[Bubble Markets and Boom and Bust Cycles: Paradigm Revolutions in the Information Age, Khafra K. Om-Ra-Seti](#) , 2002, 0963564544, 9780963564542. The primary mission of this current volume is to provide, in layman?s terms, a unique and passionate understanding of the amazing boom and bust cycles of our times. This is not a book about forecasting, but more concerned with presenting observations and facts about boom and bust cycles, and with establishing a deep understanding and awareness about this fascinating phenomenon. And given the fact that we are in the midst of one of the greatest technological revolutions in the history of the world, I sense that there is an urgency to come to a much greater understanding of how and when future boom and bust periods will emerge. Will cycles be longer or shorter in duration as we move forward into the 21st century? Is the Long Wave Cycle a myth or reality, and what is its connection

to the Information Age Revolution? Major paradigm shifts in the industry sectors of energy, communications, travel, infrastructure, medicine and other fields are scheduled to transform our world in ways that we have only imagined in Hollywood. As these events unfold, global markets are going to react, and in many cases, irrationally to barrier-breaking technologies. As investors or analysts, it is very important to have convictions, strategies, systems and guideposts to follow when investing during these highly volatile periods in the markets. This current volume can serve as an important reference source during the rush and heat of boom and bust periods. Approached with an open mind, free of economic dogma, *Bubble Markets and Boom*

A LION'S TALE documented Chris Jericho's journey from small-time dreamer to big-time superstar, from Winnipeg, Canada, to undisputed WWE heavyweight champion of the world. But UNDISPUTED kicks off just as the fantasy begins to unravel. Faced with endless internal politics on his rise to the top of the WWE company ladder, Jericho has to draw on the super-human resources that got him there in the first place. There are bruising encounters aplenty both inside and outside the ring. He reveals why he temporarily left WWE, includes the inside story of his time in Hollywood, and opens the can of worms that is life on the road with the rock band Fozzy. He also revisits the premature birth of his twins and the pain of his mother's death, as well as the shock of Eddy Guerrero's and the Benoit family deaths. As upfront and outspoken as A LION'S TALE, this sequel is as direct as the man himself.

A #1 bestseller from coast to coast, Den of Thieves tells the full story of the insider-trading scandal that nearly destroyed Wall Street, the men who pulled it off, and the chase that finally brought them to justice. Pulitzer Prizewinner James B. Stewart shows for the first time how four of the eighties biggest names on Wall Street—Michael Milken, Ivan Boesky, Martin Siegel, and Dennis Levine—created the greatest insider-trading ring in financial history and almost walked away with billions, until a team of downtrodden detectives triumphed over some of America's most expensive lawyers to bring this powerful quartet to justice. Based on secret grand jury transcripts, interviews, and actual trading records, and containing explosive new revelations about Michael Milken and Ivan Boesky written especially for this paperback edition, Den of Thieves weaves all the facts into an unforgettable narrative—a portrait of human nature, big business, and crime of unparalleled proportions.

[Zen Baggage: A Pilgrimage to China, Bill Porter](#) , 2009, 1593761325, 9781593761325. In the spring of 2006, Bill Porter traveled through the heart of China, from Beijing to Hong Kong, on a pilgrimage to sites associated with the first six patriarchs of Zen. Zen Baggage is an account of that journey. Like most travel literature, Porter takes readers to places

few Westerners have ever ventured. He weaves together historical background, interviews with Zen masters, and translations of the earliest known records of Zen, along with personal vignettes. Porter's account captures the transformations taking place at religious centers in China but also the abiding legacy they have somehow managed to preserve. Porter brings wisdom and humor to every situation, whether visiting ancient caves containing the most complete collection of Buddhist texts ever uncovered, enduring a six-hour Buddhist ceremony, searching in vain for the ghost in his room, waking up the monk in charge of martial arts at Shaolin Temple, or meeting the abbess of China's first Zen nunnery. Porter's previously published *Road to Heaven: Encounters with Chinese Hermits* has become recommended reading at Zen centers and universities throughout America and even in China (in its Chinese translation), and *Zen Baggage* is sure to follow suit.

[A New South Rebellion: The Battle Against Convict Labor in the Tennessee Coalfields, 1871-1896, Karin A. Shapiro](#) ,

1998, 080784733X, 9780807847336. In 1891, thousands of Tennessee miners rose up against the use of convict labor by the state's coal companies, eventually engulfing five mountain communities in a rebellion against government authority. Propelled by the insurgent sensibilities of Populism and Gilded Age unionism, the miners initially sought to abolish the convict lease system through legal challenges and legislative lobbying. When nonviolent tactics failed to achieve reform, the predominantly white miners repeatedly seized control of the stockades and expelled the mostly black convicts from the mining districts. Insurrection hastened the demise of convict leasing in Tennessee, though at the cost of greatly weakening organized labor in the state's coal regions. Exhaustively researched and vividly written, *A New South Rebellion* brings to life the hopes that rural southerners invested in industrialization and the political tensions that could result when their aspirations were not met. Karin Shapiro skillfully analyzes the place of convict labor in southern economic development, the contested meanings of citizenship in late-nineteenth-century America, the weaknesses of Populist-era reform politics, and the fluidity of race relations during the early years of Jim Crow.

[The Birds and Other Plays, Aristophanes](#) , 2003, 0140449515, 9780140449518. Offering a window into the world of

ordinary Athenians, Aristophanes' *The Birds and Other Plays* is a timeless set of comedies, combining witty satire and raucous slapstick to wonderful effect. This Penguin Classics edition is translated from the Greek by David Barrett and Alan H. Sommerstein. The plays in this volume all contain Aristophanes' trademark bawdy comedy and dazzling verbal agility. In *The Birds*, two cunning Athenians persuade the birds to build the utopian city of 'Much Cuckoo in the Clouds' in the sky, blockading the Olympian gods and installing themselves as new deities. *The Knights* is a venomous satire on Cleon, a prominent Athenian demagogue, who vies with a humble sausage-seller for the approval of the people; while *The Assembly-Women* deals with the battle of the sexes as the women of Athens infiltrate the all-male Assembly in disguise. The lengthy conflict with Sparta is the subject of *Peace*, inspired by the hope of a settlement in 421 BC, and *Wealth* reflects on the economic catastrophe that hit Athens after the war. These lively translations by David Barrett and Alan H. Sommerstein capture the full humour of the plays. The introduction examines Aristophanes' life and times, and the comedy and poetry of his works. This volume also includes an introductory note for each play. Aristophanes (c.445-386 BC) was probably born in Athens. Little is known about his life, but there is a portrait of him in Plato's *Symposium*. He was twice threatened with prosecution in the 420s for his outspoken attacks on the prominent politician Cleon, but in 405 he was publicly honoured and crowned for promoting Athenian civic unity in *The Frogs*. Aristophanes had his first comedy produced when he was about twenty-one, and wrote forty plays in all. The eleven surviving plays of Aristophanes are published in the Penguin Classics series as *The Birds and Other Plays*, *Lysistrata and Other Plays*, *The Wasps and Other Plays* and *The Frogs and Other Plays*. If you enjoyed *The Birds and Other Plays*, you might like *Aristophanes' The Frogs and Other Plays*, also available in Penguin Classics.

[COMPUTER NUMERICAL CONTROL PROGRAMMING. Edition en anglais, Peter J. Amic](#) , 1997, 0133261581, 9780133261585. Designed to help company managers build faster and more productive CNC departments, this state-of-the-art guide outlines the main problems when dealing with computer numerical control equipment, and examines organizational concepts and strategies that can be used to achieve maximum efficiency in the CNC department. Written by an educator with extensive hands-on CNC programming and manufacturing engineering experience, it offers the most

advanced programming techniques available in any book of its kind. Organizes material in a very logical progression, with each chapter building on the previous one for easy comprehension. Provides a well-rounded treatment of CNC programming by offering a sound balance between basic and more advanced topics, with thorough coverage of programming fundamentals, machine set up, manual tool radius compensation, automatic tool radius compensation, advanced programming, concept of macro programming, using computers in CNC programming, and efficiency in the CNC department. Many practical programming examples help users learn important mathematical concepts and build competitive skills necessary for programming and operating today's CNC equipment. [Healing Trauma: The Power of Group Treatment for People With Intellectual Disabilities, Nancy J. Razza, Daniel J. Tomasulo](#) , 2005, 1591471605, 9781591471608. A compassionate, informative guide to group therapy for an often-neglected population, this volume is devoted to building a clear foundation for determining treatments of choice for patients with intellectual disabilities. Choosing group treatment as the most effective intervention, the authors describe interactive-behavioral therapy (IBT), based heavily on traditional models of group therapy and psychodrama, and modified to enhance the possibility for change in people with intellectual disabilities. The authors describe IBT sessions with great clarity, detailing each stage and task of the process, and reporting on various therapeutic factors that emerge during group therapy. The special considerations and needs of group treatment for trauma and sexual abuse survivors and offenders with intellectual disabilities are covered in equal measure, and information is offered about how the application of the interactive-behavioral model can be used in sexual abuse avoidance training. A related model of individual treatment is detailed along with ways in which the clinician can make informed decisions concerning the most effective course of treatment for a given individual outside of group treatment. In heartfelt and instructive language, the authors make an effective case for the powerful gains that can be attained by psychotherapy for people with intellectual

disabilities, and this book will be an invaluable research for clinicians and other helping professionals who work with them.

[Industrial Constructions: The Sources of German Industrial Power, ISSN 0954-366X, Gary Herrigel](#) , 2000, 052177859X, 9780521778596. This book is about the way in which industrial production in Germany was conditioned by social, political, and regional factors from the seventeenth century to the present. The argument is distinctive because it pays so much attention to small and medium sized firms, and because it suggests that Germany does not have a single coherent national system of industrial governance. This social constructivist point of view presents a direct challenge to the Gerschenkronian, Schumpeterian, and Chandlerian approaches to Germany's economic history.

[Linguistic Diversity, Daniel Nettle](#) , 1999, 0198238576, 9780198238577. There are some 6,500 different languages in the world, belonging to around 250 distinct families and conforming to numerous grammatical types. This book explains why. Given that the biological mechanisms underlying language are the same in all normal human beings, would we not be a more successful species if we spoke one language? Daniel Nettle considers how this extraordinary and rich diversity arose, how it relates to the nature of language, cognition, and culture, and how it is linked with the main patterns of human geography and history. Human languages and language families are not distributed evenly: there are relatively few in Eurasia compared to the profusion found in Australasia, the Pacific, and the Americas. There is also a marked correlation between biodiversity and linguistic diversity. The author explains the processes by which this distribution evolved and changes still. To do so he returns to the earliest origins of language, reconstructing the processes of linguistic variation and diffusion that occurred when humans first filled the continents and, thousands of years later, turned to agriculture. He ends by examining the causes of linguistic mortality, and why the number of the world's languages may halve before 2100. *Linguistic Diversity* draws on work in anthropology, linguistics, geography, archaeology, and evolutionary science to provide a comprehensive account of the patterns of linguistic diversity. It is written in a clear, lively and accessible style, and will appeal broadly across the natural and human sciences, as well as to the informed general reader.

Teacher supervision and evaluation that emphasizes fairness, excellence, and achievement In this thoroughly revised and updated edition of his bestselling book, education expert Kim Marshall shows how to break away from the typical and often ineffective evaluation approaches in which principals use infrequent classroom visits or rely on standardized test scores to assess a teacher's performance. Marshall proposes a broader framework for supervision and evaluation that enlists teachers in improving the performance of all

students. Revised edition of the classic book on teacher supervision and evaluation. Includes thoughts on iPad and iPhone apps for classroom observation. Offers new chart on how principals can manage ten mini-observations per teacher per year. Contains new thoughts on merit pay, a different approach to the test-score argument from Arne Duncan. This vital resource also includes extensive tools and advice for managing time as well as ideas for using supervision and evaluation practices to foster teacher professional development.

Ernest Hemingway's lifelong zeal for hunting is reflected in his masterful works of fiction, from his famous account of an African safari in *The Short Happy Life of Francis Macomber* to passages about duck hunting in *Across the River and into the Trees*. For Hemingway, hunting was more than just a passion; it was a means through which to explore our humanity and man's relationship to nature. Courage, awe, respect, precision, patience—these were the virtues that Hemingway honored in the hunter, and his ability to translate these qualities into prose has produced some of the strongest accounts of hunting of all time. *Hemingway on Hunting* offers the full range of Hemingway's writing about the hunting life. With selections from his best-loved novels and stories, along with journalistic pieces from such magazines as *Esquire* and *Vogue*, this spectacular collection is a must-have for anyone who has ever tasted the thrill of the hunt in person or on the page.

[Science and Spirituality: The Volatile Connection, David M. Knight](#) , 2004, 0415257689, 9780415257688. Until the end of the eighteenth century, almost everyone believed that the empirical world of science could produce evidence for a wise and loving God. By the twenty-first century this comforting certainty has almost vanished. What caused such a cataclysmic change in attitudes to science and to the world? Science and Spirituality offers a new history of the interaction between Western science and faith, which explores their volatile connection, and challenges the myth of their being locked in inevitable conflict. Journeying from the French Revolution to the present day, and taking in such figures as Francis Bacon, Ren Descartes, Charles Darwin, Immanuel Kant, Albert Einstein, Mary Shelley and Stephen Hawking, David Knight shows how science evolved from medieval and Renaissance forms of natural theology into the empirical discipline we know today. Focusing on the overthrow of Church and State in revolutionary France, and on the crucial nineteenth century period when a newly emerging scientific community rendered science culturally accessible, Science and Spirituality shows how scientific disenchantment has provided some of our most flexible and powerful metaphors for God, such as the hidden puppet-master and the blind watchmaker, and illustrates how questions of moral and spiritual value continue to intervene in scientific endeavour.

After getting involved with the murders of local prostitutes in the town of Deva, Doctor Gaius Petreius Ruso needs to get out of town, so has volunteered for a posting with the Army on the volatile border where the Roman-controlled half of Britannia meets the independent tribes of the North. Not only is he going to the hinterlands of the hinterlands, but it his slave Tilla's homeland and she has some scores to settle there. Soon they find that Tilla's tribespeople are being encouraged to rebel against Roman control by a mysterious leader known as the Stag Man, and her former lover is implicated in the grisly murder of a soldier. Ruso, unwillingly involved in the investigation of the murder, is appalled to find that Tilla is still spending time with the lover. Worse, he is honour bound to try to prove the man innocent - and the Army wrong - by finding another suspect. Soon both Ruso's and Tilla's lives are in jeopardy, as is the future of their burgeoning romantic relationship.

[The Journey Through Cancer: Healing and Transforming the Whole Person, Dr. Jeremy Geffen](#) , 2007, 0307422119, 9780307422118. The Journey Through Cancer is an essential guide for all cancer patients, their families, and their loved ones. As a board-certified oncologist, with more than ten years of experience serving as physician, guide, mentor, coach, and friend to thousands of cancer patients and their families, Dr. Jeremy Geffen has learned how cancer often challenges

the mind, heart, and spirit of patients and their families as deeply --- if not more deeply --- than it challenges the physical body. Yet this simple truth is often overlooked by Western medicine as it aggressively pursues the best ways to diagnose and treat cancer. Too often physicians focus almost exclusively on the physical dimensions of the disease, rather than caring for the whole person who has the disease. Dr. Geffen presents a groundbreaking seven-level program, used at his cancer center in Florida, that addresses every dimension of the person with cancer--physical, mental, emotional, and spiritual: Education and Information, giving patients answers to questions about their disease and their treatment options. Psychosocial Support, focusing on the need for and benefits of a strong support network. The Body as Garden, exploring the vast array of alternative and complementary therapies. Emotional Healing, helping patients and families deal with the often overwhelming emotional challenges of cancer. The Nature of Mind, exploring how patients' thoughts and beliefs profoundly influence their journey. Life Assessment, showing patients how to discover their life's deepest meaning and purpose. The Nature of Spirit, connecting patients to the profoundly healing spiritual aspect of life we all share. In The Journey Through Cancer, Dr. Geffen presents a revolutionary model of healing based on the best treatments available from every culture and paradigm of medicine, one that respects and explores every possible avenue and resource for healing and transformation, blending East and West, body and mind, heart and technology, science and spirit. [Lucy at the Movies, Cindy De La Hoz](#) , 2007, 076242706X, 9780762427062. The world knows her as the First Lady of Television, but Lucille Ball's talent also shone brightly on the cinema screen in over eighty films spanning five decades, most from Hollywood's glamorous golden age of the 1930s and 40s. Lucy at the Movies is a long overdue showcase for this area of the star's career, offering behind-the-scenes stories and essential information for every film in which she appeared. The pages are filled with rare photos of the beautiful young actress, many from her own first scrapbooks. Explored from her days as a showgirl through blonde, brunette, and Tango Red incarnations, from black-and-white through glorious Technicolor, this is a complete reference guide and a tribute to a star and an era. Lucy at the Movies was an enormous undertaking. But it's clear that it was also a labor of love. My mother would be very impressed and flattered . . . The value in this encyclopedia is the information on, not only the film career of Lucille Ball, but the way films were made. It's an invaluable history of the motion picture industry and those who first created it.--Lucie Arnaz

[Concepts of Normality: The Autistic and Typical Spectrum, Wendy Lawson](#) , 2008, 1846428297, 9781846428296. For those with autism, understanding 'normal' can be a difficult task. For those without autism, the perception of 'normal' can lead to unrealistic expectations of self and others. This book explores how individuals and society understand 'normal', in order to help demystify and make accessible a full range of human experience. Wendy Lawson outlines the theory behind the current thinking and beliefs of Western society that have led to the building of a culture that fails to be inclusive. She describes what a wider concept of 'normal' means and how to access it, whether it's in social interaction, friendships, feelings, thoughts and desires or various other aspects of 'normality'. Practical advice is offered on a range of situations, including how to find your role within the family, how to integrate 'difference' into everyday society, and how to converse and connect with others. Accessible and relevant to people both on and off the autism spectrum, this book offers a fresh look at what it means to be 'normal'.

[In the Shadow of Melting Glaciers: Climate Change and Andean Society, Mark Carey](#) , 2010, 0195396073, 9780195396072. Climate change is producing profound changes globally. Yet we still know little about how it affects real people in real places on a daily basis because most of our knowledge comes from scientific studies that try to estimate impacts and project future climate scenarios. This book is different, illustrating in vivid detail how people in the Andes have grappled with the effects of climate change and ensuing natural disasters for more than half a century. In Peru's Cordillera Blanca mountain range, global climate change has generated the world's most deadly glacial lake outburst floods and glacier avalanches, killing 25,000 people since 1941. As survivors grieved, they formed community organizations to learn about precarious glacial lakes while they sent priests to the mountains, hoping that God could calm the increasingly hostile landscape. Meanwhile, Peruvian engineers working with miniscule budgets invented innovative strategies to drain dozens of the most unstable lakes that continue forming in the twenty first century. But adaptation to global climate change was never simply about engineering the Andes to eliminate environmental hazards. Local urban and rural populations, engineers, hydroelectric developers, irrigators, mountaineers, and policymakers all perceived and responded to glacier melting differently-based on their own view of an ideal Andean world. Disaster prevention projects involved debates about economic development, state authority, race relations, class divisions, cultural values, the evolution of science and technology, and shifting views of nature. Over time, the influx of new groups to manage the Andes helped transform glaciated mountains into commodities to consume. Locals lost power in the process and today comprise just one among many stakeholders in the high Andes-and perhaps the least powerful. Climate change

transformed a region, triggering catastrophes while simultaneously jumpstarting modernization processes. This book's historical perspective illuminates these trends that would be ignored in any scientific projections about future climate scenarios.

[Managerial Accounting with Connect Plus, Ronald Hilton](#) , 2010, 0077477588, 9780077477585. The emphasis of Managerial Accounting, 9th edition is on teaching students to use accounting information to best manage an organization. In a practice Hilton pioneered in the first edition, each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. Known for balanced examples of Service, Retail, Nonprofit and Manufacturing companies, Hilton offers a clear, engaging writing style that has been praised by instructors and students alike. As in previous editions, there is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also including traditional topics such as job-order costing, budgeting and performance evaluation.

[Peace: A History of Movements and Ideas, David Cortright](#) , 2008, 1139471856, 9781139471855. Veteran scholar and peace activist David Cortright offers a definitive history of the human striving for peace and an analysis of its religious and intellectual roots. This authoritative, balanced, and highly readable volume traces the rise of peace advocacy and internationalism from their origins in earlier centuries through the mass movements of recent decades: the pacifist campaigns of the 1930s, the Vietnam antiwar movement, and the waves of disarmament activism that peaked in the 1980s. Also explored are the underlying principles of peace - nonviolence, democracy, social justice, and human rights - all placed within a framework of 'realistic pacifism'. Peace brings the story up-to-date by examining opposition to the Iraq War and responses to the so-called 'war on terror'. This is history with a modern twist, set in the context of current debates about 'the responsibility to protect', nuclear proliferation, Darfur, and conflict transformation.

[Famine and Foreigners: Ethiopia Since Live Aid, Peter Gill](#) , 2012, 0199644047, 9780199644049. The terrible 1984 famine in Ethiopia focused the world's attention on the country and the issue of aid as never before. Anyone over the age of 30 remembers something of the events - if not the original TV pictures, then Band Aid and Live Aid, Geldof and Bono. Peter Gill was the first journalist to reach the epicentre of the famine and one of the TV reporters who brought the tragedy to light. This book is the story of what happened to Ethiopia in the 25 years following Live Aid: the place, the people, the westerners who have tried to help, and the wider multinational aid business that has come into being. We saved countless lives in the beginning and continue to save them now, but have we done much else to transform the lives of Ethiopia's poor and set them on a 'development' course that will enable the country to thrive?

[The Development of International Law by the International Court of Justice, Christian J. Tams, James Sloan](#) , 2013, 0199653216, 9780199653218. This book traces the impact that the International Court of Justice (ICJ), the principal judicial organ of the United Nations, has had on various areas of international law. A number of prominent international experts examine whether, and to what extent, international law has been shaped by the Court's jurisprudence. The informal development of international law through the Court's judgments contrasts with the development of international law through more deliberate means, such as treaty-making. Assessing key areas of international law over which the ICJ has exercised its jurisdiction, such as international environmental law, international human rights, the law of the sea, and the law of immunities, this book comprehensively details the impact of international jurisprudence on contemporary international law. Continuing the work started by Sir Hersch Lauterpacht's influential book *The Development of International Law by the Permanent Court of International Justice*, this book provides key new insights into the role of the Court in wider international law. It makes required reading for anyone studying the ways in which international courts have in shaped the evolution of international law.

[Phenomenological Epistemology, Henry Pietersma Professor of Philosophy University of Toronto](#) , 1999, 0195351142, 9780195351149. This work offers a provocative new historical and systematic interpretation of the epistemological doctrines of three twentieth-century giants: Husserl, Heidegger, and Merleau-Ponty. Pietersma argues that these three philosophers, while connected by their phenomenological doctrines, have underappreciated and interestingly-linked views on the theory of knowledge.

Written to provide all readers with an opportunity to learn and demonstrate computer and Internet literacy. Computer Literacy for IC3 was written to align with a certification called Internet and Computing Core Certification (IC3). This certification is for users who want to demonstrate critical computer and Internet skills valued in today's academic and professional environments. The Computer Literacy for IC3 text is written to meet the certification standards and provide readers with a broad understanding of the key components of computer literacy in order to prepare for the exam. This certification has 3 units: Unit 1: Computing Fundamentals (computer concepts) Unit 2: Using Productivity Software Unit 3: Living Online (the Internet) Each of these units is available as a separate Computer Literacy for IC3 text. This text contains: Unit 1: Computing Fundamentals and covers basic computer concepts including computer hardware, computer software, and using an operating system. The second edition of Computer Literacy for IC3 has been revised to keep up with the IC3 program's evolution, which reflects the recent changes in computers and technology. Instead of publishing one large, comprehensive text, the three units are now available as separate, smaller texts. Identifying Types of Computers (1.1.0); Identifying Computer Components and Their Functions (1.1.0); Maintain Computer Equipment (1.2.0); Identifying Software and Hardware Interaction and Types of Software; Using an Operating System; Using Windows Computer Literacy for IC3 prepares readers from the IC3 certification, which ensures that students and professionals have all the core skills needed to work in today's technological environment.

[If You Give an Architect a Contract, Seth Kaufman](#) , 2012, 0985626593, 9780985626594. More than a parody of the well-known children's series, If You Give an Architect a Contract is a hilarious and painful cautionary tale about home ownership, renovation, and the uncomfortable dynamics between clients, architects and contractors. In other words, it's the perfect house-warming gift. Laura Lee Pedersen's slyly comical illustrations bring Seth Kaufman's traumatic tale to life. Humor and satire abound from the first page to the inspired back-cover quotes. No home--or architecture office--should be without this book.

[US Marine Corps in World War I 1917-18, Mark R. Henry](#) , 2012, 1782005196, 9781782005193. Though the US Marines initially struggled to maintain their distinctive identity within the huge American Expeditionary Force in France, their unforgettable performance at Belleau Wood, Soissons, St Mihiel, Blanc Mont and the Meuse-Argonne established their reputation as 'the most aggressive body of diehards on the Western Front'. This book describes the organization of this formidable force from 1917-18 and details their uniforms, insignia and decorations, weapons and equipment. Numerous photographs and eight full colour plates vividly depict the various ranks of the US Marine Corps.
