[The Science of Doctor Who, Paul Parsons](#) , 2010, 080189560X, 9780801895609. Almost fifty years after he first crossed the small screen, Doctor Who remains a science fiction touchstone. His exploits are thrilling, his world is mind-boggling, and that time travel machine known as the Tardis almost certainly an old-fashioned blue police box, once commonly found in London. Paul Parsons's plain-English account of the real science behind the fantastic universe portrayed in the Doctor Who television series provides answers to such burning questions as whether a sonic screwdriver is any use for putting up a shelf, how Cybermen make little Cybermen, where the toilets are in the Tardis, and much more. Taking the show as a starting point episode-by-episode in some cases Parsons dissects its scientific concepts. In addition to explaining why time travel is possible and just how that blue police box works, Parsons discusses who the Time Lords are and how we may one day be able to regenerate just like them ponders the ways that the doctor's two hearts might work and introduces us to a terrestrial animal with five details the alien populations and cosmology of the Whovian Universe and relates them to what we currently know about our universe compares the robotics of the show with startlingly similar real-world applications This slender, equation-free discussion is penned by a Ph.D. cosmologist and is ideal beach reading for anyone who loves science and watches the show no matter which planet the beach is on.

[Telling Times: Writing and Living, 1950-2008, Nadine Gordimer](#) , 2011, 1408800969, 9781408800966. Never before has Gordimer, awarded the Nobel Prize for Literature in 1991, published such a comprehensive collection of her nonfiction. Telling Tales represents the full span of her works in that field—from the twilight of white rule in South Africa to the fight to overthrow the apartheid regime, and most recently, her role over the past seven years in confronting the contemporary phenomena of violence and the dangers of HIV. The range of this book is staggering, and the work in totality celebrates the lively perseverance of the life-loving individual in the face of political tumult, then the onslaught of a globalized world. The abiding passionate spirit that informs "A South African Childhood," a youthful autobiographical piece published in The New Yorker in 1954, can be found in each of the book's ninety-one pieces that span a period of fifty-five years. Returning to a lifetime of nonfiction work has become an extraordinary experience for Gordimer. She takes from one of her revered great writers, Albert Camus, the conviction that the writer is a "responsible human being" attuned not alone to dedication to the creation of fiction but to the political vortex that inevitably encompasses twentieth- and twenty-first-century life. Born in 1923, Gordimer, who as a child was ambitious to become a ballet dancer, was recognized at fifteen as a writing prodigy. Her sensibility was as much shaped by wide reading as it was to eye-opening sight, passing on her way to school the grim labor compounds where black gold miners lived. These twin decisive—literature and politics—infuse the book, which includes historic accounts of the political atmosphere, firsthand, after the Sharpeville Massacre of 1960 and the Soweto uprising of 1976, as well as incisive close-up portraits of Nelson Mandela and Desmond Tutu, among others. Gordimer revisits the eternally relevant legacies of Tolstoy, Proust, and Flaubert, and engages vigorously with contemporaries like Susan Sontag, Octavio Paz, and Edward Said. But some of her most sensuous writing comes in her travelogues, where the politics of Africa blend seamlessly with its awe-inspiring nature—including spectacular recollections of childhood holidays beside South Africa's coast of the Indian Ocean and a riveting account of her journey the length of the Congo River in the wake of Conrad. Gordimer's body of work is an extraordinary vision of the world that harks back to the sensibilities—political, moral, and social—of Dickens and Tolstoy, but with a decidedly vivid contemporary consciousness. Telling Times becomes both a literary exploration and extraordinary

document of social and political history in our times.

[The Eagle's Last Triumph: Napoleon's Victory at Ligny, June 1815, Andrew Uffindell](#) , 2006, 1853676888, 9781853676888. Napoleon won his final victory on June 16th, 1815 at Ligny, shortly before suffering a crushing defeat at Waterloo. Facing two enemy armies Wellingtons Anglo-Allied and Bluechers Prussian he aimed his main attack against Bluecher at Ligny and diverted Wellingtons attention by engaging his forward elements at Quatre Bras. The Eagles Last Triumph is the single most comprehensive examination of this vital aspect of the 1815 campaign available in English. Having put the battle at Ligny into perspective, the author provides a clear account of the action in detail, including much eye-witness testimony. The complex story of Wellington and Bluechers cooperation throughout the struggle against the French is revealed, with new light on Wellingtons promises of prompt aid to the Prussians in the early stages of the campaign promises which he failed to keep. The reasons for General dErlons failure to support the French forces at either Ligny or Quatre Bras are traced, and how the main culprits in the fiasco later sought to cover up their responsibility. The Eagles Last Triumph is a vivid military epic, providing a cogent and lucid explanation of why Napoleon, victorious at Ligny, met with utter defeat just two days later at Waterloo.

[Here Be Dragons: How the Study of Animal and Plant Distributions Revolutionized Our Views of Life and Earth, Dennis McCarthy](#) , 2011, 0199595666, 9780199595662. Why do we find polar bears only in the Arctic and penguins only in the

Antarctic? Why do oceanic islands often have many types of birds but no large native mammals? As Charles Darwin and Alfred Russel Wallace travelled across distant lands studying the wildlife they both noticed that the distribution of plants and animals formed striking patterns - patterns that held strong clues to the past of the planet. The study of the spatial distribution of living things is known as biogeography. It is a field that could be said to have begun with Darwin and Wallace. In this lively book, Denis McCarthy tells the story of biogeography, from the 19th century to its growth into a major field of interdisciplinary research in the present day. It is a story that encompasses two great, insightful theories that were to provide the explanations to the strange patterns of life across the world - evolution, and plate tectonics. We find animals and plants where we do because, over time, the continents have moved, separating and coalescing in a long, slow dance; because sea levels have risen, cutting off one bit of land from another, and fallen, creating land bridges; because new and barren volcanic islands have risen up from the sea; and because animals and plants vary greatly in their ability to travel, and separation has caused the formation of new species. The story of biogeography is the story of how life has responded and has in turn altered the ever changing Earth. It is a narrative that includes many fascinating tales - of pygmy mammoths and elephant birds; of changing landscapes; of radical ideas by bold young scientists first dismissed and later, with vastly growing evidence, widely accepted. The story is not yet done: there are still questions to be answered and biogeography is a lively area of research and debate. But our view of the planet has been changed profoundly by biogeography and its related fields: the emerging understanding is of a deeply interconnected system in which life and physical forces interact dynamically in space and time.

[Flight, Adam Thorpe](#) , 2013, 0099539764, 9780099539766. The exhilarating and gripping new novel from Adam Thorpe. Bob Winrush used to fly passengers, then worked for years as a 'freight dog', flying consignments of goods and sometimes people to all the corners of the world -- including bush-strips in warzones: 'real flying,' as he called it. Until, one day, he walked away from a deal that didn't smell right -- something a freight dog should never do. Now working as a private pilot for an Emirate prince in Dubai, he finds that moment of refusal catching up with him. Caught between those who want to find out more and those who want to cover their traces, he becomes a marked man, and flees to a remote Scottish island. Pursued by both armed assassins and a ruinous, bitter divorce, he struggles to re-fashion himself in this barren, beautiful place, taking on another identity. But back in the world of smuggled AK-47s and heroin, the stakes are rising. Despite the presence of Judith, the lovely environmentalist, memories of his uglier flights return to haunt him. Even in the furthest Hebrides his past is with him, and the predators are closing in. Adam Thorpe's tenth novel is an extraordinary amalgam: a vertiginous, page-turning thriller and a masterful work of literary fiction. Fast, funny and very frightening, Flight shows a new facet of this most brilliant of writers.

Precisely written, replete with advanced code examples, and based on Randall Maddox' extensive experience teaching advanced C++, this book gives working C++ developers the insights and sophisticated techniques they need to build superior software infrastructure. Maddox begins by introducing the context required to support a distributed Web application in a Unix environment. He then presents the utility classes that illustrate crucial design and implementation issues and serve as building blocks for a distributed software architecture. Coverage includes concrete data types, templates, containers, namespaces, error handling, and an automated solution for the hazards of dynamic memory allocation. Maddox reviews C++ program startup and memory usage in detail, laying the groundwork for a full of understanding of multiprocessing, multithreading, and interprocess communication. Unlike most advanced C++ books, *Distributed Application Programming in C++* goes beyond coding, introducing superior strategies for enterprise software development. Maddox presents key design/implementation tradeoffs, managing source code organization, build-time issues, the run-time environment, and more. For all professional developers who want to master the use of advanced C++ features in real-world distributed applications.

[Formalities in Copyright Law: An Analysis of Their History, Rationales and Possible Future, ISSN 0926-9800, Stef van Gompel](#) , 2011, 9041134182, 9789041134189. "At present, copyright is 'automatic'. From the moment an original work is created, the author enjoys all the benefits that copyright protection entails, without the need to complete a registration, deposit the work, mark it with a copyright notice, or comply with any other statutorily prescribed formality. However, the digital revolution has caused a paradigm shift in the way copyright-protected works are created and consumed. Copyright law is now facing significant challenges arising from the need to establish legal certainty over copyright claims, improve rights clearance, and enhance the free flow of information. Inevitably, proposals to introduce formalities in copyright law (or reintroduce them, as the absence of formalities has not always been the norm) have risen to prominence in legal debate. This book examines whether reintroducing copyright formalities is legally feasible. Based on a comprehensive and thorough analysis of copyright formalities, it sets out to establish the extent to which the current copyright system allows

for their reintroduction. To this end, the author describes the role and functions of formalities, revisits the history of formalities at the national and international levels, examines the scope of the international prohibition on formalities, and scrutinizes the rationales behind this prohibition, including an in-depth examination of the validity of the argument that copyright is a 'natural right' and therefore should be protected independently of formalities. The author skilfully evaluates and contrasts the conflicting theories according to which formalities, on the one hand, add legal certainty to claims on the ownership of property, and, on the other, hamper individual authors from seeking adequate protection for their works. This book makes an important contribution to legal science by answering questions that so far have been neglected or only marginally addressed. To the degree that current copyright law permits reintroducing formalities, the author posits the specifications that will determine to a great extent what role and functions they may eventually fulfil: depending on the aims to be achieved, lawmakers must choose which types of formalities shall be imposed, and what their legal consequences shall be. This book goes a long way towards reinforcing the foundation for those decisions"--Provided by publisher.

[A Terrible Splendor: Three Extraordinary Men, a World Poised for War, and the Greatest Tennis Match Ever Played, Marshall Fisher](#) , 2009, 0307393941, 9780307393944. Before Federer versus Nadal, before Borg versus McEnroe, the greatest tennis match ever played pitted the dominant Don Budge against the seductively handsome Baron Gottfried von Cramm. This deciding 1937 Davis Cup match, played on the hallowed grounds of Wimbledon, was a battle of titans: the world's number one tennis player against the number two; America against Germany; democracy against fascism. For five superhuman sets, the duos brilliant shotmaking kept the Centre Court crowd and the world spellbound. But the match's significance extended well beyond the immaculate grass courts of Wimbledon. Against the backdrop of the Great Depression and the brink of World War II, one man played for the pride of his country while the other played for his life. Budge, the humble hard-working American who would soon become the first man to win all four Grand Slam titles in the same year, vied to keep the Davis Cup out of the hands of the Nazi regime. On the other side of the net, the immensely popular and elegant von Cramm fought Budge point for point knowing that a loss might precipitate his descent into the living hell being constructed behind barbed wire back home. Born into an aristocratic family, von Cramm was admired for his devastating good looks as well as his unparalleled sportsmanship. But he harbored a dark secret, one that put him under increasing Gestapo surveillance. And his situation was made even more perilous by his refusal to join the Nazi Party or defend Hitler. Desperately relying on his athletic achievements and the global spotlight to keep him out of the Gestapo's clutches, his strategy was to keep traveling and keep winning. A Davis Cup victory would make him the toast of Germany. A loss might be catastrophic. Watching the mesmerizingly intense match from the stands was von Cramm's mentor and all-time tennis superstar Bill Tilden, a consummate showman whose double life would run in ironic counterpoint to that of his German pupil. Set at a time when sports and politics were inextricably linked, *A Terrible Splendor* gives readers a courtside seat on that fateful day, moving gracefully between the tennis match for the ages and the dramatic events leading Germany, Britain, and America into global war. A book like no other in its weaving of social significance and athletic spectacle, this soul-stirring account is ultimately a tribute to the strength of the human spirit.

[Here But Not Here: A Love Story, Lillian Ross](#) , 2001, 1582431108, 9781582431109. In this memoir, a renowned journalist tells the remarkable story of the passionate life she shared for 40 years with William Shawn, legendary editor of The New Yorker. An enduring love, however startling or unconventional, feels unalterable, predestined, compelling, and intrinsically normal to the couple immersed in it, so I would have to say that I had an intrinsically normal life for over four decades with William Shawn. Shawn was married, yet Ross and Shawn created a home together a dozen blocks south of the Shawns' apartment, raised a child, and lived with discretion. Their lives intertwined from the 1950s until Shawn's death in 1992. Ross describes how they met and the intense connection between them; how Shawn worked with the best writers of the period; how, to escape their developing liaison, Ross moved to Hollywood - only to return to New York and to the relationship.

[The Limits to Debate: A Revised Theory of Semantic Presupposition, ISSN 0068-676X, Noel Burton-Roberts](#) , 1989, 0521361508, 9780521361507. Exponents and critics of semantic presupposition have almost invariably based their discussion on the ('Standard') definition of presupposition implied by Frege and Strawson. In this study Noel Burton-Roberts argues convincingly against this definition, that leads it to a three-valued semantics. He presents a very simple semantic definition which is weaker, more general and leads to a semantics more easily interpreted as two-valued with gaps. The author shows that a wide range of intuitive facts that eluded the Standard definition follow directly from this ('Revised') definition itself: facts about the presuppositions of compound sentences and modal sentences, about

presuppositional conflict and about differences in the logical status of simple sentences suffering from presupposition failure. The book includes a detailed argument that an ambiguity of natural language negation, generally assumed to be necessary to the defence of semantic presupposition, is neither possible nor necessary in a presuppositional semantics. Noel Burton-Roberts has made an authoritative contribution to a debate which has involved philosophers and linguists for many years. His command of the issues, his clarity of exposition and his theoretical insight may well serve to change the boundaries of that debate.

In Unconventional Warfare operations it may be impossible or unwise to use conventional military munitions as tools in the conduct of certain missions. It may be necessary instead to fabricate the required munitions from locally available or unassuming materials. The purpose of this manual is to increase the potential of Special Forces and guerrilla troops by describing in detail the manufacture of munitions from seemingly innocuous locally available materials. Manufactured, precision devices almost always will be more effective, more reliable, and easier to use than improvised ones, but shelf items will just not be available for certain operations for security or logistical reasons. Therefore the operator will have to rely on materials he can buy in a drug or paint store, find in a junk pile, or scrounge from military stocks. Also, many of the ingredients and materials used in fabricating homemade items are so commonplace or innocuous they can be carried without arousing suspicion. The completed item itself often is more easily concealed or camouflaged. In addition, the field expedient item can be tailored for the intended target, thereby providing an advantage over the standard item in flexibility and versatility. The manual contains simple explanations and illustrations to permit construction of the items by personnel not normally familiar with making and handling munitions. These items were conceived in-house or, obtained from other publications or personnel engaged in munitions or special warfare work. This manual includes methods for fabricating explosives, detonators,

propellants, shaped charges, small arms, mortars, incendiaries, delays, switches, and similar items from indigenous materials.

[God's livestock policy, Stan Apps](#) , 2008, . God's Livestock Policy is Stan Apps' self-ordained "mini-Bible... sort of a commentary on the real Bible." Employing satire as incisive as that which one might find in e.e. cummings and The New Republic, Apps' poems problematize God, configuring the deity as a grasping extension of Man's urge for sovereignty, a populist construct by which we are roped, doped, and branded. Heaven here is a bureaucratic machine, earth a lamentable mistake, and humans the lowing livestock. God's Livestock Policy is published as part of the TrenchArt: Parapet Series.

The twenty pound, webbed-footed and clawed *Myocastor coypus* or nutria is capable of devouring up to a quarter of its weight every day. Its two large orange teeth can rip apart anything that looks like vegetation including crops, lawns, and trees. Native to South America, the nutria's only value is its fur. The citizens of Twin River weren't happy when they escaped their pens and took over the town. They called them swamp beavers and they blamed Big Al Craft for it. Swamp Beaver Fever is an outrageous and lighthearted yarn concerning the odd and unusual life and times of Alphonse Craft. Young Alphonse never considered himself unusual or odd, not anymore than his father, Big Al, who christened him in 1970 with his own name but never his own story - not even a photograph. Little Alfie always had the sense that Big Al was protecting him from something. He liked that. He figured it's what fathers do, but he never imagined he would need three aliases. Big Al has big plans from Little Alfie. The trouble is that Big Al has his own troubles - he never divulged his that he worked for the US government from 1960 to 1969 in Cuba, France, and Colombia, in drug enforcement - they weren't very good at their job. Big Al Craft returns with nothing but a large bag bearing a pair of big-toothed swamp beavers, wrestling for scraps above a hidden layer of cocaine. That's how it all started. Little Alfie quickly learns the Craft craft of anonymity.

[Tool-Being: Heidegger and the Metaphysics of Objects, Graham Harman](#) , 2013, 0812697731, 9780812697735. Tool-Being offers a new assessment of Martin Heidegger's famous tool-analysis, and with it, an audacious reappraisal of Heidegger's legacy to twenty-first-century philosophy. Every reader of Being and Time is familiar with the opposition between readiness-to-hand (Zuhandenheit) and presence-at-hand (Vorhandenheit), but commentators usually follow Heidegger's wishes in giving this distinction a limited scope, as if it applied only to tools in a narrow sense. Graham Harman contests Heidegger's own interpretation of tool-being, arguing that the opposition between tool and broken tool is not merely a provisional stage in his philosophy, but rather its living core. The extended concept of tool-being developed here leads us not to a theory of human practical activity but to an ontology of objects themselves. Tool-Being urges a fresh and concrete research into the secret contours of objects. Written in a lively and colorful style, it will be of great interest to anyone intrigued by Heidegger and anyone open to new trends in present-day philosophy.

Every Christmas, Americans reopen their hearts to Jimmy Stewart and his journey through Bedford Falls. Yet few of us know that the movie was based on "The Greatest Gift," a short story by Philip Van Doren Stern, privately printed as a Christmas card to the author's friends in 1943. This deluxe edition of "The Greatest Gift" marks the fiftieth anniversary of the release of *It's a Wonderful Life*. Delighted readers will immediately recognize George Bailey from the movie - together with the guardian angel, the snowy scene on the bridge, and Bedford Falls - and will identify with George's realization that life is a gift and every individual indispensable. Specially commissioned artwork illustrates scenes from "The Greatest Gift," and an afterword by the author's daughter, Marguerite Stern Robinson, reveals how this enchanting story inspired the beloved movie.

[Pressure Vessel Design Manual, Dennis R. Moss, Michael Basic](#) , 2013, 0123870003, 9780123870001. Pressure vessels are closed containers designed to hold gases or liquids at a pressure substantially different from the ambient pressure. They have a variety of applications in industry, including in oil refineries, nuclear reactors, vehicle airbrake reservoirs, and more. The pressure differential with such vessels is dangerous, and due to the risk of accident and fatality around their use, the design, manufacture, operation and inspection of pressure vessels is regulated by engineering authorities and guided by legal codes and standards. *Pressure Vessel Design Manual* is a solutions-focused guide to the many problems and technical challenges involved in the design of pressure vessels to match stringent standards and codes. It brings together otherwise scattered information and explanations into one easy-to-use resource to minimize research and take readers from problem to solution in the most direct manner possible. Covers almost all problems that a working pressure vessel designer can expect to face, with 50+ step-by-step design procedures including a wealth of equations, explanations and data. Internationally recognized, widely referenced and trusted, with 20+ years of use in over 30 countries making it an accepted industry standard guide. Now revised with up-to-date ASME, ASCE and API regulatory

code information, and dual unit coverage for increased ease of international use

[Maximize Your Quality of Life, Thomas Matt](#) , 2012, 0985547006, 9780985547004. Do you know that three simple lifestyle changes will improve your quality of life? Many of us don't realize what those changes are, and still many more that do know lack the motivation to consistently apply those changes. Obesity rates in America are higher than ever and impact healthcare costs. The standard American diet (SAD), starch-dominated and loaded with salt and sugar, places most Americans on a consumption cycle that leads to greater cravings even as the number of calories skyrockets. Sugar in the blood is actually toxic, and the body uses insulin to control it. But that leads to more hunger, and the cycle repeats. Combined with the labor-saving devices of modern society, and our increasingly sedentary lifestyle, that sugar has nowhere to go but in our storage system: body fat. But there's hope. Movement improves your brain functions, joints, and digestion. Consistent activity can help stabilize blood sugar levels, and reduce the insulin cycle that stores energy as fat. Would you like to feel better in every aspect of your life? Would you like to feel younger, look better, and live longer? You probably know what you should be doing to take care of yourself, but so many fad diets use gimmicks that they forgo lasting change. Meanwhile, the onslaught of fast food, processed meals, and a rush-around lifestyle make it difficult to sustain the benefits. Still you probably want to be fitter, trimmer, and sleep better, all of which are the result of a healthier lifestyle. Tom Matt has spent the past two years interviewing experts for his motivational fitness show,

"Boomers Rock," and is presenting those findings in his new book, "Maximize Your Quality of Life, The 200% Solution." In his uniquely accessible manner and fired-up enthusiasm, Tom shares his own lessons learned the hard way with the expert knowledge about health, nutrition, and fitness. This convenient volume packs an amazing amount of information, carefully edited to be immediately useful.

Classic from the year 2008 in the subject English Language and Literature Studies - Literature, language: English, abstract: Chapter I Among the many fatalities attending the bloom of young desire, that of blindly taking to the confectionery line has not, perhaps, been sufficiently considered.

How is the son of a British yeoman, who has been fed principally on salt pork and yeast dumplings, to know that there is satiety for the human stomach even in a paradise of glass jars full of sugared almonds and pink lozenges, and that the tedium of life can reach a pitch where plum-buns at discretion cease to offer the slightest excitement? Or how, at the tender age when a confectioner seems to him a very prince whom all the world must envy—who breakfasts on macaroons, dines on meringues, sups on twelfth-cake, and fills up the intermediate hours with sugar-candy or peppermint—how is he to foresee the day of sad wisdom, when he will discern that the confectioner's calling is not socially influential, or favourable to a soaring ambition? I have known a man who turned out to have a metaphysical genius, incautiously, in the period of youthful buoyancy, commence his career as a dancing-master; and you may imagine the use that was made of this initial mistake by opponents who felt themselves bound to warn the public against his doctrine of the Inconceivable. He could not give up his dancing-lessons, because he made his bread by them, and metaphysics would not have found him in so much as salt to his bread. It was really the same with Mr. David Faux and the confectionery business. His uncle, the butler at the great house close by Brigford, had made a pet of him in his early boyhood, and it was on a visit to this uncle that the confectioners' shops in that brilliant town had, on a single day, fired his tender imagination. He carried home the pleasing illusion that a confectioner must be at once the happiest and the foremost of men, since the things he made were not only the

[Handel's Trumpeter: The Diary of John Grano, John Baptist Grano](#) , 1998, 0945193963, 9780945193968. The Grano diary is one of the treasures of the Bodleian Library's Rawlinson collection of manuscripts. It was written by a musician who had worked under the direction of George Frederick Handel at the opera house in London's Haymarket. From 30 May 1728 to 23 September 1729 -- the exact period of the diary -- he was a prisoner for debt in the Marshalsea, that curious institution which gave the pensioned and relatively privileged inmates of the Master's Side a certain freedom to come and go -- and to entertain the friends who were drawn here by sociability, compassion or the desire to test its louche reputation. Within this framework, John Baptist Grano's diary becomes a record of social maneuvering, but with the underlying theme of a man trying to salvage his career and reestablish himself in the world outside the prison gate.

[Truth and Grace Together Is the Gospel, Alphonso F. Kelly](#) , 2010, 0982857012, 9780982857014. Truth and Grace Together Is The Gospel helps the reader to understand that the truth of the Gospel is only half of the Gospel message. What was told to us by the Holy Spirit and by the written Word of God (the Bible) is only part of what the Lord gave to Believers. The other half of the message is the Grace of God. The gifts, mercy, and favor that the Lord gave to us is the Gospel as well. He gave us the understanding of the Truth of the message and He gave us the perception of the Grace of the message. Understanding and Perception is also play a major role in the message of the Lord Jesus. If you don't know what I mean, then you should look into the study of these four Gospel concepts. [The Colour of Law, Mark Gimenez](#) , 2008, 0748109609, 9780748109609. A. Scott Fenney is a hotshot corporate lawyer at a big Dallas firm. At 33, in the prime of his life, he rakes in \$750,000 a year, drives a Ferrari and comes home every night to a mansion in Dallas's most exclusive neighbourhood. He also comes home to one of Dallas's most beautiful women, with whom he has a much-loved daughter, Boo. For Fenney, life could not be better. But when a senator's son is killed in a hit-and-run, Fenney is asked by the state judge to put his air-conditioned lifestyle on hold to defend the accused: a black, heroin-addicted prostitute - a very different client to the people Fenney usually represents. And, more importantly, she is not going to be paying Ford Stevens \$350 an hour for the privilege of his services. Under fire from all sides, Fenney drafts in a public defender to take the case on. Yet as Scott prepares to hand over to Bobby, he feels increasingly guilty about the path he is taking, because Scott still believes in the principle of justice. The question is: does he believe in it strongly enough to jeopardise everything in his life he holds dear? And to what lengths is the dead man's power-hungry father prepared to go to test Fenney's resolve?

[Lehrter Station \(John Russell World War II Spy Thriller #5\): A John Russell WWII Thriller, David Downing](#) , 2012, 1616950757, 9781616950750. WWII has ended But the danger has just begun for a spy caught between political superpowers. Book 5 in the John Russell historical thriller series. Paris, November 1945. John Russell is walking home along the banks of the Seine on a cold and misty evening when Soviet agent Yevgeny Shchepkin falls into step alongside him. Shchepkin tells Russell that the American intelligence will soon be asking him to undertake some low grade espionage on their behalf assessing the strains between different sections of the German Communist Party and that Shchepkin's own bosses in Moscow want him to accept the task and pass his findings on to them. He adds that refusal will put Russell's livelihood and life at risk, but that once he has accepted it, he'll find himself even further entangled in the Soviet net. It's a lose-lose situation. Shchepkin admits that his own survival now depends on his ability to utilize Russell.

The only way out for the two of them is to make a deal with the Americans. If they can come up with something the Americans want or need badly enough, then perhaps Russell will be forgiven for handing German atomic secrets over to Moscow and Shchepkin might be offered the sort of sanctuary that also safeguards the lives of his wife and daughter in Moscow. Every decision Russell makes now is a dangerous one. From the Hardcover edition.

[Interpersonal Communication, Sarah Trenholm, Arthur Jensen](#) , 2004, 0195170741, 9780195170740. Interpersonal Communication interweaves current research and theory with the skills needed to communicate effectively in today's complex and diverse "global village." Now in its fifth edition, this bestseller explains the principles and theoretical underpinnings of interpersonal communication while enriching students' everyday interactions with new interpersonal skills. The authors' five-point model of communication competence focuses on the keys to becoming a better communicator. Introduced in the first chapter and employed throughout the book, this useful model emphasizes how communication constructs relationships and how relationships in turn encourage or constrain communication practices. Every chapter contains fascinating applications of communication practices. Drawn from anthropology, ethnology, history, psychology, and popular culture, these applications illustrate how the information and skills needed for effective interpersonal communication can enrich students' enjoyment of most of life's activities. Interpersonal Communication, 5/e, is ideal for introductory classes on interpersonal communication. Revised and Updated for the Fifth Edition Chapter 4, Verbal Competence, consolidates material on gender and language previously covered in separate chapters. It presents

traditional findings and accompanying criticisms side-by-side in order to encourage careful interpretation and discussion. Chapter 8, Self Competence, includes an expanded discussion and a new case study on the best way to handle coming-out disclosures—a topic that college students are encountering more and more frequently. Chapter 11, Intimate Relationships, provides additional information on factors that lead to the break-up of personal relationships and discusses how gender roles affect relational satisfaction. It also offers a sampling of John Gottman's seminal work on relational conflict. Chapter 12, Professional Relationships, has been revised substantially. It contains new sections on organized narratives and ritual, as well as discussions of how to manage professional relationships and set boundaries to separate home, work, and community. Chapter 13, Cultural and Historical Influences, features a new discussion of several basic variables that define cultural difference, followed by an examination of how American cultural patterns fit those variables.

[British Cinema of the 1950s: The Decline of Deference, Sue Harper, Vincent Porter](#) , 2003, 019815934X, 9780198159346. In this definitive and long-awaited history of 1950s British cinema, Sue Harper and Vincent Porter draw extensively on previously unknown archive material to chart the growing rejection of post-war deference by both filmmakers and cinema audiences. Competition from television and successive changes in government policy all forced the production industry to become more market-sensitive. The films produced by Rank and Ealing, many of which harked back to wartime structures of feeling, were challenged by those backed by Anglo-Amalgamated and Hammer. The latter knew how to address the rebellious feelings and growing sexual discontents of a new generation of consumers. Even the British Board of Film Censors had to adopt a more liberal attitude. The collapse of the studio system also meant that the screenwriters and the art directors had to cede creative control to a new generation of independent producers and film directors. Harper and Porter explore the effects of these social, cultural, industrial, and economic changes on 1950s

An earlier report from the NAO is also available, see (HCP 1035, session 2006-07, ISBN 9780102951219). Some 4 million people are still active contributors to work-based pension schemes (final salary schemes), with approximately some 20 million people having at some point contributed to such schemes with the value of the managed funds exceeding 700 billion. The Pensions Regulator (TPR), established in 2005, took over regulatory responsibility for such schemes. The Committee states that the TPR has acted to put the regulation of such schemes on a firmer footing, taking greater account of risk and possesses stronger powers to obtain information and intervene to protect members' benefits. The Committee also states though that the TPR has made a slower start in the regulation of money purchase schemes with room for improvement in the standards of scheme governance and communication with members. Further work is also required to improve the information held by the TPR about schemes and make use of that information to effectively regulate individual schemes.

[Hesse Place Name Indexes: Identifying Place Names Using Alphabetical and Reverse Alphabetical Indexes, Roger Phillip Minert](#) , 2000, 096784200X, 9780967842004. "For the first time, a reverse alphabetical index is available to the public.

Such indexes have been known and valued among researchers in the Family History Library for some time, but none have been available in print or microform. The Reverse Alphabetical Index allows the researcher to determine the name of a town when the first part of the name (whether one or more letters) is missing. This is a common problem caused by torn pages, ink blots, tight bindings, poor microfilm quality, etc. By using this index, the researcher can also determine the official spelling for towns when variant spellings occur in old records. The book includes a regular alphabetical index of all the towns in the province as well as regular and reverse alphabetical listings of over 400 names of German kingdoms, duchies, principalities, counties, rivers, mountain ranges, and other geopolitical and topographical entities." - from the publisher.

[EU Foreign Investment Law, Angelos Dimopoulos](#) , 2011, 0199698600, 9780199698608. The regulation of foreign investment represents one of the most topical and controversial subjects in European Union law and international investment law. EU foreign investment law is emerging as a critically important issue, particularly since the introduction of EU competence over foreign direct investment after the Lisbon Treaty and the recent successful challenge of the compatibility of Member States Bilateral Investment Treaties with EU law. Within this framework, the book sets out to identify whether and to what extent the EU has become an international actor in the field of foreign investment. Exploring the existing legal framework on the scope and exercise of EU competence and its legal effects, it examines the foundations upon which EU investment policy is based and will be based in the future. The book addresses questions relating to the definition of foreign investment; the scope of EU competences; the exercise of EU powers; the substantive content of existing and future EU International Investment Agreements; and the objectives of EU investment policy and its EU law effects. From this grounding, the study widens to scrutinize the influence that the EU exerts on international law and regulation of foreign investment. Paying careful attention to the substantive content and orientation of EU International Investment Agreements, the book takes a comparative approach to the content of Bilateral Investment Treaties, as well as to the ramifications of EU foreign investment regulation for international law, especially with regard to the EU's international responsibility. Taking into account the recent developments in the field, this book provides the first comprehensive treatment of the legal, practical, and political concerns that the creation of an EU common investment policy creates.

[Political Beethoven, Nicholas Mathew](#) , 2013, 1107005892, 9781107005891. Musicians, music lovers and music critics have typically considered Beethoven's overtly political music as an aberration; at best, it is merely notorious, at worst, it is denigrated and ignored. In *Political Beethoven* Nicholas Mathew returns to the musical and social contexts of the composer's political music throughout his career - from the early marches and anti-French war songs of the 1790s to the grand orchestral and choral works for the Congress of Vienna - to argue that this marginalized functional art has much to teach us about the lofty Beethovenian sounds that came to define serious music in the nineteenth century. Beethoven's much-maligned political compositions, Mathew shows, lead us into the intricate political and aesthetic contexts that shaped all of his oeuvre, thus revealing the stylistic, ideological and psycho-social mechanisms that gave Beethoven's music such a powerful voice - a voice susceptible to repeated political appropriation, even to the present day.

[Vehicles of Transmission, Translation, and Transformation in Medieval Textual Culture, ISSN 2034-1660, Carlos Fraenkel, Robert Wisnovsky, Jamie Fumo, Faith Wallis](#) , 2011, 250353452X, 9782503534527. In this volume the McGill University Research Group on Transmission, Translation, and Transformation in Medieval Cultures and their collaborators initiate a new reflection on the dynamics involved in receiving texts and ideas from antiquity or from other contemporary cultures. For all their historic specificity, the western European, Arab/Islamic and Jewish civilizations of the Middle Ages were nonetheless co-participants in a complex web of cultural transmission that operated via translation and inevitably involved the transformation of what had been received. This three-fold process is what defines medieval intellectual history. Every act of transmission presumes the existence of some 'efficient cause' - a translation, a commentary, a book, a library, etc. Such vehicles of transmission, however, are not passive containers in which cultural products are transported. On the contrary: the vehicles themselves select, shape, and transform the material transmitted, making ancient or alien cultural products usable and attractive in another milieu. The case studies contained in this volume attempt to bring these larger processes into the foreground. They lay the groundwork for a new intellectual history of medieval civilizations in all their variety, based on the core premise that these shared not only a cultural heritage from antiquity but, more importantly, a broadly comparable 'operating system' for engaging with that heritage. Each was a culture of transmission, claiming ownership over the prestigious knowledge inherited from the past. Each depended on translation. Finally, each transformed what it appropriated.

A House of Gathering gives her poetry long-overdue critical attention and discusses Sarton's place among modern and contemporary world authors. As working poets, the contributors offer knowledgeable discussions of Sarton's craft. The essays cover a broad range of topics, from Pastan's memoirs of Sarton as her teacher at Radcliffe in the 1950s, to Charlotte Mandel's close scrutiny of Sarton's poetic forms in her earliest collections, to Bobby Caudle Rogers's consideration of the poetic sequence as a form in contemporary American poetry, to Keith Norris's reading of Sarton as a postmodernist. William Stafford's essay on Sarton's A Private Mythology offers eloquent testimony as to the poet's "breakthrough" in mid-career. In addition, A House of Gathering includes an original interview with May Sarton; a recent poem, "Friendship and Illness"; working drafts for "Old Lovers at the Ballet"; a letter from Sarton to H.D.; and several original photographs. These essays will appeal to readers interested in poetry and literature in general, in women's studies, and in May Sarton.

[The Battle History of the U.S. Marines: A Fellowship of Valor, Joseph H. Alexander](#) , 1999, 0060931094, 9780060931094.

The Battle History of the U.S. Marines is the only single-volume, definitive combat history of the United States Marines, covering more than two centuries of battles in the air and on land and sea--literally "from the Halls of Montezuma to the shores of Tripoli," from Suribachi to Somalia. It presents graphic narratives of such epic engagements as Belleau Wood, Wake Island, Guadalcanal, Tarawa, Peleliu, Saipan, Okinawa, the Chosin Reservoir, Khe Sanh, and many more. You will meet the Marine sharpshooters in the "fighting tops" of our young country's legendary frigates, as they took on the British navy during the American revolution; discover the exploits of Marine pilots in the "Banana Wars," in the skies over

the Pacific during World War II, and later over Korea and Vietnam; and share the tension and terror of stalking the enemy on a Marine patrol in the jungles of the Pacific islands and Southeast Asia. An award-winning military historian and a retired Marine colonel, Joseph H. Alexander served two tours of duty in Vietnam. He tells the Marine combat story in a no-holds-barred narrative, with dozens of sidebars full of fascinating vignettes and Marine lore accompanied by nearly one hundred rare combat photographs and vivid sketches and numerous maps.

It has originated in a series of invited lecture courses at various universities in different countries. This is reflected in its informal style of exposition and presentation of key results in the subject. In addition to treating quantum communication, entanglement and algorithms in great depth, this book also addresses a number of interesting miscellaneous topics, such as Maxwell's demon, Landauer's erasure, the Bekenstein bound and Caratheodory's treatment of the Second law of thermodynamics. All mathematical derivations are based on clear physical pictures which make even the most involved results--such as the Holevo bound-- look comprehensible and transparent. The book is ideal as a first introduction to the subject, but may also appeal to the specialist due to its unique presentation. This book offers a concise and up-to-date introduction to the
