[Fishing the Greenbrier Valley: An Angler's Guide, Michael W. Smith](#) , 2005, 0813923743, 9780813923741. While sparsely populated, the Greenbrier Valley is home to some of the richest outdoor recreation resources in the mid-Atlantic.

Boasting a combination of unspoiled backcountry, featuring spectacular gorges and falls and major resorts, including both Snowshoe Mountain and the venerable Greenbrier Hotel, the area draws legions of campers, hikers, anglers, hunters, paddlers, horseback riders, and bird-watchers each year. In his new guide, *Fishing the Greenbrier Valley*, M. W. Smith extends his ongoing tour of the Commonwealths greatest fishing spots to West Virginia, offering readers excellent advice on where, when, and how to catch more fish in the Greenbrier Valley. Though the Greenbrier Valley is well known for its excellent smallmouth bass and trout fishing, many anglers dont realize that white bass, catfish, and walleye also can be found there. Smith draws on a wealth of first-hand experience to convey how to find these fish, providing everything from driving directions, locations of put-in and take-out spots, float-fishing suggestions, and detailed descriptions of the different species of fish that can be found in the Greenbrier Valley. Complete with a comprehensive map of the valley streams and notes on specific fishing locations keyed to maps in DeLormes West Virginia Atlas and Gazetteer, Smiths guidebook is both compact and informative. Whether one is new to the region or a longtime resident, novice fisher or pro, *Fishing the Greenbrier Valley* will prove an indispensable guide to every fishing adventure you undertake in the Greenbrier Valley.

Tay-Sachs disease is a rare hereditary disease caused by a genetic mutation that leaves the body unable to produce an enzyme necessary for fat metabolism in nerve cells, producing central nervous system degeneration. In infants, it is characterized by progressive mental deterioration, blindness, paralysis, epileptic seizures, and death by age four. Adult-onset Tay-Sachs occurs in persons who have a genetic mutation that is similar but allows some production of the missing enzyme. There is no treatment for Tay-Sachs. A test to determine whether an infant is carrying the Tay-Sachs disease was introduced in

1969. However, work continues to be done to help find a cure. Because there is no cure for this deadly disease, genetic research is essential. *Advances in Genetics* presents an eclectic mix of articles of use to all human and molecular geneticists. They are written and edited by recognized leaders in the field and make this an essential series of books for anyone in the genetics field.

The Language of Sexual Misconduct Cases analyzes the many ways in which language plays a crucial role in sexual misconduct cases. Roger W. Shuy describes eleven court cases for which he served as an expert witness, and explains the issues at stake in each case for both lawyers and linguists. The book's attention is on aspects of sexual misconduct that have not previously received the attention they deserve, such as: the language evidence of sexual misconduct in the workplace; cases of adult-to-child sexual misconduct with the family; and adult-adult sexual misconduct cases. Shuy describes the often-used linguistic analytical tools that are available to both the prosecution and the defense, and argues that there is a particular sequence in which these tools should be used.

'A well-written, well argued discussion of the foundations of macroeconomics. If you are unfamiliar with the arguments that macro is not, and cannot be, a traditional science, then this book is definitely worth reading.' - David

Colander, Middlebury College, Vermont, US 'Athol Fitzgibbons's book distils the main lesson of the debates on Keynes over the last 25 years: that macroeconomics has to be based on a theory of knowledge consistent with the way life is lived, where decisions are made in the face of imperfect knowledge. All existing theory (including, he argues, the General Theory) assumes either perfect knowledge or complete ignorance. He shows us why this has happened, and suggests a way out. It is a brave, knowledgeable and important book.' - Victoria Chick, University College London, UK This book addresses the long absence of a satisfactory theory of macroeconomics. Keynesian theory is not consistent with rational self-interest, but neo-classical economics is unable to explain economic volatility and the trade cycle. Athol Fitzgibbons critiques the leading macroeconomic theories, which he believes are unduly mechanistic because they are incompatible with non-quantitative knowledge.

[Sex, power, conflict: evolutionary and feminist perspectives, David M. Buss](#) , 1996, 0195095812, 9780195095814. Sexual harassment in the workplace, date rape, and domestic violence dominate the headlines and have recently sparked scholarly debates about the nature of the sexes. Concurrently, the scientific community is conducting research in topics of sex and gender issues. Indeed, more research is being done on the topics of sexual conflict and coercion than at any other time in the history of the social sciences. Despite this attention, it is clear that these issues are being addressed from two essentially different perspectives: one is labeled "feminist", while the other, viewed as antithetical to the feminist movement, is called "evolutionary psychology", which emphasizes the history of reproductive strategies in understanding conflict between the sexes. This book brings together leading experts from both sides of the debate in order to discover how each could offer insights lacking in the other. The editors' overall goal is to show how the feminist and evolutionary approaches are complementary despite their evident differences, then provide an integration and synthesis. In fact, several of the contributors to this unique volume consider themselves advocates of both approaches. As a stimulating presentation of the dynamics of sex, power, and conflict--and a pioneering rapprochement of the diverse tendencies within the scientific community-- this book will attract a wide audience in both psychology and women's studies fields.

series of lectures on the art of creating effective nonfiction by one of the 20th century's most profound writers and thinkers--now available for the first time in print. Culled from sixteen informal lectures Ayn Rand delivered to a select audience in the late 1960s, this remarkable work offers indispensable guidance to the aspiring writer of nonfiction while providing readers with a fascinating discourse on art and creation. Based on the concept that the ability to create quality nonfiction is a skill that can be learned like any other, *The Art of Nonfiction* takes readers through the writing process, step-by-step, providing insightful observations and invaluable techniques along the way. In these edited transcripts, Rand discusses the psychological aspects of writing, and the different roles played by the conscious and unconscious minds. From choosing a subject to polishing a draft to mastering an individual writing style--for authors of theoretical works or those leaning toward journalistic reporting--this crucial resource introduces the words and ideas of one of our most enduring authors to a new generation.

[Laike and Nahum: A Poem in Two Voices, Ruth Panofsky](#) , 2007, 0978223314, 9780978223311. *Laike and Nahum: A Poem in Two Voices* is a long, narrative poem based loosely on the lives of the poets maternal grandparents, Russian Jewish immigrants to Montreal in the early part of the twentieth century. Her grandmother arrived in Canada as a child; her grandfather was already a young man in his early twenties upon his arrival in this country. The poem is inspired by the intense courtship and sixty-year marriage of the poets grandparents, the experiences that necessitated their departure for North America, and their difficult settlement in Montreal. The poem is told in two voices that frame, overlap, embellish, and question one another. Laikes voice and Nahums voice are heard in counterpoint across a poem that probes the hold of culture, tradition, and gender expectations on women and men in the rapidly changing society of Montreal during the twentieth century. Panofskys work charts the emotional and physical trials of impoverished immigrants who were deeply affected by the Great Depression and the Second World War and who struggled to establish themselves in Canada. This volume unveils the sacrifices and victories of a Jewish, working-class couple that experienced

firsthand the lash of racism and the balm of community.

Throughout the twentieth century, Beijing University (or Beida) has been at the center of China's greatest political and cultural upheavals—from the May Fourth Movement of 1919 to the Cultural Revolution of the 1960s to the tragic events in Tiananmen Square in 1989. Why this should be—how Beida's historical importance has come to transcend that of a mere institution of higher learning—is a question at the heart of this book. A study of intellectuals and political culture during the past century's tumultuous early decades, "The Power of Position" is the first to focus on Beida, China's oldest and best-known national university. Timothy B. Weston portrays the university as a key locus used by intellectuals to increase their influence in society. Weston analyzes the links between intellectuals' political and cultural commitments and their specific manner of living. He also compares Beijing's intellectual culture with that of the rising metropolis of Shanghai. What emerges is a remarkably nuanced and complex picture of life at China's leading university, especially in the decades leading up to the May Fourth Movement.

[From Myth to Reason?: Studies in the Development of Greek Thought, R. G. A. Buxton](#) , 2001, 0199247528, 9780199247523. It has often been asserted that Greek civilization underwent a transition from myth to reason. But what does such an assertion mean? And how much truth is there in it? Were the Greeks special in having evolved our sort of reason, or is that a mirage? In this book, some of the world's leading experts on ancient Greek myth, religion, philosophy, and history reconsider these fundamental issues. Among the problems they explore are: the history of the Mythos/Logos opposition; myth and reason in practice; logic(s) of myth; intersections involving myth/philosophy, myth/history, myth/ethnography, and myth/technology. Some contributors are more sceptical than others about whether the myth/reason polarity has any future as a tool for the understanding of Greek society - or any society. But what they all agree on is that a reconsideration of the Greek case can help us to clarify much broader debates, for example the debate about the cross-cultural viability (or not) of myth and reason/rationality.

Literary Criticism. Poetics. "The wild is always unprecedented, but never inconsistent. This is the knowledge that makes American scholarship American. Norman Finkelstein offers unprecedented insights here whose facts consist of one Soul purpose: Friendship. Here the imagination of poetry is Friendship on the line. And driving that line are energies of the inevitable (if we are to live, Friendship is inevitable): motions outward; an outstretched hand; a goddamn big car bought and paid for lovingly. These energies speak simply, and doing so, they accomplish new simplicities which Finkelstein boldly proposes as the most radical virtues of poetic art. Read and see"--from the introduction by Donald Revell.

In this explicit first-hand account, a biker who spent 46 years as a member of the Hells Angels and Satan's Choice invites bestselling author Peter Edwards into the story of life lived as we've only imagined it. A kid raised by his father's fists on the wrong side of a blue-collar town, Lorne Campbell grew up watching the local bikers ride past, making him wonder what that kind of freedom and power would feel like. He soon found out. At the age of 17, he became the youngest-ever member of the Satan's Choice Motorcycle Club and spent the next 5 decades living a life for which he does not ask forgiveness, only that his story finally be told, and that his family finally understand what drove him to live the way he did. With moments of terror and humour, great sadness and the simple pleasures of camaraderie and the open road, Unrepentant is a book like none other.

[Visual Basic Database Programming, Michael Kofler](#) , 2002, 0201721937, 9780201721935. The expert guide to better database application development with Visual Basic.-- In-depth coverage of ADO, including a compact reference of ADO.-- Powerful optimization solutions -- and real-world workarounds for undocumented problems!-- Includes detailed coverage of SQL Server and Microsoft Data Engine (MSDE)According to Microsoft, two-thirds of all Visual Basic programmers develop database applications. In Visual Basic Database Programming, Michael Kofler targets VB database application development, showing experienced Visual Basic programmers exactly how to take full advantage of VB6 and SQL Server to build more robust, faster applications. Kofler begins with an introduction to the ADO (ActiveX Data Objects) database library, and to Microsoft's diverse Visual Basic database productivity tools, such as the DataEnvironment designer. Next, he introduces powerfully efficient programming techniques for accessing data stored on Microsoft SQL Server databases. Finally, the book includes a compact reference of ADO 2.1 objects and controls. All examples are based on SQL Server 7. Kofler offers detailed, hard-to-find information about the Microsoft Data Engine (MSDE), Microsoft's new, free database engine, showing how to use MSDE as a low-cost starting point for projects that can be scaled up to Microsoft SQL Server later, with no code changes. From start to finish, Visual Basic Database Programming identifies undocumented problems, presents workarounds, and describes optimizations based on how VB

and SQL Server 7 really work together. The accompanying CD-ROM contains an extensive code library, a 100 MB test database, and a complete copy of the Microsoft Data Engine (MSDE).

[Soul and Man, Kit Cain](#) , 2006, 0978000560, 9780978000561. Ever since I started learning to play the guitar fifty-some years ago, writing my own songs and putting words to rhythm and rhyme became a sort of hobby that I used to fill my spare time. Initially, these were just simple folk and country songs, but because my singing voice was not that great and music not of major interest- and because I was very shy and self-conscious- I kept music and song as my part-time reclusive companions. However, whenever I felt some phrases, concept, or event in my life warranted expression in song or poetic verse, I would sit down and work it out in the moment and then store it away in my notebooks. Over the years, and as my consciousness moved increasingly into spiritual things, expressing concepts poetically seen the natural medium for spiritual thoughts and feelings and thus my writings turn more to poetry and poetic prose. These and

numerous song lyrics were all scattered about in various notebooks and computer files, and not until I one day decided to organize them into coherent order did it occur to me that someone else might be interested in that which had flowed so effortlessly off the end of my pen over the years. Whether a book of poetry would interest anyone or not I didn't know because I have never had any interest in poetry as such. Poetry has always seemed to be such a personal expression that most poetry I had heard or read either escaped my limited intelligence completely, put me to sleep, or embarrassed me for not wanting to make an honest comment. Even the best of poetry when delivered by a dead tongue is lifeless. When delivered by a masterful actor, however, is unequalled in its spellbinding power. There are roughly 40 poems, 19 song lyrics, 7 letters or stories, and six author's commentaries here between these covers. Most may be of minimal interest or momentary entertainment. Hopefully, more than a few will be provoking of profound thought. If, however there is just one that you read over and over again down through the years, you will wonder just as I do where such beautiful words come from. Such is the mystery of really great poetry.

[Le Corbusier in America: Travels in the Land of the Timid, Mardges Bacon](#) , 2003, 0262523426, 9780262523424. Le Corbusier's first trip to the United States in 1935 is generally considered a failure because it produced no commissions. The experience nevertheless had a profound effect on him, both personally and professionally. Sponsored by the Museum of Modern Art in New York, Le Corbusier promoted his ideas through a lecture tour, exhibition, and press conferences, as well as in meetings with industrialists, housing reformers, New Deal technocrats, and editors. His lectures were watershed events that advanced the cause of European modernism. Yet he returned to France empty-handed and published a bittersweet account, *Quand les cathédrales étaient blanches: voyage au pays des timides* (When the Cathedrals Were White: Journey to the Country of Timid People), which faulted America for lacking the courage to adopt his ideas. In this first major study of Le Corbusier's American tour, Mardges Bacon reconstructs his encounter with America in all its fascinating detail. Through extensive archival research and interviews, she presents a critical history of the tour as well as a nuanced and intimate portrait of the architect. Drawing on the methods of microhistory, she also considers how small ordinary events affect larger biographical, architectural, and cultural developments. Bacon notes that Le Corbusier's dialogue with America was drafted within a spirited European discourse on americanism. She contends that the trip validated his concept of a "second machine age" that would unite standardized industrial methods with a new humanism. Le Corbusier's subsequent work, she suggests, reflected an "Americanization," evidenced by the introduction of tension structures and the textured skyscraper conceived as an integrated system with functions articulated. She also defines Le Corbusier's role in the debate over New York City high-rise public housing. Appearing here in print for the first time are color reproductions of the pastel drawings that illustrated Le Corbusier's American lectures."

[Athenian Democracy, Peter John Rhodes](#) , 2004, 0195221400, 9780195221404. Athens' democracy developed during the sixth and fifth centuries and continued into the fourth; Athens' defeat by Macedon in 322 began a series of alternations between democracy and oligarchy. The democracy was inseparably bound up with the ideals of liberty and equality, the rule of law, and the direct government of the people by the people. Liberty means above all freedom of speech, the right to be heard in the public assembly and the right to speak one's mind in private. Equality meant the equal right of male citizens (perhaps 60,000 in the fifth century, 30,000 in the fourth) to participate in the government of the state and the administration of the law. Disapproved of as a mob rule until the nineteenth century, the institutions of Athenian democracy have become an inspiration for modern democratic politics and political philosophy. P. J. Rhodes's reader focuses on the political institutions, political activity, history, and nature of Athenian democracy and introduces some of the best British, American, German, and French scholarship on its origins, theory, and practice. Part I is devoted to political institutions: citizenship, the assembly, the law-courts, and capital punishment. Part II explores aspects of political activity: the demagogues and their relationship with the assembly, the maneuverings of the politicians, competitive festivals, and the separation of public from private life. Part III looks at three crucial points in the development of the democracy: the reforms of Solon, Cleisthenes, and Ephialtes. Part IV considers what it was in Greek life that led to the development of democracy. Some of the authors adopt broad-brush approaches to major questions; others analyze a particular body of evidence in detail. Use is made of archeology, comparison with other societies, the location of festivals in their civic context, and the need to penetrate behind what the classical Athenians made of their past.

[Cunning, Don Herzog](#) , 2008, 140082706X, 9781400827060. Want to be cunning? You might wish you were more clever, more flexible, able to cut a few corners without getting caught, to dive now and again into iniquity and surface clutching a prize. You might want to roll your eyes at those slaves of duty who play by the rules. Or you might think there's something sleazy about that stance, even if it does seem to pay off. Does that make you a chump? With pointedly mischievous prose, Don Herzog explores what's alluring and what's revolting in cunning. He draws on a colorful range of sources: tales of Odysseus; texts from Machiavelli; pamphlets from early modern England; salesmen's newsletters; Christian apologetics; plays; sermons; philosophical treatises; detective novels; famous, infamous, and obscure historical cases; and more. The book is in three parts, bookended by two murderous churchmen. "Dilemmas" explores some canonical moments of cunning and introduces the distinction between knaves and fools as a "time-honored but radically deficient scheme." "Appearances" assails conventional approaches to unmasking. Surveying ignorance and self-deception, "Despair?" deepens the case that we ought to be cunning--and then sees what we might say in response. Throughout this beguiling book, Herzog refines our sense of what's troubling in this terrain. He shows that rationality, social roles, and morality are tangled together--and trickier than we thought.

[Migrations, William Coughlin](#) , 2011, 0981793053, 9780981793054. A parent succumbing to Alzheimer's, an elderly neighbor's cancer, a victim of urban violence, friends taken by the first wave of the AIDS crisis--these are some of the experiences explored in William Coughlin's migrations. The focus here is on loss as the fundamental condition of life. Whether on foot or in flight, on land or water, as each of us tries to live in the present, we are pulled toward a confrontation with mortality. The poems reach back into the pre-human past and forward into outer space in order to illustrate the conundrum of consciousness. In the end, the poet finds healing and redemption in acceptance of the self as one among many, salvation in letting go. "Few books of poetry combine intelligence, vulnerability, and playfulness as successfully as William Coughlin's migrations does." --Tony Trigilio, author of Historic Diary "These poems are unimposing yet forcefully sharp enough to strip a moment to its core, and once there, they are confidently free of overly staged interpretation. Don't be fooled by the restraint and the quiet. The effect achieved is to read living's continual shock toughly understood." --Ed Roberson, author of To See the Earth Before the End of the World About the Author William

Coughlin received his MFA in Poetry from Columbia College Chicago and his MA in English Literature from DePaul University. At various times in his life he has been a seminarian, a teacher, a Unitarian Universalist, a classical pianist, a runner, a dog lover and a world traveler. He lives with his partner and their cocker spaniel in Chicago and spends as much time as possible on the coast of Maine.

Horse-whispering, crocodile-hunting and single-handedly changing an 80-kilo flat tyre on a road train in 40-degree heat...there is nothing these modern-day outback women can't do. But when it comes to hardship and heartbreak, they've endured far more than their fair share. Living and working in some of the most remote spots in the world, they've had to become experts at turning tragedy into triumph. Our former Miss World finds a new start in the bush; an adventurer crosses one of the world's harshest deserts on camelback; a single mum becomes a truck driver to make ends meet and a former nurse takes over the famous Birdsville Hotel. This book is a tribute to the great Australian Outback from those who live and work at the heart of it. [Comparative Environmental Regionalism, Lorraine M. Elliott, Shaun Breslin](#) , 2011, 0415611431, 9780415611435.

Comparative Environmental Regionalism focuses on environmental governance as a key issue of analysis to provide an important new conceptualisation of 'region' and regional power. Examining both interregionalism and regional integration, the book goes beyond the traditional study of micro-regions within the EU to examine regions and regional institutions across Asia, Africa and the Americas. The focus on forms of governance allows a consideration of the variety of processes and mechanisms developed to deal with collective issues in addition to formal institutional cooperation. Using globally based case studies, Comparative Environmental Regionalism will be of interest to students and scholars of environmental and regional politics, and international relations.

In recent years Purcell's biography has received a good deal of attention, but there has been little writing on his music; indeed, this book provides the first general survey since Sir Jack Westrup's 1937 volume in the Master Musicians series. Furthermore, it is the first book to explore in detail the historical context of Purcell's music, dealing fully with the institutions he worked for, the origin and development of the various genres to which he contributed, and the sources of his music. In the process, a new picture of Purcell's creative personality emerges: a composer obsessed with formal counterpoint, extraordinarily well-versed in English music of the previous century, yet eager to embrace up-to-date features of the Italian style in the 1680s.

[The Warriors Princess, Barbara Erskine](#) , 2008, 0007287208, 9780007287208. The powerful new timeslip novel from the worldwide bestselling author of Lady in Hay, in which the fate of a young woman becomes entwined with the extraordinary history of a Celtic princess. Jess, a young teacher in London, is attacked by someone she fears knows her well. Fleeing to her sisters house in the Welsh borders to recuperate, she is disturbed by the cries of a mysterious child. Two thousand years before, the same valley is the site of a great battle between Caractacus, king of the mighty Catuvellauni tribe, and the invading Romans. The proud king is captured and taken as a prisoner to Rome with his wife and daughter, the princess Eigon. Jess is inexorably drawn to investigate Eigon's story, and as the Welsh cottage is no longer a peaceful sanctuary she determines to visit Rome. There lie the connections that will reveal Eigon's astonishing life - and which threaten to reawaken Jess's own tormentor. Barbara Erskine's ability to weave together the past and the present, shedding light on a real but little-known figure, makes this a tremendous novel of Roman and Celtic history, passion and intrigue.

[A Primer for Benefit-cost Analysis, Richard O. Zerbe, Allen S. Bellas](#) , 2006, 1847201903, 9781847201904. Benefit cost analysis (BCA) is the best technique for analyzing proposed or previously enacted projects to determine whether undertaking them is in the public interest, or for choosing between two or more mutually exclusive projects. An introduction to BCA for students as well as practitioners, this accessible volume describes the underlying economic theory and legal and philosophical foundations of BCA. BCA provides an objective framework around which discussion, correction and amendment can take place. Stated simply, it is the calculation of values for all the inputs and outputs from a project and then the subtraction of the first from the second. The authors goal here is to take the mystery out of the process. They discuss practical issues of market-based valuation and aggregation, non-market valuation, practical applications of general equilibrium models, issues in discounting, and the impacts of risk and uncertainty in BCA. They also provide a list of resources and case studies looking at ethanol and the use of cellular phones by drivers. Straightforward in style and cutting-edge in coverage, this volume will be highly usable both as a text and a reference. Advanced undergraduates and masters students in public policy, public administration, economics and health care administration programs will find this a valuable resource. It will also be of great use to agencies that perform benefit cost analyses.

[Free Will: A Very Short Introduction, Thomas Pink](#) , 2004, 0192853589, 9780192853585. Every day we seem to make and act upon all kinds of free choices - some of them trivial, and some so consequential that they may change the course of our life, or even the course of history. But are these choices really free? Or are we compelled to act the way we do by factors beyond our control? Is the feeling that we could have made different decisions just an illusion? And if our choices are not free, why should we be held morally responsible for our actions? This Very Short Introduction, written by a leading authority on the subject, looks at a range of issues surrounding this fundamental philosophical question, exploring it from the ideas of the Greek and medieval philosophers through to the thoughts of present-day thinkers. It provides a interesting and incisive introduction to this perennially fascinating subject. [Children of the Revolution: The French, 1799-1914, Robert Gildea](#) , 2008, 0674032098, 9780674032095. For those who lived in the wake of the French Revolution, from the storming of the Bastille to Napoleons final defeat, its aftermath left a profound wound that no subsequent king, emperor, or president could heal. Children of the Revolution follows the ensuing generations who repeatedly tried and failed to come up with a stable regime after the trauma of 1789. The process encouraged fresh and often murderous oppositions between those who were for, and those who were against, the Revolutions values. Bearing the scars of their countrys bloody struggle, and its legacy of deeply divided loyalties, the French lived the long nineteenth century in the shadow of the revolutionary age. Despite the ghosts raised in this epic tale, Robert Gildea has written a richly engaging and provocative book. His is a strikingly unfamiliar France, a country with an often overwhelming gap between Paris and the provinces, a country torn apart by fratricidal hatreds and a tortured history of feminism, the site of political catastrophes and artistic triumphs, and a country that managed despite a pervasive awareness of its own fall from grace to fix itself squarely at the heart of modernity. Indeed, Gildea reveals how the collective recognition of the great costs of the Revolution galvanized the French to achieve consensus in a new republic and to integrate the tumultuous past into their sense of national identity. It was in this spirit that Frances young men went to the front in World War I with a powerful sense of national confidence and purpose.

[Salute!: Food, Wine and Travel in Southern Italy, Gail Donovan, Kevin Donovan, Robert Castellani](#) , 2003, 014300140X, 9780143001409. In May 1999, four friends - two restaurateurs, a chef and a photographer - set out on a three-week holiday in southern Italy. Gail and Kevin Donovan, owners of Melbourne's popular Donovans, wanted to find visual and culinary inspiration for their constantly evolving bayside restaurant. Renowned photographer Simon Griffiths had been to Italy before and desperately wanted to go back. Donovans chef Robert Castellani looked forward to extending his

knowledge of Italian food and of his Italian heritage. This beautiful book is their account of the journey. Travelling from Rome south to Sicily, Gail kept a diary of their adventures while Simon took photographs wherever they went, Kevin recorded the wines they sampled and Robert made notes on the meals they ate. The result is a lavishly illustrated, inspirational journal full of travel information, personal stories, ideas for design and decor and, of course, food - simple, delicious recipes which capture the flavours and colours of southern Italy.

[Coastline to Skyline: The Philip H. Greene Gift of California Watercolors, 1930-1960, Barbara J. MacAdam](#) , 2008, 0944722369, 9780944722367. The so-called California-style watercolorists, an informal but closely knit group, were most

active from the late 1920s through the 1950s. They achieved national recognition for their generally large-scale watercolors painted with broad, saturated washes in a manner that was bold and expressive, yet representational. Among the best-known of the group were Millard Sheets, Phil Dike, Rex Brandt, Barse Miller, Emil Kosa Jr, and Dong Kingman. These artists celebrated their environs through images of the states dramatic coastline, agricultural and fishing traditions, public amusements, and bustling cities. In keeping with the populist, nationalistic mood of the era, they captured unpretentious, typically American subjects that transcended their regional content to appeal to audiences coast-to-coast.

[Natural saints: how people of faith are working to save God's earth, Mallory D. McDuff](#) , 2010, . At La Capilla de Santa Mara, parishioners weatherized their church in an effort to decrease the utility bills that took up a fifth of the annual budget. At Jubilee Community Church, parents and the education coordinator revised the Sunday School curriculum to integrate care of creation for all age levels. And at All People's Church in Milwaukee, the sanctuary became a free farmer's market on Sundays with produce grown by youth. Natural Saints shares the stories and strategies of contemporary church leaders, parishioners, and religious environmentalists working to define a new environmental movement, where justice as a priority for the church means a clean and safe environment for all. Mallory McDuff shows that a focus on God's earth is transforming both people and congregations, creating more relevant and powerful ministries . As a result, people of faith are forming a new environmental movement with a moral mandate to care for God's earth. McDuff highlights eight key ministries: protecting human dignity, feeding the hungry, creating sacred spaces, responding to natural disasters, promoting justice, making a pilgrimage, educating youth, and bearing witness. With two daughters in tow, she traveled across the country to document environmental actions grounded in faith. This journey transformed the author's own faith and hope for a sustainable future. Congregations and individuals seeking to integrate care of creation into their faith community will find inspiration and concrete advice in the lives of these natural saints.

Each encounter is given as an example of the knowledge and insights he has learned within the context of Scripture. The book also includes other real-life testimonies that show how Gods supernatural power is released. You will be amazed to read of the miracles taking place today: blind eyes and deaf ears

being opened, tumors vanishing, demons being cast out, and captives being set free from heartache, pain, depression, and fear. These faith-building stories and biblical references will help you live supernaturally victorious in every area of your life, regardless of the circumstances.

[Augustine Through the Ages: An Encyclopedia, Allan Fitzgerald, John C. Cavadini](#) , 1999, 080283843X, 9780802838438. This one-volume reference work provides the first encyclopedic treatment of the life, thought, and influence of Augustine of Hippo (A.D. 354-430), one of the greatest figures in the history of the Christian church. The product of more than 140 leading scholars throughout the world, this comprehensive encyclopedia contains over 400 articles that cover every aspect of Augustines life and writings and trace his profound influence on the church and the development of Western thought through the past two millennia. Major articles examine in detail all of Augustines nearly 120 extant writings, from his brief tractates to his prodigious theological works. For many readers, this volume is the only source for commentary on the numerous works by Augustine not available in English. Other articles discuss: Augustines influence on other theologians, from contemporaries like Jerome and Ambrose to prominent figures throughout church history, such as Gregory the Great, Aquinas, Luther, Calvin, and Harnack; Augustines life, the chaotic political events of his world, and the churchs struggles with such heresies as Arianism, Donatism, Manicheism, and Pelagianism; Augustines thoughts about philosophical problems (time, the ascent of the soul, the nature of truth), theological questions (guilt, original sin, free will, the Trinity), and cultural issues (church-state relations, Roman society).

[A House of Her Own: Kay Sage, Solitary Surrealist, Judith D. Suther](#) , 1997, 0803242344, 9780803242340. A House of Her Own is the first full-length biography of the American Surrealist painter Kay Sage. Born in 1898 to wealthy American parents in upstate New York, Sage spent most of her childhood and young adult years in Italy and France. In 1937 she moved to Paris, where she became a member of the Surrealist group surrounding Andre Breton. She returned to the United States in 1940, settling in Woodbury, Connecticut. Her most productive years as an artist extended from roughly 1938 through the late 1950s, when her health began to deteriorate and she withdrew gradually from social contact. She stopped working on her oil paintings in 1958 but continued to forge her increasingly nihilistic poems until she shot herself in the heart in January 1963. Along with her eloquent chronicle of Sage's life, Judith D. Suther presents subtle, revelatory views of Sage's artistic accomplishments. She takes us into the artist's elegant, dreamlike paintings, connecting them to Sage's complex inner life and to the artistic and intellectual worlds in which she moved. Suther also shows how the raw language and iconoclastic themes of Sage's poetic works were related to Sage's lifelong revolt against social and artistic convention. Judith D. Suther is a professor of French and comparative literature at the University of North Carolina-Charlotte. She is the author of Raissa Maritain, Pilgrim, Poet, Exile.

[Spellbound Falls, Janet Chapman](#) , 2012, 1101560452, 9781101560457. New York Times bestselling author Janet Chapman takes us to charming Spellbound Falls, where strange things have started happening ever since Maximilian Oceanus came to town. Maximilian Oceanus arrives in Spellbound Falls just in time to save Olivia Baldwin from an overly aggressive suitor, only to find himself attracted to the beautiful, if rather aloof, widow. And although Mac has come to Inglenook to get a handle on fatherhood, his newly discovered six-year-old son has set his sights on finding his father a wife. Olivia, however, is busy getting Inglenook ready for its new season, so she doesn't have time to deal with her growing attraction to the dangerously seductive Mac. Besides, weird stuff seems to happen all around him. Take the fact that her seatbelt keeps getting stuck in his presence, or locks magically open for him without keys, and that he seems to have a talent for sensing things. Never mind the three lost albatrosses walking down the road in the middle of the night. Since when are there albatrosses in Maine? But despite Olivia's resistance to falling under the sexy man's spell, Olivia is having trouble fighting her longing. Because she knows Mac is just the man to unlock the powerful passion deep within her.

The novice reader is eased into the subject and confidently guided through the basic principles and on to the more advanced features. This guide empowers the user not only to build a professional website but to also to make it a success." -Russell Walker, CEO, Netshine Software Limited (Joomla! Development Consultancy) "If you've been using or following Joomla! in the past years, you've most likely seen the name Barrie North or Joomla!shack. Barrie has been a member of the community for a long time and, as such, my expectations for this book were pretty high. Besides explaining how Joomla! works from a usability point of view, there is valuable information for people who want to learn serious template building, and readers can stand out of the crowd by using Barrie's steps to make their (X)HTML and CSS optimized for accessibility and SEO. All in all, this book is a great guide that comes at the right time for newcomers and more experienced Joomla! users and developers alike. Well done, Barrie!" -Arno Zijlstra, Joomla! cofounder, custom template specialist, [www.alvaana.com](http://www.alvaana.com) "In a time when solid, real-life Joomla! 1.5 information is rarely available, this book is a thirst-quenching oasis of knowledge. of its focus on examples based on live sites. This book is well crafted for beginners to advanced users with a well-organized overview that walks you through the entire Joomla! CMS." -Steven Pignataro, corePHP, www.corephp.com "As a long-time Joomla! end-user and developer, I had low expectations for anything new I might learn from this book. However, I was pleasantly surprised to find it a great refresher course, especially since the book is logically organized, leading beginners from the most basic Joomla! concepts and continuing through to more complex ones, such as tableless template design and how to write a template for Joomla! 1.5. As a young patrol officer at the Vernor Station, it seemed that every criminal who fled would always escape "north between the houses." It became a running gag that if we wanted to capture the fleeing thugs, all we had to do was go to the northernmost point in the precinct and they would run into our arms. So sit back and enjoy some of my personal encounters and those of my fellow officers.

This book argues that the gospels are in an important sense "occasions for offense." The Jesus of the gospels is a scandal (skandalon, in the original Greek) and he is never more scandalous than when he is speaking in parables. Interpreters of the gospels over the centuries have consistently labored to domesticate the offense or to eliminate it entirely. David McCracken, focusing on parables, Matthew's narrative contexts, and the gospel of John, seeks to recover the gospels' sense of Jesus as

skandalon. To this end, he enlists the help of Kierkegaard, the philosopher of offense, and to a lesser extent that of Bakhtin, both of whom prove to be surprisingly apt conversation partners for the evangelists.
