

afrimapr community meetups

Presenter: Anelda van der Walt (afrimapr/Talarify)

R packages for Open Data from Africa

In this month's meetup Anelda van der Walt will be introducing a broad range of R packages that facilitates easy access to open data sets. We will look at data related to mapping, health, climate, society, and more. We'll also share some resources to help you get started with your own data package in R. The talk will be relevant to those not yet familiar with R as well.

afrimapr's monthly virtual meetups aim to support the development of an active African R mapping community. It offers you a chance to learn about new resources, ask questions, showcase your work, and grow your R mapping network.

Come along and say "Hallo!" No preparation or experience with R or mapping needed!

Date: 23 March 2022

Time: 10:00 - 11:00 UTC

Where: Online

Register: <https://qkt.io/afrimapr-March2022>

Join our mailing list to stay in touch!
