative, this bitter-sweet story of moral dilemma, grand passions and sacrifice will tug whimsically on the strings long after it is read.

[The Second Oswald, Richard H. Popkin](#) , 1999, 1886420270, 9781886420274. "Who killed Kennedy? Many keen minds have their doubts about the findings of the Warren Commission. Could Oswald have fired 3 shots in 5.6 seconds with the inaccurate rifle he had - and hit a moving target? Did he even kill patrolman Tippit (the bullets in the body were smaller than the barrel of his revolver)? Was the brown paper bag made only to attract attention? Was Bullet No. 399 a plant? Suppose there was a Second Oswald - a man very similar physically and an expert marksman? Such a man was seen both before and at the time of the murder. Was there a rifleman on the knoll as well as at the Book Depository window? If so this was one of the greatest - and most successful conspiracies of modern times... "The Second Oswald "has been called ""the first plausible and significant argumentation on the Kennedy assassination."" It takes into account the books by Edward J. Epstein, Mark Lane, and Harold Weisberg. Too much was attempted too quickly. Professor Popkin believes that Lee Harvey Oswald may have been innocent and no more than a decoy in a plot to kill the President. His job may have been to divert suspicion and be arrested. A startling alternative to the 'Single Assassin' theory. For an author bio and photo, reviews and a reading sample, visit bosonbooks.com. "

novel, the complete life of one of Italy's most fearless women. Between her birth in 1463 as the illegitimate daughter of the Duke of Milan, and her death in 1509 as a member of the powerful Medici family, the life of Caterina Sforza crossed the firmament of Renaissance Italy like a shooting star. She was painted by Botticelli, feted by Pope Sixtus IV, slandered by Macchiavelli and celebrated as a warrior who led her own troops fearlessly into battle. While defending her fortress city-state of Forlì, she was prepared to sacrifice her children rather than surrender - yet she was eventually defeated, imprisoned and raped by a Borgia. Caterina Sforza bore 8 children, buried 3 husbands, and wrote a recipe book that has since been through more than 100 editions. Her youngest child became, like his mother, a brilliant soldier and a national hero. But not even the determined Caterina could have planned that her son's direct descendants would include the kings of France and of England ... Or that she herself would be reborn 600 years later as the kick-ass lead character in the multimillion-selling videogame Assassin's Creed.

[Bluebird: A Memoir, Vesna Maric](#) , 2010, 1847081193, 9781847081193. For Vesna Maric, the war begins when the machine-gun fire in the distance sounds like a sewing machine. As it comes closer, her family's anxiety grows, prompting them to send her and her sister to Britain via bus. The Bosnian women who board the bus for the four-day trip are in turmoil: Gordana, a fifty-two-year-old who looks like Xena the Warrior Princess, reveals through tears that she is pregnant and must leave her husband in Bosnia; their only English-language interpreter descends into a nervous breakdown; and the weak English coffee only compounds Maric's confusion and exhaustion. They arrive in the vivid green of England's Lake District, greeted by volunteers who carry naive ideas about refugee behavior and appearance. Unbeknownst to the altruistic welcoming party, Maric and her fellow travelers are accustomed to a comfortable, middle-class life, and their new "refugee" status comes as a shock. Maric's humor and tenderness carry the reader through her love affair with a local boy and her eventual moves to larger towns. Interwoven are stories of other refugees--stories of love, escape, and burdens of the "refugee" label. Eventually, Maric returns to Bosnia, visits the ruined streets of her town, and finds that her old slippers, still by her bed, no longer fit.

[The Evolution of the Southern Backcountry: A Case Study of Lunenburg County, Virginia, 1746-1832, Richard R. Beeman](#) , 2011, 081220087X, 9780812200874. The Evolution of the Southern Backcountry is the story of an expanding frontier. Richard Beeman offers a lively and well-written account of the creation of bonds of community among the farmers who settled Lunenburg Country, far to the south and west of Virginia's center of political and economic activity. Beeman's view of the nature of community provides an important dynamic model of the transmission of culture from older, more settled regions of Virginia to the southern frontier. He describes how the southern frontier was influenced by those staples of American historical development: opportunity, mobility, democracy, and ethnic pluralism; and he shows how the county

A story of the summer of '69 for fans of John Ritter and Mike Lupica Brody Winslow is having a summer typical for most twelve-year-old boys--hanging out at the pool, listening to music, and hitting on girls. But the year is 1969: we've just landed on the moon, the Vietnam War is heating up, the Mets are beginning their famous World Series run, and Woodstock is rocking upstate New York. Down in New Jersey, twelve-year-old Brody is mostly concerned with the top ten hits on the radio and how much playing time he'll get on the football team. But when he goes along for the ride to Woodstock with his older brother, who is getting closer to the draft age, he starts to wake up to the world that is changing around him.

[The Faeries of Spring Cottage, Terri Windling](#) , 2003, 074320235X, 9780743202350. While searching for shelter from a rainstorm, a little faery named Sneezle is pursued by a band of strange creatures with wooden swords. They're not faeries, they're not goblins...in fact, he doesn't know what they are. With their long sticklike limbs, gnarled faces, and mouths full of knife-sharp teeth, they aren't like anything the denizens of Old Oak Wood have ever seen. Sneezle barely escapes, but another band of the ugly little creatures chases him out of the safety of the woods. Fleeing for his life, the little faery is forced to find refuge in a place that is almost as frightening as the stick men themselves -- in an old stone cottage at the edge of the forest. It is here that Sneezle must confront his greatest adventure and biggest fear. In *The Faeries of Spring Cottage*, fans of young Sneezle will be delighted to see that their reluctant hero is journeying out of Old Oak Wood (even if it is against his will) and encountering humans for the first time, as well as other enchanting, mysterious -- and sometimes scary -- new beings. This dazzling collaboration between renowned doll maker Wendy Froud and award-winning writer Terri Windling introduces a host of magical new characters, including a strange faery court beneath a kitchen sink, rat-faery warriors, and faery dolls that magically come to life. Art-directed by Brian Froud, creator of *Good Faeries/Bad Faeries*, this latest volume in the Sneezle series captures the diminutive hero on his latest adventure in vivid detail. Following the success of Wendy Froud and Terri Windling's first two Sneezle stories, *A Midsummer Night's Faery Tale* and *The Winter Child*, this new volume opens the magical window of enchantment once more with an extraordinary combination of story and art. *The Faeries of Spring Cottage* is destined to charm and captivate lovers of fairy tales, fantasy literature, and all things Froudian.
