[Canadian Content: Culture and the Quest for Nationhood, Ryan Edwardson](#) , 2008, 1442692421, 9781442692428. A nation is given shape in large part through the cultural activities of its builders. Historically, nationalists have turned to the arts and media to articulate and institute a sense of unique national identity. This was certainly true of Canada in the twentieth century. Canadian Content explores ways in which nationhood was defined and pursued through cultural means in Canada throughout the last century. As a framework for the study, Ryan Edwardson distinguishes between three phases of Canadianization: support for the arts and cultured mass media during the colony-to-nation transition; the 'new nationalist' empowerment of multi-brow culture and the call for state intervention in the mid-1960s and 1970s; and the 'cultural industrialism' initiated by the federal government under Pierre Trudeau in 1968. Examining each phase in its turn, Canadian Content looks at Canada as an ongoing postcolonial process of not one but a series of radically different nationhoods, each with its own valued but tentative set of cultural criteria for orchestrating and implementing a Canadian national experience. Considering the relationship between culture and national identity, this study offers an idea of what it means to be Canadian, and suggests just how adaptable, problematic, and ongoing the pursuit of nationhood can be.

[Nya, Stephen Haggard](#) , 1989, 0192821350, 9780192821355. A gifted young actor and writer who worked in Intelligence during World War II and died prematurely in 1943, Stephen Haggard published his first novel, Nya, in 1938 at the age of 27. Frank Kermode, the eminent British literary scholar and Professor Emeritus at the University of Cambridge, has rediscovered this long-lost novel and has provided a new introduction. It tells the story of a love affair between a man in his mid-twenties and a thirteen-year-old girl who, having spent a carefree childhood in Nyasaland, returns to England for "an English training." Hovering at the threshold between latency and adolescence, Nya represents the noble savage who has experienced a "natural" upbringing. Simon, with whom she falls in love, comes from the same British middle-class

background as the aunt and uncle who take in Nya. The poignancy of the story does not stem from the impossibility of their love, nor from the violation of the child by the man, but, rather, it lies in the chastity of the lovers. Although theirs is a passionate love, she does not lose her innocence. Unlike *Lolita*, which it somewhat foreshadows, Nya attempts in a serious and interesting fashion to reconcile passion with respect for normal conduct, while still portraying authentic passion. The cultural context for such a revolt has changed drastically in the intervening half-century, but the ancient argument between nature and custom, treated in this novel, continues today.

[Calculus for Biology and Medicine, Claudia Neuhauser](#) , 2011, 0321673174, 9780321673176. Calculus for Biology and Medicine, Third Edition, addresses the needs of readers in the biological sciences by showing them how to use calculus to analyze natural phenomena without compromising the rigorous presentation of the mathematics. While the table of contents aligns well with a traditional calculus text, all the concepts are presented through biological and medical applications. The text provides readers with the knowledge and skills necessary to analyze and interpret mathematical models of a diverse array of phenomena in the living world. This book is suitable for a wide audience, as all examples were chosen so that no formal training in biology is needed.

[Laws and Lawmakers : Science, Metaphysics, and the Laws of Nature: Science, Metaphysics, and the Laws of Nature, Chapel Hill Marc Lange Professor of Philosophy University of North Carolina](#) , 2009, 019974503X, 9780199745036. Laws of nature have long puzzled philosophers. What distinguishes laws from facts about the world that do not rise to the level of laws? How can laws be contingent and nevertheless necessary? In this brief, accessible study, Lange offers provocative and original answers to these questions. He argues that laws are distinguished by their necessity, which is grounded in primitive subjunctive facts (expressed by counterfactual conditionals). While recognizing that natural necessity is distinct from logical, metaphysical, and mathematical necessity, Lange explains how natural necessity constitutes a species of the same genus as those other varieties of necessity. Along the way, Lange discusses the relation between laws and objective chances, as well as such unjustly neglected topics as the completeness of the laws of physics and whether the laws of nature can change. Lange's elegant, engagingly written book is non-technical and suitable for undergraduate philosophers (and undergraduate scientists interested in the logical foundations of science). It is "must reading" for metaphysicians and philosophers of science working on laws, chance, counterfactuals, modality, or the philosophy of physics.

When the Berlin Wall fell in 1989, the artist Neo Rauch was 30 years old, living in his East German hometown of Leipzig and just beginning to exhibit his paintings. It was the perfect moment for a painter who had been reared on Social Realism to gain access to art outside East Germany, to receive its influences into his art and to emerge onto the stage of world art as a star. At first closely identified with the generation of painters known as the Leipzig School, in recent years Rauch's wonderfully bizarre blend of Social Realism (not exactly a widely-mined style in contemporary art) with de Chirico or Stanley Spencer has come to be seen as a painterly barometer of post-Communist Europe. "Post-Communist Surrealism" could therefore be one way to describe the look of his canvases, which convey narrative intent--men and women from various historical eras performing obscure tasks in uniform, or midway through some ominous occasion--shifting styles several times within the same picture, but always displaying a lush brushwork. Rauch has established a particularly strong audience in the U.S., having been championed by "The New York Times" Roberta Smith as "the" painter of the zeitgeist. Marking Rauch's fiftieth birthday and a simultaneous retrospective in Leipzig and Munich featuring works dating from 1982 to early 2010, this monograph is the most substantial appraisal of his work published to date. In it, his friends and colleagues supply testimonies, among them Luc Tuymans, Jonathan Meese and Michael Borremans. Alongside essays by critics and historians, Timm Rautert provides a photographic portrait of Rauch's studio. Neo Rauch (born 1960) was born, reared and trained as an artist in Leipzig, where he continues to live. In August 2005, Rauch was awarded the chair of painting at Leipzig University.

[Christopher Elwood](#) , 1999, 0195121333, 9780195121339. In the public religious controversies of sixteenth-century France, no subject received more attention or provoked greater passion than the eucharist. In this study of Reformation theologies of the eucharist, Christopher Elwood contends that the doctrine for which French Protestants argued played a pivotal role in the development of Calvinist revolutionary politics. By focusing on the new understandings of signs and symbols purveyed in Protestant writing on the sacrament of the Lords Supper, Elwood shows how adherents to the Reformation movement came to interpret the nature of power and the relation between society and the sacred in ways that departed radically from the views of their Catholic neighbors. The clash of religious, social, and political ideals focused in interpretations of the sacrament led eventually to political violence that tore France apart in the latter half of the sixteenth century.

[The Psychology of Reading, Eleanor Jack Gibson, Harry Levin](#) , 1975, 0262570521, 9780262570527. In this book, two psychologists apply principles of cognitive psychology to understanding reading. Unlike most other books on the subject, this one presents a consistent theoretical point of view and applies it to the acquisition of reading and what the skilled reader does. The first part of *The Psychology of Reading* covers perceptual learning, the development of cognitive strategies, the development of language, the nature of writing systems, and an extensive review of the research on word recognition. In the second part of the book, the authors look closely at abilities that children bring to school before learning to read. They describe the acquisition of initial reading skills and transition to skilled reading, the nature of the reading process in adult readers, and the ways people learn from reading. The book's third part takes up questions people frequently ask about reading -- such as reading by deaf children, dyslexia, the influence of nonstandard dialects on learning to read, comparison of reading achievement across different nations and different languages, and the debatable virtues of "speed reading." The authors conclude that reading cannot be understood simply as associative learning -- that is, the learning of an arbitrary code connecting written symbols and their sounds. Reading involves higher-level mental processes such as the discovery of rules and order, and the extraction of structured, meaningful information.

In the Age of Democratic Revolution, countries on both sides of the Atlantic were linked together through trade networks, diplomatic ties, and social interactions. More importantly, however, they also shared a common revolutionary dynamic that oscillated back and forth across the ocean. Revolutionary Currents explores the global crosscurrents and revolutionary ideologies that inspired four great modern revolutions England's Glorious Revolution of 1688-89, the American Revolution of 1776, the French Revolution in 1789, and the Mexican Revolution in the early 1800s. Michael A. Morrison and Melinda S. Zook bring together noted historians to look at how each nation reshaped these revolutionary traditions, making them their own, and exported them once again. In examining each event, the contributors respond to the historiographical trends of revolutionary ideology, transatlantic cross-fertilization of ideas, and nation-building. In assessing and analyzing the ideas, traditions, and nationalisms that inspired revolution and nation-building in the modern world, this book breaks new ground in the area of transatlantic history."

[Crisis Management in a Complex World, Dawn R. Gilpin, Priscilla J. Murphy](#) , 2008, 0195328728, 9780195328721.

Managers, business owners, public relations practitioners, and others grapple daily with issues that have the potential to radically redefine the reputation of a person, company, or industry. They confront a fundamental question about contemporary crisis management: to what extent is it possible to control events and stakeholder responses to them, in order to contain escalating crises or safeguard an organization's reputation? In Crisis Management in a Complex World, authors Dawn Gilpin and Priscilla Murphy address this question head-on. Operating from a strong theoretical orientation, this book marks a sharp departure from other crisis management texts, which focus on nuts-and-bolts procedures and information distribution in an effort to simplify the turbulent reality of a crisis situation. Instead, this book pairs real-world examples from across the globe with theory-based analysis to show why simplification often fails to alleviate crises, and can even intensify them. Gilpin and Murphy propose a new, complexity-based approach to organizational learning that can allow organizations to adapt quickly to changing circumstances. This volume addresses both scholars and high-level practitioners of public relations, organizational communication, and strategic management. Strongly cross-disciplinary, the book draws on theories from communication, the physical sciences, and business. It invites controversy and

ultimately aims to change the way people conceptualize and prepare for crises.

[The Other Language, Mark Brazaitis](#) , 2009, 0980156017, 9780980156010. The Other Language, a book of poems by Mark Brazaitis, is, appropriately, about language. It's about English and Spanish, as in the title poem; it's about what we say and what we don't, or won't or can't, say; it's about what we can easily find words for and what we cannot. The Other Language is about Guatemala, a country ravaged by a thirty-six-year-long civil war. It's about Brazaitis' encounters in Guatemala, with North Americans as well as Guatemalans, and about what these encounters inspired him to think, feel, and remember. The Other Language is about love and passion. In the Guatemalan poems, the lovers can be equated with the country itself, which, for Brazaitis, is haunting and beautiful and painful to think of leaving. In the latter part of the book, the love poems-written to Brazaitis' wife and daughters-are both lighthearted and exuberant. The Other

Language is about loss. It's about the devastating losses war brings. It's about the loss of a country-something Elizabeth Bishop, who also loved Latin America, understood. It's about the death of Brazaitis' father and the loss, or the potential loss, of so much because of global warming. The Other Language is about the redemptive power of words, of poetry, of beautiful language, to captivate people and bring relief. It's about the laughter and playfulness words can engender, whether it's in a monologue by a Prince Charming who has a surprising political and domestic agenda or in a whimsical reflection on what it means to turn forty. It's about the relationship between language and music, and how sound, whether from word or instrument, is sometimes enough to unite us-or at least bring us closer.

And when, if ever, is it legitimate for external actors to impose their understandings of human rights upon particular countries? In the contemporary context of globalization, these questions have a salient religious dimension. Religion intersects with global human rights agendas in multiple ways, including: whether "universal" human rights are in fact an imposition of Christian understandings; whether democracy, the "rule of the people," is compatible with God's law; and whether international efforts to enforce human rights including religious freedom amount to an illicit imperialism. This book brings together leading specialists across disciplines for the first major survey of the religious politics of human rights across the world's major regions, political systems, and faith traditions. The authors take a bottom-up approach and focus particularly on hot-button issues like human rights in Islam, Falun Gong in China, and religion in the former Soviet Union. Each essay examines the interaction of human rights and religion in practice and the challenges they pose for national and international policymakers.

[Madoc: The Making of a Myth, Gwyn A. Williams](#) , 1979, 0192851780, 9780192851789. Three hundred years before Columbus, Madoc, son of Prince Owain Gwynedd, sailed to North America in order to settle there. Soon thereafter, he returned to Wales, leaving behind some of his people to colonize the newly discovered land. First reported by Dr. John Dee to Queen Elizabeth I and publicized as the official view in 1580 in order to justify the English raids on Spanish-controlled North America, this myth greatly influenced American and Welsh history. Though now largely discredited, it still maintains a presence, as seen by the construction in 1958 of a monumental plaque in Alabama that commemorates Madoc's landing. Gwyn Williams offers the first full-length analysis of the Madoc myth, including a full description of how and why the Elizabethans developed it. He explores, in depth, the "Madoc fever" that gripped both sides of the Atlantic in the 1790s, concentrating particularly on the rapid increase in Welsh immigrations to the United States that resulted from the rush to discover the lost tribe of white, Welsh-speaking Indians left behind by Madoc. This unique work of historical detection not only recovers the factual origins of strange stories and influential beliefs, but also investigates how myth can actually create and shape history.

[Sammlung, Timotheus \(of Miletus.\)](#) , 2002, 0199246947, 9780199246946. This is the first new edition for more than a decade of the fragments of Timotheus of Miletus, a Greek lyric poet of the fifth and fourth centuries BC and one of the most important poets of the period. His description of the battle of Salamis, a substantial portion of his Persae, has been the most widely studied of his fragments. This is a historically significant work and J.H. Hordern's accurate text, based on close examination of the original papyrus, is a distinguished contribution to scholarship. The minor fragments, most of which survive only as quotations in other ancient authors, are subjected to detailed treatment for the first time. The text of these, and the numeration throughout, are based on D.L. Page's *Poetae Melici Graeci* for ease of reference. A comprehensive commentary (the fullest available) deals with both textual and literary points, offering both a complete metrical analysis and an explanatory discussion of each fragment. The extensive introduction, which includes a fascinating and full discussion of the archaeological context of the papyrus, provides a series of technical studies of Timotheus' language, dialect, style, and metre. In addition, Hordern gives an account of the biographical tradition relating to Timotheus, and, following an account of the genres in which he wrote, analyses his place in Greek literary and musical history. Timotheus clearly has much to tell us about the Greeks' attitude to Asia and to the past. This invaluable new edition shows that he also has much to tell us about Greek non-dramatic poetry, at an important stage in its history, for which we have little other evidence.

[The Earth Moved: On the Remarkable Achievements of Earthworms, Amy Stewart](#) , 2005, 1565124685, 9781565124684. In *The Earth Moved*, Amy Stewart takes us on a journey through the underground world and introduces us to one of its most amazing denizens. The earthworm may be small, spineless, and blind, but its impact on the ecosystem is profound. It ploughs the soil, fights plant diseases, cleans up pollution, and turns ordinary dirt into fertile land. Who knew? In her witty, offbeat style, Stewart shows that much depends on the actions of the lowly worm. Charles Darwin devoted his last years to the meticulous study of these creatures, praising their remarkable abilities. With the august scientist as her inspiration, Stewart investigates the worm's subterranean realm, talks to oligochaetologists the unsung heroes of earthworm science who have devoted their lives to unearthing the complex life beneath our feet, and observes the thousands of worms in her own garden. From the legendary giant Australian worm that stretches to ten feet in length to the modest nightcrawler that wormed its way into the heart of Darwin's last book to the energetic red wigglers in

Stewart's compost bin, The Earth Moved gives worms their due and exposes their hidden and extraordinary universe.

This book is for all of us who appreciate Mother Nature's creatures, no matter how humble.

Featuring, among other things, IRA bombs, prog rock, punk rock, bad poetry, first love, love on the side, prefects, detention, a few bottles of Blue Nun, plenty of brown wallpaper, industrial strife, and divine intervention in the form of a pair of swimming trunks, it is firmly and mischievously located in the midst of the decade's many struggles and upheavals. Tragic and riotous by turns, packed with thwarted romance and furtive sex, The Rotters' Club is for anyone who ever experienced adolescence the hard way.

Extensively revised and updated, this second edition of the bestselling Handbook of Chemical and Biological Warfare Agents goes well beyond the dirty thirty commonly discussed agents and provides rapid access to a wide range of agents that can be used as weapons. This edition incorporates additional classes of agents, expands existing classes, and increases the number of agents described. Expanding the scope of the original, this edition is rich with scientific data and provides more information on the chemical, physical, and biological properties of these agents and their health effects. Highly organized and cross-referenced to provide instant access to the most authoritative data, this handbook is divided into classes based on the common military groupings of chemical, biological, and toxin agents. Additional classes are provided where the divisions are too broad for appropriate identification, along with classes for non-traditional agents and improvised industrial materials. At the end of each class section is detailed technical information about individual agents, components, precursors, and decomposition products within that class. Employing four indices along with the handbooks own identification number, each entry follows a standard format for that class including toxicology, characteristics, hazards, protection, and medical response. Other information is provided where applicable such as chemical formula, routes of exposure, medicinal uses, threat or treaty listing, and descriptions of the disease as it appears in humans, animals, and plants. All values are based on a standard man model to allow for consistency of data and evaluations. Still the gold-standard reference in the field, Handbook of Chemical and Biological Warfare Agents, Second Edition raises the bar in terms of both quality and quantity and assures accuracy across the widest variety of military, scientific, and medical sources available.

Hubbard & O'Brien keeps it real in the third edition with updated examples, data, and end-of-chapter problems, providing the most up-to-date discussion on the recession/financial crisis and the monetary and fiscal policy response. The #1 question students of economics ask themselves is: "Why am I here, and will I ever use this?"

Hubbard/O'Brien answer this question by demonstrating that real businesses use economics to make real decisions daily. This is motivating to all students, whether they are business majors or not. All students can relate to businesses they encounter in their everyday lives. Whether they open an art studio, do social work, trade on Wall Street, work for the government, or bartend at the local pub, students will benefit from understanding the economic forces behind their work.

In the wake of the terrorist attacks on America the UN Security Council passed a resolution targeting transnational sources of terrorist funds. The United States and the International Monetary Fund are encouraging the governments of the Middle East to adopt policies of economic liberalism and a new type of capitalism, based on Islamic values and beliefs, is emerging. The aims of the book are: to explore the political implications of the slow but steady accumulation of Islamic capital to analyse the connections between Islamic finance and Islamic political movements in Middle Eastern and North African countries to show that the commonly-perceived connection between Islamic finance and money laundering and terrorism is by no means the complete picture. Readers will learn to appreciate the various political contexts in which Islamic finance operates in the Middle East and North Africa and will acquire some understanding of its political as well as economic constraints. Hopefully possible misunderstandings about Islamic banking and finance will be corrected. The book is

divided into two parts - part one is thematic and lays the ground for the country-specific case studies in part two (covering the Sudan, Kuwait, Jordan, Turkey, Tunisia and Egypt). The contributors include political scientists, economists and historians. Key Features: A major topical issue Written by the world's leading experts on Islamic Political Economy Explores the connections between Islamic finance and Islamic political movements Includes country-specific case studies

His plan is to hide the truth behind an IRA assassination so he helps Gavin escape to take out the trash. Murphy's number is up but he is not going easily. The Crucified God is a seminal work on the crucifixion and its significance. The book takes death despair and dreadfulness the dark side of the human condition

with total seriousness and relates these to a liberating hope of redemption through divine agony and suffering. Influential for many years, especially with political and liberation theologians, but also much more widely, the book represents a concentrated blast of hard-edged doctrinal reflection and - now reissued with a Preface by the author's leading British interpreter - will continue to inspire upcoming generations who take seriously the life-changing notion that 'God was in Christ.'
