[The Steppe and Other Stories, Anton Chekhov](#) , 2009, 0199555451, 9780199555451. The first of Chekhov's works to be published in a serious literary journal, 'The Steppe', with its masterly account of a spectacular thunderstorm, signifies his maturation as a writer of short stories. While the majority of his tales focus on the privileged classes, this selection shows that Chekhov never forgot his origins as the son of a failed provincial grocer, and characters as varied as the brutal soldier in 'Gusev', the downtrodden old constable in 'On Official Business', and the bemused peasants in 'New Villa' testify to the power and flexibility of his art. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

[Subversive Spirituality: Transforming Mission Through the Collapse of Space and Time, L. Paul Jensen](#) , 2011, 0227173570, 9780227173572. Subversive Spirituality links the practice and study of Christian spirituality with Christian mission. It develops a twofold thesis: grace, spiritual disciplines, and mission practices are inseparably linked in the mission of Jesus, of the early church, and of several historical renewal movements, as well as in a contemporary field research sample; and amidst the collapse of space and time evidenced by our culture's increasingly hurried pace of life, more time and space are needed for regular solitary and communal spiritual practices in church, mission, and leadership structures if Christian mission is to transform people and culture in our time. This requires a subversion of the collapsed spatial and temporal codes that have infected our Christian institutions. Jensen employs methods and approaches from a variety of academic disciplines to explore both spirituality in terms of space and time and mission in terms of deed and word. Specifically, Jensen examines the spirituality and mission of Jesus, the early church, the apostolic fathers, Origen, the Devotio Moderna, the early Jesuits, David Brainerd, and several women in 19th century Protestant missions. He considers the spirituality and mission that have arisen within the postmodern generations born after 1960. Based on the

theological, historical, cultural, and field analyses of this study, a model for spirituality and mission is proposed. The model addresses the contemporary collapse of space and time and appears to have widespread applicability to diverse cultures and eras. Jensen's model is applied to the pluralistic and postmodern milieu of North America with recommendations for spirituality and mission in church, mission, and educational structures. A derivative model for teaching and practicing spirituality and mission in the academy, which also has application for non-formal leadership development structures, is also proposed.

[Nationalism, John Hutchinson, Anthony David Smith](#) , 1994, 0192892606, 9780192892607. Achieving prevalence as an ideology in the political and social ferment of late 18th-century Europe and America, nationalism first found expression during the course of such historical upheavals as the American and French Revolutions. Its founders and early sponsors--Rousseau, Herder, Fichte, Korais, and Mazzini--looked to nationalism as the manifestation of modern humanity's most essential aspirations: autonomy, unity, identity. Born of notions regarding popular freedom and sovereignty that had been gathering momentum for generations, it conjured up images of a modernizing West at once hungry for change and yearning for a return to age-old concepts of fraternity and ancient heritage. Since that time nationalism, having taken on countless different dimensions, remains a vital and dynamic force for change--whether for good or otherwise. Despite only recently becoming the subject of scholarly debate, nationalism has been the focus of a truly prodigious amount of writing. This important Oxford Reader makes the topic more accessible by offering a broad, authoritative treatment of the key contributions to the subject, while giving unprecedented depth to recent debates and issues. Edited by two of the field's most influential scholars, the readings are representative of the vast array of experience and scholarship that have shaped the concept of nationalism for over two centuries. From Ernest Renan's *What is a Nation?*, written in the 1880s, to the more current views of the 1990s, *Nationalism* gathers under one cover an impressive array of writing on everything from imagined communities to ethno-regional movements. In no other volume will students of politics, history, sociology, anthropology, international relations, and cultural studies have access to such a definitive appraisal of one of the modern world's most influential--and explosive--ideas.

[The Ethics of Autism: Among Them, But Not of Them, Deborah R. Barnbaum](#) , 2008, 0253220130, 9780253220134.

Autism is one of the most compelling, controversial, and heartbreaking cognitive disorders. It presents unique philosophical challenges as well, raising intriguing questions in philosophy of mind, cognitive science, and philosophy of language that need to be explored if the autistic population is to be responsibly served. Starting from the "theory of

mind" thesis that a fundamental deficit in autism is the inability to recognize that other persons have minds, Deborah R. Barnbaum considers its implications for the nature of consciousness, our understanding of the consciousness of others, meaning theories in philosophy of language, and the modality of mind. This discussion lays the groundwork for consideration of the value of an autistic life, as well as the moral theories available to persons with autism. The book also explores questions about genetic decision making, research into the nature of autism, and the controversial quest for a cure. This is a timely and wide-ranging book on a disorder that commends itself to serious ethical examination.

[Displays: Fundamentals and Applications, Rolf R. Hainich, Oliver Bimber](#) , 2011, 1568814399, 9781568814391. In the last decade, new displays have been developed at an ever-increasing pace: bulky cathode ray tubes have been replaced by flat panels and mobile phones, tablets, and navigation systems have proliferated. Seeing this explosion raises tantalizing questions about the future evolution of visual displays: Will printed displays be sold by the square yard and glued to the wall? Will disposable displays, powered by printed batteries and with built-in storage chips, talk to us from cereal boxes? Will we begin wearing display glasses that simulate any kind or number of virtual displays we would ever need? Will chip implants directly interface to our brains, eliminating the need for any displays at all? These and other questions are explored in *Displays: Fundamentals & Applications*, which describes existing and emerging display

technology. The book begins by presenting the basics of wave optics, geometric optics, light modulation, visual perception, and display measures, along with the principles of holography. It then describes the technology and techniques behind projection displays, projector-camera systems, stereoscopic and autostereoscopic displays, computer-generated holography, and near-eye displays. In addition, the authors discuss how real-time computer graphics and computer vision enable the visualization of graphical 2D and 3D content. The text is complemented by more than 400 rich illustrations, which give readers a clear understanding of existing and emerging display technology.

The cold, hard facts about the return on investment from treating people with dignity, respect and consideration. Just what is it that permits one organization to achieve unprecedented levels of success over a substantial period of time while a nearly identical competitor is going down the tube? How for example, could Southwest Airlines achieve 23 consecutive years of record revenues and profits while TWA, Continental, Pan AM, Eastern, Braniff and others all around them were hemorrhaging red ink? How could GE, at a plant near Columbia, Tennessee, produce refrigerator compressors at a cost substantially less than that of its foreign competitors, despite an unfavorable cost differential of \$15 an hour? It's no accident that the organizations consistently identified as winners also happen to be some of the best places on earth to work. This occurs not as an afterthought, but as a vital, premeditated element of business strategy.

[Secession Debated: Georgia's Showdown in 1860, William W. Freehling, Craig M. Simpson](#) , 1992, 0195079450, 9780195079456. The critical northern antebellum debate matched the rhetorical skills of Abraham Lincoln and Stephen A. Douglas in an historic argument over the future of slavery in a westward-expanding America. Two years later, an equally historic oratorical showdown between secessionists and Unionists in Georgia generated as much popular interest south of the Mason-Dixon line, and perhaps had an even more profound immediate effect on the future of the United States. With Abraham Lincoln's "Black Republican" triumph in the presidential election of 1860 came ardent secessionist sentiment in

the South. But Unionists were equally zealous and while South Carolina a bastion of Disunionism since 1832 seemed certain to secede, the other fourteen slave states were far from decided. In the deep South, the road to disunion depended much on the actions of Georgia, a veritable microcosm of the divided South and geographically in the middle of the Cotton South. If Georgia went for the Union, secessionist South Carolina could be isolated. So in November of 1860 all the eyes of Dixie turned to tiny Milledgeville, pre-war capital of Georgia, for a legislative confrontation that would help chart the course toward civil war. In *Secession Debated*, William W. Freehling and Craig M. Simpson have for the first time collected the seven surviving speeches and public letters of this greatest of southern debates over disunion, providing today's reader with a unique window into a moment of American crisis. Introducing the debate and debaters in compelling fashion, the editors help bring to life a sleepy Southern town suddenly alive with importance as a divided legislature met to decide the fate of Georgia, and by extension, that of the nation. We hear myriad voices, among them the energetic and self-righteous governor Joseph E. Brown who, while a slaveholder and secessionist, was somewhat suspect as a native North Georgian; Alexander H. Stephens, the eloquent Unionist whose "calm dispassionate approach" ultimately backfired; and fiery secessionist Robert Toombs who, impatient with Brown's indecisiveness and the caution of the Unionists, shouted to legislators: "Give me the sword! but if you do not place it in my hands, before God! I will take it." The secessionists' Henry Benning and Thomas R.R. Cobb as well as the Unionists Benjamin Hill and Herschel Johnson also speak to us across the years, most with eloquence, all with the patriotic, passionate conviction that defined an era. In the end, the legislature adopted a convention bill which decreed a popular vote on the issue in early January, 1861. The election results were close, mirroring the intense debate of two months before: 51% of Georgians favored immediate secession, a slim margin which the propaganda-conscious Brown later inflated to 58%. On January 19th the Georgia Convention sanctioned secession in a 166-130 vote, and the imminent Confederacy had its Southern hinge. *Secession Debated* is a colorful and gripping tale told in the words of the actual participants, one which sheds new light on one of the great and hitherto neglected verbal showdowns in American history. It is essential to a full understanding of the origins of the war between the states.

[An Introduction to Numerical Methods in C++, Brian Hilton Flowers](#) , 1995, 0198538634, 9780198538639. This text on numerical computing, presented through the medium of the C++ language, is designed for students of science and engineering who are seriously studying numerical methods for the first time. It should also be of interest to computing scientists who wish to see how C++ can be used in earnest for numerical computation. A good knowledge of at least one programming language, such as Basic, Fortran or Pascal, is assumed, while a working knowledge of C would be an advantage. However, no prior knowledge of C++ is assumed. The language is developed in step with its numerical applications. What results is a powerful framework for numerical computations. As befits an introductory text, programming effort relates mostly to the classical numerical algorithms. However, greater emphasis is placed on

recursive functions than is usually the case, and some interesting use is also made of recursive data structures for solving numerical problems.

9781608191697. As the recession deepens, with a downturn in spending, rise in defaulting mortgages and throttling of credit, a Go-Go economy has transitioned to a Uh-Oh economy. How did we get here and what does it mean for individuals and families? The New Frugality lays out how Americans have overspent-and offers a way out through consuming less and saving more-showing that living simply is not just living "cheaply." What is required is a paradigm shift. We need to learn to live more modestly by cutting back on spending, actually attempting to live within our means and increasing savings. Farrell outlines creative new ways of thinking that can help us to accomplish this, not just by reverting to earlier financial models, but by innovating new solutions that are appropriate to the times we live in. In some ways, The New Frugality is the fiscal equivalent of the green movement; and indeed, going green is also part of the project. In The New Frugality Farrell will show where the economy is going, how it will affect regular families, and how they can weather the storm.

[Enchanted Europe: Superstition, Reason, and Religion 1250-1750, Euan Cameron](#) , 2011, 0199605114, 9780199605118.

Since the dawn of history people have used charms and spells to try to control their environment, and forms of divination to try to foresee the otherwise unpredictable chances of life. Many of these techniques were called 'superstitious' by educated elites. For centuries religious believers used 'superstition' as a term of abuse to denounce another religion that they thought inferior, or to criticize their fellow-believers for practising their faith 'wrongly'. From the Middle Ages to the Enlightenment, scholars argued over what 'superstition' was, how to identify it, and how to persuade people to avoid it. Learned believers in demons and witchcraft, in their treatises and sermons, tried to make 'rational' sense of popular superstitions by blaming them on the deceptive tricks of seductive demons. Every major movement in Christian thought, from rival schools of medieval theology through to the Renaissance, the Reformation, and the Enlightenment, added new twists to the debates over superstition. Protestants saw Catholics as superstitious, and vice versa. Enlightened philosophers mocked traditional cults as superstitions. Eventually, the learned lost their worry about popular belief, and turned instead to chronicling and preserving 'superstitious' customs as folklore and ethnic heritage. Enchanted Europe is the first comprehensive, integrated account of western Europe's long, complex dialogue with its own folklore and popular beliefs. Drawing on many little-known and rarely used texts, Euan Cameron constructs a compelling narrative of the rise, diversification, and decline of popular 'superstition' in the European mind.

[This Fiery Trial: The Speeches and Writings of Abraham Lincoln, Abraham Lincoln](#) , 2002, 0195151062, 9780195151060.

The most eloquent president in our history, Abraham Lincoln's literary ability was extraordinary. Indeed, he is the one American president whose writings could be considered literature. Now, in *This Fiery Trial*, William Gienapp has brought together over one hundred pieces by Lincoln, ranging from his first published political statement, printed in the *Sangamo Journal* in 1832, to his final public address, delivered just days before his assassination. Here of course are some of the greatest speeches in American history, including the Gettysburg Address and the Second Inaugural Address. Other pieces include his "A House Divided" speech to the Republican State convention in 1858, excerpts from his famed debates with Stephen Douglas, and the text of the Emancipation Proclamation. The writings provide a documentary account of Lincoln's thought and how it evolved over time. We can trace, for instance, how his thoughts on slavery and emancipation changed through the course of the war, from a rather limited view (free only slaves used for military purposes) to his ringing endorsement of the Thirteenth Amendment, which ended slavery forever. Gienapp has provided detailed introductory headnotes for each piece, and the book includes an extensive chronology of Lincoln's life. Often eloquent, frequently amusing, and occasionally profound, these writings offer an intimate portrait of Lincoln--in his own words.

To Tim's surprise, Vanessa is into him, too, but she can kiss her social status goodbye if anyone ever finds out. Tim and Vanessa begin a clandestine romance, but looming over them is the *Tragedy Paper*, Irving's version of a senior year thesis, assigned by the school's least forgiving teacher. [The Organic Chemistry of Enzyme Catalyzed Reactions, Richard B. Silverman](#), 2000, 0126437459, 9780126437454. Written for advanced undergraduate and graduate students as well as professionals in organic and medicinal chemistry and biochemistry, this unique text illuminates the "black box" of enzyme-catalyzed reactions by showing how enzymes are simply highly efficient organic chemists. Enzyme-catalyzed reactions are essential for the design of enzyme inhibitors in the pharmaceutical and agricultural industries, and of growing importance for process development in the chemical and biotechnology industries. Following a general introduction to the role of enzymes as catalysts, each chapter describes the organic reaction mechanisms that are used by enzymes to catalyze a particular family of organic transformations. The compilation includes a vast number of drawings to illustrate structures and mechanisms, and focuses on one or two examples of enzymes that catalyze the particular chemistry for that transformation. The Organic Chemistry of Enzyme-Catalyzed Reactions is not a book on enzymes, but rather the general mechanisms used by enzymes. Extensive references refer to the many experiments that have helped to elucidate enzyme mechanisms. Chemical model studies as an aid in mechanistic studies are also discussed, as are the design of haptens and the generation of catalytic antibodies ("designer enzymes"). Problem sets and solutions are provided to check the reader's understanding of the principles described. \* Shows how enzyme-catalyzed reactions are simply efficient organic reactions \* Emphasizes the connection between organic reaction mechanisms and enzyme mechanisms \* Explains how enzymes can accelerate the rates of chemical reactions with high specificity \* Uses selected enzymes to demonstrate general mechanisms of enzyme-catalyzed reactions \* Illustrated with a vast array of clearly drawn structures, schemes, and figures \* Includes an extensive bibliography on enzyme mechanisms \* Describes approaches to the design of enzyme inhibitors \* Covers catalytic antibody design and mechanisms \* Provides problem sets and solutions for each chapter \* Written in an informal and engaging style

How does one measure imagination? Why are some cities centres of innovation? Is the internet making us more or less imaginative? What kinds of classroom techniques increase the creativity of children? Does brainstorming work? Can the colour of paint on the wall or the location of a restroom have a dramatic impact on creativity? For too long we've pretended that creativity is an impenetrable biological gift. As a result, we've clung to a series of myths about what creativity is and where it comes from. These myths aren't just misleading- they also interfere with the imagination. That's why, in addition to presenting elegant experiments and important scientific studies, *Imagine* is filled with real-life examples: Bob Dylan's writing method, the drug habits of poets, an autistic surfer who invented a new surfing move, a website that solves seemingly impossible problems, and the offices of Pixar. Creativity shouldn't be a process reserved for artists, inventors, or other "creative types." The human mind, after all, has the creative impulse hard-wired into its most essential programming code. This book is about how that happens. It is the story of how we imagine.

Determined to seek out Tsalal, the remote island of pure and utter blackness that Poe describes, Jaynes convenes an all-black crew of six to follow Pym's trail to the South Pole, armed with little but the firsthand account from which Poe derived his seafaring tale, a bag of bones, and a stash of Little Debbie snack cakes. Webel, Department of French, Georgetown University. "Stella J. Cohen-Scali's new guide to French grammar, *Bouees de Grammaire: le Francais en Tableaux*, compiles at long last in published form the ingenious strategies that the author has developed to help students navigate their way through the challenges of using the French language correctly and confidently. By the many students who have urged Professor Cohen-Scali over the years to bring her work to press, this guide has been praised as no less than a pedagogical lifeline." -Professor Deborah Lesko Baker, Department of French, Georgetown University. Students comments "The diagrams really help me to understand the material. It is simpler and explained better than in the book and would be a great supplement to the book work. The color coding really makes it easy to understand even some of the more complex topics by linking the material to some examples. The bottom line is that as a student, I would definitely want to buy this material." -Zach Schwab "Professor Cohen-Scali's grammar charts are the most comprehensive and useful study tools I've used in studying French! The charts not only present the material in a way that's easy to memorize for class, but that also facilitates quick recall in daily conversation." -Faith Mulroy "This book will serve as a constant reference to students at all levels of study. The grammatical charts allowed me to learn French quickly and effectively and they helped make clear a variety of complicated concepts and rules. I would recommend this book to anyone who is looking for a useful reference for navigating French grammar." -Nabil Hashmi

[Art of the Gold Rush, Janice Tolhurst Driesbach, Harvey Jones, Katherine Church Holland](#) , 1998, 0520214315, 9780520214316. The California Gold Rush captured the get-rich dreams of people around the world more completely than almost any event in American history. This catalog, published in celebration of the sesquicentennial of the 1848 discovery of gold at Sutter's Mill, shows the vitality of the arts in the Golden State during the latter nineteenth century and documents the dramatic impact of the Gold Rush on the American imagination. Among the throngs of gold-seekers in California were artists, many self-taught, others formally trained, and their arrival produced an outpouring of artistic works that provide insights into Gold Rush events, personages, and attitudes. The best-known painting of the Gold Rush era, C.C. Nahl's *Sunday Morning in the Mines* (1872), was created nearly two decades after gold fever had subsided. By then the Gold Rush's mythic qualities were well established, and new allegories--particularly the American belief in the

rewards of hard work and enterprise--can be seen on Nahl's canvas. Other works added to the image of California as a destination for ambitious dreamers, an image that prevails to this day. In bringing together a range of art and archival material such as artists' diaries and contemporary newspaper articles, *The Art of the Gold Rush* broadens our understanding of American culture during a memorable period in the nation's history.

destitute swindlers and dangerous families populate her work. Writing bad checks and using denuded credit cards, Montgomery shows us what happens when the second paycheck in a paycheck-to-paycheck goes missing. She shows us the effects when basic needs are denied. And her poems insist on reminding us that "this too," is America, not American literature and that the line drawn between *ausa* and *athema* is a fiction, a lie we tell ourselves to keep ourselves safe. But none of us, as Montgomery's work shows us, can ever be truly safe as long as we are human. a Daphne Gottlieb, from the introduction

Noli Me Tangere is Latin for "touch me not, " an allusion to the Gospel of St. John where Jesus says to Mary Magdalene: "Touch me not, for I am not yet ascended to my Father." In this modern classic of Filipino literature, Jose P. Rizal exposes "matters...so delicate that they cannot be touched by anybody, " unfolding an epic history of the Philippines that has made it the most influential political novel in that country in the nineteenth and twentieth centuries. The popularity of this novel is grounded in its reflection of the

turbulent times in which it was written. Its influence on Filipino political thinking, as well as on contemporary fiction, drama, opera, dance, and film, has been and continues to be enormous. The vivid characters and the harsh situations depicted still ring true today.

The experiences, research and observations of the authors from their years of appearing in court as prosecutors in Toronto forms the basis for the book. Arguments that have been made to defend charges (and why they succeed or fail), what defects to look for on the actual ticket to have one thrown out, what trial justices look for in order to dismiss or convict in a case are all presented. The intention is to provide enough information to motorists so that they can represent themselves during a trial and increase their chances of success.

[The art of the impossible: politics as morality in practice : speeches and writings, 1990-1996, Vclav Havel](#) , 1997, 0679451064, 9780679451068. There is no shortage of politicians who make a habit of shooting from the hip, but it is much rarer to find one who speaks from the heart. Vclav Havel knows no other way to speak, or to write. Both as a dissident and as a playwright it was his sworn purpose for many years to combat evil with nothing but truth. As president of Czechoslovakia, and now of the Czech Republic, he has clung to that habit, refusing to turn over either his conscience or his voice to political handlers and professional speechwriters. Instead he assumes the additional burden--for him, it is a distinct pleasure--of composing all of his oratory. Audiences from New York to New Delhi, Oslo to Tokyo, have been the luckier for his decision. This volume consists of thirty-five of these essays, written between the years 1990 and 1996, that manage to be both profoundly personal and profoundly political. Havel writes of totalitarianism, its miseries and the nonetheless difficult emergence from it. He describes how his country and the other postcommunist countries are learning democracy from scratch and are encountering obstacles from inside and out. He marvels at the single technology-driven civilization that envelops the globe, and the challenges this presents to multicultural realities. He invokes the duty of every person alive to prevent hatred and fear from derailing history ever again. He acknowledges "the advantage it is for doing a good job as president to know that I do not belong in the position and that I can at any moment, and justifiably, be removed from it."And he reminds us that--contrary to all appearances--common sense, moderation, responsibility, good taste, feeling, instinct, and conscience are not alien to politics, but are the very key to its long-term success.

[Renaissance, Laurie F. Maffly-Kipp, Kathryn Lofton](#) , 2010, 0199779716, 9780199779710. Whether in schoolrooms or kitchens, state houses or church pulpits, women have always been historians. Although few participated in the academic study of history until the mid-twentieth century, women labored as teachers of history and historical interpreters. Within African-American communities, women began to write histories in the years after the American Revolution. Distributed through churches, seminaries, public schools, and auxiliary societies, their stories of the past translated ancient Africa, religion, slavery, and ongoing American social reform as historical subjects to popular audiences North and South. This book surveys the creative ways in which African-American women harnessed the power of print to share their historical revisions with a broader public. Their speeches, textbooks, poems, and polemics did more than just recount the past. They also protested their present status in the United States through their reclamation of that past. Bringing together work by more familiar writers in black America-such as Maria Stewart, Francis E. W. Harper, and Anna Julia Cooper-as well as lesser-known mothers and teachers who educated their families and their communities, this documentary collection gathers a variety of primary texts from the antebellum era to the Harlem Renaissance, some of which have never been anthologized. Together with a substantial introduction to black women's historical writings, this volume presents a unique perspective on the past and imagined future of the race in the United States.

[In Full Bloom: A Brain Education Guide for Successful Aging, Ilchi Lee, C. Jessie Jones](#) , 2008, 0979938848, 9780979938849. According to Ilchi Lee and Dr. Jessie Jones, co-authors of In Full Bloom: A Brain Education Guide for Successful Aging, the truth about the aging brain is simple but extraordinary: you can have a fit brain at age 60, 70, 80 and beyond. It's simply a matter of choice. This book empowers older individuals to take control of their mental and physical lives by introducing them to the Brain Education System Training (BEST) method. Developed by Lee, BEST is a five-step mind-body training program that helps unlock the brain's true potential. The five steps of the BEST program include: Brain Sensitizing, Brain Versatilizing, Brain Refreshing, Brain Integrating, and Brain Mastering. One of the more toxic ideas spread by modern culture is that the brain is static from birth to death, the authors write. However, as cutting-edge brain science is showing us, such decay is, for the most part, optional. It can be staved off or minimized with the proper actions. Readers will benefit from tips and techniques that will allow them to improve their attention and concentration, expand their imagination and creativity, develop their energy and strength, manage their stress effectively, and gain inspiration for a positive mature identity. In Full Bloom offers simple, yet profound, steps to help you fully realize your potential. Every phase of life should be engaging and invigorating. This easy-to-read guide shows you the way, said David Bishop, president, Sony Pictures Home Entertainment. As people age, it is important that they continue having a dream for their life to make a plan for who they want to be now and in the future, the authors say. Our goal for this book is that we can help people do this by letting them discover the joy in their life, as well as their true sense of purpose. In Full Bloom: A Brain Education Guide for Successful Aging shows readers how to get the most out of the last third of life by using the brain to its maximum potential.

[I Have Heard You Calling in the Night, Thomas Healy](#) , 2006, 0151012598, 9780151012596. It seems now like a different me, the years I spent with Martin, a Doberman dog, and before he came, another me; and it is a new me now, once again, writing this. I would have been dead long ago had I continued to live the way I had before he came. I think someone would have murdered me, given how I drank and the dives that I drank in and that I was an aggressive, angry

man. I had no money and no friends. I didnt care, I couldnt have. Thomas Healy was a drunk, a fighter, sometimes a writer, often unemployed, no stranger to the police. His life was going nowhere but downhill. Then one day he bought a pupa Doberman. He called him Martin. Gradually man and dog became unshakable allies, the closest of comrades, the best of friends. They took long walks together, they vacationed together, they even went to church together. Martin, in more ways than one, saved Thomas Healys life. Written with unadulterated candor and profound love, this soulful memoir gets at the heart of the intense bond between people and dogs.

An inspired collection of new fiction from some of todays most celebrated writers, exploring the charm, potency and seductive powers of a classic genre . . . the love letter. When did you last receive a love letter? Have emails and text messages taken over from this romantic form of communication? And might a love letter tell us something about its author their other writing could not? Editors Joshua Knelman and Rosalind Porter have assembled an exciting and unique collection of new fiction: theyve asked some of our most celebrated contemporary writers to explore the distinctive form of the love letter to remind us how enticing words can be and perhaps even to resurrect a dying custom. [Journalism is War: Stories of Power Politics, Sexual Dalliance and Corruption in the Nation's Capital, George Archibald](#) , 2009, 0978845374, 9780978845377. In the 1980 's, Rep. Newt Gingrich, then Republican whip and organizer of House Republican conservatives, was a major source for The Washington Times. Gingrich and his band of young-turk conservative Republican House members elected in the late 1970s and early eighties were tired of their party 's leaders who had become the lazy, perpetual minority. Gingrich, Trent Lott and other young Republican House members reached out to reporters like George Archibald, fed them stories, gave them access to documents and sources and briefed them in daily meetings in Gingrich 's second-floor whip 's office in the U.S. Capitol. All told, the years from 1989 to 1998 were a field of juicy clovers for The Washington Times news reporters. The circulation director often commented that The Washington Times sold 10,000 extra single copies each day when sex was on Page One, 10,000 more copies from orange boxes on the streets when the Redskins football team was out front and 10,000 more when they had a big political scandal. The recipe was clear and became the Times mantra. Washington is a dog-eat-dog town where overpaid hangers-on work constantly to secure their own positions politicians, congressional and executive branch staff members and civil servants, lobbyists for corporate, union and other bosses, lobbyist and interest-group political fellow-travelers whose paychecks come from Washington 's primary business politics around the clock. In Journalism is War , George Archibald recounts stories behind these stories Democratic vice-presidential candidate Geraldine Ferraro 's financial ethics problems in 1984, Reagan media adviser Michael Deaver 's lobbying scandal leading to his perjury conviction in 1986, House Speaker Jim Wright 's disgrace and resignation in 1989, subsequent congressional scandals in the early 1990s and cultural conflict stories to the present. Fasten your seat belt. These are the behind-the-scenes revelations about the selfish, narcissistic, power-hungry political and media players on all sides who played the game for their own benefit and power -- who was stabbing whom and why. No holds barred!

The New York Times bestseller, hailed as a powerful and epic story . . . the best account of infantry combat I have ever read, and the most significant book to come out of the Vietnam War by Col. David Hackworth, author of the bestseller About Face In November 1965, some 450 men of the First Battalion, Seventh Cavalry, under the command of Lt. Col. Harold Moore, were dropped into a small clearing in the Ia Drang Valley. They were immediately surrounded by 2,000 North Vietnamese soldiers. Three days later, only two and a half miles away, a sister battalion was brutally slaughtered. Together, these actions at the landing zones X-Ray and Albany constituted one of the most savage and significant battles of the Vietnam War. They were the first major engagements between the US Army and the Peoples Army of Vietnam. How these Americans persevered sacrificing themselves for their comrades and never giving up creates a vivid portrait of war at its most devastating and inspiring. Lt. Gen. Moore and

Joseph L. Galloway the only journalist on the ground throughout the fighting interviewed hundreds of men who fought in the battle, including the North Vietnamese commanders. Their poignant account rises above the ordeal it chronicles to depict men facing the ultimate challenge, dealing with it in ways they would have once found unimaginable. It reveals to us, as rarely before, man's most heroic and horrendous endeavor.

[In Ghostly Japan, Lafcadio Hearn](#) , 2007, 160206069X, 9781602060692. Part stories of spirits and part intellectual reflections on the spiritual, In Ghostly Japan is a phantasmagoric wander through a foreign landscape. Here can be found a mountain of skulls, beautiful specters called forth in love, and a gruesome rivalry. Interspersed between these ghostly tales are philosophical contemplations on Buddhism, poetry, and existence, by the author, a Westerner who found his true home in the heart of Japan. Bohemian and writer PATRICK LAFCADIO HEARN (1850-1904) was born in Greece, raised in Ireland, and worked as newspaper reporter in the United States before decamping to Japan. He also wrote The Romance of the Milky Way (1899), and Kwaidon (1904).

[Sikhs in Britain: The Making of a Community, Gurharpal Singh, Darsham Singh Tatla](#) , 2006, 1842777173, 9781842777176. 'This fine study of the Sikhs in Britain is a splendid addition to the field. Not only does it provide an invaluable mapping of the community's origins and development which should make it a standard work of reference for years to come, but in its sophisticated interrogation of the sociological and political tensions which have marked that development it makes a uniquely informed wider contribution to the ongoing debates about the nature of "multicultural" Britain'. - Professor Christopher Shackle, SOAS, University of London'This book is of very great importance for anyone who wishes to understand the crucial role of Sikhs in defining the possibilities of multiculturalism in Britain at a time when the very notion is under attack from many sources. It should be essential reading for policy makers as well as students.' - Professor John Rex, Professor Emeritus at the University of Warwick'This work is a major review of the history and issues affecting Sikhs in Great Britain since the Second World War. Balanced and extremely well documented...it marks an important contribution to Sikh and multicultural studies'. - Professor Norman G. Barrier, Professor of History University of Missouri'This is an important book which details the coming to self-consciousness of the Sikh community in Britain under local, national and transnational exigencies'. - Professor Uday S. Mehta, Department of Political Science, Amherst College'This book comes at a time when new limits to multiculturalism and to free speech are being drawn and these wider debates are brilliantly interwoven with an account of the public and private lives of Sikhs. The book is politically charged, but sensitive, humane and open-minded at the same time.' - Robin Cohen, ESRC Professorial Research Fellow, University of Warwick.'This first major account of the development of the British Sikh community is very welcome. Scholarly, analytical and deeply empathetic, it is a major contribution.' - Professor Judith M. Brown, University of Oxford

[This Ecstasy They Call Damnation, Israel Wasserstein](#) , 2012, 0982875282, 9780982875285. "The poems in This Ecstasy They Call Damnation walk a razor's edge, bristling with intensity as they tackle the hard work of survival, both physical and spiritual. In this wide-ranging collection, Israel Wasserstein tells and re-tells myths, legends, Bible stories, and his own brilliant poems of Highway 54. The speedometer's always broken in this life, Wasserstein reminds us, and how we cope with this knowledge, and this lack of knowledge, seems to be at the heart of this rich, sure-handed debut." -Jim Daniels, author of Having a Little Talk with Capital P Poetry and other books "An evocative and lyrical storyteller, Israel Wasserstein takes on Bible stories and zombies, politics and myth. Like the angels that "we might entertain...unaware" these poems bless us with startling beauty and intelligence as they plumb the depths of the human condition. A deft and stunning debut that lingers long after the last page has been turned." -Lisa D. Chavez, Professor of Creative Writing at the University of New Mexico, author of Destruction Bay and In an Angry Season
