[Media Ethics: Issues and Cases, Philip Patterson, Lee Wilkins](#) , 2013, 007352624X, 9780073526249. Media Ethics is a diverse, classroom tested compilation of 60 diverse cases that will help students prepare for the ethical situations they will confront in their media careers. Ninety percent of the cases are based on actual events, and authors from many institutions and media outlets contributed both real-life and hypothetical cases. There is a strong focus on ethical theory and practice throughout the book, which works well as both a main text in a media ethics course, and in an "across the curriculum" approach in other media courses.

[Celebrate the Power in Your Right to Choose, Katrina Ferguson](#) , 2008, 0977903486, 9780977903481. Your power is in your ability to make daily choices that will propel you towards your destiny; so celebrate the fact that you have the right to make a choice and thereby take control of your own life. This book includes 30 days of choices designed to be read, meditated upon and written about in the enclosed journal that is located in the back of the book. The journal will ask you thought provoking questions which will allow you to meditate on what you have learned and to record the steps you make toward living your destiny.

[Reference Works in British and American Literature, James K. Bracken](#) , 1998, 1563085186, 9781563085185. Designed to serve the basic needs of literary researchers of all degrees of sophistication, this book updates and expands on the author's previous work by the same title. Focusing on the most important and useful resources for modern researchers and students of English literature, Bracken identifies and describes a substantial portion of the currently available reference sources in British and American literature-dictionaries, encyclopedias, handbooks, periodicals, and so forth-with more than 1,500 resources on individual writers. Descriptive annotations offer thorough and detailed assessments of the works, noting specific features and often comparing them to similar titles. Numerous cross-references are given. A valuable research tool for students and scholars, this text will also be useful to bibliographic instructors and collection development specialists.

Compared to 'How To' books that present the reader with a confusing array of difficult formulae and procedures, this book is a bright day compared to that dark night! Writing a novel is freeform art based on a few simple principles. The most important thing the aspiring writer can do to fulfil their dream is to start! This book is quick and fun to read and will explain the art of writing a novel. It will give the reader many examples of what to do and what not to do as they write the 'Rough-Through' of a planned novel with the Author (The Unknown Horizon, A Novel of the Chesapeake Indians in 1607). 'The WOW Factor' explains how to write a novel and takes its own advice, it writes a novel as it explains!

[The Enlightened Savage: Using Primal Instincts for Personal and Business Success, Anthony Hernandez](#) , 2012, 0985579331, 9780985579333. What if your failures aren't really failures? What if your entire life as you know it is being guided by mental programming built into our brains over millions of years of evolution? In this groundbreaking book, Anthony Hernandez reveals how our primordial survival instincts are still driving our emotions, thoughts, and actions. Most of life's frustrations, tribulations, trials, and setbacks are a byproduct of successfully following our subconscious internal beliefs to the letter. This means that there is no such thing as failure. If you don't have all of the success and abundance you want in life, chances are this isn't because something is wrong with you. On the contrary, everything you see as "failure" could be happening because your brain is functioning exactly as designed. The key to unlocking your life's

potential is as simple as learning how your inner programming works and how to make it work for you. Do that and you will know what it means to be an Enlightened Savage. This book combines the story of human evolution with several spiritual principles in accordance with the author's belief that the theory of evolution does not conflict in any way with the certainty of creation.

[The Priest Who Left His Religion: In Pursuit of Cosmic Spirituality, John Shields](#) , 2011, 0978299914, 9780978299910.

Discover the shocking dishonesty of the Catholic Church as Scientific evidence is silenced to protect the "faithful" Follow the story of an ordained Catholic Priest, destined by family prophecy to be the first American Pope. The author reveals his disillusionment over the Pope's betrayal of scientific insight into the Bible. Shattered by his discovery of the dishonesty of his church, John Shields takes us through the torment of leaving the priesthood and the church. With courage and self-compassion, John relates his arduous struggle to make the shift from religion to spirituality. As he examines his own life, John tells how the findings of science convinced him that spirituality is rooted in the universe. He shows us a sentient cosmos where everything is interlinked, conscious and purposeful. Inspired by the science that confirms the foundation of his present spirituality, Shields leads the reader to welcome the union between science and spirit.

In this book one of Europe's foremost sociologists offers a profound and accessible overview of the trajectory of European societies, East and West, since the end of World War II. Combining theoretical depth with factual analysis, Gran Therborn addresses the questions that underpin an understanding of the nature of European modernity, including: To what extent is the period 1945-2000 producing fundamental change and what are the areas of continuity? Have the societies of Europe become more similar to others on the globe or more distinctively European? What are the prospects of Europe after decades of postwar change and the end of the Cold War? Issues covered include the division of paid and unpaid labour,

[Joseph Andrews and Shamela, Henry Fielding, Tom Keymer](#) , 1998, 0192834282, 9780192834287. Henry Fielding wrote both Joseph Andrews (1742) and Shamela (1741) in response to Samuel Richardson's book Pamela (1740), of which Shamela is a splendidly bawdy travesty. Joseph Andrews begins as a parody, too, but soon outgrows its origins, and its deepest roots lie in Cervantes and Marivaux. In both stories, Fielding demonstrates his concern for the corruption of

contemporary society, politics, religion, morality, and taste. This revised and expanded edition follows the text of Joseph Andrews established by Martin C. Battestin for the definitive Wesleyan Edition of Fielding's works. The text of Shamela is based on the first edition, and two substantial appendices reprint the preliminary matter from the second edition of Richardson's Pamela and Conyers Middleton's Life of Cicero, which is also closely parodied in Shamela. This Oxford World's Classics edition also features a new introduction by Thomas Keymer which situates Fielding's works in their critical and historical contexts.

[The Oxford Handbook of Nonlinear Filtering, Dan Crisan, Boris Rozovski](#) , 2011, 0199532907, 9780199532902. In many areas of human endeavour, the systems involved are not available for direct measurement. Instead, by combining mathematical models for a system's evolution with partial observations of its evolving state, we can make reasonable inferences about it. The increasing complexity of the modern world makes this analysis and synthesis of high-volume data an essential feature in many real-world problems. The celebrated Kalman-Bucy filter, designed for linear dynamical systems with linearly structured measurements, is the most famous Bayesian filter. Its generalizations to nonlinear systems and/or observations are collectively referred to as nonlinear filtering (NLF), an extension of the Bayesian framework to the estimation, prediction, and interpolation of nonlinear stochastic dynamics. NLF uses a stochastic model to make inferences about an evolving system and is a theoretically optimal algorithm. The breadth of its applications, firmly established and still emerging, is simply astounding. Early uses such as cryptography, tracking, and guidance were mostly of a military nature. Since then, the scope has exploded. It includes the study of global climate, estimating the state of the economy, identifying tumours using non-invasive methods, and much more. The Oxford Handbook of Nonlinear Filtering is the first comprehensive written resource for the subject. It contains classical and recent results and applications, with contributions from 58 authors. Collated into 10 parts, it covers the foundations of nonlinear filtering, connections to stochastic partial differential equations, stability and asymptotic analysis, estimation and control, approximation theory and numerical methods for solving the nonlinear filtering problem (including particle methods). It

also contains a part dedicated to the application of nonlinear filtering to several problems in mathematical finance.

[Iracema, Jose de Alencar](#) , 2000, 019976168X, 9780199761685. Jose de Alencar's prose-poem Iracema, first published in 1865, is a classic of Brazilian literature--perhaps the most widely-known piece of fiction within Brazil, and the most widely-read of Alencar's many works. Set in the sixteenth century, it is an extremely romantic portrayal of a doomed love between a Portuguese soldier and an Indian maiden. Iracema reflects the gingerly way that mid-nineteenth century Brazil dealt with race mixture and multicultural experience. Precisely because of its nineteenth-century romanticism, Iracema strongly contributed to a Brazilian sense of nationhood--contemporary Brazilian writers and literary critics still cite it as a foundation for their own work.

[Turing: Pioneer of the Information Age, B. Jack Copeland](#) , 2012, 019163378X, 9780191633782. Alan Turing can be regarded as one of the greatest scientists of the 20th century. But who was Turing, and what did he achieve during his tragically short life of 41 years? Best known as the genius who broke Germany's most secret codes during the war of 1939-45, Turing was also the father of the modern computer. Today, all who 'click-to-open' are familiar with the impact of Turing's ideas. Here, B. Jack Copeland provides an account of Turing's life and work, exploring the key elements of his life-story in tandem with his leading ideas and contributions. The book highlights Turing's contributions to computing and

to computer science, including Artificial Intelligence and Artificial Life, and the emphasis throughout is on the relevance of his work to modern developments. The story of his contributions to codebreaking during the Second World War is set in the context of his thinking about machines, as is the account of his work in the foundations of mathematics.

The Disciples begin by hijacking Diabolus Darkdoom's Airborne command post, then they kidnap his son and his son's best friend. Unfortunately for them, Nigel Darkdoom (and Franz) also happen to be Otto's friends. Heading out to America, Otto, Wing et al embark on a perilous and highly unauthorised rescue operation. Cut off from the support of H.I.V.E. and on the run from American security forces the hunt for their friends leads to one of the US military's most secret facilities. It becomes clear that the Disciples are not all they appear and in a desperate race against time Otto must work out who his real friends are to prevent the Disciples from completing their true objective. Only Otto can save the world from domination by a sinister new world order but it might be that the price he has to pay is just too high. When it comes to the crunch will he be prepared to sacrifice himself?

[Render to Caesar : Jesus, the Early Church, and the Roman Superpower: Jesus, the Early Church, and the Roman Superpower, School of Theology University of the South Christopher Bryan Professor of New Testament](#) , 2005, 019804044X, 9780198040446. At the end of the 20th century, "postcolonialism" described the effort to understand the experience of those who had lived under colonial rule. This kind of thinking has inevitably brought about a reexamination of the rise of Christianity, which took place under Roman colonial rule. How did Rome look from the viewpoint of an ordinary Galilean in the first century of the Christian era? What should this mean for our own understanding of and relationship to Jesus of Nazareth? In the past, Jesus was often "depoliticized," treated as a religious teacher imparting timeless truths for all people. Now, however, many scholars see Jesus as a political leader whose goal was independence from Roman rule so that the people could renew their traditional way of life under the rule of God. In *Render to Caesar*, Christopher Bryan reexamines the attitude of the early Church toward imperial Rome. Choosing a middle road, he asserts that Jesus and the early Christians did indeed have a critique of the Roman superpower -- a critique that was broadly in line with the entire biblical and prophetic tradition. One cannot worship the biblical God, the God of Israel, he argues, and not be concerned about justice in the here and now. On the other hand, the biblical tradition does not challenge human power structures by attempting to dismantle them or replace them with other power structures. Instead, Jesus' message consistently confronts such structures with the truth about their origin and purpose. Their origin is that God permits them. Their purpose is to promote God's peace and justice. Power is understood as a gift from God, a gift that it is to be used to serve God's will and a gift that can be taken away by God when misused. *Render to Caesar* transforms our understanding of early Christians and their relationship to Rome and demonstrates how Jesus' teaching continues to challenge those who live under structures of government quite different from those that would have been envisaged by the authors of the New Testament.

[The Tenant of Wildfell Hall, Anne Bront](#) , 2010, 0141035633, 9780141035635. Gilbert Markham is deeply intrigued by Helen Graham, a beautiful and secretive young woman who has moved into nearby Wildfell Hall with her young son. He

is quick to offer Helen his friendship, but when her reclusive behaviour becomes the subject of local gossip and speculation, Gilbert begins to wonder whether his trust in her has been misplaced. It is only when she allows Gilbert to read her diary that the truth is revealed and the shocking details of the disastrous marriage she has left behind emerge... Told with great immediacy, combined with wit and irony, *THE TENANT OF WILDFELL HALL* is a powerfully involving read.

[Kathryn's Vase: And Other Short Stories, Betty C. Umlauf](#) , 1998, 096657298X, 9780966572988. The author eloquently tells this tender love story based on the lives of her grandparents. Overlooking the glistening waters of the River Moldau in the charming city of Prague, Czechoslovakia, stands the Charles Bridge where Robert & Kathryn fall in love. Religious differences precluding their relationship, they meet secretly on the bridge each Saturday afternoon until Kathryn must leave the country. When Kathryn is eighty-one years old, she tells her family & friends "Robert & I fell in love all over again." And you will fall in love with them too! Often compared to Erma Bombeck & Robert Fulghum for her wit & candor, Betty tells this story with warmth & dignity. *KATHRYN'S VASE* is a true story that needs to be told. Robert & Kathryn shared a special love for sixty-six years until death parted them. You will cherish their story in your heart & want to share it with others. [Rock Mechanics: For underground mining, Barry H. G. Brady](#), 2007, 140202116X, 9781402021169. Although Rock Mechanics addresses many of the rock mechanics issues which arise in underground mining engineering, it is not a text exclusively for mining applications. It consists of five categories of topics on the science and practice of rock engineering: basic engineering principles relevant to rock mechanics; mechanical properties of rock and rock masses; design of underground excavations in various rock mass conditions; mining methods and their implementation; and guidelines on rock mechanics practice. Throughout the text, and particularly in those sections concerned with excavation design and design of mining layouts, reference is made to computational methods of analysis of stress and displacement in a rock mass. The principles of various computational schemes, such as boundary element, finite element and distinct element methods, are considered. This new edition has been completely revised to reflect the notable innovations in mining engineering and the remarkable developments in the science of rock mechanics and the practice of rock engineering that have taken place over the last two decades. Based on extensive professional, research and teaching experience, this book will provide an authoritative and comprehensive text for final year undergraduates and commencing postgraduate students. For professional practitioners, not only will it be of interest to mining and geological engineers but also to civil

engineers, structural and mining geologists and geophysicists as a standard work for professional reference purposes. B.H.G. Brady is Emeritus Professor and former Dean of the Faculty of Engineering, Computing and Mathematics at The University of Western Australia, and a consulting rock mechanics engineer. E.T. Brown is Senior Consultant, Golder Associates Pty Ltd, Brisbane, Australia and formerly Senior Deputy Vice-Chancellor of The University of Queensland, Australia.

[An Intelligent Person's Guide to Ethics, Mary Warnock](#) , 2004, 0715633201, 9780715633205. Mary Warnock debates the difficult moral issues of today such as abortion and euthanasia and explores the nature of ethics and how we make moral decisions. Even before its publication, opinions expressed in this highly controversial book about ethics have caused uproar among thinkers and campaigners of different persuasions such as Mary Whitehouse, Ann Widdecombe MP and Dominic Lawson, editor of The Sunday Telegraph. In no uncertain terms the highly respected philosopher and public figure Lady Warnock explains in this book how to distinguish right from wrong in areas ranging from euthanasia to abortion, Down's Syndrome, education and genetic engineering. Drawing on remarkably lucid examples from her personal and political life, Lady Warnock illustrates difficult cases to make her point succinctly and persuasively. She clarifies where she stands in relation to the philosophers of ethics in a concise and thought-provoking way.

[A Measure for Measures: In Mission and Ministry : Report of the Review of the Dioceses, Pastoral and Related Measures,](#) , 2004, 0715140299, 9780715140291. Does the legislation governing diocesan and parochial structures assist the development of Christian communities in a rapidly changing national and local context? Does it enable new initiatives to support the Church's mission and ministry to the nation? This major report was commissioned and endorsed by the Archbishops' Council and produced by a Review Group chaired by Professor Peter Toyne. The Group was determined that its work should be rooted in a sound ecclesiological understanding of the issues and the observations of their theological consultant, the Revd Dr Malcolm Brown, permeate and punctuate the Report. The Group concluded that, while dioceses were best placed to determine what might be the best fit for their mission and ministry needs, a simpler and enabling national legislative framework was still needed.

Market_Desc: Practitioners in diverse fields, including engineers, who use regression analysis techniquesSpecial Features: A revised and updated edition of a book with a solid reputation for its

excellent treatment of the theory and applications of linear regression analysis, integrating standard topics with some of the newer and less conventional areas. The new edition features complete reorganization of the material since the previous edition was published in 1992, allowing for a more logical flow of bite-sized material while keeping the size of the book manageable. Modern topics added include classification and regression analysis (CART), neural networks, and the bootstrap, among others. Expanded topics include robust regression, nonlinear regression, GLMs, and others. Problems and data sets have been extensively revised. Remains oriented toward the analyst who uses computers for problem solution. Authors have greatly expanded the discussion of regression diagnostics, illustrating all of the major procedures available in contemporary software packages. An accompanying Web site contains data sets, extensive problem solutions, and software hints. About The Book: This book is intended as a text for a basic course in linear regression analysis. It contains the standard topics as well as some of the newer and more unconventional ones and blends both theory and application so that the reader will obtain an understanding of the basic principles necessary to apply regression methods in a variety of practical settings.

The eldest son of journalist Bill Moyers, William Cope Moyers relates with unforgettable clarity the story of how a young man with every advantage found himself spiraling into a love affair with crack cocaine that led him to the brink of death-and how a deep spirituality allowed him to conquer his shame, transform his life, and dedicate himself to changing America's politics of addiction.

[The Last Ghost Rider, Frank Mosco](#) , 2009, 0976927217, 9780976927211. A much talked about book of the Vietnam War. THE LAST GHOST RIDER follows the haphazard life and times of Army enlisted man Vincent Fusco during the years 1968 to '71 as he somehow manages to wade through the often incoherent reasoning and random events of military life and war. Fusco's journey takes you from his ridiculous stateside antics to the strange reality and unforgettable heroic characters of the chopper war in the central highlands of Vietnam and Cambodia. An American G.I.'s saga that is of interest not only because of its revealing story but in the frank, humorous, and candid style in which it's told. A style that readers have already placed on par with MASH and CATCH-22. Experience the siege of Dak Seang and the Cambodian invasion in this novel of "faction" inspired by the experiences, events, and real characters known to the author during his service with the famous 189th Assault Helicopter Co. Ghostriders. Described as insightful, revealing, surprising, and even politically incorrect - this is a must read book!

[Marine Mammal Research: Conservation Beyond Crisis, John E. Reynolds III](#) , 2005, 0801882559, 9780801882555.

Marine mammal conservation presents a number of challenges for scientists and other stakeholders, especially using natural resources in ways that avoid crisis management. Scientists play the special role of providing vital information to decision makers to help them understand long-term consequences of their actions and avoid crises before they develop. The contributors to this visionary work look beyond the current crises to present a compelling argument about how science, if conducted properly, can provide insights that minimize crisis management and implement more anticipatory action. Despite the significant reduction of marine mammal harvesting, stocks of some species remain greatly reduced or are in decline. This volume provides an overview of the current state of marine mammal populations and identifies the major obstacles facing marine mammal conservation, including fisheries, sonar and other noise pollution, disease, contaminants, algal booms, and habitat loss. The contributors chart a scientifically-supported plan to direct marine management toward a well-defined recovery protocol. This comprehensive resource will be indispensable for marine mammal biologists, oceanographers, conservation program managers, government regulators, policy makers, and anyone who is concerned about the future of these captivating species.

[Animal Love Summer, Marion Peck](#) , 2010, 0867197412, 9780867197419. Animal Love Summer is the first full monograph for painter Marion Peck. One of the leading ladies of pop surrealism, Peck populates her dreamlike paintings with strange, cute creatures. As her magical and bucolic landscapes unfold, an uneasy melancholy fills the air -- the birds are chirping, but the sounds are not quite right. The viewer pauses and questions the reality Peck has created, as well as one's own. Themes of hope, despair, mystery, nostalgia, love and death recur throughout Peck's work alongside motifs of dreams, big-eyed animals, natural landscapes, doe-eyed children, royalty and peasantry. With references ranging from Pieter Bruegel to Holly Hobbie, Marion Peck mines the depths of art history, popular culture and the human experience for her meticulous scenes. While peasants dance in a painting of the same name, their son leers at a corralled ass while

the evening's dinner runs around with its head cut off. In her painting "F*ck You," a nod to Francois Grard's 1804 "Portrait de Mme Tallien, an elegant royal is anything but, as she tells us how she really feels. Peck looks beyond the subconscious, reminding us that the waking world is never quite as it seems. And with her dark sense of humor and irrepressible optimism, she assures us that while life can be ominous, tragic, even deceptive, it is also beautiful, magical and alive with hope.

[The English Legal Process, Terence Ingman](#) , 2006, 0199290385, 9780199290383. The English Legal Process offers a clear and topical explanation of how the English legal system operates. The book explains the organization and procedures of courts and tribunals, the trial process and jury system, major forms of redress in private and public law, and discusses the way judges make and determine the law. Throughout, examples are drawn from a wide range of cases to help students develop a rounded understanding of the subject. The eleventh edition incorporates a new structure to ensure the text maps even more closely to undergraduate courses as well as key new legislation, such as the Civil Partnership Act 2004, the Prevention of Terrorism Act 2005, and the Constitutional Reform Act 2005. Recent judgments of the Court of Appeal and the High Court on key cases have been included, as have important pronouncements by the House of Lords. The English Legal Process also looks at the implications of the Criminal Justice Act 2003, which changed the double jeopardy rule and allowed retrials in respect of a number of serious offences, and the forthcoming Criminal Defence Service Bill. In it the UK Government makes clear that: it wants to build on the strengths of the Kyoto Protocol, and is open to extending that agreement as a way of getting the legal deal needed; it is in favour of strengthening the UN decision making process that was so frustrating at Copenhagen; it is pushing for the EU to increase its plans to cut emissions in line with comparable moves elsewhere, supporting the European Commission's work to identify the practical steps that would be required to implement a 30 per cent reduction target. The Action Plan builds on the Copenhagen Accord, in which countries have put forward actions that, if delivered in full, would see global emissions peak before 2020.

[Plato on Pleasure and the Good Life, Daniel Russell](#) , 2005, 0199282846, 9780199282845. Daniel Russell examines Plato's subtle and insightful analysis of pleasure and explores its intimate connections with his discussions of value and human psychology. Russell offers a fresh perspective on how good things bear on happiness in Plato's ethics, and shows that, for Plato, pleasure cannot determine happiness because pleasure lacks a direction of its own. Plato presents wisdom as a skill of living that determines happiness by directing one's life as a whole, bringing about goodness in all areas of one's life, as a skill brings about order in its materials. The 'materials' of the skill of living are, in the first instance, not things like money or health, but one's attitudes, emotions, and desires where things like money and health are concerned. Plato recognizes that these 'materials' of the psyche are inchoate, ethically speaking, and in need of direction from wisdom. Among them is pleasure, which Plato treats not as a sensation but as an attitude with which one ascribes value to its object. However, Plato also views pleasure, once shaped and directed by wisdom, as a crucial part of a virtuous character as a whole. Consequently, Plato rejects all forms of hedonism, which allows happiness to be determined by a part of the psyche that does not direct one's life but is among the materials to be directed. At the same time, Plato is also able to hold both that virtue is sufficient for happiness, and that pleasure is necessary for happiness, not as an addition to one's virtue, but as a constituent of one's whole virtuous character itself. Plato therefore offers an illuminating role for pleasure in ethics and psychology, one to which we may be unaccustomed: pleasure emerges not as a sensation or even a mode of activity, but as an attitude - one of the ways in which we construe our world - and as such, a central part of every character.

[Beginning Organic Chemistry, Part 2, , Graham L. Patrick](#) , 1997, 0198559364, 9780198559368. This text is aimed at students entering first year university courses. The book is not meant to replace lecture material or conventional textbooks, but rather to enhance the course by challenging the student to test his or her knowledge. Indeed, the

introduction emphasizes that students should read their lecture notes and textbook before tackling the self-learning text. The self-learning text concentrates on reactions and mechanisms with emphasis on rationalizing reactions rather than memorizing them. The text assumes knowledge covered in Patrick's Beginning Organic Chemistry. In each section of the book, the student is led through the subject matter by being given a short piece of theory, followed by a question. A space is then provided for the student's answer and then the full model answer is given. The next bit of theory follows and so on. In this way, students are encouraged to think about what they are reading at all times, rather than getting information 'gift wrapped'. Each section finishes with a summary of the most important facts.

[Forest Gardening: Rediscovering Nature & Community in a Post-industrial Age, Robert A. de J. Hart](#) , 1996, 1900322021, 9781900322027. Based on the model of a healthy natural woodland, a forest garden incorporates a wide variety of useful plants, including fruit and nut trees, perennial herbs, and vegetables. Robert Hart's book beautifully describes his decades of experience gardening in the Shropshire countryside. The principles of "backyard permaculture" he has developed can be applied successfully in every temperate zone of North America, helping to transform even a small cottage garden into a diverse and hospitable habitat for songbirds, butterflies, and other wildlife. Blending history, philosophy, anthropology, and seasoned gardening wisdom in a lucid sequence of essays, Forest Gardening examines the pleasure of "hands off" as

well as hands-on gardening. This book offers fresh ways of understanding the relationships between people and growing plants. For gardeners who aspire to create ecological as well as beautiful gardens, Forest Gardening will be an inspiration and a pleasure.

[Cairo Modern, Naguib Mahfouz](#) , 2011, 0307780856, 9780307780850. In Naguib Mahfouz's suspenseful novel a bitter and ambitious nihilist, a beautiful and impoverished student, and a corrupt official engage in a doomed ménage à trois. Cairo of the 1930s is a place of vast social and economic inequities. It is also a time of change, when the universities have just opened to women and heady new philosophies imported from Europe are stirring up debates among the young. Mahgub is a fiercely proud student who is determined to keep both his poverty and his lack of principles secret from his idealistic friends. When he finds that there are no jobs for those without connections, out of desperation he agrees to participate in an elaborate deception. But what begins as a mere strategy for survival soon becomes much more for both Mahgub and his partner in crime, an equally desperate young woman named Ihsan. As they make their way through Cairo's lavish high society their precarious charade begins to unravel and the terrible price of Mahgub's Faustian bargain becomes clear. Translated by William M. [Attempts at Being, Alison Croggon](#) , 2002, 1876857420, 9781876857424. "Often shifting and elusive, her poems can convey the 'strangeness of dream' . The 'stubborn voice' is restless, impatient, exploratory attuned to bedrock reality. Poems are often carried forward by sheer rhythmical energy and, if the nature of the anguish that often informs them can be hard to pin down, it's because anguish is seen as the price of being alive . She can slip in and out of styles as readily as an amphibian slips from land to water." Australian Book Review "This is a poetry of changes, dissolvings, transformations, fluidity between inside and out, between people and nature . Other starting points are the poetic tradition and musical forms the ways that art works, what it can articulate and fail to articulate, the inexpressible, white space and silences, unfaithful translations." [The Practice of Strategy: From Alexander the Great to the Present, John Andreas Olsen, Colin S. Gray](#) , 2011, 0199608636, 9780199608638. The Practice of Strategy focuses on grand strategy and military strategy as practiced over an extended period of time and under very different circumstances, from the campaigns of Alexander the Great to

insurgencies and counter-insurgencies in present-day Afghanistan and Iraq. It presents strategy as it pertained not only to wars, campaigns, and battles, but also to times of peace that were over-shadowed by the threat of war. The book is intended to deepen understanding of the phenomena and logic of strategy by reconstructing the considerations and factors that shaped imperial and nation-state policies. Through historical case studies, the book sheds light on a fundamental question: is there a unity to all strategic experience? Adopting the working definition of strategy as 'the art of winning by purposely matching ends, ways and means,' these chapters deal with the intrinsic nature of war and strategy and the characteristics of a particular strategy in a given conflict. They show that a specific convergence of political objectives, operational schemes of manoeuvre, tactical moves and countermoves, technological innovations and limitations, geographic settings, transient emotions and more made each conflict studied unique. Yet, despite the extraordinary variety of the people, circumstances, and motives discussed in this book, there is a strong case for continuity in the application of strategy from the olden days to the present. Together, these chapters reveal that grand strategy and military strategy have elements of continuity and change, art and science. They further suggest that the element of continuity lies in the essential nature of strategy and war, while the element of change lies in the character of individual strategies and wars.

The 4th novel in the bestselling Conqueror series, continuing the life and adventures of the mighty Khan dynasty. Genghis Khan is dead, but his legend and his legacy live on. His son Ogedai has built a white city on a great plain and made a capital for the new nation. Now the armies have gathered to see which of Genghis' sons has the strength to be khan. The Mongol empire has been at peace for two years, but whoever survives will face the formidable might of their great enemy, Chinas Song dynasty. The great leader Tsubodai sweeps into the west: through Russia, over the Carpathian mountains and into Hungary. The Templar knights have been broken and there is no king or army to stop him reaching France. But at the moment of Tsubodai's greatest triumph, as his furthest scouts reach the northern mountains of Italy, Tsubodai must make a decision that will change the course of history forever.

[The Handbook of Crime & Punishment, Michael H. Tonry](#) , 2000, 0195140605, 9780195140606. Crime is one of the most significant political issues in contemporary American society. Crime control statistics and punishment policies are subjects of constant partisan debate, while the media presents sensationalized stories of criminal activity and over-crowded prisons. In the highly politicized arena of crime and justice, empirical data and reasoned analysis are often overlook or ignored. The Handbook of Crime and Punishment, however, provides a comprehensive overview of criminal justice, criminology, and crime control policy, thus enabling a fundamental understanding of crime and punishment essential to

an informed public. Expansive in its coverage, the Handbook presents materials on crime and punishment trends as well as timely policy issues. The latest research on the demography of crime (race, gender, drug use) is included and weighty current problems (organized crime, white collar crime, family violence, sex offenders, youth gangs, drug abuse policy) are examined. Processes and institutions that deal with accused and convicted criminals and techniques of punishment are also examined. While some articles emphasize American research findings and developments, others incorporate international research and offer a comparative perspective from other English-speaking countries and Western Europe. Editor Michael Tonry, a leading scholar of criminology, introduces the 28 articles in the volume, each contributed by an expert in the field. Designed for a wide audience, The Handbook is encyclopedic in its range and depth of content, yet is written in an accessible style. The most inclusive and authoritative work on the topic to be found in one volume, this book will appeal to those interested in the study of crime and its causes, effects, trends, and institutions; those interested in the forms and philosophies of punishment; and those interested in crime control.

[Discourses with Malachi: Opening to Spiritual Guidance, David Davidson](#) , 2000, 0953200760, 9780953200764. During morning meditations David Davidson began a mental dialogue with a spiritual teacher named Malachi. Over the course of three years Malachi explained exactly how and why this dialogue was happening. This book is primarily a book about the relationship between two people: one a spiritual teacher who lived eight thousand years ago and one a psychologist who is alive now. Through David, Malachi speaks with authority and depth. Whether his words are poetic, sympathetic or uncompromising, they are always inspiring and always spoken from the heart. This book provides a valuable guide and handbook for those who wish to enter into a dialogue with spirit. The addition of Malachi's predictions, his patience and his rather dry sense of humour make his explanations about how spirit communicates with humankind both stimulating and thought-provoking.

This text includes recent developments in research issues and practice for the pre-service and practising teacher. It maintains its practical emphasis on effective instruction. The new edition includes a new chapter on promoting self-directed and independent learning, and provides a new emphasis on the concept of reflective learning and teaching, together with ways to use the self-reflective cycles of planning, acting, observing and reflecting to promote the development of reflective teachers.
