[Java Enterprise in a Nutshell: A Desktop Quick Reference, Jim Farley](#) , 2002, 0596001525, 9780596001520. Nothing is as constant as change, and this is as true in enterprise computing as anywhere else. Since Java Enterprise in a Nutshell was first published in September of 1999, a dozen or more new APIs have been added to the platform, reflecting the new and different ways developers implement their enterprise objectives. And now developers are being called on to add even greater, more complex levels of interconnectivity to their applications, as the concepts behind Web Services solidify and

implementation decisions need coding. Java developers today need a clear understanding of the new APIs, tools, capabilities and pitfalls in J2EE 2.0 so they can plan a technology and implementation strategy for new enterprise projects. Fortunately, this is exactly what they get with the new Java Enterprise in a Nutshell, 2nd edition! Completely revised and updated for the new 2.0 version of Sun Microsystems Java Enterprise Edition software, Java Enterprise in a Nutshell 2nd edition covers all of the J2EE APIs, including RMI, Java IDL, JDBC, JNDI, Java Servlet, and Enterprise JavaBeans, with a fast-paced tutorial and compact reference on each technology. Then Java Enterprise in a Nutshell goes even further, providing a classic O'Reilly-style quick reference for all of the classes in the various packages that comprise the Enterprise APIs - covering the core enterprise APIs as well as numerous standard extensions.

[Framed: America's 51 Constitutions and the Crisis of Governance, Sanford Levinson](#) , 2013, 0199325243,

9780199325245. In his widely acclaimed volume Our Undemocratic Constitution, Sanford Levinson boldly argued that our Constitution should not be treated with "sanctimonious reverence," but as a badly flawed document deserving revision. Now Levinson takes us deeper, asking what were the original assumptions underlying our institutions, and whether we accept those assumptions 225 years later. In Framed, Levinson challenges our belief that the most important features of our constitutions concern what rights they protect. Instead, he focuses on the fundamental procedures of governance such as congressional bicameralism; the selection of the President by the electoral college, or the dimensions of the President's veto power not to mention the near impossibility of amending the United States Constitution. These seemingly "settled" and "hardwired" structures contribute to the now almost universally recognized "dysfunctionality" of American politics. Levinson argues that we should stop treating the United States Constitution as uniquely exemplifying the American constitutional tradition. We should be aware of the 50 state constitutions, often interestingly different and perhaps better than the national model. Many states have updated their constitutions by frequent amendment or by complete replacement via state constitutional conventions. California's ungovernable condition has prompted serious calls for a constitutional convention. This constant churn indicates that basic law often reaches the point where it fails and becomes obsolete. Given the experience of so many states, he writes, surely it is reasonable to believe that the U.S. Constitution merits its own updating. Whether we are concerned about making America more genuinely democratic or only about creating a system of government that can more effectively respond to contemporary challenges, we must

confront the ways our constitutions, especially the United States Constitution, must be changed in fundamental ways.

[The Landscape of Reform: Civic Pragmatism and Environmental Thought in America, Ben A. Minteer](#) , 2006, 0262134616, 9780262134613. In *The Landscape of Reform* Ben Minteer offers a fresh and provocative reading of the intellectual foundations of American environmentalism, focusing on the work and legacy of four important conservation and planning thinkers in the first half of the twentieth century: Liberty Hyde Bailey, a forgotten figure in the Progressive conservation movement; urban and regional planning theorist Lewis Mumford; Benton MacKaye, the forester and conservationist who proposed the Appalachian Trail in the 1920s; and Aldo Leopold, author of the environmentalist classic *A Sand County Almanac*. Minteer argues that these writers blazed a significant "third way" in environmental ethics and practice, a more pragmatic approach that offers a counterpoint to the anthropocentrism-versus-ecocentrism-versus-preservation narrative that has long dominated discussions of the development of American environmental thought. Minteer shows that the environmentalism of Bailey, Mumford, MacKaye, and Leopold was also part of a larger moral and political program, one that included efforts to revitalize democratic citizenship, conserve regional culture and community identity, and reclaim a broader understanding of the public interest that went beyond economics and materialism. Their environmental thought was an attempt to critique and at the same time reform American society and political culture. Minteer explores the work of these four environmental reformers and considers two present-day manifestations of an environmental third way: Natural Systems Agriculture, an alternative to chemical and energy-intensive industrial agriculture; and New Urbanism, an attempt to combat the negative effects of suburban sprawl. By rediscovering the pragmatic roots of American environmentalism, writes Minteer, we can help bring about a new, civic-minded environmentalism today.

[More Places to Stay: Hotels of the World, Shelley-Maree Cassidy](#) , 2007, 0958238898, 9780958238892. This new travel book is perfect for plotting your next escape; words and pictures describing places and where to stay that will transport you to 23 different locations around the globe. Deciding where to go on holiday and choosing a place to stay from the multitude on offer is often a difficult task. In 'More Places to Stay - Hotels of the World', the latest in the 'Places to Stay' series, photographer Grant Sheehan and writer Shelley-Maree Cassidy have helpfully done some careful research for you

and chosen some special destinations to add to your list of must-visit. Nearly two dozen very different hotels in countries on every continent are featured; classic, contemporary and eccentric in design; and in off-the-beaten-track locations, towns and cities. You can choose from rural retreats, from the Daintree Eco-Lodge in the Australian rainforest, to the romantic Las Cavas Wine Lodge in Argentina, gracious Greenhill Lodge here in New Zealand, stunning safari camps in Botswana, and more. Or pick a city base; the historic National Hotel in Moscow, the charming L' Otel in Paris or Hong Kong's Grand Peninsula. Dance the tango in Buenos Aires at the Faena + Universe Hotel; take in the spectacular view from La Minervetta in Sorrento, or from the tallest hotel in the world - Burj al Arab in Dubai. The book shows the hotels in their settings and some of the sights in many photographs, accompanied by text describing both hotel and place. It will appeal to both the active traveler, as well as the armchair one, and will make an excellent gift for that hard-to-buy-for someone who has everything.

Dughall is settling into his new role when the King imposes an Anglican liturgy book on the Scottish church. Protests and riots plague the realm, forcing lords and commoners to take a stand. Dughall and Gilbert are placed in precarious positions, torn between loyalty to the crown, their families, and zealous subjects. To complicate matters, Dughall claims the sword of Red Conan and inherits the curse that comes with it. Challenged by real and supernatural enemies, he must fight to continue his line. Conflicts pit brother against brother and father against son. The National Covenant is signed and war breaks out. Tempers run hot and actions are rash. To maintain order, one brother must take Blackheart's place. Which raises the question... Who shall become the Dark Lord?

[Trouble - You Are Not Alone, Michael Mayhew-Arnold](#) , 2012, 0957016255, 9780957016255. This is the story of mankind's eternal struggle with himself and between the flesh and spirit which our ancient ancestors and predecessors gave so much credence to and considered the vital equilibrium, harmony and balance of life but which modern man has lost and forgotten. The book is for the old and young, powerful and not so powerful, for those judging others and those being judged; for ordinary folk and those with oversight and heavy duties of responsibility, whether corporations and individuals alike. This book represents a part of the common consciousness of humanity. Trouble discriminates against us all, in every shape, size and form and at any time. It doesn't care when, where or how it strikes and it will pick the most inconvenient and worst moment and most likely, you will not see it coming. Our troubles are not new and have been encountered by many wise people, heroes and heroines of ancient times and related in stories so we might learn from them by means of historical facts, fables and myths in the Classics such as Perseus, Heracles and Antaeus, Achilles, Paris, Agamemnon, Alexander the Great, King Solomon, the Greek and Olympian Gods, Caesar, Akhenaten, The All Seeing Eye, Anubis, Horus, Zeus, Hera, Venus, Troy, Oracles, Arachne, Ophiuchus, Pandora's box and other messages from the ancients. All stories are relevant in their own context and place in history. Interpreted by different cultures and beliefs. Of God and demons, magick and illusion, perception, senses and vices, Murphy's Laws, our brains tricking us through our senses, painters and artists illusions, our primal instincts, of UFO's/ ET's, black holes and singularities, relativity, quantum mechanics, quantitative easing, Carl Jung and President JFK, curvatures of space time, covert human research programmes into behavioural modification such Project MKULTRA, an intelligence funded operation; of mass hysteria, massacre and murder, of the Holocaust, Inquisition and witch trials, of synchronicity and contemporary trouble in the form of economic, social and political issues. All this and more is part of the history of the development of our species and used by the author to fold solutions around a patterned framework to provide solutions to personal problems.

[Endocrinology of Social Relationships, Peter Thorpe Ellison, Peter B. Gray](#) , 2009, 0674031172, 9780674031173. In social relationships "whether between mates, parents and offspring, or friends" we find much of life's meaning. But in these relationships, so critical to our well-being, might we also detect the workings, even directives, of biology? This book, a rare melding of human and animal research and theoretical and empirical science, ventures into the most interesting realms of behavioral biology to examine the intimate role of endocrinology in social relationships. The importance of hormones to reproductive behavior "from breeding cycles to male sexual display" is well known. What this book considers is the increasing evidence that hormones are just as important to social behavior. Peter Ellison and Peter Gray include the latest findings "both practical and theoretical" on the hormonal component of both casual interactions and fundamental bonds. The contributors, senior scholars and rising scientists whose work is shaping the field, go beyond the proximate mechanics of neuroendocrine physiology to integrate behavioral endocrinology with areas such as reproductive ecology and life history theory. Ranging broadly across taxa, from birds and rodents to primates, the volume pays particular attention to human endocrinology and social relationships, a focus largely missing from most works of behavioral endocrinology.

[Vietnam: A View from the Front Lines, Andrew Wiest](#) , 2013, 1849089728, 9781849089722. Vietnam: A View from the Frontline traces the American experience of Vietnam from the war's popular inception to its morale-crushing and bitter conclusion. Vietnam features a grunt's-eye view of the conflict - from the steaming rice paddies and swamps of the Mekong Delta, to the triple-canopy rainforest of the Central Highlands, to the forlorn Marine bases that dotted the DMZ. Like Karl Marlantes' groundbreaking novel 2010, Matherhorn, this book will change the way we think about Vietnam.

Told in uncompromising, no-holds barred language of the soldiers themselves, the stories contained within this book detail everything from heroism to fragging, from helicopters hitting the LZs to rampant drug use. It is a true and grippingly accurate portrait of the American war in Vietnam through the eyes of the men and women who fought in that far away land while a few are drawn from medics, corpsmen, nurses and widows. The book is based on rich collections housed at the National Archive, the Center of Military History, and at the Vietnam Archive at Texas Tech.

[Badiou in Jamaica: The Politics of Conflict, Colin Wright](#) , 2013, 0987268260, 9780987268266. This book foregrounds the centrality of political conflicts in the radical philosophy of Alain Badiou. It is divided into two halves. The first undertakes a reading of Badiou's wider oeuvre (beyond Being and Event) and demonstrates that his political theory derives from analyses of key revolutionary sequences such as the Paris Commune, October '17, May '68 and the Chinese Cultural Revolution. From his evolving meditations on these sequences, and from his theoretical borrowings from Marxism, psychoanalysis and set-theory, Badiou has established a complex schema of the possible outcomes of conflict which constitutes a subtle and flexible theory of change. In the second half, the book applies this schema to a concrete 'situation': colonial and post-colonial Jamaica. Against the backdrop of the history of conflict in Jamaica, the Morant Bay Revolt of 1865 is interpreted as an 'event' in Badiou's very precise sense. The Rastafari movement is then posited as a 'subject body' faithful to this event, while roots reggae is explored as the 'subject language' of this Rastafarian subject body. Through this example, it is suggested that the starkness of the account of the event in Being and Event, in its

incompatibility with history or culture, must be qualified if Badiou's contribution to a renewed philosophy of conflict is to be realized. To this end, the book builds on Badiou's own Logics of Worlds in order to speculatively propose two new concepts: 'evental historiography' and 'evental culture'. It is argued that conceptual elaborations like these might enable a productive rapprochement between Badiou and Cultural Studies and Postcolonial theory - disciplines of which Badiou himself has been extremely critical, but which are certain to shape his reception in the English-speaking world.

Conversely, both Cultural Studies and Postcolonial theory, precisely in their increasingly enfeebled conceptions of social, cultural and political conflict, stand to gain a great deal from dialogue with the persistently Maoist dimensions of Badiou's work.

[Learning by teaching: selected articles on writing and teaching, Don Murray](#) , 1982, 0867090251, 9780867090253. For Murray, writing is active and dynamic. "The writer listens to what is on the page . . . slashes sections out, moves others around, adds new ones . . . and instead of looking back to the previous draft . . . is actually looking head to the new draft." Such a view differs sharply from the inaccurate platitudes . . . that many teachers learned some years ago in their college composition courses. - Phi Delta Kappan Murray is one of the pioneers of a process approach to teaching writing, and this book brings together twenty-nine of the articles, some previously unpublished, he has written in the past fifteen years. His pieces are theoretically stimulating, but they are also practical and humane as he looks at writing and teaching from the perspective of a working writer and teacher.

Comprehensive Real-World Guidance for Every Embedded Developer and Engineer This book brings together indispensable knowledge for building efficient, high-value, Linux-based embedded products: information that has never been assembled in one place before. Drawing on years of experience as an embedded Linux consultant and field application engineer, Christopher Hallinan offers solutions for the specific technical issues you're most likely to face, demonstrates how to build an effective embedded Linux environment, and shows how to use it as productively as possible. Hallinan begins by touring a typical Linux-based embedded system, introducing key concepts and components, and calling attention to differences between Linux and traditional embedded environments. Writing from the embedded developers viewpoint, he thoroughly addresses issues ranging from kernel building and initialization to bootloaders, device drivers to file systems. Hallinan thoroughly covers the increasingly popular BusyBox utilities; presents a step-by-step walkthrough of porting Linux to custom boards; and introduces real-time configuration via CONFIG_RT--one of today's most exciting developments in embedded Linux. Dr. Paul Mazzocchi calls The Science of Ant Communication a "beautiful essay on ant pheromones. In the last fifteen years, various areas of high energy physics, astrophysics and theoretical physics have converged on the study of cosmology so that any graduate student in these disciplines today needs a reasonably self-contained introduction to the Cosmic Microwave Background [CMB]. This book presents the essential theoretical tools necessary to acquire a modern working knowledge of CMB physics. The style of the book, falling somewhere between a monograph and a set of lecture notes, is pedagogical and the author uses the typical approach of theoretical physics to explain the main problems in detail, touching on the main assumptions and derivations of a fascinating subject. [The Gift of Guylaine Claire, A. V. Walters](#) , 2012, 0983217270, 9780983217275. When renowned Canadian sculptor, Guylaine Claire, gets caught in the cross-fire of a siege between the Mounties and an indigenous splinter faction, her family and friends find themselves at the center of a maelstrom of loss and publicity. No strangers to tragedy, they pull together to await the release of her body for burial. Ducking the rising media circus, they gather at the family homestead to share the stories of Guylaine's life and the family history that helped shape who she'd become. In the days following the shooting, her loved ones collect her works and plan a fitting memorial. Family differences erupt, and reconcile, in novel and symbolic ways, as they struggle to piece together the missing threads in the mystery surrounding her death. Recounting tales, they reveal as much about themselves as about the enigmatic Guylaine. Together they heal, laugh and make peace with the loss. They celebrate a Guylaine who found her own meaning, living a creative life, true to her beliefs. Her quiet success, only recently acknowledged beyond her corner of the art world, may tragically have triggered her death. Ultimately, her funeral is a true celebration of her creativity and of the fabric of love and family.

Although the post-colonial situation has attracted considerable interest over recent years, one important colonial power Portugal has not been given any attention. This book is the first to explore notions of ethnicity, "race", culture, and nation in the context of the debate on colonialism and postcolonialism. The structure of the book reflects a trajectory of research, starting with a case study in Trinidad, followed by another one in Brazil, and ending with yet another one in Portugal. The three case studies, written in the ethnographic genre, are intertwined with essays of a more theoretical nature. The non-monographic, composite or hybrid

nature of this work may be in itself an indication of the need for transnational and historically grounded research when dealing with issues of representations of identity that were constructed during colonial times and that are today reconfigured in the ideological struggles over cultural meanings.

In his first case since he left the LAPD's Open Unsolved Unit for the prestigious Homicide Special squad, Harry Bosch is called out to investigate a murder that may have chilling consequences for national security. A doctor with access to a dangerous radioactive substance is found murdered on the overlook above the Mulholland Dam. Retracing his steps, Harry learns that a large quantity of radioactive cesium was stolen shortly before the doctor's death. With the cesium in unknown hands, Harry fears the murder could be part of a terrorist plot to poison a major American city. Soon, Bosch is in a race against time, not only against the culprits, but also against the Department of Homeland Security and the FBI (in the form of Harry's one-time lover Rachel Walling), who are convinced that this case is too important for the likes of the LAPD. It is Bosch's job to

prove them all wrong. The Overlook was originally serialized in the New York Times Sunday Magazine. This novel includes material that was not published in the magazine, including new characters and more obstacles in Harry Bosch's path.

[The Joy and Wonder of Christmas, Steven Gannaway](#) , 2012, 0983004714, 9780983004714. Steve Gannaway's The Joy and Wonder of Christmas offers an invitation. "Come, taste and savor the richness of Christmas." Throughout this collection of poetry, readers are touched by wonder. Can it be true that God has dramatically and personally reached out to us in the gift of an infant son? The Joy and Wonder of Christmas encourages us to experience Jesus' birth from the perspectives of Joseph and Mary, shepherds, magi, and even a stable mouse. With crisp verse and vivid images, the book depicts other joys of Christmas: children and family, snow and decorated trees, gifts and peace-making, colorful lights and tables laden with food. Yet, all is not joy in the observance of Christmas. Several poems challenge readers. They pose troubling questions about the opulence of the season and the poverty of the many. The rich Christmas flavors of the poems are brought together in a closing story. "The Tree He Would Never Forget" epitomizes the joy and the wonder that are Christmas.

The value of being "Made in America" or "Made in Italy," for example, depends not only on the material advantages each place offers but also on the symbolic resources embedded in those places of production. Drawing on case studies that range from the vineyards of South Africa and the textiles of Thailand to the Mundo Maya in Latin America and tourist destinations in Tuscany, this volume examines the various forms that cultural wealth takes, the processes involved in its construction, and the ways it is deployed. Leading scholars from a range of disciplinary backgrounds examine how symbolic resources and cultural understandings help firms and regions develop. Through a thoughtful analysis of current- day cases, as well as historical developments, The Cultural Wealth of Nations offers an exciting new alternative to standard economic explanations about the wealth and poverty of nations.

This purpose of this handbook is to introduce the theoretical foundations and practical solution techniques for securing critical cyber and physical infrastructures as well as their underlying computing and communication architectures and systems. Examples of such infrastructures include utility networks (e.g., electrical power grids), ground transportation systems (automotives, roads, bridges and tunnels), airports and air traffic control systems, wired and wireless communication and sensor networks, systems for storing and distributing water and food supplies, medical and healthcare delivery systems, as well as financial, banking and commercial transaction assets. The handbook focus mostly on the scientific foundations and engineering techniques - while also addressing the proper integration of policies and access control mechanisms, for example, how human-developed policies can be properly enforced by an automated system. *Addresses the technical challenges facing design of secure infrastructures by providing examples of problems and solutions from a wide variety of internal and external attack scenarios *Includes contributions from leading researchers and practitioners in relevant application areas such as smart power grid, intelligent transportation systems, healthcare industry and so on. *Loaded with examples of real world problems and pathways to solutions utilizing specific tools and techniques described in detail throughout

[Principles of community psychology: perspectives and applications, Murray Levine, David V. Perkins](#) , 1987, 0195039467, 9780195039467. This text provides a coherent and balanced presentation of the principles and practices of community psychology. Opening chapters analyze the conceptual roots of community psychology in epidemiology, the medical model of mental health, and social ecology, while later chapters focus on practical applications in preventive mental health and social and community change. Unusual but increasingly important topics are also addressed, such as self-help, consciousness raising, labelling theory, school desegregation, and the role of behavioral scientists in social change. The authors subject basic concepts to critical analysis and provide up-to-date reviews of empirical research throughout.

[The New German Cookbook: More Than 230 Contemporary and Traditional Recipes, Jean Anderson](#) , 1993, 0060162023, 9780060162023. Contemporary German cooking couples hearty regional traditions with the subtle, light, and more sophisticated tastes of the modern palate. Jean Anderson and Hedy Wrz lead readers from the back roads of Bavaria to the vineyards on the Moselle, from a quaint subterranean tavern in Lbeck to the three-star restaurants of Munich, opening kitchen doors and kettle lids to reveal modern Germany's gastronomic triumphs. With explanations of ingredients, clear instructions, and evocative introductions to the recipes, the cooking of today's Germany is illuminated for American cooks. All the traditional dishes are here, many in their original robust versions and others cleverly lightened by German's new generation of chefs and home cooks. Potato salad, barely glossed with dressing, then greened with fresh chevil; sauerkraut teamed with cod; and pumpernickel reduced to crumbs and folded into an airy Bavarian cream are just a few of the creative new German dishes that nevertheless bow to tradition. A chapter on wine and beer by Lamart Elmore, former executive director of the German Wine Information Bureau, completes the picture of Germany's total gastronomic experience. Germany today is a land of contradictions, a land where meandering rivers run alongside autobahns, where castles and cuckoo clocks coexist easily with high tech, high fashion, and haute cuisine. German food reflects this rich tapestry, and in The New German Cookbook, Jean Anderson and Hedy Wrz import and interpret the traditional and the subtle, flavorful, and sophisticated dishes of modern Germany for American cooks.

This book contains 60 quality 2D NMR data sets following an introductory section describing the methodology employed. Many other books describe the methods used, but none offer a large number of problems. Instructors at universities and colleges at the present time are forced to cobble together problems from a wide range of sources. The fragmentary approach to assembling course materials has a negative impact on course continuity and thus adversely impacts student retention. This book will stand as a single source to which instructors and students can go to obtain a comprehensive compendium of NMR problems of varying difficulty. Presents strategies for assigning resonances to known structures and for deducing structures of unknown organic molecules based on their NMR spectra. Contains 30 known and 30 unknown structure determination problems. Features a supporting website from which instructors can download the structures of the unknowns in selected chapters, digital versions of all figures, and raw data sets for processing.

[The Earth-Mars Chronicles: Vol 1 - Hope for Humanity](#), [Gerald W. Driggers](#) , 2012, 1595944818, 9781595944818. The birthplace of the human race is facing cataclysm and humanity will perish. Does the race that calls Earth home have the vision, the determination, the know-how to evolve into the space-faring species that it must become in order to survive? Ordinary people are faced with extraordinary choices - some hesitate, some succumb to personal ambition, some choose belief over science, and some simply give up. To those who cling to a vision of humans as more than an Earth-bound

species, Mars provides hope for all - a new home and a haven for humanity. It has beckoned for decades, but as of 2045 only robots have visited the Red Planet. Now Mars has become the key to survival, but it may be too late. Hope for Humanity is the first book in the Earth-Mars Chronicles, the story of the struggle of humanity with itself when faced with survival as a species. Are we capable of sacrificing individual ambition for the continuation of the race? Can we become a global community and accomplish greatness in a time of great peril? And most importantly, can we become the children of Earth and Mars to save humanity?

[Roxana: The Fortunate Mistress, Daniel Defoe](#) , 2008, 0199536740, 9780199536740. Roxana (1724), Defoe's last and darkest novel, is the autobiography of a woman who has traded her virtue, at first for survival, and then for fame and fortune. Its narrator tells the story of her own 'wicked' life as the mistress of rich and powerful men. A resourceful adventuress, she is also an unforgiving analyst of her own susceptibilities, who tells us of the price she pays for her successes. Endowed with many seductive skills, she is herself seduced: by money, by dreams of rank, and by the illusion that she can escape her own past. Unlike Defoe's other penitent anti-heroes, however, she fails to triumph over these weaknesses. The novel's drama lies not only in the heroine's 'vast variety of fortunes', but in her attempts to understand the sometimes bitter lessons of her life as a 'Fortunate Mistress'. Defoe's achievement was to invent, in 'Roxana', a gripping story-teller as well as a gripping story. This edition uses the rare first edition text, with a new introduction, detailed notes, textual history, and a map. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

[Art of Suicide, Ron Brown](#) , 2001, 1861891059, 9781861891051. The Art of Suicide is a history of the visual representation of suicide from the ancient world to its decriminalization in the 20th century. After looking at instances of voluntary death in ancient Greece, Ron Brown discusses the contrast between the extraordinary absence of such events in early Christianity and the proliferation of images of biblical suicides in the late medieval era. He emphasizes how differing attitudes to suicide in the early modern world slowly merged, and pays particular attention to the one-time chasm between so-called heroic suicide and self-destruction as a "crying crime". Brown tracks the changes surrounding the perception of suicide into the pivotal Romantic era, with its notions of the "man of feeling", ready to hurl himself into the abyss over a woman or an unfinishable poem. After the First World War, the meaning of death and attitudes towards suicide changed radically, and in time this led to its decriminalization. The 20th century in fact witnessed a growing ambivalence towards suicidal acts, which today are widely regarded either as expressions of a death-wish or as cries for help. Brown concludes with Warhol's picture of Marilyn Monroe and the videos taken by the notorious Dr Kevorkian.

Many bacteria, animals, and plants produce toxins that can prove lethal to other organisms. Toxins are a form of "biological warfare" that helps their producer to survive and so confer an evolutionary advantage. They display an extraordinary range of complexity, from the formic acid provided by ants to bacterial proteins composed of thousands of amino acids. This Guidebook considers the more complex protein and peptide toxins and groups them according to their mode of action. Topics covered include: membrane-permeabilizing toxins; toxins affecting signal transduction and protein synthesis; cytoskeleton-affecting toxins; toxins affecting the immune and inflammatory response. This class of biomolecules will be of interest to a wide range of researchers in cell biology, neuroscience, and toxicology.

[Health Justice: An Argument from the Capabilities Approach, Sridhar Venkatapuram](#) , 2013, 0745637507, 9780745637501. Social factors have a powerful influence on human health and longevity. Yet the social dimensions of health are often obscured in public discussions due to the overwhelming focus in health policy on medical care, individual-level risk factor research, and changing individual behaviours. Likewise, in philosophical approaches to health and social justice, the debates have largely focused on rationing problems in health care and on personal responsibility. However, a range of events over the past two decades such as the study of modern famines, the global experience of HIV/AIDS, the international women's health movement, and the flourishing of social epidemiological research have drawn attention to the robust relationship between health and broad social arrangements. In Health Justice, Sridhar Venkatapuram takes up the problem of identifying what claims individuals have in regard to their health in modern societies and the globalized

world. Recognizing the social bases of health and longevity, Venkatapuram extends the Capabilities Approach of Amartya Sen and Martha Nussbaum into the domain of health and health sciences. In so doing, he formulates an inter-disciplinary argument that draws on the natural and social sciences as well as debates around social justice to argue for every human beings moral entitlement to a capability to be healthy. An ambitious integration of the health sciences and the Capabilities Approach, Health Justice aims to provide a concrete ethical grounding for the human right to health, while advancing the field of health policy and placing health at the centre of social justice theory. With a foreword by Sir Michael Marmot, chair of the WHO Commission on the Social Determinants of Health.

For women, the consequences were extensive and profound, as the state set out to reverse legal and social rights women had won and to dictate many aspects of women's lives, including what they could study and how they must dress and relate to men. Reconstructed Lives presents Iranian women telling in their own words what the revolution attempted and how they responded. Through a series of interviews with professional and working women in Irandoctors, lawyers, writers, professors, secretaries, businesswomen Haleh Esfandiari gathers dramatic accounts of what has happened to their lives as women in an Islamic society. She and her informants describe the strategies by which women try to and sometimes succeed in subverting the state's agenda. Esfandiari also provides historical background on the women's movement in Iran. She finds evidence in Iran's experience that even women from "traditional" and working classes do not easily surrender rights or access they have gained to education, career opportunities, and a public role.

[Legacy of an Ex-Slave \(in Poetry\): Arts of Screaming, Jeffrey V Perry](#) , 2009, 0982113641, 9780982113646. Legacy of an Ex-slave comes from an earlier work that was re-edited, "Conversations with a Soul Brother," Part 2. I believe that it has merit on its own. Legacy is an emotional part of American history with titles like; I am Bi-cultural and Digit-Digital-Digitell-Digitale, the story of Gigantoe that we sometimes refuse to discuss. Legacy then, runs through our history up to present times with, Can I go from a King to a President? It was to my pleasant surprise that we, in America, did exactly that in the symbolic election of a Kenyan-descendant president. Let us all move forward!

Recent developments in DNA marker technologies, in particular the emergence of Single Nucleotide Polymorphism (SNP) discovery, have rendered some of the traditional methods of genetic research outdated. Next Generation Sequencing and Whole Genome Selection in Aquaculture comprehensively covers the current state of research in whole genome selection and applies these discoveries to the aquaculture industry specifically. The text begins with a thorough review of SNP and transitions into topics such as next generation sequencing, EST data mining, SNP quality assessment, and whole genome selection principles. Ending with a discussion of the technology's specific applications to the industry, this text will be a valuable reference for those involved in all aspects of aquaculture research. [Memos from the Chairman, Alan C. Greenberg](#) , 1997, 0471177571, 9780471177579. When he assumed the position of Chairman of the Board of Bear Stearns in 1978, Alan C. Greenberg found himself with the unenviable task of meeting and surpassing the rigorous leadership standards set by his legendary predecessor, Cy Lewis, "the man who was credited with having made Bear Stearns what it then was."For nearly two decades now, "Ace" Greenberg, as he is affectionately known, has kept Bear Stearns on top through a unique and provocative business management philosophy a philosophy that he frequently and effectively communicates to employees through a series of no-holds-barred company memos. Now, the inimitable Greenberg style sparks a priceless collection of his most inspirational, insightful, and instructional memoranda. Memos From the Chairman affords a rare glimpse at the motivational thoughts and management techniques of one of the corporate world's most brilliant leaders."Many years ago, Where Are the Customers' Yachts?, through a humorous look at Wall Street, dispensed some of the best investment advice ever written. In this book, Ace has applied the same treatment to managerial advice with equal success." Warren Buffett from the Foreword to Memos From the Chairman"I love this book. If I didn't have a dreaded MBA, I might even, at age 53, apply for a job at Bear Stearns." Tom Peters

[How Sex Became a Civil Liberty, Leigh Ann Wheeler](#) , 2013, 0199754233, 9780199754236. Sexual revolutions have transformed American culture, society, and politicsnot to mention individual livesthroughout the twentieth century. Sex radicals challenged Victorian restraint and championed sexual liberation. In the process, they confronted a tightly knit web of legal restrictions on sexual expression and conduct designed to keep sex out of the public realm and to allow public officials to police sex in private spaces. The American Civil Liberties Union has stood at the center of these battles, using the Constitution to create an expansive body of sexual rights that helped lay the old order to rest. How Sex Became a Civil Liberty is the first book to show how ACLU leaders and attorneys forged legal principles that advanced the sexual revolution. It explains how, why, and to what effect ACLU activists developed and revised their own policies, adopted

sexual expression and practice as civil liberties, persuaded courts to do the same, and joined with commercial media and others to promote these understandings of sexuality to a broader public. Through its influence over public discourse as well as law, the ACLU helped to establish a liberal, rights-based sexual ethos in the United States. It played a prominent role in nearly every major court decision related to sexuality and also reached beyond the courtroom to promote its agenda through grassroots activism, political action, advertising campaigns, and public education. Thanks to its work, abortion and birth control are legal, coerced sterilization is rare, sexually explicit material is readily available, and gay rights are becoming a reality. Using rich archival sources and interviews with major players, *How Sex Became a Civil Liberty* tells the story of the men and women who built the legal foundation for the sexual revolution. It explores how private lives shaped approaches to public policy and illuminates the importance of debates among activists—as well as between activists and their opponents—in shaping what we now consider to be our sexual rights. A story of tragedy as well as of triumph, *How Sex Became a Civil Liberty* shows how the ACLU helped to create our polarized sexual culture by collapsing old distinctions between public and private and privileging access to sexual expression over protection from it. Realizing how the result—a culture saturated with sex and a citizenry armed with sexual rights—liberates and also limits our sexual choices could help to transform fights over rights into productive conversations about how to shape the public world we share.

[Rome's Revolution, Volume 1, Michael Brachman](#) , 2011, 0984895337, 9780984895335. "Imagine waking up 14 centuries from now, only to discover that everything you know about the universe is wrong and you are nothing but a despised relic from the long-dead past." Rome's Revolution is an interstellar saga about a man from the 21st century and a woman from the 35th century who fight forces from the incomprehensibly large to the infinitesimally small, all intent on destroying mankind. Cinematic in scope, Rome's Revolution offers romance, comedy, heart-pounding thrills, suspense, "legal" time travel, and meticulously researched hard science. It is a love story and a culture clash that celebrates the triumph of the individual over a mass-mind that thinks it is infallible. Rome's Revolution has it all: robots, aliens, computers, genetic manipulation, spaceships that travel faster than light and some that travel a lot slower. Rome's Revolution chronicles the adventures of Rei Bierak, a twenty-something male from the very near future. Rei, along with 542 other humans, is frozen and launched in the Ark II toward the stars with the hope of establishing a colony on a habitable world in the Tau Ceti system. During Rei's long trip, modern civilization has collapsed, and society has reformed into a decidedly different model. The 24-chromosome mind-connected humans of the future called the Vuduri are efficient, indifferent, and emotionally deficient. The Vuduri have conquered faster-than-light travel and have established an outpost in the Pi3 Orionis system (aka Tabit) to study why certain stars are disappearing. Awakening 1388 years in the future, Rei meets Rome, a beautiful half-breed Vuduri woman, who is eventually ostracized for consorting with him. Rei and Rome are joined by OMCOM, a super-computer with delusions of omnipotence. Together, they fend off a hostile society, saboteurs, and technology indistinguishable from magic. The fate of humanity, perhaps even life itself, hangs in the balance. If you are looking for some science in your science fiction, this book is for you. "(One other note: this story is true, it just hasn't happened yet.)"

These compelling authentic documents are now available for the first time in one volume -- an aesthetic testimony to the emotion and logic of a murderer's mind, a mind filled with terror and hatred, absurdity and horror, pathos and iniquity."Brian King compiled these writings and arranged them in their present order to illustrate the bizarre logic that surfaces in people who are driven into the territory of the criminally insane. He shows with comments and sequence the human delusions and viewpoints that preoccupied the minds of the individuals before, during and after the illegal, cruel, and terrible violent crimes. -- Herbert Mullin, a serial killer who murdered thirteen people in the Santa Cruz area of California between October 1972 and February 1973.A compilation of essays, short stories, memoirs, confessions, letters, manifestoes, poetry, drawings, photographs and other works created by serial killers, mass murderers, cannibals, necrophiles, sexual sadists, psychopaths and assassins."In my lifetime I have murdered 21 human beings. I have committed thousands of burglaries, robberies, larcenies, arsons and last but not least I have committed sodomy on more than 1,000 male human beings. For all of these things I am not the least bit sorry. I have no conscience so that does not worry me. I don't believe in Man, God nor devil. I hate the whole damned human race including myself". -- Carl Panzram, murderer"I wish I could enact a law that would make a dull mind an infamous crime. I'm that embittered. They've done that much to me. Every time they waddle by with a filthy story created by a filthier mind, I wonder. There they go. Free. My potential executioners. Obese in mind and body. The men who perpetrate the world with social, cultural and historical lunacy. They get to kill me. Then I laugh. I know. The whole world has suddenly gone mad.
