

# afrimapr community meetups

## Interactive session

*A community discussion on new things you are trying or challenges you are facing with mapping and R*

*afrimapr* launched a monthly virtual meetup in May! We want to get to know our community and provide an opportunity for you to share your work, tips and tricks with others.

This month, we will be holding an **interactive session** to discuss new things you are trying or challenges that you may be facing with R and mapping. This session will help us to identify focus areas for future community meetups and potential learning material or packages to develop.

Join us for our upcoming meetup. Meet others working on creating maps from African data in R. Come along to say Hello, no preparation needed!

**Date:** 25 August 2021

**Time:** 10:00 - 11:00 UTC

**Where:** Online

Join our mailing list for connection details

<https://groups.google.com/g/afrimapr/>

**Who should join?**

Researchers, analysts, students making maps using African data. Newcomers to R welcome.
