[The Structure of Justification, Robert Audi](#) , 1993, 0521446120, 9780521446129. This collection of papers (including three completely new ones) by one of the foremost philosophers in epistemology transcends two of the most widely misunderstood positions in philosophy--foundationalism and coherentism. Audi proposes a distinctively moderate, internalist foundationalism that incorporates some of the virtues of both coherentism and reliabilism. He develops important distinctions between positive and negative epistemic dependence, substantively and conceptually naturalistic theories, dispositional beliefs and dispositions to believe, episodically and structurally inferential beliefs, first and second order internalism, and rebutting as opposed to refuting skepticism. These contrasts are applied not only to rational belief, but to rational action and the rationality of desires and intentions. The overall position is a pluralist, moderately rationalistic, internalist theory of justification and a partly externalist conception of knowledge. However, by virtue of offering a theory of rationality as well as an account of knowledge and justified belief, it will interest philosophers of ethics, science, and the social sciences and teachers and students of epistemology.

[African Pride: \(from the Other Side\), Nilene Omodele Adeoti Foxworth](#) , 1994, 0964413701, 9780964413702. AFRICAN PRIDE shares over twenty years of African travel--with exotic illustrations. It has been labeled an exciting trailblazer because of the author's ability to share her innate feelings on the sensitive issues of tribalism, racism, & chauvinism. She deals candidly with the agony & pain of being a descendant of slavery, & the profound effect it has had on her. In spite of the many cultural differences, she feels renewed in her homeland (Africa). She shares her exciting days & lonely days in Zimbabwe, Tanzania, & Ghana & dramatizes her scenes with poetic excerpts. She unveils many of the negatives of European history with references dating from 1872 to 1994. Tribal wars are blamed on "the perplexing insensitivity of men" whom she addresses with a poem titled "AIN'T CHA GOT NO SHAME?" In the same chapter she quotes Jesus (Luke 7:44) to prove that women are more sensitive & benevolent. With African Pride in her heart, she shares the beauty of Africa as if it were a sacred paradise--a paradise she struggles to reclaim. Historian, Dr. S. E. Pheko comments:

"AFRICAN PRIDE is a serious & interesting book...it makes you think, laugh, & cry." Professor Ama Ata Aidoo comments: "I wish every educator could read it." [Glyphbinder, T. Eric Bakutis](#) , 2013, 0984039120, 9780984039128. Seventy years ago, the blood magic of the All Province War almost destroyed the world. Now the remaining mages of the Five Provinces maintain strict academies to guide and regulate gifted persons with the power to scribe blood glyphs: arcane symbols that alter reality itself. Kara is one of these students, a Glyphbinder, and her mother is dying. There is no cure, but there is one hope: Transference, a glyph that will swap Kara's healthy body for her mother's. The glyph is complex, the reagents scarce, and Kara's quest to complete it will cost her more than she knows. The demonic forces behind the All Province War are stirring again, linked to Kara and her mother in ways she could never suspect. These ancient demons seek more than those she loves. They seek Kara, body and soul, and if she cannot stop them, they will use her to devour the world.

Teaching Music to Students with Autism provides a comprehensive study of the education of students with autism within the music classroom. The book is designed for music educators, music teacher educators, and all those who have an interest in the education of students with autism. The authors focus on the diagnosis of autism, advocating for students and music programs, and creating and maintaining a team approach when working with colleagues. A significant portion of the book is focused on understanding the communication, cognition, behavior, sensory, and socialization challenges inherent in working with students with autism. The authors suggest ways to structure classroom experiences and learning opportunities for all students. Vignettes and classroom snapshots from experienced teachers provide additional opportunities to transfer theory to real-life application.

[Birds in Scotland, Valerie M. Thom](#) , 2011, 1408138379, 9781408138373. This impressively comprehensive study and review of the birds in Scotland by Valerie Thom, editor of Scottish Birds and past-President of the Scottish Ornithologists' Club, may be said to follow on where the celebrated two volumes of The Birds of Scotland (1953), by Dr Baxter and Miss Rintoul, left off. It does more than that, however, since not only has there been a profound increase in ornithological coverage and data (as reflected in the species accounts), there have also been great changes in habitat and environment since the days of Baxter & Rintoul. These aspects form the themes of the ten preliminary chapters reviewing the Scottish scene today in terms of habitat, conservation, birdwatching and the changes in species status and distribution. The species accounts, the backbone of the book, review the period 1950-83 but include, where practicable, records of rarities and details of counts up to the spring of 1985; there are also brief summaries of earlier data based on the researches of Baxter & Rintoul. In all, 497 species are dealt with. The texts of major species accounts are complemented by 173 distribution maps and many tables of relevant data, and there are 129 species drawings by a team of artists under the editorship of Donald Watson, who also contributes chapter head pieces and other drawings. A section of photographs

illustrates the varied habitats typical of Scotland today. There are, further, appendices and an extensive bibliography. The book is of great and obvious interest to all birdwatchers in Scotland but it will be of special value, too, to the many thousands of birdwatching visitors from elsewhere in these islands and from countries abroad. The Scottish Ornithologists' Club, for whom the book is published, and all whose records and researches made the author's work possible, have reason to be proud of Valerie Thom's achievement. The book's users will be indebted to them all for this comprehensive and essential guide to birds in Scotland.

Drawings by the great Italian Mannerist painter and poet Agnolo Bronzino (1503-1572) are extremely rare. This important and beautiful publication brings together for the first time nearly all of the sixty drawings attributed to this leading draftsman of the 16th century. Each drawing is illustrated in color, discussed in detail, and shown with many comparative photographs. Bronzino's technical virtuosity as a draftsman and his mastery of anatomy and perspective are vividly apparent in each stroke of the chalk, pen, or brush. The younger generations of Florentine artists particularly admired Bronzino for his technical virtuosity as a painter, and Giorgio Vasari praised him for his powers as a disegnatore (designer and draftsman).

"African Americans and Criminal Justice: An Encyclopedia" comprises descriptive essays documenting the ways in which people of African descent have been victimized by oppressive laws enacted by local, state, and federal authorities in the United States. The entries also describe how Blacks became disproportionately represented in national crime statistics, largely through their efforts to resist legalized oppression in early American history, and present biographies of famous and infamous Black criminal suspects and victims throughout early American history and in contemporary times. Providing coverage of law and criminal justice practices from the precolonial period, including the introduction of African slaves, up to practices in modern-day America, this encyclopedia presents a frank and

comprehensive view of how Americans of African descent have come to be viewed as synonymous with criminality. This book represents an essential learning resource for all American citizens, regardless of race or age.

[Psychology and Space, Yuri Gagarin, Vladimir Lebedev](#) , 2003, 1410206742, 9781410206749. The time is not far distant when space expeditions will have dozens of members. The American Apollo-11 spacecraft has already landed on the Moon. People will set foot on Mars, and, possibly, other planets. How will they stand up to the difficult conditions there? What sort of problems will they encounter? Will they be able to cope with them? Research work done by space psychologists in recent years has shown that the unusual conditions in store for people on a space voyage may have a decisive effect on its outcome. For this reason an astronaut's psychological training is no less important than his ability to control his spacecraft. It is this aspect of astronaut training that is dealt with by the authors of this book: the world's first astronaut, Yuri Gagarin, Hero of the Soviet Union, and the space psychologist Vladimir Lebedev. But this is not a book about psychology alone. It also speaks of Soviet space hardware, describes actual space flights, and surveys investigations carried out in aviation and space medicine.

[Vocabulary for the Common Core, Robert Marzano, Julia Simms](#) , 2013, 0985890223, 9780985890223. The Common Core State Standards (CCSS) present unique demands on students to learn vocabulary and teachers to teach it. Authors Robert J. Marzano and Julia A. Simms address the need for CCSS-aligned vocabulary instruction in their three-part resource Vocabulary for the Common Core. They guide teachers and teams toward the creation of a successful vocabulary program while highlighting both general academic and domain-specific terms from the mathematics and English language arts standards. Direct vocabulary instruction is crucial for student success, especially in light of the CCSS, and Marzano and Simms show K12 educators step by step how to achieve success for all students. In part I, the authors introduce readers to Isabel Beck, Margaret McKeown, & Linda Kucans three tiers of vocabulary: Tier 1 includes basic words, Tier 2 includes general academic or literary words, and Tier 3 includes words specific to subject areas. . In part II, readers choose Tier 2 terms to integrate academic vocabulary into their classrooms based on classroom-ready descriptions and examples of each term. Part III allows readers to choose Tier 3 CCSS terms applicable to their subject area and grade level from into 116 measurement topics (groups of related words).

[Nonplussed!: Mathematical Proof of Implausible Ideas, Julian Havil](#) , 2010, 1400837383, 9781400837380. Math--the

application of reasonable logic to reasonable assumptions--usually produces reasonable results. But sometimes math generates astonishing paradoxes--conclusions that seem completely unreasonable or just plain impossible but that are nevertheless demonstrably true. Did you know that a losing sports team can become a winning one by adding worse players than its opponents? Or that the thirteenth of the month is more likely to be a Friday than any other day? Or that cones can roll unaided uphill? In *Nonplussed!*--a delightfully eclectic collection of paradoxes from many different areas of math--popular-math writer Julian Havil reveals the math that shows the truth of these and many other unbelievable ideas. *Nonplussed!* pays special attention to problems from probability and statistics, areas where intuition can easily be wrong. These problems include the vagaries of tennis scoring, what can be deduced from tossing a needle, and disadvantageous games that form winning combinations. Other chapters address everything from the historically important Torricelli's Trumpet to the mind-warping implications of objects that live on high dimensions. Readers learn about the colorful history and people associated with many of these problems in addition to their mathematical proofs. *Nonplussed!* will appeal to anyone with a calculus background who enjoys popular math books or puzzles.

[Planets in Peril: A Critical Study of C. S. Lewis's Ransom Trilogy, David C. Downing](#) , 1995, 087023997X, 9780870239977. Literary scholar, novelist, and Christian apologist, C. S. Lewis was a remarkable and enigmatic man. He is perhaps best known today for his popular series of children's books, the Chronicles of Narnia, which continue to sell

more than a million copies a year. He also wrote science fiction in the form of interplanetary fantasies - a series of three novels known as the Ransom Trilogy. This book offers the first full-length critical assessment of that trilogy, placing the three volumes in the context of Lewis's life and work. David C. Downing reveals the autobiographical and theological subtexts of *Out of the Silent Planet*, *Perelandra*, and *That Hideous Strength*, showing as well how much Lewis the classical and medieval scholar influenced the work of Lewis the creator of interplanetary fantasies. Downing also examines the chief imaginative and intellectual sources of the trilogy and addresses persistent issues raised by reviewers and critics: Was Lewis's lifelong devotion to fantasy a mark of intellectual independence or a case of "arrested emotional development"? Were his views on women sexist, even misogynist? How much of his critique of modern science and technology was well informed and how much the result of prejudice or habitual suspicion of all things modern? A brief appendix on "The Dark Tower" fragment provides what background is known about this mysterious document, summarizes the story as far as Lewis developed it, and comments on how this unfinished work fits in with the Ransom books published during Lewis's lifetime.

[Asylum: Inside the Closed World of State Mental Hospitals,](#) , 2009, 0262013495, 9780262013499. For more than half the nation's history, vast mental hospitals were a prominent feature of the American landscape. From the mid-nineteenth century to the early twentieth, over 250 institutions for the insane were built throughout the United States; by 1948, they housed more than a half million patients. The blueprint for these hospitals was set by Pennsylvania hospital superintendent Thomas Story Kirkbride: a central administration building flanked symmetrically by pavilions and surrounded by lavish grounds with pastoral vistas. Kirkbride and others believed that well-designed buildings and grounds, a peaceful environment, a regimen of fresh air, and places for work, exercise, and cultural activities would heal mental illness. But in the second half of the twentieth century, after the introduction of psychotropic drugs and policy shifts toward community-based care, patient populations declined dramatically, leaving many of these beautiful, massive buildings--and the patients who lived in them--neglected and abandoned. Architect and photographer Christopher Payne spent six years documenting the decay of state mental hospitals like these, visiting seventy institutions in thirty states. Through his lens we see splendid, palatial exteriors (some designed by such prominent architects as H. H. Richardson and Samuel Sloan) and crumbling interiors--chairs stacked against walls with peeling paint in a grand hallway; brightly colored toothbrushes still hanging on a rack; stacks of suitcases, never packed for the trip home. Accompanying Payne's striking and powerful photographs is an essay by Oliver Sacks (who described his own experience working at a state

mental hospital in his book Awakenings). Sacks pays tribute to Payne's photographs and to the lives once lived in these places, "where one could be both mad and safe."

A comprehensive reference for engineers and researchers, Gas Turbine Heat Transfer and Cooling Technology, Second Edition has been completely revised and updated to reflect advances in the field made during the past ten years. The second edition retains the format that made the first edition so popular and adds new information mainly based on selected published papers in the open literature. See Whats New in the Second Edition: State-of-the-art cooling technologies such as advanced turbine blade film cooling and internal cooling Modern experimental methods for gas turbine heat transfer and cooling research Advanced computational models for gas turbine heat transfer and cooling performance predictions Suggestions for future research in this critical technology The book discusses the need for turbine cooling, gas turbine heat-transfer problems, and cooling methodology and covers turbine rotor and stator heat-transfer issues, including endwall and blade tip regions under engine conditions, as well as under simulated engine conditions. It then examines turbine rotor and stator blade film cooling and discusses the unsteady high free-stream turbulence effect on simulated cascade airfoils. From here, the book explores impingement cooling, rib-turbulent cooling, pin-fin cooling, and compound and new cooling techniques. It also highlights the effect of rotation on rotor coolant passage heat transfer. Coverage of experimental methods includes heat-transfer and mass-transfer techniques, liquid crystal thermography, optical techniques, as well as flow and thermal measurement techniques. The book concludes with discussions of governing equations and turbulence models and their applications for predicting turbine blade heat transfer and film cooling, and turbine blade internal cooling.

[The Fourth of July: And the Founding of America, Peter De Bolla](#) , 2009, 1590202104, 9781590202104. A new and utterly surprising look at the history behind the birth of the United States The United States is a nation that touts its diversity, but there is one tradition that Americans love to share. Every year on the Fourth of July, Americans celebrate (and, in effect, re-enact) the founding of their country. Independence Day is one of our favorite traditions-but much of the inherited lore that surrounds this holiday is mythological, not historical. In this book, Peter de Bolla teases out the true story of the Fourth of July. De Bolla traces the holiday's history from 1776 through the Civil War, the Cold War, and the present. This enlightening exploration of America's birthday offers a fascinating window into the history of the nation and its people.

[The Oxford Handbook of the Archaeology of the Levant: c. 8000-332 BCE, Margreet L. Steiner, Ann E. Killebrew](#) , 2013, 019921297X, 9780199212972. This Handbook aims to serve as a research guide to the archaeology of the Levant, an area situated at the crossroads of the ancient world that linked the eastern Mediterranean, Anatolia, Mesopotamia, and Egypt. The Levant as used here is a historical geographical term referring to a large area which today comprises the modern states of Israel, Jordan, Lebanon, western Syria, and Cyprus, as well as the West Bank, Gaza, and the Sinai. Unique in its treatment of the entire region, it offers a comprehensive overview and analysis of the current state of the archaeology of the Levant within its larger cultural, historical, and socio-economic contexts. The Handbook also attempts to bridge the modern scholarly and political divide between archaeologists working in this highly contested region. Written by leading international scholars in the field, it focuses chronologically on the Neolithic through Persian periods - a time span during which the Levant was often in close contact with the imperial powers of Egypt, Anatolia, Assyria, Babylon, and Persia. This volume will serve as an invaluable reference work for those interested in a contextualised archaeological account of this region, beginning with the tenth millennium BCE 'agricultural revolution', until the conquest of Alexander the Great that marked the end of the Persian period.

[Who's in Charge?: Free Will and the Science of the Brain, Michael Gazzaniga](#) , 2012, 1780337760, 9781780337760. The

prevailing orthodoxy in brain science is that since physical laws govern our physical brains, physical laws therefore govern our behaviour and even our conscious selves. Free will is meaningless, goes the mantra; we live in a "determined" world. Not so, argues the renowned neuroscientist Michael S. Gazzaniga as he explains how the mind, "constrains" the brain just as cars are constrained by the traffic they create. Writing with what Steven Pinker has called "his trademark wit and lack of pretension," Gazzaniga ranges across neuroscience, psychology and ethics to show how incorrect it is to blame our brains for our behaviour. Even given the latest insights into the physical mechanisms of the mind, he explains, we are responsible agents who should be held accountable for our actions, because responsibility is found in how people interact, not in brains. An extraordinary book, combining a light touch with profound implications, Who's in Charge? is a lasting contribution from one of the leading thinkers of our time.

[The Gifts of Imperfection: Let Go of Who You Think You're Supposed to Be and Embrace Who You Are, Bren Brown](#) , 2013, 1592859895, 9781592859894. "This important book is about the lifelong journey from ?What will people think?' to ?I am enough.' Brown's unique ability to blend original research with honest storytelling makes reading The Gifts of Imperfection like having a long, uplifting conversation with a very wise friend who offers compassion, wisdom, and great advice." --Harriet Lerner, New York Times best-selling author of The Dance of Anger and The Dance of Connection "Bren Brown courageously tackles the dark emotions that get in the way of leading a fuller life; read this book and let some of that courage rub off on you." --Daniel H. Pink, New York Times best-selling author of A Whole New Mind "Courage, compassion, and connection: Through Bren 's research, observations, and guidance, these three little words can open the door to amazing change in your life." --Ali Edwards, author of Life Artist Each day we face a barrage of images and messages from society and the media telling us who, what, and how we should be. We are led to believe that if we could only look perfect and lead perfect lives, we'd no longer feel inadequate. So most of us perform, please, and perfect, all the while thinking, What if I can't keep all of these balls in the air? Why isn't everyone else working harder and living up to my expectations? What will people think if I fail or give up? When can I stop proving myself? In The Gifts of Imperfection, Bren Brown, Ph.D., a leading expert on shame, authenticity and belonging, shares what she's learned from a decade of research on the power of Wholehearted Living ? a way of engaging with the world from a place of worthiness. In her ten guideposts, Brown engages our minds, hearts, and spirits as she explores how we can cultivate the courage, compassion, and connection to wake up in the morning and think, No matter what gets done and how much is left undone, I am enough, And to go to bed at night thinking, Yes, I am sometimes afraid, but I am also brave. And, yes, I am imperfect and vulnerable, but that doesn't change the truth that I am worthy of love and belonging. Bren Brown, Ph.D., L.M.S.W., is a writer and research professor at the University of Houston Graduate College of Social Work, where she studies how shame affects the way people live, love, parent, work, and build relationships. A dynamic public speaker, she frequently presents on the topic of shame resilience at conferences and public events. Visit her popular blog

[Trading Blocs: Alternative Approaches to Analyzing Preferential Trade Agreements, , Jagdish N. Bhagwati, Pravin Krishna,](#)

[Arvind Panagariya](#) , 1999, 0262024500, 9780262024501. The recent proliferation of free trade areas and customs unions in the world trading system has led to an explosive revival of interest in the economic analysis of Preferential Trade Arrangements (PTAs). The principal theoretical question of the 1950s and 1960s (Viner) was whether PTAs would create or divert trade, causing welfare improvement or loss. The principal theoretical question (Bhagwati) of the late 1980s and 1990s has been whether PTAs encourage or discourage the worldwide nondiscriminatory freeing of trade. The essays in this volume present the central contributions to the analytical approaches developed to examine these questions. The first section of the book presents a synthesis and analytical guide to the issues, and to the theoretical research, as they have developed since 1950. The following sections contain the theoretical contributions themselves, grouped by analytical approach. This volume will enable graduate students, scholars of PTAs, and policymakers concerned with trade liberalization to grasp the analytical relationships among the sometimes disparate contributions of nearly a half century of theoretical research on PTAs. Graeme's new book directly addresses the questions of 2 million, often despairing, Australians who are trying to help a loved one with depression. The advice is based on interviews with over 300 depression sufferers and 100 caregivers. In a highly sympathetic style it lists the seven frustrations of carers as revealed by the research and then sensitively outlines possible solutions. It is careful to highlight that each situation is unique. Back From the Brink Too skillfully blends this information with first-hand accounts from carers for some of the interviewees from the first book to maintain continuity in the series. It also includes direct quotes from carers on what they have found most helpful in ensuring their own good health whilst supporting their loved one.

This groundbreaking book presents the findings of Rosemary Ellen Guiley and Philip J. Imbrogno's investigation into the powerful and mysterious interdimensional beings known as djinn or genies. It reveals what the djinn are, where they can be found--and their hidden agenda against the human race. Working with material compiled from a variety of sources--including their own case files, Middle Eastern lore, the Qur'an, teachings of Islamic scholars, and the latest theories in quantum physics--the authors explore the relationship between the djinn, demons, fairies, shadow people, and extraterrestrials. They discuss the military's interest in these clandestine beings, offer eyewitness accounts of modern human encounters with the djinn, and reveal the location of interdimensional entry points in North America.

All the majesty and mayhem of Greek mythology springs to life once more in the powerful second novel based on the bestselling and critically acclaimed God of War franchise. Once the mighty warrior Kratos was a slave to the gods, bound to do their savage bidding. After destroying Ares, the God of War, Kratos was granted his freedom by Zeus and even given the ousted gods throne on Olympus. But the other gods of the pantheon didn't take kindly to Kratos's ascension and, in turn, conspired against him. Banished, Kratos must ally himself with the despised Titans, ancient enemies of the Olympians, in order to take revenge and silence the nightmares that haunt him. God of War II takes the videogames action to electrifying new heights, and adds ever more fascinating layers to the larger-than-life tale of Kratos.

Conceived in an embrace designed to comfort a dying man, born to a servant and raised as a hired hand, Eva Luna learns quickly that she has a talent that belies her humble start: the gift of storytelling. As the years pass and her imprudent nature sends Eva from household to household--from the home of a doctor famed for mummifying the dead to a colorful whorehouse and the care of a beautiful transsexual--it is Eva's magical imagination that keeps her alive and fuels her ardent encounters with lovers of all kinds. And as her South American homeland teeters on the brink of political chaos, and Eva's fate is intertwined with guerrilla fighters and revolutionaries, she will find her life's calling--and the soul mate who will envelop her in a love entirely beyond her mystical inventions. "Eva Luna" is a literary triumph, a novel brimming with battles and passions, rebellions and reunions--and some of the most exquisite characters Isabel Allende has ever created.

[Horace: Oxford Bibliographies Online Research Guide, Oxford University Press, Randall McNeill](#) , 2010, 0199805113, 9780199805112. This ebook is a selective guide designed to help scholars and students of the ancient world find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading international authority on the subject, the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated. A reader will discover, for instance, the most reliable introductions and overviews to the topic, and the most important publications on various areas of scholarly interest within this topic. In classics, as in other disciplines, researchers at all levels are drowning in potentially useful scholarly information, and this guide has been created as a tool for cutting through that material to find the exact source you need. This ebook is just one of many articles from Oxford Bibliographies Online: Classics, a continuously updated and growing online resource designed to provide authoritative guidance through the scholarship and other materials relevant to the study of classics. [Partnering with Nature: The Wild Path to Reconnecting with the Earth, Catriona MacGregor](#) , 2010, 1416592458, 9781416592457. Partnering with Nature is a simple book with a powerful message: our connections to the natural environment and ultimately, to ourselves are crucial in today's fragmented world. As each successive generation moves farther away from nature, the growing disconnect is expressed through physical as well as mental stress, from depression and fatigue in adults to attention disorders and obesity in children. The way we relate to nature helps define our place within it, and by awakening this natural, yet dormant connection to the environment around us, we can move beyond solitary stewardship and into partnership. In Partnering with Nature, Catriona MacGregor weaves together scientific and historical wisdom, spiritual insights, and inspiring stories that illuminate the energies that link humans, animals, and the natural world. Through observation and conscious practice, we can open up to the power of nature to transform our lives, uplift our spirits, and even to direct our bodies to a healthier potential. For everyone who has a sense of something missing, who wishes to make a difference in their world, who yearns to reclaim their sense of wonder and awe, or who struggles with their health or emotional balance, nature speaks to all who will listen.

[The Discovery of Insulin, Michael Bliss ,](#) 2013, 022607563X, 9780226075631. In a brilliant, definitive history of one of the most significant and controversial medical events of modern times, award-winning historian Michael Bliss brings to light a bizarre clash of scientific personalities. When F. G. Banting and J. J. R. Macleod won the 1923 Nobel Prize for discovering and isolating insulin, Banting immediately announced that he was dividing his share of the prize with his young associate, C. H. Best. Macleod divided his share with a fourth member of the team, J. B. Collip. For the next sixty years medical opinion was intensely divided over the allotment of credit for the discovery of insulin. In resolving this controversy, Bliss also offers a wealth of new detail on such subjects as the treatment of diabetes before insulin and the life-and-death struggle to manufacture insulin.

[Agents, Causes, and Events: Essays on Indeterminism and Free Will, Timothy O'Connor](#) , 1995, 0195091574, 9780195091571. Many philosophers are persuaded by familiar arguments that free will is incompatible with causal determinism. Yet, notoriously, past attempts to articulate how the right type of indeterminism might secure the capacity for autonomous action have generally been regarded as either demonstrably inadequate or irremediably obscure. This volume gathers together the most significant recent discussions concerning the prospects for devising a satisfactory indeterministic account of freedom of action. These essays give greater precision to traditional formulations of the problems associated with indeterministic accounts and to the range of theoretical avenues for pursuing resolutions. The

first four essays set out different challenges (from both compatibilists and those skeptical of the possibility of free will) to the adequacy of standard indeterministic theories. The next seven essays meet one or more of these challenges. Each of the fundamental types of approach--simple indeterminism, causal indeterminism, and agent causation--is represented in these novel and sophisticated proposals. The collection finishes with two essays that debate whether compatibilism entails that freedom of choice is a comparatively rare phenomenon within an individual's life. Eloquently presenting some of the most compelling and accessible arguments surrounding this central philosophical issue, Agents, Causes, and Events makes a valuable contribution to courses in free will/action theory and metaphysics.

[Righteous Indignation: Excuse Me While I Save the World!, Andrew Breitbart , 2012, 0446572837, 9780446572835.](#)

Known for his network of conservative websites that draws millions of readers everyday, Andrew Breitbart has one main goal: to make sure the "liberally biased" major news outlets in this country cover all aspects of a story fairly. Breitbart is convinced that too many national stories are slanted by the news media in an unfair way. Breitbart burst on to the national media scene thanks to his coverage of the ACORN controversy, where a local ACORN community group leader was videotaped giving business advice to a "gentleman" who ran a prostitution ring. When the major news media at first tried to bury the story, Breitbart used his extraordinary marketing savvy to make sure the story got full national attention. More recently, Congressman Anthony Weiner took on Breitbart, claiming that scurrilous photos of Weiner were being sent on the internet by the conservative right. In a new chapter in RIGHTEOUS INDIGNATION, Breitbart details how "Weinergate" was entirely the personal fault of Congressman Weiner this, and how Weiner derailed his own promising career by trying to implicate Breitbart and conservative journalists. In short, RIGHTEOUS INDIGNATION, Breitbart talks about the key issues that Americans face, how he has aligned himself with the Tea Party, and how one needs to deal

with the liberal news world head on. Along the way, he details his early years, working with Matt Drudge, the Huffington Post, and so on, and how Breitbart developed his unique style of launching key websites to help get the word out to conservatives all over. A rollicking and controversial read, Breitbart will certainly raise your blood pressure, one way or another.

[Multivariate Statistical Modelling Based on Generalized Linear Models, Ludwig Fahrmeir, Gerhard Tutz](#) , 2010, 1441929002, 9781441929006. The first edition of Multivariate Statistical Modelling provided an extension of classical models for regression, time series, and longitudinal data to a much broader class including categorical data and smoothing concepts. Generalized linear models for univariate and multivariate analysis build the central concept, which for the modelling of complex data is widened to much more general modelling approaches. The primary aim of the new edition is to bring the book up-to-date and to reflect the major new developments over the past years. The authors give a detailed introductory survey of the subject based on the analysis of real data drawn from a variety of subjects, including the biological sciences, economics, and the social sciences. Technical details and proofs are deferred to an appendix in order to provide an accessible account for non-experts. The appendix serves as a reference or brief tutorial for the concepts of EM algorithm, numerical integration, MCMC and others. The topics covered include: Models for multi-categorical responses, model checking, semi- and nonparametric modelling, time series and longitudinal data, random

effects models, state-space models, and survival analysis. In the new edition Bayesian concepts which are of growing importance in statistics are treated more extensively. The chapter on nonparametric and semiparametric generalized regression has been rewritten totally, random effects models now cover nonparametric maximum likelihood and fully Bayesian approaches, and state-space and hidden Markov models have been supplemented with an extension to models that can accommodate for spatial and spatiotemporal data. The authors have taken great pains to discuss the underlying theoretical ideas in ways that relate well to the data at hand. As a result, this book is ideally suited for applied statisticians, graduate students of statistics, and students and researchers with a strong interest in statistics and data analysis from econometrics, biometrics and the social sciences.

[Sculpting the Figure in Clay: An Artistic and Technical Journey to Understanding the Creative and Dynamic Forces in Figurative Sculpture, Peter Rubino](#) , 2010, 0823099245, 9780823099245. A COMPREHENSIVE GUIDE TO SCULPTING THE HUMAN FIGURE IN CLAY InSculpting the Figure in Clay, acclaimed portrait bust sculptor and author Peter Rubino teaches a master class in the essentials of figurative sculpture. In this intensive, all-inclusive guide, he introduces students to a natural, straightforward geometry that will help them become masters at forming figures in clay. Rubino's unique approach utilizes a geometric system consisting of blocks, simple shapes, and guidelines that instruct students in a new and instinctive sculptural style. With these easy-to-follow instructions and informative concepts, students will see figures as the basic shapes beneath the form as well as learn vital approaches such as BLT: Bend, Lean, and Turn, to create evocative expression, and the Three Ps: Position, Proportion, and Planes, for accurate representation. This unparalleled resource is the definitive guide to figurative sculpture. [In the Sea There are Crocodiles: Based on the True Story of Enaiatollah Akbari, Fabio Geda ,](#) 2011, 0385534744, 9780385534741. When ten-year-old Enaiatollah Akbaris small village in Afghanistan falls prey to Taliban rule in early 2000, his mother shepherds the boy across the border into Pakistan but has to leave him there all alone to fend for himself. Thus begins Enaiats remarkable and often punishing five-year ordeal, which takes him through Iran, Turkey, and Greece before he seeks political asylum in Italy at the age of fifteen. Along the way, Enaiat endures the crippling physical and emotional agony of dangerous border crossings, trekking across bitterly cold mountain pathways for days on end or being stuffed into the false bottom of a truck. But not everyone is as resourceful, resilient, or lucky as Enaiat, and there are many heart-wrenching casualties along the way. Based on Enaiats close collaboration with Italian novelist Fabio Geda and expertly rendered in English by an award- winning translator, this novel reconstructs the young boys memories, perfectly preserving the childlike perspective and rhythms of an intimate oral history. Told with humor and humanity, In the Sea There Are Crocodiles brilliantly captures Enaiats moving and engaging voice and lends urgency to an epic story of hope and survival.From the Hardcover edition.

[Introducing Proteomics: From concepts to sample separation, mass spectrometry and data analysis, Josip Lovric](#) , 2011, 1119957192, 9781119957195. Introducing Proteomics gives a concise and coherent overview of every aspect of current proteomics technology, which is a rapidly developing field that is having a major impact within the life and medical sciences. This student-friendly book, based on a successful course developed by the author, provides its readers with sufficient theoretical background to be able to plan, prepare, and analyze a proteomics study. The text covers the following: Separation Technologies; Analysis of Peptides/Proteins by Mass Spectrometry; Strategies in Proteomics. This contemporary text also includes numerous examples and explanations for why particular strategies are better than others for certain applications. In addition, Introducing Proteomics includes extensive references and a list of relevant proteomics information sources; essential for any student. This no-nonsense approach to the subject tells students exactly what they need to know, leaving out unnecessary information. The student companion site enhances learning and provides answers to the end of chapter problems. "I think this book will be a popular and valuable resource for students and newcomers to the field who would like to have an overview and initial understanding of what proteomics is about. The contents are well organized and address the major issues." [Every Officer is a Leader: Transforming Leadership in Police, Justice, and Public Safety, Terry Anderson](#) , 1999, 1574441183, 9781574441185. Every Officer is a Leader: Transforming Leadership in Police, Justice, and Public Safety, authored by leadership expert Terry Anderson and several well known leaders in the law enforcement and criminal justice profession, responds to the need for a comprehensive leadership development model for the education and training of police, justice and public safety supervisors, managers and front line officers. He examines how leadership development has a profound impact on the morale and performance of individual officers, teams, and organizations, illustrating in depth and detail how police and other justice and public safety leaders (in corrections, fire, customs, immigration, security, courts, etc.) can implement the Transforming Leadership process, skills, and principles. The recent focus (during the past 10 years) on community policing initiatives has made competency based leadership skills training essential for front line officers. The author's innovative contribution is a focus on the necessity to build "a leadership organization" before - and to an extent, while - you move ahead into building a "learning organization" that is responsive to community and internal organizational needs. The personal, team, and organization development skills discussed in this book are necessary pre-requisites to successful implementation of any neighborhood or community policing initiatives. Every Officer is a Leader: Transforming Leadership in Police, Justice, and Public Safety provides a model for integrating other models into a holistic leadership development framework. It furnishes a map for developing critical leadership skills with self-assessment, includes the developmental aspects of leadership expert Terry Anderson's previous book on Transforming Leadership, and applies them to law enforcement and criminal justice. Anderson and his contributing authors add clarity, perspective, and examples to show how individual leaders can develop themselves, and one another, into high-performance team leaders and officers who motivate others to respond to issues that affect the morale, health, and safety of the communities in which they serve. This new focus adds a perspective on security issues that affect police, justice and public safety organizations.

Are you caught up in the financial thinking of the last century? That's when we learned to buy a home and pay it off as quickly as possible. It made sense in the conditions that existed back then. It doesn't make sense today. In this new millennium, three unrelated events have converged creating new opportunities that will empower you to create a brighter financial future for yourself and your family. How would you like to Safely leverage and compound assets you didn't realize you had? Become your own bank and build family wealth? Take in stock market gains, but never take the losses? Lock-in a rich, secure and carefree retirement? Transform the IRS into your wealth-building partner? Create real wealth, empowering you to help others? Get to your existing retirement funds with little or no taxes? Leave a fortune for your heirs? STOP SITTING ON YOUR ASSETS makes these strategies crystal clear and you can now apply them with security and ease. If you own a home, you owe it to yourself to know about today's new reality: You are sitting on a potential fortune that can safely and confidently be put to work to build a massively abundant financial future. A future so rich that before STOP SITTING ON YOUR ASSETS could have only existed in your dreams.

Books a la Carte also offer a great value this format costs significantly less than a new textbook. The Bittinger Worktext Series changed the face of developmental education with the introduction of objective-based worktexts that presented math one concept at a time. This approach allowed students to understand the rationale behind each concept before practicing the associated skills and then moving on to the next topic. With this revision, Marv Bittinger continues to focus on building success through conceptual understanding, while also supporting students with quality applications, exercises, and new review and study materials to help them apply and retain their knowledge.

[What Clothes Reveal: The Language of Clothing in Colonial and Federal America, Linda Baumgarten](#) , 2012, 0300181078, 9780300181074. Paintings of upper-class men and women tell an important part of the history of costumes, but surviving garments themselves reveal even more. Every crease, stitch, and stain in a piece of clothing supplies information about

its wearer and its era. This stunning book features 18th- and early-19th-century garments from the premier collection of the Colonial Williamsburg Foundation. Illustrated with more than 300 color photographs, including many details and back views, the book treats not only elegant, high-style clothing in colonial America but also garments for everyday and work, the clothing of slaves, and maternity and nursing apparel. Drawing on contemporary written descriptions and on actual costumes of the period, the book analyzes what Americans in the 18th century considered fashionable and attractive and how they used clothing to assert status or to identify occupations. The book also examines the myths and meanings of clothing in British and American society, clothing for the entire lifecycle, and a history of clothing alteration. Informative sidebars on a variety of fascinating topics complete the volume.

Thirteen specially written essays discuss topics from the work of Bas van Fraassen, one of the most important contemporary philosophers of science. The central and unifying theme of the volume is empiricism, an approach which van Fraassen developed most fully in *The Scientific Image* and *The Empirical Stance*. Thirteen of the world's leading experts in the field examine van Fraassen's defence of scientific anti-realism (which he sees as a core tenet of empiricism), as well as his claim that adopting a philosophical position like empiricism does not consist in holding a particular set of beliefs, but is rather a matter of taking a stance. *Images of Empiricism* concludes with an extensive and intriguing reply by van Fraassen, in which he develops and corrects his old views, and offers new insights into the nature of science, empiricism, and philosophy itself.

Jerry Weissman has made a career of preparing executives for that moment. He's coached nearly 500 executives on their IPO road shows, the most critical presentations of their lives. Weissman's In the Line of Fire has established itself as the world's definitive guide to answering brutally tough questions in public and now, he's completely updated this classic with new examples, case studies, and even more great advice. Using compelling, up-to-the-minute examples from Wall Street, Washington, D.C., and beyond, Weissman teaches how to respond with perfect assurance, no matter what. You'll discover how to avoid the defensive, evasive, or contentious answers that have destroyed political careers and can ruin your credibility. Weissman shows you how to control your entire exchange with a hostile questioner: the question, answer, interactions with questioner and audience, timing, and above all, yourself. Whether you're an executive, politician, fundraiser, interviewee, teacher, student or even a family member at Thanksgiving dinner you're judged on how you handle these moments. [Conflict, Conquest, and Conversion: Two Thousand Years of Christian Missions in the Middle East, Eleanor Harvey Tejirian, Reeva S. Simon](#) , 2013, 0231511094, 9780231511094. Conflict, Conquest, and Conversion describes two thousand years of the Christian missionary enterprise in the Middle East within the context of the regions political evolution. Its broad, rich narrative follows Christian missions as they interact with imperial powers and as the momentum of religious change shifts from Christianity to Islam and back, adding new dimensions to the history of the region and the nature of the relationship between the Middle East and the West. Historians and political scientists increasingly recognize the importance of integrating religion into political analysis, and this volume, using long-neglected sources, provides the necessary context for this effort. It surveys Christian missions from the earliest days of Christianity to the present, with

particular emphasis on the role of Christian missions, both Protestant and Catholic, in the political and economic imperialism of the nineteenth and twentieth centuries. The authors delineate the ongoing tensions between conversion and a focus on witness and good works within the missionary movement, which has contributed to the development and spread of nongovernmental organizations. This volume's systematic study offers an unparalleled encounter with the social, political, and economic consequences of these trends.

[The Book of Joe, Jonathan Tropper](#) , 2004, 0440334764, 9780440334767. Right after high school, Joe Goffman left sleepy Bush Falls, Connecticut and never looked back. Then he wrote a novel savaging everything in town, a novel that became a national bestseller and a huge hit movie. Fifteen years later, Joe is struggling to avoid the sophomore slump with his next novel when he gets a call: his father's had a stroke, so it's back to Bush Falls for the town's most famous pariah. His brother avoids him, his former classmates beat him up, and the members of the book club just hurl their copies of Bush Falls at his house. But with the help of some old friends, Joe discovers that coming home isn't all bad and that maybe the best things in life are second chances. Fans of Nick Hornby and Jennifer Weiner will love this book, by turns howling funny, fiercely intelligent, and achingly poignant. As evidenced by The Book of Joe's success in both the foreign and movie markets, Jonathan Tropper has created a compelling, incredibly resonant story. From the Hardcover edition.

[More Than a Speed Bump, Jim Scott](#) , 2013, 0988537079, 9780988537071. "On that night my friend Derek Reardon and I went to a bar in Atkinson to start drinking before we moved the partying to an old friend's house. I have no memory of being there, but for some odd reason I decided to drive home. This is still a mystery to me. I wasn't a habitual drunk driver, but that doesn't matter because I know now that one time is all it takes." Jim Scott tells an intense story of Traumatic Brain Injury and the long, grueling journey that follows. A cautionary tale for young drivers, and a source of inspiration for others suffering from a TBI.

[What Is Algebra Good for & Will I Ever Use It?/Standard, Jon W. Syferd](#) , 1992, 0963191497, 9780963191496. The book answers not only the question the title poses, it makes the all important connection to job skill, survival as individuals & as a nation in a competitive world. The eight powerful ideas algebra brings to us are discussed & the link to problem solving skill & creativity is clearly made. Nationally, we are on our way to becoming mathematical illiterates. The implications of that fact are exposed. The mechanics of algebraic skill, equation building skill, equation solving skill are developed in a simple easy manner, eliminating fear & apprehension. From observations made by Isaac Newton under the apple tree - each step is retraced, the reader participates in observation & reasoning that developed the central

equation of gravity - the law of the inverse square. Many students become disillusioned with algebra & higher mathematics - the most prevalent reasons are finally exposed. Herein are answers to why students don't learn algebra - why they grow to hate it & most importantly what can be done about it. Presented are answers to: Are the Japanese really smarter than Americans? Where does American education stand in teaching math & science? What can be done? What have we missed? What can parents do?

[The Life and Times of the Thunderbolt Kid: A Memoir, Bill Bryson](#) , 2010, 0307373622, 9780307373625. From one of the most beloved and bestselling authors in the English language, a vivid, nostalgic and utterly hilarious memoir of growing up in the middle of the United States in the middle of the last century. A book that delivers on the promise that it is laugh-out-loud funny. Some say that the first hints that Bill Bryson was not of Planet Earth came from his discovery, at the age of six, of a woollen jersey of rare fineness. Across the moth-holed chest was a golden thunderbolt. It may have looked like an old college football sweater, but young Bryson knew better. It was obviously the Sacred Jersey of Zap, and proved that he had been placed with this innocuous family in the middle of America to fly, become invisible, shoot guns out of peoples hands from a distance, and wear his underpants over his jeans in the manner of Superman. Bill Brysons first travel book opened with the immortal line, I come from Des Moines. Somebody had to. In this hilarious new memoir, he travels back to explore the kid he once was and the weird and wonderful world of 1950s America. He modestly claims that this is a book about not very much: about being small and getting much larger slowly. But for the rest of us, it is a laugh-out-loud book that will speak volumes especially to anyone who has ever been young. From the Hardcover edition.

[British foreign policy in the age of the American Revolution, Hamish M. Scott](#) , 1990, 0198201958, 9780198201953. This is the first detailed and comprehensive study of British foreign policy before and during the war which led to the loss of the American colonies, a period from 1756 to 1783 in which Britain's position in Europe was transformed. H. M. Scott examines the nature and the role of British diplomacy in the age of the American Revolution in the context of Britain's other eighteenth-century conflicts. Two themes receive particular attention: Britain's continuing rivalry with the Bourbons, exemplified by the great crisis over the Falkland Islands in 1770-1, and the unsuccessful efforts to strengthen Britain diplomatically by concluding alliances with major Continental powers. Dr Scott has provided a major scholarly reassessment of British diplomacy in this period, analysing both the impact of the personalities involved, and the successes and failures of their policies.

The Petal Fairies have a very important job - together with their magic petals they help to make sure that flowers grow and bloom in the human world. But after Jack Frost sent his goblins to steal the magic petals in the hope they would help to grow flowers in his cold and dreary ice castle, the petals have ended up scattered in the human world. Rachel and Kirsty must help the Tia the Tulip Fairy, Pippa the Poppy Fairy, Louise the Lily Fairy, Charlotte the Sunflower Fairy, Olivia the Orchid Fairy, Danielle the

Daisy Fairy and Ella the Rose Fairy to find their magic petals before the goblins get their hands on them. But this time Jack Frost has given the goblins a wand to help them - he's determined to get those petals before the fairies do, whatever it takes! Jack Frost is determined to get his hands on the final magic petal so he can grow some flowers in his ice castle. But Rachel and Kirsty will do anything to rescue it for Ella the Rose Fairy first...

[From Them to Us: An International Study of Inclusion in Education, Tony Booth, Mel Ainscow](#) , 1998, 0415187397, 9780415187398. Inclusive education has become a phrase with international currency shaping the content of conferences and national educational policies around the world. But what does it mean? Is it about including a special group of disabled learners or students seen to have 'special needs' (them) or is it concerned with making educational institutions inclusive, responsive to the diversity of all their students (us)? In this unique comparative study, the editors have brought together an international team of researchers from eight countries to develop case-studies which explore the processes of inclusion and exclusion within a school or group of schools set in its local and national context. The study includes classroom observation, the experiences of the school day of students and interviews with staff, students, parents and school governors. Through an innovative juxtaposition of the case-studies and commentaries on them, differences of perspective within and between countries are revealed and analysed. The study arose from a dissatisfaction with previous research, which presents 'national perspectives' or seeks findings that have global significance. This book avoids such simplification and draws attention to the problems of translation of practice across cultures. The editors start from an assumption of diversity of perspective which like the diversity of students within schools can be viewed as problematic or as a resource to be recognized and celebrated.

[Lightening Up: The Yoga of Self-Acceptance, Tony Wolff](#) , 2012, 1479306517, 9781479306510. Lightening Up, The Yoga of Self-Acceptance offers an antidote to the striving for performance and achievement so common in modern yoga. Yoga has become another sport, a way to perform, to always improve and as such leads to much self-criticism and doubt. With great respect for the teachings of TKV Desikachar, a nod to Buddhism, a healthy dose of mindfulness practices, a guide to how anatomy and neurophysiology can influence a more balanced practice, and more than a dash of humor and common sense, the book offers a new view of progress, one built not on learning to put your foot behind your ear, but rather on your ability to recognize and cultivate your own inner teacher. If yoga were about maximizing your physical flexibility, then any circus contortionist could start an ashram.
