[Max Weber's Sociology of Intellectuals, Ahmad Sadri](#) , 1992, 0195065565, 9780195065565. The social role of intellectuals was a pervasive motif in Max Weber's thought, particularly in his works on religion and politics. In his study of world religions, Weber asked such questions as: What is the relation of ideas to social reality? Do the carriers of new ideas create them independently or do they reflect class or other stratum bound traditions? Comprehensively examining and extending Weber's work on the subject, Ahmad Sadri provides a new perspective on intellectuals and the intelligentsia and their respective roles in society. He also provides a synthetic typology of intellectuals which spans both Eastern and Western traditions. Sadri provides a provocative and convincing defense of an heuristic approach to theory as well. The work is further augmented with five appendices discussing such issues as: Weber on the "Positivist-Intuitionist" controversy; Winch, Schutz, and Oakes on the verification of ideal types; Weber and Islam; ideologies and counter-ideologies of intellectuals; and methodology and epistemology. Many attempts have been made by scholars to explain the roles and functions of intellectuals and intelligentsia, each remaining embedded in their commitments to various ideologies. In this work, Sadri synthesizes a review of writers from Europe, as well as Russia and the United States. He also presents a paradigm that focuses on the characteristics that distinguish intellectuals from the intelligentsia.

[The Law & Society Reader, Richard L. Abel](#) , 1995, 0814706185, 9780814706183. This book seeks to provide answers to everything you ever wanted to know about the law?except what the rules are or ought to be. For centuries, the law has been considered a neutral, objective arena that sets societal standards and in which conflicting forces resolve disputes. More recently, however, the interaction between law and society has been recognized as a two-way street: society clearly exacts a considerable influence on the practice and evolution of law. Further, the discrepancy between what the law mandates and what the social reality is has served as evidence of the chasm between theory and practice, between the abstraction of law and its actual societal effects. Examining such issues as the limits of legal change and the capacity of law to act as a revolutionary agent, the essays in this book offer a well-rounded introduction to the relationship between law and society. By focusing on flashpoint issues in legal studies?equality, consciousness and ideology, social control--and making ample use of engaging case studies, The Law and Society Review provides an invaluable resource for scholars and students alike.

[The Neural Basis of Reading, , Piers Cornelissen, Peter Hansen, Morten Kringelbach, Ken Pugh](#) , 2010, 019530036X,

9780195300369. Reading is a unique human ability that has become very pivotal for functioning in our world today. As modern societies rely extensively on literacy skills, and as reading disabilities have profound personal, economic and social consequences, it is surprising that we have a very underdeveloped scientific understanding of the neural basis of reading and visual word recognition in the normal brain. A better understanding of normal reading processes could help individuals with developmental dyslexia and other reading disabilities, and also inform our strategies for improving early learning and carrying out effective interventions. Neuroimaging offers a unique window on reading through which we have achieved profound insights into its neural correlates in both health and disease, and has also raised important questions that have generated much scientific debate. This book addresses some of the fundamental questions in reading research. Piers Cornelissen, Peter Hansen, Morten Kringelbach, and Ken Pugh have brought together some of the leading scientists to provide comprehensive articles that shed light on the neural basis of reading. Its broad-yet-integrative treatment is divided into three parts: 1) behavioural data and modelling (with direct implications for neuroimaging), 2) neuroimaging, and 3) impaired reading. The book will be a useful resource for everyone interested in the reading brain, particularly those in neuroimaging, cognition and attention, sensation and perception, language, development and aging, education, and computational modelling.

Erica Francis had never asked for anything complex in her life all she wanted was a happy marriage, a normal husband, healthy children and a house to call her own. But destiny had already mapped out her life and her marriage of ten years was over, her only child had been diagnosed with a disability and the house she had dreamed of all her life was in jeopardy. All she needed in her life was someone she could confide in a best friend, a lover, her soul-mate. She had hoped she would cross paths with this person in this lifetime, but her past had taught her, that she was a man magnet for attracting Mr Wrong and the last place she was expecting to find love was on the internet. Until Troy Baxter appeared online young, hot and half naked, she wasn't intending to add him as a friend as conservative types were her taste. But he pursued her and she rather enjoyed the chase, so she thought it would be fun to flirt with him. She had no idea that he was keen on her, she was on the other side of the world in Australia and he was in a foreign country, far away from her. But there was an immediate spark between them, that she just couldn't shake and she felt a longing for him. The only problem was that he was hiding a deep, dark secret, from his past that threatened to ruin everything. Erica wondered if he was even the same person online as in real life, as she had often been short changed by men, posting fake photos on the internet. When Troy was reluctant to reveal his true identity, Erica began to wonder what else he was hiding and she had begun to get suspicious of his motives. When she finally meets him she cannot believe her fate, as she seeks to unravel the truth. She

always knew her life was full of unexpected surprises, mostly tragic ones, but this one was the icing on the cake!

[For All These Rights: Business, Labor, and the Shaping of America's Public-Private Welfare State, Jennifer Klein](#) , 2006, 0691126054, 9780691126050. The New Deal placed security at the center of American political and economic life by establishing an explicit partnership between the state, economy, and citizens. In America, unlike anywhere else in the world, most people depend overwhelmingly on private health insurance and employee benefits. The astounding rise of this phenomenon from before World War II, however, has been largely overlooked. In this powerful history of the American reliance on employment-based benefits, Jennifer Klein examines the interwoven politics of social provision and labor relations from the 1910s to the 1960s. Through a narrative that connects the commercial life insurance industry, the politics of Social Security, organized labor's quest for economic security, and the evolution of modern health insurance, she shows how the firm-centered welfare system emerged. Moreover, the imperatives of industrial relations, Klein argues, shaped public and private social security. Looking closely at unions and communities, Klein uncovers the wide range of alternative, community-based health plans that had begun to germinate in the 1930s and 1940s but that eventually succumbed to commercial health insurance and pensions. She also illuminates the contests to define "security"--job security, health security, and old age security--following World War II. For All These Rights traces the fate of the New Deal emphasis on social entitlement as the private sector competed with and emulated Roosevelt's Social Security program. Through the story of struggles over health security and old age security, social rights and the welfare state, it traces the fate of New Deal liberalism--as a set of ideas about the state, security, and labor rights--in the 1950s, the 1960s, and beyond.

[Thomas Cranmer's Doctrine of Repentance: Renewing the Power to Love, Ashley Null](#) , 2000, 0199210004, 9780199210008. Self-serving lackey, self-deceiving puppet, Swiss Protestant partisan, or sensible Erasmian humanist:

which, if any, was Thomas Cranmer? For centuries historians have offered often bitterly contradictory answers. Although Cranmer was a key participant in the changes to English life brought about by the Reformation, his reticent nature and lack of extensive personal writings have left a vacuum that in the past has too often been filled by scholarly prejudice or presumption. For the first time, however, this book examines in-depth little used manuscript sources to reconstruct Cranmer's theological development on the crucial Protestant doctrine of justification. The author explores Cranmer's cultural heritage, why he would have been attracted to Luther's thought, and then provides convincing evidence for the Reformed Protestant Augustinianism which Cranmer enshrined in the formularies of the Church of England. For Cranmer the glory of God was his love for the unworthy; the heart of theology was proclaiming this truth through word and sacrament. Hence, the focus of both was on the life of on-going repentance, remembering God's gracious love inspired grateful human love.

[Resistance: Jews and Christians Who Defied the Nazi Terror, Nechama Tec](#) , 2013, 0199912629, 9780199912629.

Nechama Tec's *Defiance*, an account of a Jewish partisan unit that fought the Nazis in the Polish forests during World War II, was turned into a major feature film. Yet despite the attention this film brought to the topic of Jewish resistance, Tec, who speaks widely about the Holocaust and the experience of Jews in wartime Poland, still ran into the same question again and again: Why didn't Jews fight back? To Tec, this question suggested that Jews were somehow complicit in their own extermination. Despite works by Tec and others, the stereotype of Jewish passivity in the Holocaust persists. In *Resistance*, Tec draws on first-hand accounts, interviews, and other sources to reveal the full range of tactics employed to resist the Nazi regime in Poland. She compares Jewish and non-Jewish groups, showing that they faced vastly different conditions. The Jewish resistance had its own particular aims, especially the recovery of dignity and the salvation of lives. Tec explores the conditions necessary for resistance, including favorable topography, a supply of arms, and effective leadership, and dedicates the majority of the book to the stories of those who stood up and fought back in any way that they could. Emphasizing the centrality of cooperation to the Jewish and Polish resistance movements of World War II, Tec argues that resistance is more than not submitting--that it requires taking action, and demands cooperation with others. Whereas resilience is individual in orientation, Tec writes, resistance assumes others. Within this

context, Tec explores life in the ghettos, the organizations that arose within them, and the famous uprising in Warsaw that began on January 18, 1943. She tells of those who escaped to hide and fight as partisans in the forests, and considers the crucial role played by women who acted as couriers, carrying messages and supplies between the ghetto and the outside world. Tec also discusses resistance in concentration camps, vividly recounting the Auschwitz-Birkenau camp uprising on October 7, 1944. The refusal of the rebel leaders to give information under unspeakable torture, Tec displays, was just one more of the many forms resistance took. Resistance is a rich book that forever shatters the myth of Jewish passivity in the face of annihilation.

Cairnes, with her years of international leadership expertise, provides us with an alternative, enticing us to follow the call of our hearts - the call for personal wellbeing and ultimate success. This is a time of great opportunity for those with the courage to change their thinking and operating styles - by learning to develop new ways that are in tune with the new era. Margot carefully guides us on our journey with wisdom, compassion, intelligence, humour and practical commonsense. She discusses the political and personal

traps we need to manage, and provides invaluable hints on how to support ourselves throughout our personal and professional lives. "Corporations today need both the 'minds' and the 'hearts' of their employees to succeed in the current marketplace. This timely well-written book emphasises the importance of this crucial integration in a brilliant manner."

It has been translated into fifteen languages, sold more than 12 million copies, and is the basis for an award-winning German entry at the 2002

Cannes Film Festival. Recounting an incredible real-life adventure, it tracks the destiny of German soldier Clemens Forrell who, in the aftermath of WWII, was sentenced to twenty-five years of forced labor in a lead mine in the barren eastern reaches of Siberia. Subjected to the brutality of the camp and the climate, Forrell dreamed continuously of escape and then daringly effected it. From East Cape across the vast trackless wastes of Siberia, for thousands of miles and three years, with fear as his most intimate companion, Forrell fled treachery and endured some of the most inhospitable conditions on earth. In a long series of taped interviews with esteemed German author Josef M. Bauer, Forrell unfolded his remarkable story of survival. Bauer not only reconstructs Forrell's arduous journey to the Iranian frontier and freedom; he also poignantly evokes the emotional content of Forrell's brave quest emerging as an affecting portrait of a man who strove and triumphed against all odds.

[My Children, Listen, Catherine Helene Toye](#) , 2003, 0966308808, 9780966308808. In tragedy, so began one woman's courageous journey from despair to faith. A scientist by training, Dr. Toye had not relied on faith for answers. She is the last person she would have expected to offer a first person account of mystical experience. And yet, that was her experience. For in the depths of physical pain and emotional anguish her eyes and ears were opened to the presence of God. The extraordinary mystical phenomena she witnessed, the words and messages she heard defied her scientific training and became her beliefs. While incredible phenomena are recounted, the book is as much about finding the sacred in daily living -- being open to God in the moment, wherever life brings us. It is an affirmation of meaning in our present lives and the real fact of an afterlife for every soul. It will bring comfort and inspiration to readers everywhere. The book began as a gravely ill mother's wish to leave a written legacy of this spiritual life for her own children; but the book has had its own life and speaks to all God's children. My Children, Listen is a story about finding our way home. It is a parable of hope and faith. But above all My Children, Listen is a love story.

[Roman Republican Villas: Architecture, Context, and Ideology, , Jeffrey A. Becker, Nicola Terrenato](#) , 2012, 047211770X, 9780472117703. The Roman villa is a classic icon of Western culture, and yet villa can be used to cover a multiplicity of ideas, experiences, and places. In the late Republic and early Imperial periods, villas are inseparable from elite lifestyles, providing a prestigious setting for leisurely and intellectual pursuits. But how did these advanced buildings come about? Roman Republican Villas examines key aspects of early villa culture and architecture, with the goal of understanding the development and deployment of villas in Republican Italy. For instance, where does the "classic" villa architecture originate? How do writers like Cato the Elder or Varro use the villa to their own advantage? How visible are Republican villas in the landscape of central Italy? Traditional theories about villa development have been largely focused on stereotypical ideals of early Roman austerity and industriousness. New work at sites such as the Auditorium, however, proves the existence of luxurious residences already by the 5th-4th c. BCE, even before the Roman conquest of Italy. Such recent developments in archaeological fieldwork have begun to reshape the discourse in such a way that old assumptions are being challenged and, in many cases, found wanting. Within this atmosphere of new discoveries and reconsideration, scholars are uniquely poised to re-examine the villa and the part it played in the culture of Roman Italy, in terms of both the material remains and the literary sources. The villa also plays a prominent role in Republican literature such as the *De agri cultura* of Cato and the texts of Varro, as the early Latin authors seek to fashion identities for themselves and the city of Rome. Drawing on diverse source materials, the collected essays of Roman Republican Villas help to re-center the discussion of Roman villa culture, particularly in light of new evidence offered both by fieldwork and by new approaches to Republican agricultural writers. This volume brings together scholars of Latin literature, Roman history, and classical archaeology to offer a multidisciplinary approach to the questions connected to the emergence and development of villas and their farming culture. With contributions from leading scholars Jeffrey A. Becker, John Bodel, Stephen L. Dyson, Carin M. C. Green, Brendon Reay, Nicola Terrenato, Mario Torelli, and Rita Volpe, the viewpoints offered build upon previous scholarship and ask challenging questions about how the evidence of Roman villas has traditionally been interpreted.

Because clearly there are too many people who haven't gotten the message yet. That message is- If you want a better life, you must create a better YOU! How do you create a better you? You create a better you by becoming a better LEADER. Becoming a better leader has nothing to do with getting a promotion on your job. It has nothing to do with getting a new title. It has nothing to do with your boss, family, co-workers or subordinates. The first person you must learn to lead is yourself and this book is the perfect tool to assist you in that daunting task. Over a seven week period, Lead Wolf vs. Lone Wolf will systematically assist you with your own personal leadership development through daily leadership training, activities and reflections. When you speak do people listen? When you move do people follow? When you call do people answer? Are you a LEAD WOLF or a Lone Wolf?

with great ambitions, against a backdrop of social change and political upheaval, one man stood as a giant among men. Almost more than a man, he was an irresistible force of nature. "Imperator - The Life of Gaius Julius Caesar" by Philip Katz is a fictional recreation of the life of the greatest of all Romans, Gaius Julius Caesar. It is a personal memoir, the inside story of his world as viewed through his eyes, written in the first person, suppressed by Caesar's successors, only to be rediscovered in modern times. Born to one of Rome's most prestigious families, Caesar went on to conquer all of Western Europe in the name of Rome. He then conquered Rome to liberate his countrymen from a corrupt Senate. Caesar's energy, intellect, and desire for achievement brought him the jealousy and animosity of his peers along with enormous political opposition. Ultimately, his fight against the corrupt, political establishment and his quest for a more sustainable society brought him into direct conflict with the ruling class of Rome. Gaius Julius Caesar begins writing his life story on the heels of the Alexandrian war while spending some time on the Nile in the company of Cleopatra, Queen and Pharaoh of Egypt, reflecting on the halcyon days of his childhood that quickly gave way to smoldering hostilities between the great men of the state, followed by the burst into the conflagration of civil war. The lack of information about Caesar's early life makes these formative years of particular importance to the narrative as his character and motivations are placed in the context of recorded history. The reader is invited to step back two thousand years to witness the collapse of the Republic that subjugated the entire Mediterranean world but could not govern itself. With "Imperator - The Life of Gaius Julius Caesar" author Philip Katz creates an atmosphere in which ancient Rome comes back to life, seen through the eyes of the man who was the principle instrument of fortune and change, Gaius Julius Caesar.

[The Jewels of Paradise, , Donna Leon](#) , 2012, 0434022284, 9780434022281. Donna Leon has won heaps of critical praise and legions of fans for her best-selling mystery series featuring Commissario Guido Brunetti. With *The Jewels of Paradise*, Leon takes readers beyond the world of the Venetian Questura in her first standalone novel. Caterina Pellegrini is a native Venetian, and like so many of them, she's had to leave home to pursue her career. With a doctorate in baroque opera from Vienna, she lands in Manchester, England. Manchester, however, is no Venice. When Caterina gets word of a position back home, she jumps at the opportunity. The job is an unusual one. After nearly three centuries, two locked trunks, believed to contain the papers of a baroque composer have been discovered. Deeply-connected in religious and political circles, the composer died childless; now two Venetians, descendants of his cousins, each claim inheritance. Caterina's job is to examine any enclosed papers to discover the "testamentary disposition" of the composer. But when her research takes her in unexpected directions she begins to wonder just what secrets these trunks may hold. From a masterful writer, "The Jewels of Paradise" is a superb novel, a gripping tale of intrigue, music, history and greed.

[Bunker Hill: A City, a Siege, a Revolution, Nathaniel Philbrick](#) , 2013, 1446463052, 9781446463055. What lights the spark that ignites a revolution? What was it that, in 1775, provoked a group of merchants, farmers, artisans and mariners in the American colonies to unite and take up arms against the British government in pursuit of liberty? Nathaniel Philbrick, the acclaimed historian and bestselling author of *In the Heart of the Sea* and *The Last Stand*, shines new and brilliant light on the momentous beginnings of the American Revolution, and those individuals - familiar and unknown, and from both sides - who played such a vital part in the early days of the conflict that would culminate in the defining Battle of Bunker Hill. Written with passion and insight, even-handedness and the eloquence of a born storyteller, *Bunker Hill* brings to life the robust, chaotic and blisteringly real origins of America.

[Canadian Workplace Culture: Mastering the Unspoken Rules, Matt Adolphe](#) , 2013, 0986852848, 9780986852848. Every day newcomers enter the workforce unaware of the unspoken, unwritten rules of workplace conduct. Not knowing those rules can be the beginning of their undoing; breaking them, making the wrong impression on their new peers can stand in the way of promotions and success in the workplace. This book explains the 10, generally unspoken, rules that enable newcomers to the workplace to fit in, become accepted and succeed. Readers discover why, in a non-assertive environment it is so important to put the feelings of others first, avoid conflict, be diplomatic, and build the strong rapport with colleagues that leads to success in the workplace. The book sets out from the premise that cultures are learned and learnable. Some people have simply been learning this particular culture for longer, and their behaviours reflect a knowledge of a simple set of unspoken rules. This easy read, aimed at a very wide readership, presents a series of self-reflection quizzes with suggestions on how to keep to the rules.

It has decimated Asia, causing mass starvation and riots, but Europe is safe and a counter-virus is expected any day. Except, it turns out, the governments have been lying to their people. When the deadly disease hits Britain they are left alone, and society starts to descend into barbarism. As John and his family try to make it across country to the safety of his brother's farm in a hidden valley, their humanity is tested to its very limits.

Jim Ells spent 25 years working on the first edition of Rocky Mountain Flora. One of the many features of this second edition is that he has photographed both the flower and plant to aid in identification. An additional feature of the second edition is that some of the photos from the first edition have been upgraded with the help of volunteer wildflower photographers. Organized by color and then alphabetically by family name and genus, Rocky Mountain Flora has images of each flower, the plant, and detailed descriptions of stems, leaves and flowers, and includes the specific location, elevation, and time of the year the flower was found. A special feature called, "LOOK FOR" helps with quick plant identification.

[The Ten Trusts: What We Must Do to Care for The Animals We Love, Jane Goodall, Marc Bekoff](#) , 2013, 0062316796, 9780062316790. World-renowned behavioral scientists Jane Goodall and Marc Bekoff have set forth ten trusts that we must honor as custodians of the planet. They argue passionately and persuasively that if we put these trusts to work in

our lives, the earth and all its inhabitants will be able to live together harmoniously. The Ten Trusts expands the concept of our obligation to live in close relationship with animals -- for, of course, we humans are part of the animal kingdom -- challenging us to respect the interconnection between all living beings as we learn to care about and appreciate all species. The world is changing. We are gradually becoming more aware of the damage we are inflicting on the natural world. At this critical moment for the earth, Goodall and Bekoff share their hope and vision of a world where human cruelty and hatred are transformed into compassion and love for all living beings. They dream of a day when scientists and non-scientists can work together to transform the earth into a place where human beings live in peace and harmony with animals and the natural world. Simple yet profound, The Ten Trusts will not only change your perspective regarding how we live on this planet, it will establish your responsibilities as a steward of the natural world and show you how to live with respect for all life.

An intimate peek at mountain politics and the 1960 presidential primary campaign. Rich and straightforward stories of political tomfoolery, vote-buying, and eventual victory for Jack Kennedy in West Virginia's primary, often cited as the most important and vital primary win in Senator John Kennedy's run for the Whitehouse. The book features the results of hundreds of hour's worth of interviews and discussions with several Mountain State political kingpins from yesteryear. Although they are in their twilight years, all are still living and have chosen to tell "inside information" about their participation in the presidential campaign. They disclose their vivid memories of working directly with JFK and his family, and with Hubert Humphrey. These influential Democratic factional commandoes - Claude Ellis, Raymond Chafin, Dan Dahill and others like them - tell interesting, and sometimes humorous stories, about growing up in rough and poverty stricken southern West Virginia. Then, they explain how they each grew in political power. It's mountain politics as it once was, and will never be again. West Virginia Tough Boys is chock full of exciting and startling tales of election money exchanging hands, fraud, half-pints of liquor traded for votes, and the buying of various elections.

[A Country Merchant, 1495-1520: Trading and Farming at the End of the Middle Ages, Christopher Dyer](#) , 2012, 0199214247, 9780199214242. Around 1500 England's society and economy had reached a turning point. After a long period of slow change and even stagnation, an age of innovation and initiative was in motion, with enclosure, voyages of discovery, and new technologies. It was an age of fierce controversy, in which the government was fearful of beggars and wary of rebellions. The 'commonwealth' writers such as Thomas More were sharply critical of the greed of profit hungry landlords who dispossessed the poor. This book is about a wool merchant and large scale farmer who epitomises in many ways the spirit of the period. John Heritage kept an account book, from which we can reconstruct a whole society in the vicinity of Moreton in Marsh, Gloucestershire. He took part in the removal of a village which stood in the way of agricultural 'improvement', ran a large scale sheep farm, and as a 'woolman' spent much time travelling around the countryside meeting with gentry, farmers, and peasants in order to buy their wool. He sold the wool he produced himself, and the fleeces he gathered, to London merchants who exported wool through Calais to the textile towns of Flanders. The wool growers named in the book can be studied in their native villages, and their lives can be reconstructed in the round, interacting in their communities, adapting their farming to new circumstances, and arranging the building of their local churches. A Country Merchant has some of the characteristics of a biography, is part family history and part local history, with some landscape history. Dyer explores themes in economic and social history without neglecting the religious and cultural background. His central concern is to demonstrate the importance of the peasants' contribution to a changing economy.

[Reducing Gun Violence in America: Informing Policy with Evidence and Analysis, Daniel W. Webster, Jon S. Vernick](#) , 2013, 1421411113, 9781421411118. Amid a growing consensus that the staggering toll of gun violence in the United States is an urgent public health issue, the Johns Hopkins Universitys Bloomberg School of Public Health has convened experts on gun policy and violence from the United States and selected other countries to summarize relevant research and its implications for policymakers and concerned citizens. Legal scholars weigh in on the constitutionality of recommended policies, and researchers present new data on public support for a wide array of policies designed to reduce gun violence. Collected for the first time in one volume, this reliable, empirical research and legal analysis will inform the policy debate by helping lawmakers and opinion leaders identify the policy changes that are most likely to

reduce gun violence in the United States. Researchers draw on new and existing studies on U.S. gun policies to demonstrate both the weaknesses of current federal gun policies and the efficacy of various state laws designed to reduce firearm availability to high-risk groups. By analyzing scientific and legal data, the contributors provide evidence in support of enhanced regulation and oversight of licensed gun dealers, background checks for private sales, and purchaser licensing. Lessons from bans of assault weapons and of large-capacity magazines for guns are considered, as is the promise of "smart guns," which could be fired only by authorized users. Compelling case studies from Australia, Scotland, and Brazil demonstrate effective policy responses to gun violence that have led to significant reductions in gun-related deaths. The book concludes with data on public support for strengthening gun laws and Second Amendment considerations.

[Invitation to Christian Spirituality: An Ecumenical Anthology, John R. Tyson](#) , 1999, 0195106377, 9780195106374.

Bringing together a wide range of classical and contemporary texts, *Invitation to Christian Spirituality: An Ecumenical Anthology* addresses the theory and practice of Christian spirituality in the broadest sense. Arranged chronologically, the selections are drawn from all major Christian traditions, from Ignatius of Antioch (d. 117) to Desmond Mphilo Tutu, representing distillations from the formative works of seventy-six great spiritual masters. Issues examined include the church in the world (Diognetus, Las Casas), purity of intention (Kierkegaard, Phoebe Palmer), prayer (Origen of Alexandria, Hannah More), religious affectations (Jonathan Edwards, Martin Luther King), Christian freedom (Augustine, Martin Luther), Christian feminism (Dame Julian, Rosemary Ruether), and the means of grace (Maximus the Confessor, John Wesley). This timely, eclectic collection considers not only the mystical and theoretical aspects of Christian spirituality but also its practice; for example, it includes readings about how to pray as well as notable prayers. Most selections include autobiographical materials from the authors that set the context for their writings. Opening with a theological survey of themes in Christian spirituality, this volume also includes a historical and theological orientation to each major period and a theological/biographical introduction to each spiritual master. Indexed by person, key word, and Bible references, *Invitation to Christian Spirituality* serves as an ideal text for courses in Christian spirituality, history of Christianity, and introduction to Christianity.

[Christianity, Empire, and the Making of Religion in Late Antiquity, Jeremy M. Schott](#) , 2008, 0812240928,

9780812240924. In *Christianity, Empire, and the Making of Religion in Late Antiquity*, Jeremy M. Schott examines the ways in which conflicts between Christian and pagan intellectuals over religious, ethnic, and cultural identity contributed to the transformation of Roman imperial rhetoric and ideology in the early fourth century C.E. During this turbulent period, which began with Diocletian's persecution of the Christians and ended with Constantine's assumption of sole rule and the consolidation of a new Christian empire, Christian apologists and anti-Christian polemicists launched a number of literary salvos in a battle for the minds and souls of the empire. Schott focuses on the works of the Platonist philosopher and anti-Christian polemicist Porphyry of Tyre and his Christian respondents: the Latin rhetorician Lactantius, Eusebius, bishop of Caesarea, and the emperor Constantine. Previous scholarship has tended to narrate the Christianization of the empire in terms of a new religion's penetration and conquest of classical culture and society. The present work, in contrast, seeks to suspend the static, essentializing conceptualizations of religious identity that lie behind many studies of social and political change in late antiquity in order to investigate the processes through which Christian and pagan identities were constructed. Drawing on the insights of postcolonial discourse analysis, Schott argues that the production of Christian identity and, in turn, the construction of a Christian imperial discourse were intimately and inseparably linked to the broader politics of Roman imperialism.

[Linguistic Perspectives on English Grammar: A Guide for EFL Teachers, Martin J. Endley](#) , 2010, 1617351695, 9781617351693. The proposed book is best described as a linguistically oriented textbook taking the grammar of English as its subject matter. It is directed to professional teachers of English (ESL and EFL) and their students, as well as those currently training to become teachers of English. The book is also likely to be of interest to interpreters, translators and other English language professionals. It will explore selected aspects and problem areas of English from a broadly "functional" linguistic perspective. My experience as a teacher and teacher trainer has shown me that this perspective has the potential to inspire teachers and students with a genuine enthusiasm for the grammatical features of English and that it often enables them to "make sense" of the grammar in a way that all too often other approaches fail to do. An important focus of the book is on understanding grammar as a series of conventionalized patterns rather than a set of rules (which is how grammar has traditionally been presented). Moreover, unlike many other grammar books, this book emphasizes how the grammatical constructions under consideration are employed in various types of communicative situation, attention being given to the importance of discourse context in interpreting the target forms. In line with contemporary linguists generally, the approach adopted is descriptive rather than prescriptive. While the main focus is on English, I offer occasional comments on how the issue under discussion is expressed in languages other than English. Apart from the inherent interest which I hope such comparisons may have for the reader, I take the view that these can be helpful in casting further light on the grammar of English.

[Subcultures: Cultural Histories and Social Practice, Ken Gelder](#) , 2007, 0203446852, 9780203446850. This book presents

a cultural history of subcultures, covering a remarkable range of subcultural forms and practices. It begins with London's Elizabethan underworld, taking the rogue and vagabond as subcultural prototypes: the basis for Marx's later view of subcultures as the lumpenproletariat, and Henry Mayhew's view of subcultures as those that will not work. Subcultures are always in some way non-conforming or dissenting. They are social - with their own shared conventions, values, rituals, and so on but they can also seem immersed or self-absorbed. This book identifies six key ways in which subcultures have generally been understood: through their often negative relation to work: idle, parasitical, hedonistic, criminal their negative or ambivalent relation to class their association with territory - the street, the hood, the club - rather than property their movement away from home into non-domestic forms of belonging their ties to excess and exaggeration (as opposed to restraint and moderation) their refusal of the banalities of ordinary life and in particular, of massification. Subcultures looks at the way these features find expression across many different subcultural groups: from the Ranters to the riot grrrls, from taxi dancers to drag queens and kings, from bebop to hip hop, from dandies to punk, from hobos to leatherfolk, and from hippies and bohemians to digital pirates and virtual communities. It argues that subcultural identity is primarily a matter of narrative and narration, which means that its focus is literary as well as sociological. It also argues for the idea of a subcultural geography: that subcultures inhabit places in particular ways, their investment in them being as much imaginary as real and, in some cases, strikingly utopian.

This new edition of the critically-acclaimed biography of Alexander Trocchi has been revised, extended and updated since its first publication in 1991 when it helped to create new interest in the celebrated - and notorious - author of *Young Adam* and *Cain's Book*. It was highly influential, led to the reprinting of his novels and inspired a wave of new writers to discover Trocchi for themselves. A story of heartbreak and pain, the minutiae of squalor, tragedy, obsession, of chemical addictions, sexual experimentations, promiscuity and desertion, suicide - and literary genius. So begins this account of one of Britain's most remarkable literary figures. It traces his childhood in war-time Glasgow, his literary apprenticeship in Paris with Beckett, Ionesco and Sartre, his move to New York then Venice Beach among the leaders of the Beat movement. Trocchi charmed and haunted all who met him. ... a strange and saddening book... Trocchi... experimenting with drugs and sex...left behind a trail of wrecked lives ... at least he has been lucky in this excellent biography which conveys something of his charm and charisma." Devastated, Will Rees left his son, David, in his sister's care, fled his Maine farm, and struck out for a tough but emotionally empty life as a traveling weaver. Overwhelmed by guilt and hoping to reconcile with his son, Rees

immediately follows David to the Shaker community. But when a young Shaker woman is brutally murdered shortly after Rees arrival, Rees finds himself launched into a complicated investigation where the bodies keep multiplying, a tangled web of family connections casts suspicion on everyone, and the beautiful woman on the edge of the Shaker community might be hiding troubling ties to the victims. It quickly becomes clear that in solving Sister Chastity's murder, Rees may well expose some of the Shaker community's darkest secrets, not to mention endanger his own life. [Power over Peoples: Technology, Environments, and Western Imperialism, 1400 to the Present, Daniel R. Headrick](#) , 2012, 1400833590, 9781400833597. For six hundred years, the nations of Europe and North America have periodically attempted to coerce, invade, or conquer other societies. They have relied on their superior technology to do so, yet these technologies have not always guaranteed success. *Power over Peoples* examines Western imperialism's complex relationship with technology, from the first Portuguese ships that ventured down the coast of Africa in the 1430s to America's conflicts in the Middle East today. Why did the sailing vessels that gave the Portuguese a century-long advantage in the Indian Ocean fail to overcome Muslim galleys in the Red Sea? Why were the same weapons and methods that the Spanish used to conquer Mexico and Peru ineffective in Chile and Africa? Why didn't America's overwhelming air power assure success in Iraq and Afghanistan? In *Power over Peoples*, Daniel Headrick traces the evolution of Western technologies--from muskets and galleons to jet planes and smart bombs--and sheds light on the environmental and social factors that have brought victory in some cases and unforeseen defeat in others. He shows how superior technology translates into greater power over nature and sometimes even other peoples, yet how technological superiority is no guarantee of success in imperialist ventures--because the technology only delivers results in a specific

environment, or because the society being attacked responds in unexpected ways. Breathtaking in scope, *Power over Peoples* is a revealing history of technological innovation, its promise and limitations, and its central role in the rise and fall of empire. [The Cities, the Towns, the Crowds: The Paintings of Robert Spencer, Brian H. Peterson](#) , 2004, 081223829X,

9780812238297. In 1906 a young painter named Robert Spencer moved from the hustle and bustle of New York City to the bucolic Bucks County region in nearby southeastern Pennsylvania. Over the next twenty-five years, Spencer became one of the most prominent artists in the Pennsylvania impressionist art colony, a group of nationally known landscape painters centered in the picturesque village of New Hope. His first major success came when the Metropolitan Museum of Art purchased *Repairing the Bridge* in 1914. He won a gold medal in 1915 at the prestigious Panama-Pacific International Exposition in San Francisco. After Spencer's death, the celebrated collector Duncan Phillips praised him as "a rebel always against the standardized and stereotyped in art." Phillips believed that there was "no other painter, not John Sloan, or Edward Hopper, more pungently American in expression." In matters of style, Spencer differed radically from his Pennsylvania impressionist colleagues. He made his reputation with skillful, evocative renderings of the everyday life of his community, often depicting the mills, tenements, and factories of New Hope and the surrounding areas. "A landscape without a building or a figure," he said, "is a very lonely picture to me." Later Spencer began to experiment with a looser, more spontaneous style, and he painted more fanciful European scenes, many of which were done from his imagination. Spencer's canvas *Mountebanks and Thieves* won a prize at the 1926 Carnegie International Exhibition in Pittsburgh, and juror Pierre Bonnard said, "Mr. Spencer . . . is in the full vigor of his talent, which is great. His art does not resemble European art, a rare fact in America." Spencer battled depression throughout his adult life and committed suicide in 1931. This book tells the story of Spencer's colorful yet tragic life, using as sources the written recollections of his two daughters as well as extensive new research. Illustrated with nearly seventy-five color images from major museums and private collections, the book examines the artist's work in depth, from his unformed beginnings to his mature New York City and European images. Extensive excerpts from his correspondence with Duncan Phillips and from press articles and reviews are also included, making *The Cities, the Towns, the Crowds* the definitive study of this important American painter.

Larry, a down-and-out writer, is paid to push a wheelchair-bound Argentine political exile, Ramirez, around Greenwich Village. Through their journeys and their conversations about sex and politics, we witness the collision of two "solitary fantasy systems, " revealing the men to be enmeshed in the lies that make up their bitter, shadowy symbiosis.

Jesus amended the Shema, giving his followers a new creed for life: to love God with heart, soul, mind, and strength, but also to love others as themselves. [The Development of Double Qualification Courses in Secondary Schools in North Rhine Westphalia](#), , 1994, 0113500432,

9780113500437. In October 1993, three of Her Majesty's Inspectors from OFSTED went to Germany to look at developments in full-time general vocational courses in upper secondary schools, primarily for students aged 15 to 18 years. The purpose of the visit was to see in context a range of newly established full-time double qualification courses which combine vocational and academic studies at upper secondary level. The HMI team had in mind issues of relevance to the three qualification routes being developed in the UK for post 16 students, which are designed to meet the National Education and Training Targets. These routes consist of courses leading to: GCE A Level and AS; GNVQs; and NVQs. This report presents the findings.

[Vietnamese and Chinese ceramics used in the Japanese tea ceremony, Hiromu Honda, Noriki Shimazu](#) , 1993, . Various objects are needed to conduct a tea ceremony with decorum. Most important among them are ceramics: bowls for sipping the tea from, vessels for holding and pouring water, side dishes for passing carefully prepared and visually appealing sweets and cakes, caddies for holding powdered tea, covered boxes for incense, vases for flower arrangements, and candle-holders and other paraphernalia for decoration and atmosphere. The collection illustrated and described in this book was assembled over a decade by Honda and Shimazu. It is impeccable in taste and will appeal not only to the Asian collector of ceramics because of its strong aesthetic value but also to the Western collector curious about Japanese preferences: a calm and functional beauty, technical perfection, and historical identification. The book, originally published in Japanese, is arranged in three parts. The first part is comprised of ceramics made in Vietnam from pre-Christian days until the sixteenth century; the second and third part covers Chinese porcelain and stoneware of the sixteenth and seventeenth centuries.

[The Oath: The Obama White House and The Supreme Court, Jeffrey Toobin](#) , 2012, 0385536305, 9780385536301. From the prizewinning author of *The Nine*, a gripping insider's account of the momentous ideological war between the John Roberts Supreme Court and the Obama administration. From the moment John Roberts, the chief justice of the United States, blundered through the Oath of Office at Barack Obama's inauguration, the relationship between the Supreme Court and the White House has been confrontational. Both men are young, brilliant, charismatic, charming, determined to change the course of the nation and completely at odds on almost every major constitutional issue. One is radical; one essentially conservative. The surprise is that Obama is the conservative a believer in incremental change, compromise, and pragmatism over ideology. Roberts and his allies on the Court seek to overturn decades of precedent: in short, to undo the ultimate victory FDR achieved in the New Deal. This ideological war will crescendo during the 2011-2012 term, in which several landmark cases are on the Court's docket most crucially, a challenge to Obama's controversial health-care legislation. With four new justices joining the Court in just five years, including Obama's appointees Sonia Sotomayor and Elena Kagan, this is a dramatically and historically different Supreme Court, playing for the highest of stakes. No one is better positioned to chronicle this dramatic tale than Jeffrey Toobin, whose prize-winning bestseller *The Nine* laid bare the inner workings and conflicts of the Court in meticulous and entertaining detail. As the nation prepares to vote for

President in 2012, the future of the Supreme Court will also be on the ballot.

[American International Law Cases Fourth Series: 2009, Volume 9, Oceana Editorial Board](#) , 2011, 019975893X, 9780199758937. AILC is an annual case law reporter that provides the full text of U.S. court opinions involving international law issues. The courts covered include all U.S. federal district courts, federal appellate courts, and the U.S. Supreme Court, as well as some state courts, the U.S. Court of Claims, the U.S. Court of International Trade, and the U.S. Tax Court. The series seeks to provide not every single case in which a court refers to international law but rather all cases that analyze at least one international law issue in depth. The list of subjects addressed by these volumes is vast and changes from year to year, with the inclusion and prominence of most topics turning on their prevalence in a given year's jurisprudence. Some consistently prominent topics are personal jurisdiction over foreign defendants, deportation procedure, and double taxation. Over the last three editions (2006, 2007, and 2008), many topics have developed rapidly and constitute a correspondingly larger portion of the volumes, particularly Terrorism, the Foreign Sovereign Immunities Act, Forum Non Conveniens, and an entirely new, added topic: the National Security Exception (to deportation eligibility). The 2008 edition of AILC also features expanded sections on family law and on the detention of terrorist suspects. The U.S. war on terror and the crisis at Guantanamo have made that last topic a significant and dynamic component of AILC. Each edition of AILC also comes framed with two practical resources for students and scholars. The first is an introductory editor's note that both reviews international law's major developments for the given

year and explains to readers how to use the volumes. The second is a subject index to allow for targeted research.

Volume Nine of AILC concerns topics in international trade, such as agency, employment, and labor, and transportation carriers. The volume also includes issues in customs law, environmental law, human rights, and criminal law. In *World Fuel Corporation v. Geithner*, the issue was whether the Office of Foreign Assets Control, United States Department of the Treasury properly denied World Fuel Corporation a license to access the blocked assets of one of WFC's debtors. The district court remanded the matter to the OFAC for de novo consideration. The circuit court dismissed for lack of jurisdiction. In *United States v. Rodriguez*, the principal issue was whether the Hostage Act has been validly applied to defendants who perpetrated an extortion scheme that used brief confinement of a taxi passenger to obtain a somewhat above average taxi fare. The court concluded that the Hostage Act does not apply to the facts of the case.

[Intensely Human: The Health of the Black Soldier in the American Civil War, Margaret Humphreys](#) , 2010, 1421402386, 9781421402383. Black soldiers in the American Civil War were far more likely to die of disease than were white soldiers. In Intensely Human, historian Margaret Humphreys explores why this uneven mortality occurred and how it was interpreted at the time. In doing so, she uncovers the perspectives of mid-nineteenth-century physicians and others who were eager to implicate the so-called innate inferiority of the black body. In the archival collections of the U.S. Sanitary Commission, Humphreys found evidence that the high death rate among black soldiers resulted from malnourishment, inadequate shelter and clothing, inferior medical attention, and assignments to hazardous environments. While some observant physicians of the day attributed the black soldiers' high mortality rate to these circumstances, few medical

professionals on either side of the conflict were prepared to challenge the "biological evidence" of white superiority. Humphreys shows how, despite sympathetic and responsible physicians' efforts to expose the truth, the stereotype of black biological inferiority prevailed during the war and after. -- Cheryl Wells

[Laboratory and Diagnostic Tests with Nursing Implications, Joyce LeFever Kee](#), 2002, 0130305197, 9780130305190.

Each day hundreds of thousands of laboratory and diagnostic tests are performed and thus nursing responsibilities are forever increasing. Nurses should understand laboratory and diagnostic tests and should provide nursing implications through nursing assessment, judgment, implementation, teaching, and interaction. *Laboratory and Diagnostic Tests with Nursing Implications, Sixth Edition* is designed to provide nurses and other health professionals with the necessary information regarding laboratory and diagnostic tests and corresponding nursing implications. It gives quick, pertinent information about the tests, emphasizing the purposes, procedure, and nursing implications with rationale. Reference values are given for adults and children. The tests (laboratory and diagnostic) are arranged in alphabetic order which provides the user with a quick access to the tests. This text is appropriate for students in various types of nursing programs, including students in masters, baccalaureate, associate degree, diploma, and practical nursing programs. This book should be most valuable to the registered nurse and licensed practical nurse in hospital settings, including specialty areas such as the ICU and emergency room, clinics, health care provider offices, and in independent nursing practice. The sixth edition lists more than 400 laboratory and diagnostic tests with approximately 28 new tests added to this edition. Major additions and revisions made include: Selected new laboratory tests: High sensitivity C-reactive protein (hs CRP) helpful in detecting risk for coronary artery disease (CAD); amyloid beta protein precursor that aids in the diagnosis of Alzheimer's disease; viral cultures using various specimens; hematologic tests such as fetal hemoglobin (Hb F), methemoglobin, D-Dimer test to aid in the detection of disseminated intravascular coagulation (DIC), Heinz Bodies for detecting hemoglobinopathies, platelet antibody test to detect thrombocytopenia that may be drug-induced; and antibody tests such as parvovirus B 19 antibody, antismooth muscle antibody, antiscleroderma antibody, and antiparietal cell antibody tests. Selected new diagnostic tests: Bone densitometry, corneal staining, cystometry, fetal nonstress test, fetoscopy, electronystagmography, laparoscopy, sleep studies, and thoracoscopy. Latest tests (antigen and antibodies) for human immunosuppressive virus-type (HIV-1 and HIV-2) and hemoglobin A1c updated. Latest updated data for diagnostic tests: magnetic resonance imaging (MRI) Additional Therapeutic Drug Monitoring (TDM) information. Updated Laboratory Test Groups (Appendix B). Updated Laboratory Test Values for Adults and Children that are listed according to the laboratory departments (Appendix C). Organization Each test is discussed in seven subsections in the following sequence: (1) reference values/normal findings, (2) description, (3) purpose, (4) clinical problems, (5) procedure, (6) factors affecting laboratory or diagnostic results, and (7) nursing implications with

rationale. Following the name and initials for each test, there may be names of other closely associated tests. Reference values/normal findings are given for children and adults, including the elderly. The description focuses on background data and pertinent information related to the test. The general purpose for each test is listed. Clinical problems include disease entities, drugs, and foods that cause or are associated with abnormal test results. The procedure is explained with a rationale for the test and with appropriate steps that the nurse and other health professionals can follow. Factors affecting laboratory or diagnostic results alert the nurse to factors that could cause an abnormal test result. The last subsection and most valuable information for each test concerns the nursing implications with rationale. For most diagnostic tests, nursing implications are given as "pretest" and "posttest." There are four parts in the text. Part 1, Laboratory Tests; Part 2, Diagnostic Tests; Part 3, Laboratory/Diagnostic Assessments of Body Function; and Part 4, Therapeutic Drug Monitoring (TDM). There is a list of laboratory tests with page numbers at the beginning of Part I and a list of diagnostic tests with page numbers at the beginning of Part II. In addition, general information appears in the Introduction to the book including the importance of specimen collection with detailed information about all types of specimen collection. The Instructions for Laboratory and Diagnostic Tests section explains the information that will be found under the eight major subheadings for each test and gives basic information that relates to most of the laboratory and diagnostic tests. Part 3, Laboratory/Diagnostic Assessments of Body Function, should be most valuable to both the practicing nurse and the student. The section consists of 12 categories related to organ system and clinical conditions. These are: Cardiac Function; Respiratory Function; Renal Function; Liver, Gallbladder, Pancreatic Functions; Gastrointestinal Function; Neurologic and Musculoskeletal Functions; Endocrine Function; Reproductive Function; Arthritic and Collagen Conditions; Shock; Neoplastic Conditions; and Hematologic Conditions. Each category contains numerous laboratory and diagnostic tests ordered to assist in the diagnosis of disease entities and to determine organ function. These tests are briefly discussed with reference values as they relate to the organ or condition of that category. A few of the same tests (e.g., enzyme tests) can be found in more than one category (cardiac, muscle, liver). The nurse could determine if the test is more specific for one category or the other. The nursing process with nursing diagnosis, nursing implications, and nursing evaluation are found at the end of each category. Part 4, Therapeutic Drug Monitoring (TDM), lists drugs that are monitored frequently by serum and urine for the purposes of achieving and maintaining therapeutic drug effects and for preventing drug toxicity. The TDM section includes 120 drugs and their therapeutic range, peak time, and toxic level. There are three appendices: Abbreviations, Laboratory Test Groups (laboratory profiles ordered for diagnosing clinical problems), and Laboratory Test Values for Adults and Children. The detailed index should be most helpful for locating the page of a test when the test name is different from the alphabetic listing used.

Born during the tumultuous one-hundred-year division of Poland by Austria, Prussia, and Russia, Gabriela Zapolska (1857-1921) was an actor, journalist, and playwright who wrote over thirty plays in her lifetime. In her best-known work, *The Morality of Mrs. Dulaska*, a tyrannical landlady harasses, exploits, and even prostitutes the eccentric cast of tenants who occupy her stone tenement building. The petty-bourgeois tragicomedy that ensues is regarded as a landmark of early modernist Polish drama. A cross between Bertolt Brecht's *Mother Courage* and Patricia Routledge's *Hyacinth Bucket*, Mrs. Dulaska keeps her purse strings tightly drawn and shows no compassion towards the sad plights of her lodgers until she is forced to come to terms with her own possessive love for her son. Now available for the first time in an English-language edition that firmly situates the play in the context of its performance history, Zapolska's incisive play is an uncompromising look at gender, class, and relationships in fin-de-siècle Poland. In her introduction to Zapolska's seminal play, Murjas discusses the many intriguing challenges involved in its cultural transference, combining the perspective of translator with that of theatre practitioner. This book is a rare treat in a much neglected area of modern scholarship. Elwira Grossman, University of Glasgow

This book resituates some familiar nineteenth-century texts within the context of public debates about the place of American Indians in the civil and cultural institutions of the new American nation. Rereading texts by Melville, Hawthorne, Child, Sedgwick, Thoreau, Fuller, and Parkman, Maddox demonstrates the pervasiveness of the anxieties produced by discussion of "the Indian question" and shows how extensively they influenced the production and reception of writing in the first half of the century.

[Communication Power, Manuel Castells](#) , 2013, 0199681937, 9780199681938. We live in the midst of a revolution in communication technologies that affects the way in which people feel, think, and behave. The media have become the space where power strategies are played out. In the current technological context mass communication goes beyond traditional media and includes the Internet and mobile communication. In this wide-ranging and powerful book, Manuel Castells analyses the transformation of the global media industry by this revolution in communication technologies. He argues that a new communication system, mass self-communication, has emerged, and power relationships have been profoundly modified by the emergence of this new communication environment. Created in the commons of the Internet this communication can be locally based, but globally connected. It is built through messaging, social networks sites, and blogging, and is now being used by the millions around the world who have access to the Internet. Drawing on a wide range of social and psychological theories, Castells presents original research on political processes and social movements. He applies this analysis to numerous recent eventsthe misinformation of the American public on the Iraq War, the global environmental movement to prevent climate change, the control of information in China and Russia,

Barak Obama's internet-based presidential campaigns, and (in this new edition) responses to recent political and economic crises such as the Arab Spring and the Occupy movement. On the basis of these case studies he proposes a new theory of power in the information age based on the management of communication networks. Justly celebrated for his analysis of the network society, Castells here builds on that work, offering a well grounded and immensely challenging picture of communication and power in the 21st century. This is a book for anyone who wants to understand the dynamics and character of the modern world.

[John Nash: a complete catalogue, Michael Mansbridge, John Nash](#) , 2004, 0714843806, 9780714843803. John Nash (1752-1835) was the most successful and fashionable architect of his time. Architect, town-planner, landscape designer, bridge-builder, engineer and entrepreneur, Nash outlived his principal patron, George IV, by five years. After a disheartening start, when his first speculative buildings in Bloomsbury failed and left him bankrupt, Nash moved to Wales to rebuild his career, eventually returning to London in 1796. He had made a remarkable recovery and went on to become the most successful and fashionable architect of the period. His buildings reflect a variety of styles, including neo-classical, Tudor and Gothic, with a strong emphasis on the Picturesque. His Metropolitan Improvements - Regent's Park, Regent Street, Trafalgar Square - were the most comprehensive developments ever carried out in London, even until recent times.

[War by Contract: Human Rights, Humanitarian Law, and Private Contractors, Francesco Francioni, Natalino Ronzitti](#) , 2011, 019960455X, 9780199604555. The growth in scope and importance of the private military and security industry in the past decade has challenged the role of the state as the main provider of defence and security functions. At the same time it has put under stress the state's authority to properly oversee the conduct of private contractors and has raised the question of whether existing rules of domestic law and international law are adequate to ensure their accountability in the event of abuse. This book addresses this question through the lens of international human rights law and international humanitarian law. It presents a systematic analysis of the way in which these two bodies of international law, applicable in times of peace and in the event of armed conflict, may be interpreted and implemented in a way so as to fill possible accountability gaps. Human rights and humanitarian law obligations are analysed from the point of view of their applicability to the states involved, to international organisations, and to the companies and their individual employees. Victims' access to civil remedies and the criminal prosecution of private contractors, as well as new policy issues, such as the use of private contractors in the fight against piracy, are also covered in the book.

[Adventures in ocean exploration: from the discovery of the Titanic to the search for Noah's flood, Robert D. Ballard, Malcolm McConnell](#) , 2001, . For decades, Robert Ballard has pursued a dual career as a marine scientist and a pioneering discoverer, locating scores of wrecks all over the world, including the "Titanic and the battleship "Bismarck. In this lavishly illustrated chronicle, he uses his most exciting dives as starting points for an odyssey through time, tracing the evolution of ships and navigation from the first reed boats to the nuclear submarines of today. Ballard tells of plunging 12,000 feet to the floor of the Atlantic and finding new life in the superheated water around active volcanoes on the Pacific Seabed. Readers join a team of technicians on the bridge of a research ship as they " fly" a state-of-the-art, unmanned submersible over the "Titanic' s ghostly hull. But this book does much more than chronicle Ballard' s unique experiences?it provides an illuminating history of humankind' s relationship with the ocean. Along with the giants of modern undersea exploration--Cousteau, Beebe, Piccard--he introduces the storied seamen of the past, from the ancient Phoenicians to such greats as Magellan, Columbus, and Cook. Capturing the irresistible lure of the sea in lively text and 200 vivid illustrations, this is a fascinating book that combines stirring history with the excitement of discovery that Robert Ballard knows so well.

[De Valera in America: The Rebel President and the Making of Irish Independence, Dave Hannigan](#) , 2010, 0230619193, 9780230619197. Eamon de Valera is one of the most famous characters in Irish history. He commanded troops during the famous 1916 Easter Rising, co-authored the present-day Irish constitution, and in 1926, he founded Fianna Fil, which continues to be the largest political party in Ireland today. In June 1919, he arrived at the Waldorf-Astoria Hotel pronouncing himself the "President of Ireland." He was on a mission to convince the United States to recognize Ireland as an independent nation, and also to fund the independence movement, which would be a clear affront to Britain. De Valera went on to give speeches in some of America's largest venues, including Madison Square Garden and Fenway Park, where he drew crowds of 60,000 people. Over the course of that year, he accumulated fame and scandal, but more importantly, he gained essential financial support for the fledgling Irish Republic. Here, for the first time, award-winning journalist Dave Hannigan follows de Valera on his controversial trip across America, exploring his questionable personal and political relationships, and the costs and benefits of his perilous crusade. From newspaper headlines to cloak and dagger antics, Hannigan delivers a truly unique slice of Irish Americana, bringing to life this pivotal moment in history.

[Human Biological Variation, James H. Mielke, Lyle W. Konigsberg, John Relethford](#) , 2006, 0195188713, 9780195188714.

This text explores human biological variation in its broadest sense--from the molecular to the physiological and morphological--focusing on the micro-evolutionary analysis of genetic variation among recent human populations. Authoritative yet accessible, Human Biological Variation opens with an introduction to basic genetics and the evolutionary forces that set the stage for understanding human diversity. It goes on to offer a detailed and clear discussion of molecular genetics and its uses and relationship to anthropological and evolutionary models. The text features up-to-date discussions of "classic" genetic markers (blood groups, enzymes, and proteins), along with extensive background on DNA analysis and detailed coverage of satellite DNA, single nucleotide polymorphisms (SNPs), Alu inserts, and the coalescent model. The book addresses such current issues as the meaning and significance of "race," quantitative genetics and the "nature versus nurture" debates, biocultural interactions, population structure, and cultural and historical influences on patterns of human variation. Human Biological Variation lucidly explains the use of probability and statistics in studies of human variation and adaptation, keeping the mathematics at the level of basic algebra. It also presents computer simulations in a manner that makes complex issues easily understandable. Integrating examples on topics that are of particular interest to students--including dyslexia, IQ, and homosexuality--Human Biological Variation provides the most thorough thorough view of our biological diversity and is ideal for upper-level undergraduate and graduate classes on human adaptation and variation.

[And the band played on: politics, people, and the AIDS epidemic, Randy Shilts](#) , 1987, 014011369X, 9780140113693. By

the time Rock Hudson's death in 1985 alerted all America to the danger of the AIDS epidemic, the disease had spread across the nation, killing thousands of people and emerging as the greatest health crisis of the 20th century. America faced a troubling question: What happened? How was this epidemic allowed to spread so far before it was taken seriously? In answering these questions, Shilts weaves the disparate threads into a coherent story, pinning down every evasion and contradiction at the highest levels of the medical, political, and media establishments. Shilts shows that the epidemic spread wildly because the federal government put budget ahead of the nation's welfare; health authorities placed political expediency before the public health; and scientists were often more concerned with international prestige than saving lives. Against this backdrop, Shilts tells the heroic stories of individuals in science and politics, public health and the gay community, who struggled to alert the nation to the enormity of the danger it faced. *And the Band Played On* is both a tribute to these heroic people and a stinging indictment of the institutions that failed the nation so badly.

Every expectant parent will tell you that they don't want a perfect baby, just a healthy one. Charlotte and Sean O'Keefe would have asked for a healthy baby, too, if they'd been given the choice. Instead, their lives are made up of sleepless nights, mounting bills, the pitying stares of "luckier" parents, and maybe worst of all, the what-ifs. What if their child had been born healthy? But it's all worth it because Willow is, well, funny as it seems, perfect. She's smart as a whip, on her way to being as pretty as her mother, kind, brave, and for a five-year-old an unexpectedly deep source of wisdom. Willow is Willow, in sickness and in health. Everything changes, though, after a series of events forces Charlotte and her husband to confront the most serious what-ifs of all. What if Charlotte should have known earlier of Willow's illness? What if things could have been different? What if their beloved Willow had never been born? To do Willow justice, Charlotte must ask herself these questions and one more. What constitutes a valuable life? Emotionally riveting and profoundly moving, *Handle with Care* brings us into the heart of a family bound by an incredible burden, a desperate will to keep their ties from breaking, and, ultimately, a powerful capacity for love. [Development ethics: a guide to theory and practice, Denis Goulet](#) , 1995, 0945257643, 9780945257646. A pioneering work by one of the pioneers in development ethics, who has long been at the leading edge of development in linking the worlds of thought and action. This new field of study has emerged from a heightened awareness of social issues and values in development and a recognition of the need for application of something more than "normal ethics" in this important realm of human endeavor. After setting forth the contours of this new discipline, the author formulates general principles underlying ethical strategies in development and discusses their application in such topics as technology for development, ecology and ethics, culture and tradition, and the ethics of aid. Written for scholars, students, and practitioners of development: national and international policy-makers, program planners, project managers, field workers, and those local "communities of need", the presumed beneficiaries of development.
