

# AEES 2021

Australian Earthquake Engineering Society  
Virtual Conference

25 & 26 November, 2021

## WELCOME

AEES President, Trevor Allen, and the AEES Committee look forward to welcoming you to our virtual conference. The conference will be held over two days 25 & 26 November, 2021.

Our keynote speakers this year are:

**Prof. Ken Elwood** currently serves as the Associate Director of QuakeCoRE: New Zealand Centre for Earthquake Resilience, a multi-institution Centre of Research Excellence funded by the New Zealand Government.

Ken joined the University of Auckland in July 2014 after 11 years on faculty at the University of British Columbia, Canada. Ken was drawn to New Zealand to pursue the numerous opportunities for research and implementation in earthquake risk reduction. He is actively involved in research related to the seismic response of existing concrete buildings, residual capacity, and post-earthquake recovery.

Ken received his PhD in Civil Engineering from the University of California, Berkeley in 2002, M.S. from the University of Illinois at Urbana-Champaign in 1995, and BSc from the University of British Columbia in 1993. Ken has served as a member of several international code committees and currently sits on the American Concrete Institute Building Code (ACI 318) Committee. He has also chaired a committee for New Zealand Government to set guidelines for the seismic assessment of buildings with precast floors.

**Assoc. Prof. Mark Quigley** is Associate Professor of Earthquake Science in the School of Geography, Earth, and Atmospheric Sciences at the University of Melbourne. He has published more than 100 research articles and supervised more than 30 Ph.D. and M.Sc. students. He is a Fellow of the Geological Society of America and recipient of the New Zealand Prime Minister's Science Communication Prize and Geological Society of America's Public Service Award. Mark is Director of Geological Hazards for Critical Infrastructure (GeoHACI) Consulting and has worked extensively with industry, government, the United Nations, and diverse stake-holders and decision-makers to provide seismic hazard analysis for decision-making. His website is [www.drquigs.com](http://www.drquigs.com)

We will have a blend of keynote speakers, oral presentations and posters. The conference proceedings this year will be presented in digital format. All papers will be published in the conference proceedings.
