

afrimapr community meetups

Presenter: Anne Treasure (afrimapr/Talarify)

An automated data pipeline using R and GitHub Actions

In this month's meetup, Anne Treasure will be showcasing a data pipeline developed for reading data from a Google Form & Spreadsheet to then visualise interactively in Shiny and Kumu. We'll look at steps for setting up non-interactive authorisations to enable integrating with Google Spreadsheets. The workflow is automated using GitHub Actions.

afrimapr's monthly virtual meetups aim to support the development of an active African R mapping community. It offers you a chance to learn about new resources, ask questions, showcase your work, and grow your R mapping network.

Come along and say "Hello!" No preparation or experience with R or mapping needed!

Date: 20 April 2022

Time: 10:00 - 11:00 UTC

Where: Online

Register: <https://qkt.io/afrimapr-Apr2022>

Join our mailing list to stay in touch!

<https://groups.google.com/g/afrimapr/>

Who should join?

Researchers, analysts, students making maps using African data. Newcomers to R welcome.
