**CONNECTING GLOBAL
EXPERTISE AND
ENTREPRENEURSHIP IN WATER
AND WASTE MANAGEMENT**

waterandwastemanagement.org

Mariyana T. Spyropoulos

Commissioner

*Metropolitan Water Reclamation District of Greater Chicago
Chairperson of the Conference and Expo*

It is my great pleasure to welcome you all to participate in the 3rd International Water and Waste Management Conference & Expo to be held virtually during Feb 24 – 26, 2021.

The two International conferences held at Hyderabad, India during Feb 2019, and Feb 2020 were very successful and created Knowledge and Business platforms in Water and Waste sector. Subject matter experts and Business Leaders from USA and around the world gathered on one platform to share their experiences to build a better environment.

The highlights of WWM conferences held in 2019, and 2020 are:
Participation of large number of Experts and Business Leaders from USA and other parts of world.

- Interaction with Government and Local Leaders of India
- Publication of souvenirs highlighting the technical expertise in the field
- Creation of Knowledge and Business platforms
- Participation of Industry, Engineering Students and Academicians
- Plans to adopt the knowledge to improve environment in Rural areas.

The present situation in the World due to COVID-19 pandemic restricted us to hold our 3rd conference physically in India. However due to the improved technological advances it created opportunity to participate virtually from the comfort of your own place.

Following are the highlights of our 3rd International WWM Conference:

- Conference and Expo to be conducted on dual virtual platforms
- Participation of Business Leaders and Experts in water and Waste Industry
- Possibility to sign MOUs and create Business opportunities
- Increased participation from around the world due to virtual nature

Our virtual Conference and Expo is an excellent opportunity to introduce your organization to the customers on International platform. We encourage you to participate in this Conference and Expo and we look forward to your presence.

Understanding WWM

Water and Waste Management (WWM) Group is an eclectic team of Consultants, Scientists, Engineers, and Academicians from USA, Australia, Canada, Europe, Singapore and India with expertise in water and waste management. With this wide experience, the Group provides a global platform for Governments, Industry and society to share the knowledge and expertise for sustainable living/development.

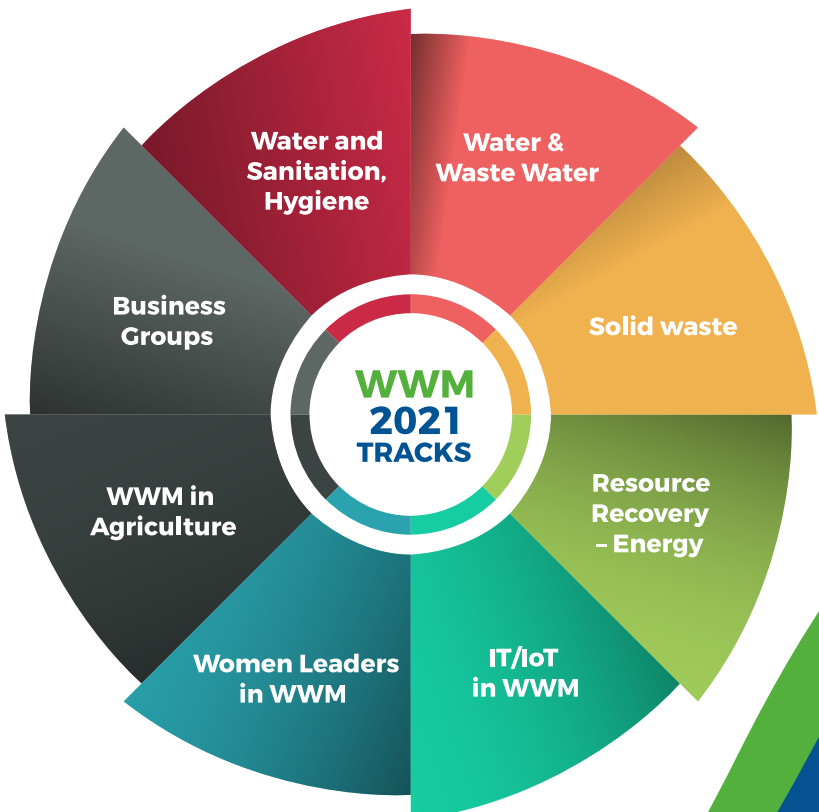

WWM: Dual Time Zone Concept

WWM is coming out with a unique dual time zone model of holding conference at both the time zones of United States of America and India (CST & IST). This gives Participants and Businesses an opportunity to participate in both time zones for better reach to their audience and customers. With this the conference goes 16 hours a day which is 8 hours USA time zone and 8 hours Indian time zone. At both platforms, one will get an opportunity to interact with different guests, speakers and audience keeping the conference more successful. Better reach, Better mileage and Better collaborations are possible with this unique concept. This will expand our WWM concept of creating Knowledge and Business platforms.

WWM 2019 / 2020: Elite speakers made a profound impact

During 2019 WWM conference, a group of 37 Experts from USA participated from more than 12 USA National Organizations. For the WWM 2020, about 100 International Experts and teams from USA and other countries participated in the 8 tracks designed for the event.

WWM: Focus

Strengthening further based on our first and second successful WWM conferences,

- We would like our WWM platform to enable business opportunities,
- Offer best technology solutions and disseminate best practices and methods in the Water and Waste Management sectors and
- Connecting the global technologies and people together for better environmental solutions.

Why Exhibit?

- » Being the virtual platform the products and services will be introduced in many countries simultaneously.
- » Increased brand awareness
- » Network with business leaders, policy makers and key decision makers
- » Explore one of the fastest growing markets globally
- » Build strategic business alliances in USA, India and other countries
- » Improve global competitiveness
