

disabled students. This clearly written, thought provoking and hugely enjoyable manual is essential reading whether you're just starting out or are already active in the field. Taking improvisation as his focus and as the starting point of choreographic exploration, Adam Benjamin asks what it has to offer as an art form and how it can be better used to meet the changing needs of dance education. In the theoretical section Benjamin explores the history of a disintegrated dance practice, placing it within the wider context of cultural and political movements. He questions what is meant today when we talk about 'inclusive' or 'integrated dance' and what we might expect of it. The book includes over 50 exercises and improvisations designed to stimulate and challenge students at all levels of dance. Benjamin also includes useful hints on the practicalities of setting up workshops covering issues as diverse as class size, the safety aspects of wheelchairs and the accessibility of dance spaces.

[Gandhi: A Very Short Introduction, Bhikhu Parekh](#) , 2001, 0192854577, 9780192854575. Gandhi (1869-1948) was one of the few men in history to fight simultaneously on moral, religious, political, social, economic, and cultural fronts. During his time as a lawyer in South Africa he developed his strategy of non-violence: the idea of opposing unjust laws by non-violent protest, which he made the basis of his successful struggle against British rule in India. In this Very Short Introduction to Gandhi's life and thought, Bhikhu Parekh outlines both Gandhi's major philosophical insights and the limitations of his thought. He looks at Gandhi's cosmocentric anthropology, his spiritual view of politics, his unique form of liberal communitarianism, and his theories of oppression, non-violent action, and active citizenship. He also considers how the success of Gandhi's principles was limited by his lack of coherent theories of evil, and of state and power, and how his hostility to modern civilization impeded his appreciation of its complexity. Gandhi's life and thought has had an enormous impact both within and outside India, and he continues to be widely revered, as one of the greatest moral and political leaders of the twentieth century. [Staying with it: role models of perseverance, Emerson Klees](#) , 1999, 0963599003, 9780963599001. Staying With It: Role Models of Perseverance provides role models of perseverance through profiles of thirty-five individuals who displayed perseverance at one phase of their lives or throughout their lifetime. The biographical sketches represent seven areas of endeavor including: painters / architects / composers; engineers / scientists; reformers / activists; inventors / entrepreneurs; soldiers / sailors / airmen; and thinkers / authors. Above average intelligence, by itself, does not insure success. Other qualities, particularly perseverance, are necessary to accomplish our goals in life. These individuals show us how they overcame many obstacles to achieve their ultimate success. Examples include Beethoven overcoming deafness to compose, King Robert I of Scotland enduring six defeats before winning his first victory, and Douglas Bader becoming a Royal Air Force Ace in World War II after losing both legs in an air crash. If readers put their daily challenges and problems into perspective alongside those faced by these individuals, their concerns pale in comparison. They can then turn challenges and problems into opportunities, and their lives will be richer for it. They can learn from these achievers.

[The Suicide Index: Putting My Father's Death in Order, Joan Wickersham](#) , 2008, 0151014906, 9780151014903. When you kill yourself, you kill every memory everyone has of you. You're saying I'm gone and you can't even be sure who it is that's gone, because you never knew me. Sixteen years ago, Joan Wickersham's father shot himself in the head. The father she loved would never have killed himself, and yet he had. His death made a mystery of his entire life. Using an index that is most formal and orderly of structures Wickersham explores this chaotic and incomprehensible reality. Every bit of family history—marriage, parents, business failures—and every encounter with friends, doctors, and other survivors exposes another facet of elusive truth. Dark, funny, sad, and gripping, at once a philosophical and deeply personal exploration, *The Suicide Index* is, finally, a daughter's anguished, loving elegy to her father.

[The Impact of Labour 1920-1924: The Beginning of Modern British Politics, Maurice Cowling](#) , 2005, 0521619203, 9780521619202. Modern British politics begins with the Labour victory at the Spen Valley by-election in early 1920. In

the next four years, the challenge presented by its arrival as a major electoral force enabled the Conservative leaders to destroy the Coalition, the Liberal Party, and Lloyd George, to triumph as guardians of the social order under Baldwin at the General Election of 1924 and to establish the Labour-Conservative polarisation in the form which has persisted since. This conclusion emerges from Mr Cowling's detailed study of the high politics of these years, in which the various attempts to end and replace the Coalition are shown to have hinged on 'resistance to socialism'. This book is primarily an account of the initiatives of politicians and their reactions to one another. Mr Cowling's book is unique in the sources used; it is also the only study of this period to examine all three political parties in detail.

[Science of Science and Reflexivity, Pierre Bourdieu](#) , 2004, 074563060X, 9780745630601. One of the world's leading social thinkers, Bourdieu's work has become increasingly influential throughout the social sciences and humanities. In this new book he embarks on a sociological analysis of science and its legitimacy. Bourdieu argues that the emergence of the social sciences has had the effect of calling in to question the objectivity and validity of scientific activity, by relating it to its historic conditions. It is this relativistic and at times nihilistic interpretation of science that Bourdieu sets out to challenge, in an attempt to combine an accurate vision of the scientific arena with a realist theory of knowledge. The book also offers an elaboration of Bourdieu's notion of the scientific field and uses it to address a range of issues and debates in the natural and social sciences. This is a clear and accessible introduction to Bourdieu's views on science that will appeal to students of sociology, philosophy and the social sciences.

[The works of Thomas Southerne, Volume 2, , Thomas Southerne, Robert Jordan, Harold Love](#) , 1988, 0198127987, 9780198127987. Dublin-born Thomas Southerne has long been admired by scholars as one of the most important dramatists of the Restoration, but the lack of a modern edition has prevented his plays from taking their deserved place alongside those of Congreve, Wycherly, and Etherege. This two-volume collection--based on an exhaustive study of the earliest editions--brings together his ten plays and the small surviving body of non-dramatic writing. Volume Two features two of Southerne's best known tragedies, *The Fatal Marriage* and *Oroonoko*, based on stories by Aphra Behn, and the variants between the censored and uncensored texts of his political tragedy *The Spartan Dame*. In addition, the introduction contains the first biography of Southerne based on a comprehensive study of the surviving documentary records, and the editors have incorporated generous notes to clarify the many contemporary allusions and to relate Southerne's work to its sources and models.

[Theism, Atheism, and Big Bang Cosmology, William Lane Craig, Quentin Smith](#) , 1993, 0198263481, 9780198263487.

Contemporary science presents us with the remarkable theory that the universe began to exist about fifteen billion years ago with a cataclysmic explosion called "the Big Bang." The question of whether Big Bang cosmology supports theism or atheism has long been a matter of discussion among the general public and in popular science books, but has received scant attention from philosophers. This book sets out to fill this gap by means of a sustained debate between two philosophers, William Lane Craig and Quentin Smith, who defend opposing positions. Craig argues that the Big Bang that began the universe was created by God, while Smith argues that the Big Bang has no cause. Alternating chapters by the two philosophers criticize and attempt to refute preceding arguments. Their arguments are based on Einstein's theory of relativity and include a discussion of the new quantum cosmology recently developed by Stephen Hawking and popularized in A Brief History of Time.

[Myth, Truth, and Narrative in Herodotus, , Emily Baragwanath, Mathieu de Bakker](#) , 2012, 0199693978, 9780199693979.

Herodotus, the 'Father of History', is infamously known for having employed elements more akin to mythological tales than to unvarnished 'truth' in translating his historical research into narrative form. While these narratives provide valuable source material, he could not have surmised the hostile reception his work would receive in later generations. This mythical aspect of the Histories led many successors, most notoriously Plutarch, to blame Herodotus for spinning far-fetched lies, and to set him apart as an untrustworthy historian. Echoes of the same criticism resounded in twentieth-century scholarship, which found it difficult to reconcile Herodotus' ambition to write historical stories 'as they really happened' with the choices he made in shaping their form. This volume brings together 13 original articles written by specialists in the fields of ancient Greek literature and history. Each article seeks to review, re-establish, and rehabilitate the origins, forms, and functions of the Histories' mythological elements. These contributions throw new light on Herodotus' talents as a narrator, underline his versatility in shaping his work, and reveal how he was inspired by and constantly engaged with his intellectual milieu. The Herodotus who emerges is a Herculean figure, dealing with a vast quantity of material, struggling with it as with the Hydra's many-growing heads, and ultimately rising with consummate skill to the organisational and presentational challenges it posed. The volume ultimately concludes that far from being unrelated to the 'historical' aspects of Herodotus' text, the 'mythic' elements prove vital to his presentation of history.

[Domestic Animals: The Neoprimitive Style](#), [Andrea Branzi](#), [Nicoletta Branzi](#) , 1987, 0262521261, 9780262521260. Andrea Branzi, one of Italy's foremost designers and critics and Nicoletta Branzi, designer of limited edition art clothing for women, introduce the neoprimitive style under the generic title "Domestic Animals." These mysterious creature-objects are oriented to domestic settings, intended to be used or worn, but they are also fetishistic and contemplative, arousing expectations that magic or tribal rituals are about to be performed. Uniting precision of design with natural raw materials, these objects fashioned from tree trunks, sticks of wood and animal skins joined to steel "bamboo" rods and painted in bright, totemic colors fascinate us. Taken out of their wild settings and tamed by technology, "domestic animals" establish a loving relationship with man, sharing his most private space. We have not seen anything like them in the world of interior, furniture, or fashion design before. The ideas and creations in Domestic Animals were developed by the Branzis over several years, and can be understood as a metaphor of the relationship that links man to a number of animal and technical presences within the home. The Branzis have created clothing, furniture, and objects of decoration

that challenge the conventional notions of habitation: Where living too often takes place in empty spaces marked out by couches they have introduced an environment of archetypal symbols and materials that invite a new way of inhabiting the home. Andrea Branzi lives and works in Milan where he is Educational Director of Domus Academy and Editorial Director of MODO. His last book, *The Hot House: Italian New Wave Design*, is an MIT Press paperback.

[Juvenilia, Ken Chen](#) , 2010, 0300160089, 9780300160086. Ken Chen is the 2009 winner of the annual Yale Younger Poets competition. These poems of maturation chronicle the poet's relationship with his immigrant family and his unknowing attempt to recapture the unity of youth through comically doomed love affairs that evaporate before they

start. Hungrily eclectic, the wry and emotionally piercing poems in this collection steal the forms of the shooting script, blues song, novel, memoir, essay, logical disputation, aphorism—even classical Chinese poetry in translation. But as contest judge Louise Gluck notes in her foreword, The miracle of this book is the degree to which Ken Chen manages to be both exhilaratingly modern (anti-catharsis, anti-epiphany) while at the same time never losing his attachment to voice, and the implicit claims of voice: these are poems of intense feeling. . . . Like only the best poets, Ken Chen makes with his voice a new category.

[The State of Play: Law, Games, and Virtual Worlds, J. M. Balkin, Beth Simone Noveck](#) , 2006, 081479971X, 9780814799710. "This is a spectacular collection of essays on the present and future of virtual worlds. It's a perfect introduction for those who have yet to experience them, and more important, a thoughtful companion for those who do." Jonathan Zittrain, Oxford University "The State of Play is an extremely comprehensive look into digital worlds and how those worlds are evolving cultures, changing lives, reshaping the way we think and communicate. If you want to understand where modern culture is headed and learn more about incredibly fascinating experiences taking place in virtual worlds, pick up and read this book now." Richard Garriott, a.k.a. Lord British, Creator of Ultima Online and Executive Producer, Ncsoft "These essays, by the best thinkers in their fields, will be read, debated, taught, and cited in court cases as we struggle to figure out how to live in a world which is part digital and part social, part real and part imaginary." Henry Jenkins, author of Convergence Culture: Where Old and New Media Collide "Is useful and interesting for students of surveillance." Surveillance & Society "With diverse essays from game designers, social scientists and legal scholars, The State of Play is a provocative consideration of virtual jurisprudence." Paste Magazine "For those who want to skip over the hype and dive into the issue, it is hard to imagine a better resource." Cecily Deane Mak, Senior Counsel, Music at RealNetworks. "Reading The State of Play is an adventure. it is the first real step of a journey into the outer limits of the physical world And The inner realms of the virtual within the boundaries of society's comfort zone. it is an exploratory glimpse into how digital worlds may change the future, reshape our own reflection, and challenge real-world laws." New York Law Journal "...traces the fate of playtime over the centuries." Slate.com The State of Play presents an essential first step in understanding how new digital worlds will change the future of our universe. Millions of people around the world inhabit virtual worlds: multiplayer online games where characters live, love, buy, trade, cheat, steal, and have every possible kind of adventure. Far more complicated and sophisticated than early video games, people now spend countless hours in virtual universes like Second Life and Star Wars Galaxies not to shoot space invaders but to create new identities, fall in love, build cities, make rules, and break them. As digital worlds become increasingly powerful

and lifelike, people will employ them for countless real-world purposes, including commerce, education, medicine, law enforcement, and military training. Inevitably, real-world law will regulate them. But should virtual worlds be fully integrated into our real-world legal system or should they be treated as separate jurisdictions with their own forms of dispute resolution? What rules should govern virtual communities? Should the law step in to protect property rights when virtual items are destroyed or stolen? These questions, and many more, are considered in *The State of Play*, where legal experts, game designers, and policymakers explore the boundaries of free speech, intellectual property, and creativity in virtual worlds. The essays explore both the emergence of law in multiplayer online games and how we can use virtual worlds to study real-world social interactions and test real-world laws. Curriculum maps are among the simplest yet most effective tools for improving teaching and learning. Because they require people to draw explicit connections between content, skills, and assessment measures, these maps help ensure that all aspects of a lesson are aligned not only with each other, but also with mandated standards and tests. In *Getting Results with Curriculum Mapping*, Heidi Hayes Jacobs and her coauthors offer a wide range of perspectives on how to get the most out of the curriculum mapping process in districts and schools. In addition to detailed examples of maps from schools across the United States, the authors offer concrete advice on such critical issues as* Preparing educators to implement mapping procedures,* Using software to create unique mapping databases,* Integrating decision-making structures and staff development initiatives through mapping,* Helping school communities adjust to new curriculum review processes, and* Making mapping an integral part of literacy training. Teachers, administrators, staff developers, and policymakers alike will find this book an essential guide to curriculum mapping and a vital resource for spearheading school improvement efforts. [The Way of Failure: Winning Through Losing, Mariana Caplan](#) , 2001, 1890772100, 9781890772109. In this straight-talking, inspirational view of failure, Marianna Caplan unmask it for what it really is: She tells us to how to meet failure on its own field, how to learn its twists and turns, its illusions and its realities. Only then, she advises, is one equipped to engage failure as a means of ultimate winning, and in a way that far exceeds our culturally-defined visions of success. This book offers a direct means of using failure for* profound self-understanding* increased compassion for self and others* significant spiritual development. Instead of speaking to where we should be, this book looks to our lives as they are now, realistically -- since everybody has experienced failure in big or small ways at some time or another in life. This book deals with a subject most people consider negative or depressing, but it is actually highly inspirational, giving us permission to find joy and contentment within failure. The Way of Failure covers many aspects of the subject, including: * the failure of ordinary love* the failure of conventional happiness* the failure of worldly success* the failure of ideas and philosophy* the failure of security* the failure of meaning* and ultimately, the failure of failure.

This book, a revised and extended version of Professor Davies's 1988 Wiles Lectures, explores the ways in which the kings and aristocracy of England sought to extend their domination over Ireland, Scotland and Wales in the twelfth and thirteenth centuries. It analyses the mentalities of domination and subjection - how the English explained and justified their pretensions and how native rulers and societies in Ireland and Wales responded to the challenge. It also explains how the English monarchy came to claim and exercise a measure of 'imperial' control over the whole of the British Isles by the end of the thirteenth century, converting a loose domination into sustained political and governmental control. This is a study of the story of the Anglo-Norman and English domination of the British Isles in the round. Hitherto historians have tended to concentrate on the story in each country - Ireland, Scotland and Wales - individually. This book looks at the issue comparatively, in order to highlight the comparisons and contrasts in the strategies of domination and in the responses of native societies.

[Teaching to Transgress: Education as the Practice of Freedom, Bell Hooks](#) , 1994, 0415908078, 9780415908078. In this book, the author shares her philosophy of the classroom, offering ideas about teaching that fundamentally rethink democratic participation. She writes about a new kind of education, education as the practice of freedom. She advocates the process of teaching students to think critically and raises many concerns central to the field of critical pedagogy, linking them to feminist thought. In the process, these essays face squarely the problems of teachers who do not want to teach, of students who do not want to learn, of racism and sexism in the classroom. Teaching students to "transgress" against racial, sexual, and class boundaries in order to achieve the gift of freedom is, for the author, the teacher's most important goal. -- From back cover

[Best Practices of Literacy Leaders: Keys to School Improvement, Rita M. Bean, Allison Swan Dagen](#) , 2011, 1609189442, 9781609189440. Bringing together leading experts, this book presents the principles of effective literacy leadership and describes proven methods for improving instruction, assessment, and schoolwide professional development. The book shows how all school staff--including reading specialists and coaches, administrators, teachers, and special

educators--can play an active role in nurturing a culture of collaboration and promoting student achievement. Best practices are identified for creating strong elementary and secondary literacy programs, differentiating instruction, supporting English language learners, utilizing technology, building home-school partnerships, and much more. User-friendly features include case examples, guiding questions, and engagement activities in each chapter.

[Divorcing Jack, Colin Bateman](#) , 1995, 1559703105, 9781559703109. In this explosive thriller set in "post-terrorist" Belfast, the old hatreds continue to fester and the politics remain deeply personal. Anyone, at any moment, may decide the war's not yet over. Belfast journalist Dan Starkey is caught by his wife wrapped in the arms of a woman he hardly knows. Within hours his virtually anonymous girlfriend has been murdered, and before anyone can sort out whether she was killed by the IRA, Protestant extremists, or a jealous beau, Starkey has become the killer's next target. He had always kept himself above Belfast's violent fray with the cynical, beer-drenched wit that fueled his notorious column in a Protestant newspaper. But when the Belfast police figure Starkey as their prime suspect, his wits are suddenly all he has left to keep himself ahead of both sides of the law - and to win back his wife. As he seeks to solve the crime himself, his frantic pursuit of the only clues to the killer's identity leads him deep into the most guarded reaches of Northern Irish political power.

[Mechanics and Durability of Solids, Volume 2, Franz-Josef Ulm, Olivier Coussy](#) , 2008, 013140282X, 9780131402829. Intended for a first course in continuum mechanics and constitutive modeling at the senior undergraduate and the introductory graduate level, the focus of this book is on a unified "mechanistic" approach that uses energy concepts for modeling a large range of engineering material behavior. In the presentation, 1D-Think models lead to the development of various fundamentals of continuum mechanics, such as deformation and strain, momentum balance, stress and stress states, thermoelasticity and elasticity bounds, plasticity, and yield design. Along these lines, the bases for a common language among core disciplines in engineering sciences are developed, in a mathematical, yet eloquent manner. The textbook evolved from lecture notes of a one-semester course developed by the authors at the Massachusetts Institute of Technology, as well as in France, Germany, and Brazil. "Key Features of the Book" Parts I and II introduce the two pillars of continuum mechanics, strain and stresses, with a focus on geometrical and physical interpretation, starting with the finite deformation theory. Part III is dedicated to non-dissipative material behavior, with a focus on thermoelasticity and variational methods in elasticity, as well as to its application in heterogeneous material systems. Part IV starts with 1D-plasticity, introducing ideal plasticity, hardening plasticity, and associated energy transformations. It is within the energy approach that the 1D-Think models are extended to 3D, introducing the notion of associated and non-associated plasticity. Finally, the concept of plastic collapse is introduced, leading to the development of the upper- and lower-bound theorems of limit analysis, which form the basis of modern yield design for engineering structures and material systems. The mathematical developments in each chapter are illustrated through a set of accompanying blackboard

exercises of the subject matter, a Training Set for recitation, followed by a broad spectrum of worked exercises suitable for homework, classroom assignments, quizzes, or take-home examinations.

[On Booze \(New Directions Pearls\), F. Scott Fitzgerald](#) , 2011, 081121933X, 9780811219334. A collection of F. Scott Fitzgeralds best drinking stories makes this the most intoxicating New Directions Pearl yet! First you take a drink, F. Scott Fitzgerald once noted, then the drink takes a drink, then the drink takes you. Fitzgerald wrote alcohol into almost every one of his stories. On Booze gathers debutantes and dandies, rowdy jazz musicians, lost children and ragtime riff-raff into a newly compiled collection taken from The Crack-Up, and other works never before published by New Directions. On Booze portrays The Jazz Age as Fitzgerald experienced it: roaring, rambunctious, and lush with quite a hangover.
