

[Hiding God: The Ambition of World Religion, Warren Henderson](#) , 2007, 0979538718, 9780979538711. World religion is an exhaustive system of doings apart from God's truth and God's enablement. How does world religion obscure divine truth, thus preventing man from personally knowing God? What general trends are consistently found in humanized religion? What advantage does biblical Christianity have over the religions of the world? Why should I trust Jesus Christ alone to secure eternal life? These questions and many others will be posed and rationally addressed in this book. Dear reader, please examine the evidence, and determine for yourself if biblical Christianity is a logical choice.

[Legal and Liability Issues of a Medical Spa, Paula Cohen, Susanne S. Warfield](#) , 2006, 0972541039, 9780972541039. This complete guide will take the physician, esthetician, accountant and health attorney through the necessary steps of designing a business plan for incorporating skin care services into a medical practice. The legal and liability chapters identify the areas that need to be researched on a Federal and State basis. Warfield also helps the physician determine physical plant requirements, how to hire an esthetician and what to negotiate in an employment agreement. Service and product proforma assumptions are also provided with a sample financial plan. This book is a must-read by the physician/esthetician incorporating skin care services within a medical facility.

[Unlock the Hidden Job Market: 6 Steps to a Successful Job Search when Times are Tough, Duncan Mathison, Martha I. Finney](#) , 2010, 0137032498, 9780137032495. 70% of job opportunities are never posted. Discover the huge hidden job market, and find the position of your dreams! Launch your own personal custom job search and avoid competing with thousands of desperate job seekers. Leap-frog salary levels, change professions, or even move within your current company. Uncover an employer's hidden needs and wants, and help them design the perfect job for you. More than 70% of today's job opportunities come through the 'hidden job market': they're never advertised, assigned to search firms or internal recruiters, or displayed at job fairs. What's more, as employers cut recruiting costs, the proportion of 'hidden' job opportunities is actually growing. And, since most jobseekers know practically nothing about it, those who do understand it have a powerful inside advantage. Now, two career experts reveal the hidden job market, and show how to use it to dramatically improve your chances of landing a job that fits your passions and skills perfectly. Duncan Mathison and best-selling author Martha Finney help you launch a custom, personal job search that avoids competing with thousands of desperate, laid-off job seekers. Learn how to: Use the hidden job market to leap-frog salary levels or even change professions. Uncover hidden market opportunities, and your target employers' unspoken needs and wants. Tell your story in two minutes, and make people want to know more Get the interviews that count, and run them like a pro Network without sounding phony, lame or desperate Reframe experiences, passions, and hobbies as 'transferable skills' Build a strategic support team of advisors Identify a 'dead-ended' job search, and get it restarted Negotiate compensation for 'hidden' jobs

[GMAT Quantitative Review: The Official Guide, Graduate Management Admission Council](#) , 2005, 0976570920, 9780976570929. The 'Official Guide for GMAT Quantitative Review' is the only book of its kind on the market written by the creators of the GMAT exam. With real GMAT questions from previous GMAT exams, this brand-new study guide can help you focus on your math skill, with nearly 300 answers and explanations in the following areas - Arithmetic- Algebra- Geometry- Problem Solving- Data Sufficiency.

[Workbook: Notice of Default & Foreclosure Survival for Homeowners, Mike Rockwood](#) , 2009, 0982458142, 9780982458143. This is the Workbook companion to author Mike Rockwood's critically praised, "Notice of Default & Foreclosure Survival Handbook" The 'Workbook' is filled with information, tips and strategies for homeowners today. It provides ample space to record correspondence, notes and ideas to maintain sanity through tough times. Info on the 'Handbook': The South Bay Notice of Default Handbook guides you through the steps to make sound decisions, wise choices. Written by an expert in South Bay real estate who has "been there, done that" and who helps South Bay residents through these issues every day, this book is not only good information but good inspiration as well - packed with real-life stories about how your neighbors are handling the Notice of Default.

[Kid's Eye View of Science: A Teacher's Handbook for Implementing an Integrated Thematic Instruction Approach, Susan J. Kovalik, Karen D. Olsen](#) , 1991, 0963054716, 9780963054715. This is a bold new view of science for the classroom. Based on Susan Kovalik's Integrated Thematic Instruction model, it provides step-by-step directions for integrating the areas of science (physical, earth, & life science plus technology) into students' daily science study so that what goes on inside the classroom accurately represents science as it is encountered in the real world. Centered on "first hand" rather than "hands on" approaches, the book provides step-by-step how-to's for developing curriculum (year-long theme, key points & inquiries) & selecting the most effective instructional strategies for implementing a powerful, brain-compatible science program. Chapters include: "Science, the Most Brain-Compatible of All Subjects" - an overview of five notions of how the brain learns based on recent brain research; "The Scientific Thinking Processes" - defines the seven scientific thinking processes & their brain research underpinnings; "Integrated Thematic Instruction: The Model"- describes the curricular & instructional elements of the ITI model; "Creating a Year-Long Theme"- discusses the differences between

"units" & year-long themes; provides examples & how-to steps; "Identifying Key Points"- how to identify the essential core to be learned by all students; examples & how-to's provided; "Developing Inquiries"- how to develop "first hand" rather than hands-on activities; & "Instructional Strategies"- how to make learning happen.

[Buffalo Calf Road Woman: The Story of a Warrior of the Little Bighorn, Joseph Agonito, Rosemary Agonito](#) , 2005, 0762751908, 9780762751907. Winner of the Western Heritage Award for "Outstanding Western Novel" 2005As the Cheyenne fought that June day in 1876, warrior Comes in Sight faced grave danger. His horse had been shot out from under him, and he was left stranded on the battlefield. Suddenly, a rider galloped through enemy fire, pulled Comes in Sight onto the back of her horse, and spirited him to safety. It was Buffalo Calf Road Womanthe warriors own sister. While white men refer to this clash as the Battle of the Rosebud, the Cheyenne know it as the battle, Where the Girl Saved Her Brother. Days later, Buffalo Calf fought at the Battle of Little Bighornthe only woman to do so. And now a controversy is brewing over her role in that battle: Did Buffalo Calf strike the fatal blow that killed Custer?In this award-winning novel, authors Rosemary Agonito and Joseph Agonito depict the life and times of this brave young woman and the devastating effects of white mans westward migration. Based on true events, this epic tale of love and war is an inspiring journey through one of historys most moving sagas.

[The Killer of Little Shepherds: A True Crime Story and the Birth of Forensic Science, Douglas Starr](#) , 2011, 0307279081, 9780307279088. Winner of the Gold Dagger Award A fascinating true crime story that details the rise of modern forensics and the development of modern criminal investigation. At the end of the nineteenth century, serial murderer Joseph Vacher terrorized the French countryside, eluding authorities for years, and murdering twice as many victims as Jack The Ripper. Here, Douglas Starr revisits Vacher's infamous crime wave, interweaving the story of the two men who eventually stopped him--prosecutor Emile Fourquet and Dr. Alexandre Lacassagne, the era's most renowned criminologist. In dramatic detail, Starr shows how Lacassagne and his colleagues were developing forensic science as we know it. Building to a gripping courtroom denouement, The Killer of Little Shepherds is a riveting contribution to the history of criminal justice.

[Custom and Reason in Hume: A Kantian Reading of the First Book of the Treatise, Henry E. Allison](#) , 2008, 0191615528, 9780191615528. Henry Allison examines the central tenets of Hume's epistemology and cognitive psychology, as contained in the Treatise of Human Nature. Allison takes a distinctive two-level approach. On the one hand, he considers Hume's thought in its own terms and historical context. So considered, Hume is viewed as a naturalist, whose project in the first three parts of the first book of the Treatise is to provide an account of the operation of the understanding in which reason is subordinated to custom and other non-rational propensities. Scepticism arises in the fourth part as a form of metascepticism, directed not against first-order beliefs, but against philosophical attempts to ground these beliefs in the "space of reasons." On the other hand, Allison provides a critique of these tenets from a Kantian perspective. This involves a comparison of the two thinkers on a range of issues, including space and time, causation, existence, induction, and the self. In each case, the issue is seen to turn on a contrast between their underlying models of cognition. Hume is committed to a version of the perceptual model, according to which the paradigm of knowledge is a seeing with the "mind's eye" of the relation between mental contents. By contrast, Kant appeals to a discursive model in which the fundamental cognitive act is judgment, understood as the application of concepts to sensory data, Whereas regarded from the first point of view, Hume's account is deemed a major philosophical achievement, seen from the second it suffers from a failure to develop an adequate account of concepts and judgment.

[National Lottery Commission: Annual Report, Great Britain: National Lottery Commission](#) , 2000, 010556902X, 9780105569022. The book includes entertaining tips and ideas, as well as suggestions for gifts of food, and fun ways to celebrate the seasons.

[11 Hank the Cowdog: Lost in the Dark Uncharted Forest, John R. Erickson](#) , 1991, 0141303875, 9780141303871.

Fearless Hank the cowdog, head of ranch security, enters the "dark uncharted forest" to rescue his master's son from Sinister the bobcat.

[Investing in Real Estate, Gary W. Eldred](#) , 2009, 0470564032, 9780470564035. A fully revised, new edition of one of the bestselling real estate investing guides of all time Through its five previous editions, Investing in Real Estate has shown investors how to intelligently build wealth with their investments in houses, condominiums, and small apartment buildings. Unlike many titles in this genre, Investing in Real Estate steers clear of the hyped-up no cash, no credit, no problem promises. Instead, it provides sound, real-world advice and instruction that reflects the authors time-tested wisdom and experience. This book shows you how to invest profitably, safely, and reliably as you navigate the risks and opportunities of todays property market. It covers all the topics investors need to master, including how to find, negotiate, finance, lease out, and manage your property acquisitions. Plus, you will discover how to add tens of thousands of dollars of value to nearly any property. Whether you plan to start investing or move your current investing strategy to a higher level, two decades of sales success testifies to the fact that this investing guide stands superior to any others that you will find. This new edition covers all the recent changes in the market, including the latest housing rescue legislation from Congress, a historical review of how to profit from property cycles, and insightful new ways to gain from the current excess inventories of for-sale properties, foreclosures, and REOs. Author Gary W. Eldred has also authored ten other successful real estate titles, including The Beginners Guide to Real Estate Investing, The 106 Mistakes Homebuyers Make and How to Avoid Them, and The 106 Mortgage Secrets that All Borrowers Must Learn but Lenders Dont Tell Completely revised to cover current ways to prosper in todays property markets Includes new, insider techniques for foreclosure investing Features fifteen new ways to profit with property investments Shows you how to buy properties for less than they are worth from many sources including auctions, bank sales, and homebuilders Investing in Real Estate, Sixth Edition retains its premier position as the most reliable, informative, and comprehensive guides to successful real estate investing.

[The Hungarian revolution of 1956: a collection of documents from the British Foreign Office, va Haraszti-Taylor, Great Britain. Foreign Office](#) , 1995, 094613443X, 9780946134434.

[Metaphors from Nature, Tori Peglar](#) , 2002, 0972092307, 9780972092302. This illustrates the ways in which nature can play a powerful role in our lives. While we no longer rely on the natural world for our immediate survival, the author uses myth and observation to reveal how vital our connection with nature is for spiritual and emotional health. From examining hardy plants living in harsh environments to skiing through snowy forests, he shows us how nature's quiet lessons become metaphors that help us in our daily lives

[Building Wooden Machines: Gears and Gadgets for the Adventurous Woodworker, Alan Bridgewater, Gill Bridgewater](#) , 2012, 1440322228, 9781440322228. Twenty-eight step-by-step projects result in working wooden models that demonstrate fundamental concepts of motion and mechanics such as used in cameras, combustion and steam engines, locks, and pumps.

[Molecular Orbitals and Organic Chemical Reactions: Reference Edition, Ian Fleming](#) , 2011, 1119964679,

9781119964674. Winner of the PROSE Award for Chemistry & Physics 2010. Acknowledging the very best in professional and scholarly publishing, the annual PROSE Awards recognise publishers' and authors' commitment to pioneering works of research and for contributing to the conception, production, and design of landmark works in their fields. Judged by peer publishers, librarians, and medical professionals, Wiley are pleased to congratulate Professor Ian Fleming, winner of the PROSE Award in Chemistry and Physics for *Molecular Orbitals and Organic Chemical Reactions*. Molecular orbital theory is used by chemists to describe the arrangement of electrons in chemical structures. It is also a theory capable of giving some insight into the forces involved in the making and breaking of chemical bonds—the chemical reactions that are often the focus of an organic chemist's interest. Organic chemists with a serious interest in understanding and explaining their work usually express their ideas in molecular orbital terms, so much so that it is now an essential component of every organic chemist's skills to have some acquaintance with molecular orbital theory. *Molecular Orbitals and Organic Chemical Reactions* is both a simplified account of molecular orbital theory and a review of its applications in organic chemistry; it provides a basic introduction to the subject and a wealth of illustrative examples. In this book molecular orbital theory is presented in a much simplified, and entirely non-mathematical language, accessible to every organic chemist, whether student or research worker, whether mathematically competent or not. Topics covered include: Molecular Orbital Theory, Molecular Orbitals and the Structures of Organic Molecules, Chemical Reactions: How Far and How Fast, Ionic Reactions, Reactivity, Ionic Reactions, Stereochemistry, Pericyclic Reactions, Radical Reactions, Photochemical Reactions. This expanded Reference Edition of *Molecular Orbitals and Organic Chemical Reactions* takes the content and the same non-mathematical approach of the Student Edition, and adds extensive extra subject coverage, detail and over 1500 references. The additional material adds a deeper understanding of the models used, and includes a broader range of applications and case studies. Providing a complete in-depth reference for a more advanced audience, this edition will find a place on the bookshelves of researchers and advanced students of organic, physical organic and computational chemistry. The student edition of *Molecular Orbitals and Organic Chemical Reactions* presents molecular orbital theory in a simplified form, and offers an invaluable first textbook on this important subject for students of organic, physical organic and computational chemistry. Further information can be viewed here. "These books are the result of years of work, which began as an attempt to write a second edition of my 1976 book *Frontier Orbitals and Organic Chemical Reactions*. I wanted to give a rather more thorough introduction to molecular orbitals, while maintaining my focus on the organic chemist who did not want a mathematical account, but still wanted to understand organic chemistry at a physical level. I'm delighted to win this prize, and hope a new generation of chemists will benefit from these books."—Professor Ian Fleming

[TRAVELS CONGO PB, Andr Gide](#) , 1929, 0880013656, 9780880013659. The Belgian Congo (now the countries of Congo, Zaire, and Central African Republic) has fascinated travellers for centuries with its mysterious and brilliant landscapes and its rich tribal cultures. While the area is investigated in the most minute detail, Gide is clear about his position as the responsive outsider. He does not claim cultural familiarity - rather, he treats all that he describes with the authority of a writer whose startling awareness makes places and people live indelibly in the imagination.

[Green Angel, Alice Hoffman](#) , 2010, 0545231248, 9780545231244. Alice Hoffman is at her magical best in a new novel about loss and healing. When her family is lost in a terrible disaster, 15-yr-old Green is haunted by loss and by the past. Struggling to survive physically and emotionally in a place where nothing seems to grow and ashes are everywhere, Green retreats into the ruined realm of her garden. But in destroying her feelings, she also begins to destroy herself, erasing the girl she'd once been as she inks ravens into her skin. It is only through a series of mysterious encounters -- with a ghostly white dog and a mute boy -- that Green relearns the lessons of love and begins to heal as she tells her own story.

[Leaving the Ivory Tower: The Causes and Consequences of Departure from Doctoral Study, Barbara E. Lovitts](#) , 2002, 0585383642, 9780585383644. Graduate schools have faced attrition rates of approximately 50 percent for the past 40 years. They have tried to address the problem by focusing on student characteristics and by assuming that if they could make better, more informed admissions decisions, attrition rates would drop. Yet high attrition rates persist and may in fact be increasing. Leaving the Ivory Tower thus turns the issue around and asks what is wrong with the structure and process of graduate education. Based on hard evidence drawn from a survey of 816 completers and noncompleters and on interviews with noncompleters, high- and low-Ph.D productive faculty and Directors of Graduate study, this book locates the root cause of attrition in the social structure and cultural organization of graduate education.

[The Judith Blacklock Encyclopedia of Flower Design,](#) , 2006, 0955239109, 9780955239106. The Judith Blacklock Encyclopedia of Flower Design is the essential 'how to' manual for everyone interested in flowers and floral art. Whether flowers are a passion, a pleasure or a business, this book is essential reading. Covering classic, contemporary and cutting-

edge design, the beginner will build knowledge and competence and quickly get started in the art. The experienced arranger will find the book a most valuable reference with inspiration from across the world.

[With the whales, Flip Nicklin, James Darling](#) , 1994, 1559711809, 9781559711807. This book is an elegant showcase both for whales and the photography of Flip Nicklin. Most of the 130 arresting photographs were taken beneath the waves by Nicklin, free-swimming with these compelling creatures. Jim Darling's text authoritatively covers the natural history of all major whale species.

[What You Have Now What Your Daddy Had Then, Craig Shoemaker](#) , 2004, 0971345414, 9780971345416. This wonderfully illustrated family-oriented book visually and simply capture the comedic brilliance and common sense insight that has made Mr. Shoemaker one of America's funniest personalities for the past 20 years. Illustrations.

[Surviving Chemistry Regents Exam: One Day at a Time: Questions for Exam Practice, Effiong Eyo](#) , 2011, 0983132984, 9780983132981. PREVIEW, READ AND PRINT OVER 30 PAGES OF THIS BOOK BEFORE BUYING. Visit our website (SURVIVINGCHEM dot COM) to get a stunning online digital Flipbook preview. Coming November 15th 2013: A new revision for the 2014 Regents Exam Prep. Studying and practicing for the NYS Chemistry Regents exam have never been easier, quicker and less overwhelming. This book is available in three cover colors: Green, Purple, and Orange. Your book. Your Color. Your Choice. E3 Scholastic Publishing. Trusted by Teachers. Enjoyed by Students. Book Summary: 30 days of quality Regents practice question sets. Almost 6 Regents exams of questions to practice. Small number of questions per set for quick and less overwhelming practice for your Regents exam. Quickly do and correct small number of questions in a set to immediately see how well you did. Clean, clear, simplified, and easy-to-understand guided explanations of correct answers. Keep track of your day-to-day progress, improvement and readiness for your Regents exam. 2 full Practice Regents exams included. Portable so you can practice more often and in more places. Glossary of must-know Chemistry Regents vocabulary terms. Preparing for Chemistry Regents exam has never easier, more exciting, more engaging, more understandable, and less overwhelming. E3 Scholastic is new and independent Educational Publishing Company, but we are slowly gaining the trust of hundreds of teachers and thousands of students. Our Surviving Chemistry Review Book, Workbook, and Guided Study Book are now being used in chemistry classrooms of several High Schools. Everyday, science teachers are discovering how reliable, how great, how simplified, and how exciting our books are for their students. We now have seven titles to our name, and we make sure that all of our books are easy to learn from, and easy to understand for all students, especially for the struggling students. You can get this book in three different cover colors. Click on the authors name to view all titles, title formats, and cover colors. Thanks and Best of Luck on your exam.

[Heal My Heart, Lord: Experiencing God's Touch When You Hurt, Emilie Barnes](#) , 2006, 0736938931, 9780736938938.

Brimming with optimism and trust, "Heal My Heart, Lord" pours out a message of hope and assures women they can bring their needs to God and He will provide. Bestselling author Emilie Barnes leads women to quietness and peace through heartwarming chapters that focus on God's remedies for difficult situations and offer words of encouragement to everyone facing difficult times. This uplifting collection of compassionate meditations "offers the gentle reminder that it is precisely during times when "the valley of the shadow" seems too long to endure that we come to know the abundant reality of God's presence. A treasured addition to any woman's library or a thoughtful gift to a friend seeking to trust God and rest in His embrace.

[Problems at the Roots of Law : Essays in Legal and Political Theory: Essays in Legal and Political Theory, Joel Feinberg Regents Professor of Philosophy and Law University of Arizona \(Emeritus\)](#) , 2002, 0198035322, 9780198035329.

Feinberg is one of the leading philosophers of law of the last forty years. This volume collects recent articles, both published and unpublished, on what he terms "basic questions" about the law, particularly in regard to the relationship to morality. Accessibly and elegantly written, this volume's audience will reflect the diverse nature of Feinberg's own interests: scholars in philosophy of law, legal theory, and ethical and moral theory.

[The Christmas Tale of Peter Rabbit, Emma Thompson](#) , 2013, 0723271151, 9780723271154. The Christmas Tale of Peter Rabbit is a brand new tale from Emma Thompson. In her second Further Tale of Peter Rabbit, Emma Thompson returns Peter to his home in the Lake District. Peter and his silly cousin Benjamin are helping their friend William - he's a turkey - who is in danger of becoming Mr and Mrs McGregor's Christmas dinner. Will Peter and Benjamin be able to save

him? Emma Thompson is an Oscar-winning screenwriter and actress who lives in London and Argyll. Emma's *Further Tale of Peter Rabbit* was published in 2012. Emma said, "I've always loved Beatrix Potter, as a child and then as a mother and all the years in-between as well. When Mr Rabbit invited me to write a further tale, I was more honoured than I can say. I hope I don't let him or his extraordinary creator down." Don't miss *The Further Tale of Peter Rabbit* by Emma Thompson

[Tools and Techniques in Biomolecular Science, Aysha Divan, Janice Royds](#) , 2013, 0199695563, 9780199695560. Tools and Techniques in the Biomolecular Sciences reviews the theoretical concepts and experimental details underpinning the broad range of modern technologies that are currently being used to advance our understanding of the biomolecular sciences. Each chapter focuses on the theoretical principles of a given technology, and its applications and limitations, before using worked examples to illustrate the nature of the data a particular technique generates. Fostering active engagement with the techniques presented, each chapter uses worked examples and problems to encourage the reader to critically appraise scientific data and select the most appropriate methods when designing an experimental strategy to undertake their own research. Its straightforward style and clear explanations make *Tools and Techniques in the Biomolecular Sciences* the ideal resource for any student or early-stage researcher who is looking to develop a firm understanding of the range of experimental tools at their disposal. After hearing word that his plan was not fool-proof, William must return home to clear up what should be a small detail left untied. To his bitter surprise another personal

war awaits him upon his return. The war is more brutal, the motives higher, the risks greater and the chances of victory are slimmer. With a little help from his friends William must once again fight for what's right, but this time he may have bitten off more than he could chew. About the Author Dave Aquino is the author of several novels, including "Personal War," "Counselor" and "The Slot Machine." He is working on his next novel.

[Swimming Upstream: A Resurrection, Shoshanah Simon](#) , 2002, 0971623201, 9780971623200. The promise of a happy childhood gets rocked right out of Shoshanah's cradle the day her mother dies. To her father, she's a painful souvenir of her mother's desertion; and to her stepmother, she's little more than a thorn in her side. A troubled adolescence leads her to create the life she had always imagined would bring her happiness, by breaking family tradition and pursuing a college education. Her happiness is short-lived. She's stricken with an illness that threatens her existence and crushes her hopes for a promising career. Yet it also becomes the catalyst to help her escape from an abusive marriage and ultimately turn her life around. She eventually finds freedom, fulfills a lifelong dream, and discovers a passion for living.

[Health Systems in Low- and Middle-Income Countries: An Economic and Policy Perspective, Richard D. Smith, Kara Hanson](#) , 2012, 0199566763, 9780199566761. Health systems in low- and middle-income countries: an economic and policy perspective outlines the key aspects and issues concerning health systems of low- and middle-income countries, recognising the current global context within which these systems operate and the dynamics of this context. It brings together a set of renowned authors to tackle the issues that face population health and health care in the twenty-first century. The focus is predominantly low- and middle-income countries, with a distinct meeting of economic and policy perspectives, and grounding analysis of key issues within the broader international context. The book therefore provides a unique and comprehensive analysis of health systems, with a very different and unique 'flavour' in the field. It should have wide appeal to those engaged in health and health care, including health professionals, researchers and students, as well as those outside traditional health professions but with increasing interest within health issues, such as trade policy makers, researchers and students.

[The Pipe Dreamers, Sandra Gurvis](#) , 2001, 1587540088, 9781587540080. Like Kent State in the late 1960's, Hayes University was in a sleepy Ohio college town, Julia Brandon, an innocent sorority girl, was in for an awakening, both emotionally and physically. Trouble begins when she tries to bail her radical roommate out of jail and escalates as she becomes increasingly involved with the protest movement, which erupts in violence, death, and destruction. She falls irrevocably in love with handsome, carefree, soon-to-be drafted Win, who steals her heart, entombing her emotionally. Fifteen years later, trapped in an arid life, Julia catches a glimpse of a man whom she believes to be Win while on a cruise. She embarks upon a journey which leads her to the brink of devastation. Can she accept the truth about what happened so long ago without destroying herself and those she loves? For those who lived through it, The Pipe Dreamers recaptures the turmoil surrounding Vietnam, the sexual revolution, and the rejection of parental values. For those who did not, it's an eye-opening revelation of what Mom and Dad were really up to back then.

[Multi-Carrier Digital Communications: Theory and Applications of OFDM, ISSN 1389-6938, Ahmad R.S. Bahai, Burton R.](#)

[Saltzberg, Mustafa Ergen](#) , 2004, 0387225757, 9780387225753. Multi-Carrier Digital Communications Theory and Applications of OFDM, Second Edition Multi-carrier modulation, Orthogonal Frequency Division Multiplexing (OFDM) particularly, has been successfully applied to a wide variety of digital communications applications over the past several years. OFDM has been chosen as the physical layer standard for a variety of important systems and its implementation techniques continue to evolve rapidly. This book is a valuable summary of the technology, providing an understanding of new advances as well as the present core technology. A unified presentation of OFDM performance and implementation over a wide variety of channels, including both wireline and wireless systems, is made. This will prove valuable both to developers of such systems and to researchers and graduate students involved in analysis of digital communications. In the interest of brevity, the authors have minimized treatment of more general communication issues. There exist many excellent texts on communication theory and technology. Only brief summaries of topics not specific to multi-carrier modulation are presented in this book where essential. As a background, it is assumed that the reader has a clear knowledge of basic fundamentals of digital communications. Highlights of the Second Edition During the past few years since the publication of the first edition of this text, the technology and application of OFDM have continued their rapid pace of advancement. As a result, it became clear that a new edition of the text would be highly desirable. The new edition provides the opportunity to make those corrections and clarifications whose need became apparent from continued discussions with many readers. However, the main purpose is to introduce new topics that have come to the forefront during the past few years, and to amplify the treatment of other subject matter. Because of the particularly rapid development of wireless systems employing OFDM, the authors introduced a section early in the text on wireless channel fundamentals. They have extended and modified their analysis of the effects of clipping, including new simulation results. A section of channel estimation has been added to the chapter on equalization. The chapter on local area networks has been greatly expanded to include the latest technology and applications. Three totally new chapters are added, on OFDM multiple access technology, on ultra wideband technology, and on WiMAX (IEEE 802.16).

Organization of This Book The authors begin with a historical overview of multi-carrier communications, wherein its advantages for transmission over highly dispersive channels have long been recognized, particularly before the development of equalization techniques. They then focus on the bandwidth efficient technology of OFDM, in particular the digital signal processing techniques that have made the modulation format practical. Several chapters describe and

analyze the sub-systems of an OFDM implementation, such as clipping, synchronization channel estimation, equalization, and coding. Analysis of performance over channels with various impairments is presented. The book continues with descriptions of three very important and diverse applications of OFDM that have been standardized and are now being deployed. ADSL provides access to digital services at several Mbps over the ordinary wire-pair connection between customers and the local telephone company central office. Digital broadcasting enables the radio reception of high-quality digitized sound and video. A unique configuration that is enabled by OFDM is the simultaneous transmission of identical signals by geographically dispersed transmitters. And, the new development of wireless LANs for multi-Mbps communications is presented in detail. Each of these successful applications required the development of new fundamental technology. Finally, the book concludes with describing the OFDM based multiple access techniques, ultra wideband technology and WiMAX.

[Pixarina Witcherina](#), , 2002, 0945558317, 9780945558316. In the typology of fairy tales, women are routinely reduced to caricatures of innocence or evil, either impossibly saintly and self-sacrificing or malevolent in ways that only the male sex would project. That said, fairy tales also provide a wealth of inspiration for art, and the work in Pixarina Witcherina transforms these polarities into whimsically abstracted visual yarns (the title is taken from an invented language used by Virginia Woolf to share secrets with her niece, and refers to this polarization of women's roles as either pixies or witches.). These women embrace the power of myth while deconstructing it, re-imagining its pungency for our times. Pixarina Witcherina features work by Meghan Boody, Amy Cutler, Margi Geerlinks, Claudia Hart, Julie Heffeman, Julia Latan , Tracey Moffatt, Maria Porges, Amy Sillman, Elena Sisto, Karen Arm and Katharina Fritsch.

[Clutter Busting Your Life: Clearing Physical and Emotional Clutter to Reconnect with Yourself and Others](#), Brooks Palmer , 2012, 1608680800, 9781608680801. Over the course of his career helping people let go of things they no longer need, Brooks Palmer has been struck by the many ways that clutter affects relationships. In these pages, he shows how we use clutter to protect ourselves, control others, and cling to the past, and how it keeps us from experiencing the joy of connection. With insight-prompting questions, exercises, client examples, and even whimsical line drawings, Palmer will take you from overwhelmed to empowered. His gentle guidance will help you to not only clear clutter from your home but also enjoy deeper, more authentic, and clutter-free relationships of all kinds.

[DIY Solar Projects: How to Put the Sun to Work in Your Home](#), Eric Smith , 2011, 1589236033, 9781589236035.

Advances in solar technology have made many DIY-friendly products available to consumers, several of which will be hitting the market for the first time in 2011. These include solar water heaters, solar battery charging stations, solar powered lights, photovoltaic shingles that provide supplementary electricity, solar heat pumps, and solar panel kits that generate primary home electrical service. Among the step-by-step projects is a solar water heating system you can build and install yourself for under \$1000; simple thermosyphon solar heat collectors for barns and outbuildings; or "heat

grabbers" that you can fabricate for \$50 in materials and position below a south-facing window to provide auxiliary winter heat.

[Today's Technician: Automotive Electricity And Electronics, Barry Hollembeak](#) , 2006, 141801267X, 9781418012670. The newest edition of this classroom and shop manual set continues to provide unsurpassed coverage of the theory and procedures for automotive electricity and electronics. Streamlined diagnostic and service procedures and added attention to data bus networks, including the CAN, LIN, ISO, and other common systems, are highlighted in this revision. Expanded coverage of vehicle accessory systems includes the new multi-stage air bag systems, weight classification systems, side air bag systems, and laser guided cruise control systems. An all-new chapter on hybrid and high voltage systems is also featured. [Love, Football, and Other Contact Sports, Alden Carter](#) , 2008, 0823421651, 9780823421657. This dynamic collection of short stories, which revolves around Argyle West High School's football team, features an ensemble cast of students during their sophomore, junior, and senior years. Some characters appear in only one story, while others appear in many. Written with sensitivity and conviction, the realistic stories are leavened with occasional, often ironic humor. Carter leads off with a witty zinger: the female editorial staff of the school literary magazine offers "A Girl's Guide to Football Players," which explains each position, then comments on the personality and relative intelligence typical of the player who does the job. "A Football Player's Guide to Love," which follows, is considerably shorter--two lines to be exact: "Love. Well, you see it's, uh, sort of, you know, kinda like when . . . Hey, can we talk about this later?" Readers can leave their stereotypes at the door, as Carter shows the unexpected strengths and the vulnerabilities of his characters.

[The Amazing Word of God, Randy Fisk](#) , 2010, 0982183577, 9780982183571. "Christians often discard theology as too intellectual or not applicable to their lives. The Amazing Word of God takes seminary-level topics and tools and presents them in a practical, relevant way. This book left me with a deep hunger for the Word and a desire to know God in a more meaningful way." John Westergaard Former Staff Teacher, YWAM School of Biblical Studies The Amazing Word of God is for those wanting to look deeper into the Scriptures. Whether you are seeking preparation to lead or would just like to know more, author Randy Fisk has written a clear guide to help you grow in God's truth, and to give you tools to research, apply, and enjoy it. Teach or simply explore the Bible more effectively. Gain new skills with original biblical languages. Capture more of God's passion. Randy's sincere desire to train others, especially his children and the next generation, inspired this book. He is passionate about his love for God and equipping the church. As a Ph.D., educator, pastor, and father, Randy has a unique talent for making complex concepts accessible and easy to understand.

[Ten Kings: And the Worlds They Ruled, Milton Meltzer](#) , 2002, 0439312930, 9780439312936. A riveting portrait of ten kings in history by Milton Meltzer, America's premier nonfiction writer. This book tells the story of ten kings. Kings made the rules by which their people lived. Kings carried on wars to protect their realms or expand their power, and kings, like the rest of us, were complex human beings. Starting with Hammurabi, who ruled Mesopotamia, to Peter the Great, the legendary Russian czar, Milton Meltzer shows the reader how political leaders use and abuse power. Although each of these men lived hundreds or thousands of years ago, these tales provide a striking portrait of how human behavior remains virtually unchanged over time and how one person can alter the course of history.

[Math Word Problems, Learning Express LLC](#) , 2008, 157685650X, 9781576856505. With fast, targeted lessons jam-packed with hundreds of practice questions, Express Review Guides: Math Word Problems can be used to provide a quick review or an in-depth understanding to solving one of the most difficult of math challenges. You'll learn the ins and outs to solving word problems, including: Identifying and decoding key words that reveal the correct math action to take Breaking seemingly complex scenarios into smaller, simpler steps Using pictures, tables, and Venn diagrams effectively When to apply algebra, fractions, decimals, percents, ratios and proportions, statistics and probability, formulas, and geometry Overcoming word problem pitfalls that can take down even a seasoned math aficionado With Express Review Guides: Math Word Problems, even math-phobic students can quickly gain the understanding to solve even the most challenging problems that involve money, distance, work, time, and more. In addition, this book includes: Fun brainstorming ideas, notes, and trivia Hundreds of practice questions and puzzlers Clear and complete explanations of key mathematics concepts Glossary of terms and appendices Samples of every type of math word problem found on standardized tests A pretest that pinpoints where to focus further study A posttest that provides proof of improvement- and the feeling of a job well done!

[Bleeding Afghanistan: Washington, Warlords, and the Propaganda of Silence, Sonali Kolhatkar, James Ingalls](#) , 2011, 1609800931, 9781609800932. Through in-depth research and detailed historical context, Sonali Kolhatkar and James Ingalls report on the injustice of U.S. policies in Afghanistan historically and in the post-9/11 era. Drawing from declassified government documents and on-the-ground interviews with Afghan activists, journalists, lawyers, refugees, and students, Bleeding Afghanistan examines the connections between the U.S. training and arming of Mujahideen commanders and the subversion of Afghan democracy today. Bleeding Afghanistan boldly critiques the exploitation of Afghan women to justify war by both conservatives and liberals, analyzes uncritical media coverage of U.S. policies, and examines the ways in which the U.S. benefits from being in Afghanistan.

[The Atlantic Celts: Ancient People Or Modern Invention?, Simon James](#) , 1999, 0299166740, 9780299166748. The Celtic peoples of the British Isles hold a fundamental place in our national consciousness. In this book Simon James surveys ancient and modern ideas of the Celts and challenges them in the light of revolutionary new thinking on the Iron Age peoples of Britain. Examining how ethnic and national identities are constructed, he presents an alternative history of the British Isles, proposing that the idea of insular Celtic identity is really a product of the rise of nationalism in the eighteenth century. He considers whether the 'Celticness' of the British Isles is a romantic fantasy, even a politically dangerous falsification of history which has implications in the current debate on devolution and self-government for the Celtic regions.

[Mixed method design: principles and procedures, Janice M. Morse, Linda Niehaus](#) , 2009, 1598742973, 9781598742978.

The use of mixed methods designs for conducting research has become a major trend in social science research. Renowned methodological experts Janice Morse and Linda Niehaus present a guide to intermediate and experienced researchers on the possibilities inherent in mixed method research. They offer the basic principles of conducting this kind of study, then examine a wide variety of design options available to the researcher, including their strengths and weaknesses and when to use them. Providing examples from a variety of disciplines, examining potential threats to validity, and showing the relationship between method and theory, the book will be a valuable addition to the methodologists library and a useful text in courses in research design.

[Icarus in the Boardroom: The Fundamental Flaws in Corporate America and Where They Came From, David Skeel](#) , 2005, 0195174712, 9780195174717. Americans have always loved risktakers. Like the Icarus of ancient Greek lore,

however, even the most talented entrepreneurs can overstep their bounds. All too often, the very qualities that make Icaran executives special-- self-confidence, visionary insight, and extreme competitiveness--spur them to take misguided and even illegal chances. The Icaran failure of an ordinary entrepreneur isn't headline news. But put Icarus in the corporate boardroom and, as David Skeel vividly demonstrates, the ripple effects can be profound. Ever since the first large-scale corporations emerged in the nineteenth century, their ability to tap huge amounts of capital and the sheer number of lives they affect has meant that their executives play for far greater stakes. Excessive and sometimes fraudulent risks, competition, and the increasing size and complexity of organizations: these three factors have been at the heart of every corporate breakdown from 1873, when financial genius Jay Cooke collapsed, to the corporate scandals of the early 21st century. Compounding the scandals is an ongoing cat-and-mouse game between regulators' efforts to police the three factors that lead to Icarus Effect failures and efforts by corporate America to evade this regulation in the name of efficiency and flexibility. These efforts to side-step oversight can rapidly spiral out of control, setting the stage for the devastating corporate failures that punctuate American business history. But there is also a silver lining to the stunning failures: the outrage they provoke galvanizes public opinion in favor of corporate reform. The most important American business regulation has always been enacted in response to a major breakdown in corporate America. Today's business environment poses unprecedented perils for the average American as for the first time ever, more than half of Americans now own stock. Identifying the problems of the past, Skeel offers a strikingly new diagnosis of the fundamental flaws in corporate America today, and of what can be done to fix them.

[Whole earth discipline: an ecopragmatist manifesto, Stewart Brand](#) , 2009, 0670021210, 9780670021215. An icon of the environmental movement outlines a provocative approach for reclaiming our planet. According to Stewart Brand, a lifelong environmentalist who sees everything in terms of solvable design problems, three profound transformations are under way on Earth right now. Climate change is real and is pushing us toward managing the planet as a whole. Urbanization--half the world's population now lives in cities, and eighty percent will by midcentury--is altering humanity's land impact and wealth. And biotechnology is becoming the world's dominant engineering tool. In light of these changes, Brand suggests that environmentalists are going to have to reverse some longheld opinions and embrace tools that they have traditionally distrusted. Only a radical rethinking of traditional green pieties will allow us to forestall the cataclysmic deterioration of the earth's resources. Whole Earth Discipline shatters a number of myths and presents counterintuitive observations on why cities are actually greener than countryside, how nuclear power is the future of energy, and why genetic engineering is the key to crop and land management. With a combination of scientific rigor and passionate advocacy, Brand shows us exactly where the sources of our dilemmas lie and offers a bold and inventive set of policies and solutions for creating a more sustainable society. In the end, says Brand, the environmental movement must become

newly responsive to fast-moving science and take up the tools and discipline of engineering. We have to learn how to manage the planet's global-scale natural infrastructure with as light a touch as possible and as much intervention as necessary.

[Collection of Selected Prayers, Candita Gual](#) , 2006, 0595834426, 9780595834426. Allen Kardec believed that the ability to communicate with the spirit world was hindered because man did not know how to pray. This belief inspired him to write a collection of prayers accompanied by instructions for their appropriate use. Many worldwide have found these prayers to be an essential tool for communicating with spirits on a positive level. Mr. Kardec's original work was in French. As interest in Spiritualism grew so did the acceptance of his beliefs, which led his works to be translated into other languages. My sole purpose in authoring this work was to create a more comprehensive English version of this highly effective tool in order for it to reach a broader audience. My hope is that this work will open for many more the gateway to true spiritual understanding.

[The Devil's Star, Jo Nesb](#) , 2009, 0099546760, 9780099546764. A young woman is murdered in her Oslo flat. One finger has been severed from her left hand, and behind her eyelid is secreted a tiny red diamond in the shape of a five-pointed star - a pentagram, the devil's star. Detective Harry Hole is assigned to the case with his long-time adversary Tom Waaler and initially wants no part in it. But Harry is already on notice to quit the force and is left with little alternative but to drag himself out of his alcoholic stupor and get to work. A wave of similar murders is on the horizon. An emerging pattern suggests that Oslo has a serial killer on its hands, and the five-pointed devil's star is key to solving the riddle. This is the fifth book in the Harry Hole series.
