[The Merchant of Venice, William Shakespeare](#) , 2007, 0140623760, 9780140623765. "Hath not a Jew eyes? Hath not a

Jew hands, organs, dimensions, senses, affections, passions?" Shylock's impassioned plea in the middle of *The Merchant of Venice* is one of its most dramatic moments. After the Holocaust, the play has become a battleground for those who argue that the play represents Shakespeare's ultimate statement against ignorance and anti-Semitism in favour of a liberal vision of tolerance and multiculturalism. Other critics have pointed out that the play is, after all, a comedy that ultimately pokes fun at a 16th-century Jew. In fact, the bare outline of the plot suggests that the play is far more complex than either of these characterisations. Bassanio, a feckless young Venetian, asks his wealthy friend, the merchant Antonio, for money to finance a trip to woo the beautiful Portia in Belmont. Reluctant to refuse his friend (to whom he professes intense love), Antonio borrows the money from the Jewish moneylender. If he reneges on the deal, Shylock jokingly demands a pound of his flesh. When all Antonio's ships are lost at sea, Shylock calls in his debt, and the love and laughter of the first scenes of the play threaten to give way to death and tragedy. The final climactic courtroom scene, complete with a cross-dressed Portia, a knife-wielding Shylock, and the debate on "the quality of mercy" is one of the great dramatic moments in Shakespeare. The controversial subject matter of the play ensures that it continues to repel, divide but also fascinate its many audiences.

Story of Australia's first successful land rights campaign: an against-the-odds struggle that reshaped our nation. As Australia wrestles again with questions of Indigenous land ownership, this film recalls the momentous fight started 40 years ago by the Gurindji people of the Northern Territory. On Australia's biggest cattle station, they took on one of England's richest aristocrats, the beef baron Lord Vestey. Their 1966 strike became one of Australia's longest industrial disputes. Their rebellion gave rise to a national movement. The story of the Wave Hill walk off is told in Kev Carmody and Paul Kelly's song From Little Things Big Things Grow - but this story is more than just a popular folk tune; it is a milestone in Australian history and regarded by many as the beginning of the Indigenous land rights movement. Before the Wik or Mabo judgments, before ATSIC, there was the Gurindji uprising against Lord Vestey's cattle empire. Their pay and conditions were appalling; their women had been sexually abused; their land stolen. The Gurindji stuck to their demands - over nine hard years - and garnered support across Australia; from bricklayers to folk singers, from white university students to a new wave of young, urban Indigenous activists. These pioneering alliances carried the Gurindji message from the edge of the Tanami desert to the world. Ripples From Wave Hill is the definitive first-hand account of the struggle - told by the Aboriginal people who fought for their land and the radicals who joined with them. The Gurindji's victory was a pivotal event in Indigenous land rights - a transformative moment in Australian history which still resonates today.

[Making Magic : Religion, Magic, and Science in the Modern World: Religion, Magic, and Science in the Modern World, Chapel Hill Randall Styers Assistant Professor of Religion and Culture University of North Carolina](#) , 2003, 0198037899, 9780198037897. Since the emergence of religious studies and the social sciences as academic disciplines, the concept of "magic" has played a major role in defining religion and in mediating the relation of religion to science. Across these disciplines, magic has regularly been configured as a definitively non-modern phenomenon, juxtaposed to distinctly modern models of religion and science. Yet this notion of magic has remained stubbornly amorphous. In Making Magic, Randall Styers seeks to account for the extraordinary vitality of scholarly discourse purporting to define and explain magic

despite its failure to do just that. He argues that this persistence can best be explained in light of the Western drive to establish and secure distinctive norms for modern identity, norms based on narrow forms of instrumental rationality, industrious labor, rigidly defined sexual roles, and the containment of wayward forms of desire. Magic has served to designate a form of alterity or deviance against which dominant Western notions of appropriate religious piety, legitimate scientific rationality, and orderly social relations are brought into relief. Scholars have found magic an invaluable tool in their efforts to define the appropriate boundaries of religion and science. On a broader level, says Styers, magical thinking has served as an important foil for modernity itself. Debates over the nature of magic have offered a particularly rich site at which scholars have worked to define and to contest the nature of modernity and norms for life in the modern world.

[In an Antique Land: History in the Guise of a Traveler's Tale, Amitav Ghosh](#) , 2011, 0307792269, 9780307792266. Once upon a time an Indian writer named Amitav Ghosh set out an Indian slave, name unknown, who some seven hundred years before had traveled to the Middle East. The journey took him to a small village in Egypt, where medieval customs coexist with twentieth-century desires and discontents. But even as Ghosh sought to re-create the life of his Indian

predecessor, he found himself immersed in those of his modern Egyptian neighbors. Combining shrewd observations with painstaking historical research, Ghosh serves up skeptics and holy men, merchants and sorcerers. Some of these figures are real, some only imagined, but all emerge as vividly as the characters in a great novel. In an Antique Land is an inspired work that transcends genres as deftly as it does eras, weaving an entrancing and intoxicating spell.

[Planning for a New Century: The Regional Agenda, Jonathan Barnett](#) , 2001, 1559638060, 9781559638067. Across the United States, issues such as sustainability, smart growth, and livable communities are making headlines. Planning for a New Century brings together leading thinkers in the fields of planning, urban design, education, welfare, and housing to examine those issues and to consider the ways in which public policies have helped create and can help solve many of the problems facing our communities. Each chapter identifies issues, provides background, and offers specific policy suggestions for federal, state, and local initiatives. Topics examined include: the relation of existing growth management policies to social equity, as well as how regional growth management measures can make new development more sustainable how an obscure technical procedure in highway design becomes a de facto regional plan ways in which local governments can promote environmental preservation and better-designed communities by rewriting local zoning and subdivision ordinances why alleviating housing shortages and slum conditions has resulted in a lack of affordable housing, and how that problem can be solved how business improvement districts can make downtowns cleaner, safer, and more welcoming to workers and visitors In addition, the book features chapters on public safety, education, and welfare reform that include proposals that will help make regional growth management easier as inner-city crime is reduced, schools are improved, and concentrations of extreme poverty are eliminated. Planning for the New Century brings together current academic research with pressing public policy concerns, and will be a useful resource for policymakers at all levels of government, for planners and architects, and for students and scholars of urban planning and design, and urban studies.

[How to Go to the Movies, Quentin Crisp](#) , 2003, 031229994X, 9780312299941. Since moving to New York City over a decade ago, Quentin Crisp has brought his love of the cinema and his notorious wit together in a series of essays on films and film stars. A veteran film-goer of seventy years who has kept a vigilant eye on changing Hollywood styles and the public tastes that follow, Mr. Crisp discusses both films and stars with his typical panache and dexterity and leads his readers with polite madness to a clear, straightforward moral, proving himself to be an unexpected champion of good sense. Along the way Mr. Crisp shares his personal encounters with the likes of Lillian Gish, John Hurt, David Hockney, Divine, Sting, and Geraldine Page. Prefaced by longer essays on the essence of stardom, the nature of Hollywood, and the deplorable state of that town today, Mr. Crisp's book is a delight to read.

[Charm City: A Walk Through Baltimore, Madison Smartt Bell](#) , 2007, 030740742X, 9780307407429. With a writer's keen eye, a longtime resident's familiarity, and his own sly wit, acclaimed novelist Madison Smartt Bell leads us on a walk through his adopted hometown of Baltimore, a city where crab cakes, Edgar Allan Poe, hair extensions, and John Waters movies somehow coexist. From its founding before the Revolutionary War to its place in popular culture thanks to seminal films like Barry Levinson's Diner, the television show Homicide, and bestselling books by George Pelecanos and Laura

Lippman Baltimore is America, and in Charm City, Bell brings its story to vivid life. First revealing how Baltimore received some of its nicknames including Charm City Bell sets off from his neighborhood of Cedarcroft and finds his way across the city's crossroads, joined periodically by a host of fellow Baltimoreans. Exploring Baltimore's prominent role in history (it was here that Washington planned the battle of Yorktown and Francis Scott Key witnessed the bombs bursting in air), Bell takes us to such notable spots as the Inner Harbor and Federal Hill, as well as many of the undiscovered corners that give Baltimore its distinctive character. All the while, Charm City sheds deserved light onto a sometimes overlooked, occasionally eccentric, but always charming place. From the Hardcover edition.

[Nature and Culture : American Landscape and Painting, 1825-1875, With a New Preface: American Landscape and Painting, 1825-1875, With a New Preface, Barbara Novak Altschul Professor of Art History Barnard College and Columbia University \(Emerita\)](#) , 2007, 0195345665, 9780195345667. In this richly illustrated volume, featuring more than fifty

black-and-white illustrations and a beautiful eight-page color insert, Barbara Novak describes how for fifty extraordinary years, American society drew from the idea of Nature its most cherished ideals. Between 1825 and 1875, all kinds of Americans--artists, writers, scientists, as well as everyday citizens--believed that God in Nature could resolve human contradictions, and that nature itself confirmed the American destiny. Using diaries and letters of the artists as well as quotes from literary texts, journals, and periodicals, Novak illuminates the range of ideas projected onto the American landscape by painters such as Thomas Cole, Albert Bierstadt, Frederic Edwin Church, Asher B. Durand, Fitz H. Lane, and Martin J. Heade, and writers such as Ralph Waldo Emerson, Henry David Thoreau, and Frederich Wilhelm von Schelling. Now with a new preface, this spectacular volume captures a vast cultural panorama. It beautifully demonstrates how the idea of nature served, not only as a vehicle for artistic creation, but as its ideal form. "An impressive achievement."

--Barbara Rose, The New York Times Book Review "An admirable blend of ambition, elan, and hard research. Not just an art book, it bears on some of the deepest fantasies of American culture as a whole." --Robert Hughes, Time Magazine

[Nationalism, Anthony D. Smith](#) , 2013, 0745659675, 9780745659671. For the last two centuries, nationalism has been a central feature of society and politics. Few ideologies can match its power and resonance, and no other political movement and symbolic language has such worldwide appeal and resilience. But nationalism is also a form of public culture and political religion, which draws on much older cultural and symbolic forms. Seeking to do justice to these different facets of nationalism, the second edition of this popular and respected overview has been revised and updated with contemporary developments and the latest scholarly work. It aims to provide a concise and accessible introduction to the core concepts and varieties of nationalist ideology; a clear analysis of the major competing paradigms and theories of nations and nationalism; a critical account of the often opposed histories and periodization of the nation and nationalism; and an assessment of the prospects of nationalism and its continued global power and persistence. Broad and comparative in scope, the book is strongly interdisciplinary, drawing on ideas and insights from history, political science, sociology and anthropology. The focus is theoretical, but it also includes a fresh examination of some of the main historical and contemporary empirical contributions to the literature on the subject. It will continue to be an invaluable resource for students of nationalism across the social sciences.

[Shy Children, Phobic Adults: Nature and Treatment of Social Anxiety Disorder, , Deborah C. Beidel, Samuel M. Turner](#) , 2007, 1591474523, 9781591474524. This book describes the clinical presentation of social anxiety disorder, presents theoretical perspectives on its etiology, and examines the latest empirical data with respect to both pharmacological and behavioral interventions. Social anxiety disorder occurs in children, adolescents, and adults, but its manifestation and treatment differ depending on developmental factors. Drawing from a broad literature base as well as their extensive clinical experience, the authors illustrate the impact of developmental stage on all aspects of the disorder. They also provide practical implementation guidelines, enhanced by case examples, tips on patient management, lists of assessment instruments, and sample forms to use with clients. Since publication of the first edition in 1998, knowledge about social anxiety disorder has advanced on several fronts. The new edition includes information from new studies differentiating patterns of distress characteristic of social anxiety disorder vs. social phobia. It draws on more substantive data bases to support firmer conclusions about the presentation of social anxiety disorder among children and adolescents as well as across various ethnocultural groups. New assessment strategies reviewed in this book include neuroassessments using magnetic resonance imaging, and well-validated self-report instruments and clinician rating

scales. Authors review greatly expanded literature addressing pharmacological treatment and psychosocial treatments. New case descriptions and clinical materials are also included. This highly informative and comprehensive volume will be illuminating reading for practitioners, researchers, and students.

[The Japanese Language, Haruhiko Kindaichi](#) , 1988, 0804815798, 9780804815796. A classic study by one of Japans foremost linguists, 'The Japanese Language' illuminates one of the worlds most common and commonly misunderstood languages. With fascinating discussions of the controversial beginnings of Japanese, and able clarifications of the dialects, jargon, and layers of formality which color this language, it is an excellent reference for students of the Japanese language. Striking illustrations of the concepts that infuse Japanese speech -- from single words representing the dark shadows cast by dense trees to the many words expressing shades of blue -- reveal the familiar structures and values of Japanese culture.

[International Year of Disabled Persons: The Story of the U.S. Council for IYDP.,](#) , 1983, 0961062800, 9780961062804. The report summarizes the efforts of the U.S. Council for the International Year of Disabled Persons (IYDP) during the Council's 28-month existence. Introductory sections briefly cite the increase in the number of disabled persons in the United States and trace progress since World War II. The IYDP concept is examined in terms of its initial inception during a conference at Gallaudet College in 1979; preparation during 1980; and the responses of local towns, counties, and cities through the Community Partnership Program. Examples of local activities are cited. The role of national voluntary organizations, state agencies, corporations, religious organizations, the education community, U.S. Congress, and the media is highlighted. A summary of activities of the U.S. Council for IYDP lists projects, a communications program, the Institute for New Challenges, and the final IYDP conference in 1981. Worldwide IYDP activity is briefly noted. (CL)

[Up and Atom, Hal Olsen](#) , 2012, 0979164265, 9780979164262. Artist Hal Olsen, the last living World War II Nose Art visual artist, known and honored internationally for his artwork, describes in his autobiography, Up An' Atom, a critical time in his life as a young man growing up in New Jersey and serving in the United States Navy during World War II. He tells about how he began painting his way into history over 70 years ago using bare buns and bust lines to lift the spirits and morale of American aviators. An enemy bombing, blowing up a fellow artist's paint supply, and having \$50.00 worth of his own oil paints, launched Hal into his Nose Art painting career while on a Mariana island in the Pacific, serving as a 3rd Class Aviation Machinist Mate in the U.S. Navy. Nose Art, a form of artistic graffiti painted on the nose of airplanes, began to flourish in the time known as the Great War-World War I (1913-1918). During the World War II years, (1941-1945), Nose Art expanded in many forms to almost every flying aircraft in the American military and is still visible

on many of today's military aircraft. Hal did Nose Art on an F-111 at Pease Air Force Base in New Hampshire in 1989, painting Necessary Evil on the inside of the front wheel well flap. Hal Olsen also painted other forms of fine art to include landscapes, portraits and military items such as Navy ships, and three of his most famous paintings, the Enola Gay, Bochscar and Up An' Atom, are of the three B-29 bombers involved in the atomic bomb drops on Japan in 1945. 'The final painting I made was Enola Gay because the Air Force wanted her done right.' Photographs of his art are included in this edition. Many paintings are in permanent museum collections with some pieces being held in private collections. Included are the U.S. Navy; Museum of New Mexico, -Santa Fe; Roswell Museum, Roswell, New Mexico; and the Los Alamos Scientific Laboratory Science Museum, Los Alamos New Mexico. Hal's artwork is also featured in Galerie Des Mondes (the Worlds Gallery) John F. Kennedy Airport, New York City, New York; the Fine Arts Museum of Santa Fe, New Mexico; Jonson Gallery, University of New Mexico, Albuquerque, New Mexico; the Commemorative Air Force American Air Power Heritage Museum, Midland, Texas; Admiral Nimitz Museum, Fredericksburg, Tennessee; the National Atomic Museum, Albuquerque, New Mexico; Los Alamos Historical Museum, Los Alamos, New Mexico and the War in the Pacific National Historical Park, Guam His awards include the Prix de Paris, received in 1961 at the Duncan Gallery in Paris, France, and first Prize for his exhibit in the World Wide Nuclear Art Exhibition, Washington D.C. He also served on the State Art Council and the Artist Advisor Commission of the Museum of New Mexico. Hal and his wife Estelle are still happily married, living in Albuquerque, New Mexico, USA. In stressful situations, such as a war, man has a natural tendency to identify himself in unique ways and a graffiti art form of painting came into being, ultimately transferring to military aircraft as early as The Great War of 1914-1918, also known as World War I. This decoration, usually located near the aircraft's nose, became known as Nose Art. Thousands of young men volunteered for the armed services to avenge the deaths of over 2400 killed and 1280 wounded in the Pearl Harbor attack, and the conflict in the Pacific continued on until August, 1945, when two U.S. Air Force B-29s ended the war by dropping atomic bombs on two cities in Japan. The aircraft named Enola Gay, piloted by Colonel Paul W. Tibbets, dropped its bomb named Little Boy on Hiroshima, August 6, 1945 while Bochscar, a plane piloted by Major Charles W. Sweeney dropped the bomb Fat Man on Nagasaki, August 9, 1945. Six days later, August 15, 1945, the Japanese surrendered, ending the war. A young Navy enlisted man, Hal Olsen, had a personal connection with two aircraft making the atomic bomb runs on Japan. He painted B-29s-Enola Gay and Bochscar. This is Hal'

[Looking for Dilmun, Geoffrey Bibby](#) , 1996, 0905743903, 9780905743905. Dilmun features both in Mesopotamian myth, as a blessed land where death is unknown, and in the trade records of the Mesopotamian city of Ur as a real place, the source of Ur's copper supplies. The quest for the real Dilmun began in a relatively light-hearted way in 1953, when Geoffrey Bibby seized the opportunity to revisit Bahrain, in order to explore the thousands of undated burial mounds that decorate the Bahraini landscape. A brief season's digging was enough to establish the existence of a major civilization dating from around 2300 BC, contemporary with Ur and Babylon and showing evidence of trade with the Indus Valley civilization. Thus began a major undertaking, eventually encompassing more than 20 annual expeditions. These revealed the existence of cities and temples not only on Bahrain, but along 250 miles of coast and islands as far north as Kuwait and extending 60 miles into the interior of Saudi Arabia, as well as a second and earlier civilization some 300 miles east, in Oman, which Bibby identified with the legendary copper-rich land of Makan. And the final extraordinary revelation was the discovery in Saudi Arabia of pottery contemporary with the very earliest Stone Age settlements in Mesopotamia,

c.5000 BC, extending the early history of the Gulf region back by over 1000 years and raising the possibility that Mesopotamia was first settled from Arabia.

[A Man of Letters: Selected Essays, V. S. Pritchett](#) , 2012, 144820108X, 9781448201082. V. S. Pritchett is widely - and justly - regarded not only as one of the finest short story writers of this century, but as a critic and essayist of astonishing range, perception and originality. Combining an unpretentious common sense with a rare genius for the illuminating insight into the familiar and the neglected alike, his criticism is all the more valuable in an age in which the study of literature has become increasingly arid and arcane; and unlike so many of his academic counterparts, V. S. Pritchett has always had a remarkable ability to epitomise a writer's work - and convey his own enthusiasm for it - within the compass of a short and eminently accessible essay. First published in 1985, A Man of Letters brings together a selection of his finest and most representative work from the past forty years, ranging from Smollett and Peacock to Evelyn Waugh and Cyril Connolly, from Henry James and Nathanael West to Stendhal and Proust, from Nabokov and Machado de Assis to Manzoni and Dostoevsky. This wise and sparkling collection is, in itself, a lasting tribute to one of the greatest Men of Letters of our time.

[The Diaspora and the Lost Tribes of Israel, Amotz Asa-El](#) , 2004, 0883636042, 9780883636046. This book illuminates two particularly fascinating aspects of Jewish history and culture in one definitive volume. Part one of The Diaspora and the Lost Tribes of Israel chronicles the vast historic migration of Jews throughout the world, starting in about 585 B.C.

Exiled from their homeland or lured by the promise of safe havens, the Jews started the process of acculturation into their host countries while maintaining their Jewish identities. This story, illustrated with stunning archival and contemporary photographs and exquisite examples of ceremonial art, goes from the heights of Jewish educational, religious, and cultural enlightenment, to the almost unimaginable depths in which many of their communities suffered or perished. Part two explores the complex question of the lost tribes of Israel. Thought to have been lost to the sands of time, there is increasing evidence that vestiges of these ancient tribes continue to exist in some of the most remote and unexpected corners of the world.

[Why Evolution Is True, Jerry A. Coyne](#) , 2010, 0143116649, 9780143116646. "Coyne's knowledge of evolutionary biology is prodigious, his deployment of it as masterful as his touch is light." -Richard Dawkins In the current debate about creationism and intelligent design, there is an element of the controversy that is rarely mentioned-the evidence. Yet the proof of evolution by natural selection is vast, varied, and magnificent. In this succinct and accessible summary of the facts supporting the theory of natural selection, Jerry A. Coyne dispels common misunderstandings and fears about evolution and clearly confirms the scientific truth that supports this amazing process of change. Weaving together the many threads of modern work in genetics, paleontology, geology, molecular biology, and anatomy that demonstrate the "indelible stamp" of the processes first proposed by Darwin, Why Evolution Is True does not aim to prove creationism wrong. Rather, by using irrefutable evidence, it sets out to prove evolution right.

[Galileo's Visions: Piercing the Spheres of the Heavens by Eye and Mind, Marco Piccolino, Nicholas J. Wade](#) , 2013, 0199554358, 9780199554355. Galileo is known as a pioneer of science - especially of mechanics and astronomy - but far less attention has been paid to his work on the senses generally, and more specifically on vision. In this book, two experts on the history of science look at the novel ways in which Galileo looked at the heavens through his telescope, and, in the process, emphasised the importance of contrast phenomena and visual resolution for all observations. He also described the senses and perception in terms that found an echo in doctrines advanced by nineteenth century sensory physiologists. In a fascinating and accessible style, Marco Piccolino and Nick Wade analyse the scientific and philosophical work of Galileo Galilei from the particular viewpoint of his approach to the senses (and especially vision) as a means of acquiring trustworthy knowledge about the constitution of the world. For Galileo evidence from the senses was potentially ambiguous, hence reliable information capable of penetrating the complexity of reality could only be obtained by interpreting the sensory data critically. The philosophical background of Galileo's attitude to the senses was his awareness that nature had not developed a specific language aimed at communicating with senses generally and human senses in particular. Galileo's analysis of the senses corresponded closely to a fundamental tenet of modern sensory physiology and psychophysics - the absence in the world of specific sensory signals like sounds, colours, tastes, and odours. Fully illustrated throughout, this book is an important contribution to psychology and the vision sciences, but

more broadly to our knowledge of a pioneering figure in the history of science.

[Mastering Learning: A Study Guide to Accompany Learning and Behavior, Paul Chance](#) , 1995, 0534338488, 9780534338480. LEARNING AND BEHAVIOR looks at learning as an evolutionary mechanism. Chance's book is stimulating, interactive, and peppered with high-interest queries and examples. Chance provides the depth of conceptual knowledge usually associated with books twice as dense and infinitely less interesting. Chance's engaging work has become a favorite of students because of his ability to illuminate how the psychology of learning can offer insight into their own behavior.

[The Vietnam War: A Concise International History, Mark Atwood Lawrence](#) , 2010, 0199753938, 9780199753932. The Vietnam War remains a topic of extraordinary interest, not least because of striking parallels between that conflict and more recent fighting in the Middle East. In *The Vietnam War*, Mark Atwood Lawrence draws upon the latest research in archives around the world to offer readers a superb account of a key moment in U.S. as well as global history. While focusing on American involvement between 1965 and 1975, Lawrence offers an unprecedentedly complete picture of all sides of the war, notably by examining the motives that drove the Vietnamese communists and their foreign allies. Moreover, the book carefully considers both the long- and short-term origins of the war. Lawrence examines the rise of Vietnamese communism in the early twentieth century and reveals how Cold War anxieties of the 1940s and 1950s set the United States on the road to intervention. Of course, the heart of the book covers the "American war," ranging from the overthrow of South Vietnamese President Ngo Dinh Diem to the impact of the Tet Offensive on American public opinion, Lyndon Johnson's withdrawal from the 1968 presidential race, Richard Nixon's expansion of the war into Cambodia and Laos, and the problematic peace agreement of 1973, which ended American military involvement. Finally, the book explores the complex aftermath of the war--its enduring legacy in American books, film, and political debate, as well as Vietnam's struggles with severe social and economic problems. A compact and authoritative primer on an intensely relevant topic, this well-researched and engaging volume offers an invaluable overview of the Vietnam War.

[Thunderstruck, Erik Larson](#) , 2010, 1409044769, 9781409044765. In 1910, Edwardian England was scandalized by a murder. It seems mild-mannered American Hawley Crippen had killed his wife, buried her remains in the cellar of their North London home and then gone on the run with his young mistress, his secretary Ethel Le Neve. A Scotland Yard inspector, already famous for his part in the Ripper investigation, discovered the murder and launched an international hunt for Crippen that climaxed in a trans-Atlantic chase between two ocean liners. The chase itself was novel, but what captured the imagination was the role played by a new and little understood technology: the wireless. Thanks to its inventor Marconi's obsessive fight to perfect his machine, the world was able to learn of events occurring in the middle of the Atlantic as they unfolded - something previously unthinkable. Commentators of the time all agreed that if not for Marconi, Crippen would have escaped. But Marconi had struggled to gain acceptance for his invention (some viewed it as a supernatural device, while distrust of foreigners remained prevalent in England and America). It was the Crippen case that helped convince the world of the potential of Marconi's miracle technology, so accelerating the revolution that eventually produced the modern means of communication we take for granted today. With its cast of captivating characters, Thunderstruck is Erik Larson doing what he does brilliantly well: bringing together seemingly disparate yet inextricably linked lives to paint a fascinating and exciting portrait of an extraordinary age of cultural, social and technological change while evoking the darker side of human nature.

This includes, but is not limited to: cardboard boxes, Volkswagen buses, boxcars, fifth-wheel travel- trailers, halfway houses, nursing homes and jails. There is something deeply ironic in their (our) perceived mobility. The Promise Land is the Land of Promises just over the horizon. One must always be ready, at a moment's notice, to pack up and head out in search of permanence. The rest of the book contains poems on various subjects, all of which relate in one way or another to impermanence.

[Principles of biomedical ethics, Tom L. Beauchamp, James F. Childress](#) , 1994, 019508537X, 9780195085372. This is an extremely thorough revision of the leading textbook of bioethics. The authors have made many improvements in style, organization, argument and content. These changes reflect advances in the bioethics literature over the past five years. The most dramatic expansions of the text are in the comprehensiveness with which the authors treat different currents in ethical theory and the greater breadth and depth of their discussion of public policy and public health issues. In every chapter, readers will find new material and refinements of old discussions. This is evident in the many new sections on topics like communitarianism, ethics of care, relationship-based accounts, casuistry, case-based reasoning, principle-based common-morality theories, the justification of assistance in dying, rationing through priorities in the health care budget, and virtues in professional roles. The most extensive revisions are in chapters 1, 2 and 8.

[Urban Health: Combating Disparities with Local Data, Steven Whitman, Ami Shah, Maureen Benjamins](#) , 2010, 0199750157, 9780199750153. The 1980s opened a discussion of the varying nature of health in different segments of the United States. Falling under the rubric of "health disparities," a great deal of research has been published demonstrating the substantial differences in health status within a population. The causes of health disparities are varied and not always clear but most researchers agree that disparities are a reflection of social and economic inequities and political injustice. One of the obstacles to addressing disparities is the lack of meaningful health data especially for vulnerable populations, which is often nonexistent despite being a critical factor for informing health programs and policies at the local level. This book provides a model for combating health disparities by describing how the authors gathered local health information, engaged the community at every step of the process, and created movement toward evidence-based sustainable change. This book describes how a landmark health survey in Chicago generated dramatic data that are allowing investigators throughout the city to move from data to action and from observation to intervention. In providing a detailed description of how the community-focused collection and analysis of health data can serve as an impetus for improved well-being, Urban Health is an invaluable resource for researchers, community groups, students and professionals.

[Polkabilly: How the Goose Island Ramblers Redefined American Folk Music, James Leary](#) , 2006, 0195349717, 9780195349719. A freewheeling blend of continental European folk music and the songs, tunes, and dances of Anglo and Celtic immigrants, polkabilly has enthralled American musicians and dancers since the mid-19th century. From West Virginia coal camps and east Texas farms to the Canadian prairies and America's Upper Midwest, scores of groups have wed squeezeboxes with string bands, hoe downs with hambos, and sentimental Southern balladry with comic "up north" broken-English comedy, to create a new and uniquely American sound. The Goose Island Ramblers played as a house band for a local tavern in Madison, Wisconsin from the early 1960s through the mid-1970s. The group epitomized the polkabilly sound with their wild mixture of Norwegian fiddle tunes, Irish jigs, Slovenian polkas, Swiss yodels, old time hillbilly songs, "Scandihoovian" and "Dutchman" dialect ditties, frost-bitten Hawaiian marches, and novelty numbers on the electric toilet plunger. In this original study, James P. Leary illustrates how the Ramblers' multiethnic music combined both local and popular traditions, and how their eclectic repertoire challenges prevailing definitions of American folk music. He thus offers the first comprehensive examination of the Upper Midwest's folk musical traditions within the larger context of American life and culture. Impeccably researched, richly detailed and illustrated, and accompanied by a compact disc of interviews and performances, James P. Leary's Polkabilly: How the Goose Island Ramblers Redefined American Folk Music creates an unforgettable portrait of a polkabilly band and its world.

I know how it feels to be afraid to pray, afraid you're praying wrong, afraid that your prayers are unheard. So I pass on to you the knowledge that changed my approach to and experience of prayer: your every thought, every word, every action is a prayer. If we can focus on God's presence in everything and everyone, then prayer will become as natural to us as breathing. This book is a collection of prayers I have written over the years in my prayer journals. They address a variety of topics and situations. Eugene wants to get on in the world. So he has come to Paris, where the streets teem with chancers, criminals and social climbers - and everyone is out for what they can get. When he finds a place to stay at a shabby boarding house, he sees a potential plan to make a fortune: the two beautiful, aristocratic women who mysteriously come at night to visit the lonely old lodger Goriot. Could they bring him the status and acceptance he craves? In the city nothing is as it seems though. Soon Eugene gets out of his depth in a world of greed and obsession that he could never have imagined - one that can only end in terrible tragedy. Marion Ayton Crawford's sparkling translation is accompanied by an introduction exploring Balzac's ability to create distinctive characters from all levels of society as the new, ambitious middle classes replaced France's old imperial ways. Honor De Balzac (1799-1850) failed at being a lawyer, publisher, printer, businessman, critic and politician before, at the age of thirty, turning his hand to writing. His life's work, La Comdie humaine, is a series of ninety novels and short stories which offer a magnificent panorama of nineteenth-century life after the French Revolution. Balzac was an influence on innumerable writers who followed him, including Marcel Proust, mile Zola, Charles Dickens, and Edgar Allan Poe. If you enjoyed Old Goriot, you might like Balzac's Cousin Bette, also available in Penguin Classics.

[Avian Ecology and Conservation in an Urbanizing World, John Marzluff, Reed Bowman, Roarke Donnelly](#) , 2001, 0792374584, 9780792374589. One of the most striking and persistent ways humans dominate Earth is by changing land-cover as we settle a region. Much of our ecological understanding about this process comes from studies of birds, yet the existing literature is scattered, mostly decades old, and rarely synthesized or standardized. The twenty-seven contributions authored by leaders in the fields of avian and urban ecology present a unique summary of current research on birds in settled environments ranging from wildlands to exurban, rural to urban. Ecologists, land managers, wildlife managers, evolutionary ecologists, urban planners, landscape architects, and conservation biologists will find our information useful because we address the conservation and evolutionary implications of urban life from an ecological

and planning perspective. Graduate students in these fields also will find the volume to be a useful summary and synthesis of current research, extant literature, and prescriptions for future work. All interested in human-driven land-cover changes will benefit from a perusal of this book because we present high altitude photographs of each study area.

This important new book written from direct observation of otter populations in Scotland, is the first attempt at a scientific description of populations and behaviour of this species. This essential research offers a fascinating insight into the ecology of mammals living in a hostile environment and provides a much needed basis for active conservation management.

9780520202429. "The editors and authors have produced an important work in the ongoing debate about the effect and efficacy of U.S. drug policy. Authoritative in its analysis and comprehensive in its embrace, this work will contribute importantly to the policy debate. A must-read for anybody concerned about developing a strategy to improve the health and well-being of our communities."--Ronald Dellums, Member of Congress"Crack in America is a devastating, sad, angry, though always scholarly book about the many failures of our national drug policy. The contributors make a convincing case that America is unable to solve the problems associated with crack because it is unwilling to deal with extreme economic and racial inequality except by stigmatizing and punishing the unequal. The book is of urgent importance--a powerfully persuasive and illuminating inquiry about America. I wish it could be required reading for the White House and all the agencies responsible for the country's drug problems."--Herbert J. Gans, Columbia University"Indispensable for understanding the real roots of hard drug abuse in America's inner cities. It shows brilliantly how our drug policies have made our drug problem worse and points the way out of the drug war morass. A passionate and ultimately hopeful book."--Kurt Schmoke, Mayor of Baltimore"Crack in America accurately and forcefully examines in detail the myth and the reality of crack. It is a must-read for any American concerned about drugs in our society and for any reader valuing honesty and scholarship compellingly presented."--Robert W. Sweet, U.S. District Judge"A penetrating analysis by a variety of scholars which explodes many of the government propagated myths regarding crack cocaine."--Joseph D. McNamara, Stanford University"Reinerman, Levine and their colleagues bring a keen sociological sensibility to their analysis of our contemporary moral panic. These essays make clear that crack policy is more the problem than the so-called crack epidemic. And they go on to disentangle the intricate ways in which American culture and economy, and particularly our racism, classicism and sexism, are implicated both in the use of crack and its repression."--Frances Fox Piven, Dept. of Political Science, CUNY Graduate Center"Scholarly, lucid, and readable. . .the most original and thoughtful analysis of the American crack panic. The contributors demonstrate compellingly the relationship between social justice and public health."--Lester Grinspoon, M.D., Harvard Medical School"An immensely rich book and an extraordinary source

of information. . . . Since crack is not only America's but the world's latest demon drug, and since rational alternatives to repression are at the order of the day the world over, the book is indispensable reading for concerned students, scholars, politicians, and citizens everywhere."--Henner Hess, Goethe-Universität (Frankfurt, Germany)

[Under Ground: How Creatures of Mud and Dirt Shape Our World, Yvonne Baskin](#) , 2006, 1597269387, 9781597269384.

In childhood, the backyard, the flowerbed, the beach, puddles, lakes, and streams are infinitely fascinating. It is a mistake to leave that "childish" fascination with mud behind. The soils of the Earth, whether underneath our feet or pressurized beneath tons of ocean water, hold life in abundance. A handful of garden dirt may harbor more species than the entire aboveground Amazon. The robotic rovers Spirit and Opportunity made headlines as they searched the Martian landscape for signs of life. But while our eyes have been turned toward the skies, teeming beneath us and largely unexplored lies what Science magazine recently called the true "final frontier." A growing array of scientists is exploring life in soils and sediments, uncovering a living world alien to our own senses--and yet one whose integrity turns out to be

crucial to life above ground. Yvonne Baskin takes the reader from the polar desert of Antarctica to the coastal rain forests of Canada, from the rangelands of Yellowstone National Park to the vanishing wetlands of the Mississippi River basin, from Dutch pastures to English sounds, and beyond. She introduces exotic underground creatures and shows us what scientists are learning about their contribution to sustaining a healthy world above ground. She also explores the alarming ways in which air pollution, trawl fishing, timber cutting, introductions of invasive species, wetland destruction, and the like threaten this underground diversity and how their loss, in turn, affects our own well being. Two-thirds of the world's biological diversity exists in soils and underwater sediments, and yet most of us remain unaware of these tiny multitudes that run the planet beneath the scenes. In *Under Ground*, Baskin reveals the startling ways in which that life, whether in our own back yards, in fields and forests, or in the furthest reaches of the Earth, is more significant and fascinating than we once imagined.

[Margret and Flynn, 1875, , Kathleen Duey](#) , 2008, 0142410195, 9780142410196. The year is 1875, and twelve-year-old orphan Margret and her sister, Libby, are living with the kind Mrs. Fredriksen in her sod house in rural Littleton, Colorado. Margret would be happy to stay forever, but she knows that Libby, with her basic distrust of anyone other than Margret, will have them moving soon enough. Then a tornado sweeps through, bringing with it an injured horse. Immediately Margret lays claim to the horse, naming him Flynn, nursing him back to health, and teaching herself to ride. Now more than ever, Margret yearns for some stability in her life. Somehow, she's got to find a way to convince Libby to stay so she can make Flynn hers. Powerfully written and historically accurate, this is a great addition to the series that's tailor-made for girls who love horses and historical fiction.

[Sex & Secrets: Crimes Involving Australian Women Since 1880, Judith A. Allen](#) , 1990, 0195548396, 9780195548396.

This book is both a detailed study of criminal acts involving Australian women since 1880 and a feminist analysis of their social and political significance. Based on previously unpublished archival documents, including court reports, coroners' reports, and those of prisons and child welfare organizations, Allen's findings show that infanticide, prostitution, and sexual and other assaults involving women have been much more prevalent than generally believed. Contending that this lack of official attention is due to the crimes' connection with the sexual relationships between men and women, Allen demonstrates that such a false perception of their incidence has disguised their significance in the processes of social

change that have occurred over the last century. This study will be of particular value for courses in women's studies, criminology, and the sociology of law and of gender.
