The short stories in this collection follow characters that are plucked away from their normal lives to face wildly abnormal situations. An old coachman must face the death of his passenger; a missionary loses a colleague in the swollen waters of the Turakina River; a cranky ghost wreaks havoc on a Kapiti train; and a bloodied figure travels through time. From a reimagined history to a future where holograms walk the streets, these stories traverse time and genre to explore adventurous frontiers in the past, present, and future.

[Direct Red: A Surgeon's View of Her Life-or-Death Profession, Gabriel Weston](#) , 2010, 0307374416, 9780307374417. In this powerful and sometimes shocking account, a surgeon reveals her experience of hospital life with rare frankness. In her mid-twenties, Gabriel Weston - an arts graduate with no scientific qualification beyond high school-level biology - decided to become a surgeon. She enrolled at night school, then went through many years of medical school and surgical training. Now in her late thirties, she has achieved her ambition and is working as a surgeon in a British hospital. "But I have never quite managed to shake off the feeling that I am an imposter,"she says. "Even when operating, it sometimes seems like I am on the outside looking in."Direct Red is the result of those observations. It is a superbly written, startlingly raw account of her experience of life in a hospital. All her own doubts, mistakes, and incongruous triumphs are faithfully recorded. It is also a revealing and at times chilling account of what she sees around her. The world of surgery is secret and closed - or was until now.ExcerptI knew that this man needed to be opened up immediately. I phoned the on-call consultant, offering to meet him in theatre. "Not so fast," he objected. "You youngsters are always in such a hurry." When he finally did concede that we needed to go to theatre, he picked up a coffee on the way. Physiology forced pace on the situation: once we cut the man open, we were confronted with the sight of the hollow cavern of the patients abdomen filling with blood as quickly as a basin fills with water. This consultant did not have a clue what to do; didnt know the simplest emergency measures. He dressed his incompetence in a mannered slowness of action. It took

him almost an hour to admit he wasn't coping, at which point he shouted at the scrub nurse: "Get me another surgeon! Any surgeon!" The night taught me the paramount value of a quick response.

[Agency in Archaeology](#), [Marcia-Anne Dobres](#), [John E. Robb](#), 2000, 0415207606, 9780415207607. Agency in Archaeology is the first critical volume to scrutinise the concept of agency and to examine in-depth its potential to inform our understanding of the past. Theories of agency recognise that human beings make choices, hold intentions and take action. This offers archaeologists scope to move beyond looking at broad structural or environmental change and instead to consider the individual and the group. Agency in Archaeology brings together nineteen internationally renowned scholars who have very different, and often conflicting, stances on the meaning and use of agency theory to archaeology. The volume is composed of five theoretically-based discussions and nine case studies, drawing on regions from North America and Mesoamerica to Western and central Europe, and ranging in subject from the late Pleistocene hunter-gatherers to the restructuring of gender relations in the north-eastern US.

[Word Smart: Building an Educated Vocabulary](#), [Adam Robinson](#), 2001, 0375762183, 9780375762185. The words people use say a lot about them. Some words say that they are smart, persuasive, and informed. Others say that they don't know what they're talking about. Knowing which words to use and how to use them are keys to getting the most from one's mind and to communicating effectively. To find out which words readers absolutely need to know, The Princeton Review researched the vocabularies of educated adults. The Princeton Review analyzed newspapers from The New York Times to The Wall Street Journal, magazines from Time to Scientific American, and books from current bestsellers to classics. Editors threw out words that most people know and focused on the words that people misunderstand or misuse. TPR also combed through the SAT and other standardized tests to determine which words are tested most

frequently. In this updated third edition, editors give readers the most important words they need to know to score higher. Includes special lists covering: Common usage errors Most frequently tested words on standardized tests Foreign phrases, abbreviations, and terms readers need to know to understand finance, science, computers, and the arts

[The Invisible City, Emili Rosales](#) , 2009, 1846880904, 9781846880902. Emili Rossell, the young owner of one of Barcelona's top galleries, receives an old manuscript written by an Italian architect about the "Invisible City" - an ambitious project dreamt up by King Charles III to build an alternative capital city in the Ebro delta. The manuscript contains hints about a lost masterpiece by the Venetian painter Tiepolo, and the site of the Invisible City is where Emili used to play as a child; spurred on by these reasons, he is plunged into a fascinating extinct world. Juxtaposing the life of the eighteenth-century royal court and the contemporary art world - both with a similar share of intrigue, politics and romance - The Invisible City is a gripping historical mystery and a compelling examination of the forces of power and love.

[Rainwater Harvesting for Drylands and Beyond: Water-harvesting earthworks, , Brad Lancaster](#) , 2008, 0977246418, 9780977246410. Turn water scarcity into water abundance! Earthworks are one of the easiest, least expensive, and most effective ways of passively harvesting and conserving multiple sources of water in the soil. Associated vegetation then pumps the harvested water back out in the form of beauty, food, shelter, wildlife habitat, and passive heating and cooling strategies, while controlling erosion, increasing soil fertility, reducing downstream flooding, and improving water

and air quality. Building on the information presented in Volume 1, this book shows you how to select, place, size, construct, and plant your chosen water-harvesting earthworks. It presents detailed how-to information and variations of a diverse array of earthworks, including chapters on mulch, vegetation, and greywater recycling so you can customize the techniques to the unique requirements of your site. Real life stories and examples permeate the book, including: How curb cuts redirect street runoff to passively irrigate flourishing shade trees planted along the street How check dams have helped create springs and perennial flows in once-dry creeks How infiltration basins are creating thriving rain-fed gardens How backyard greywater laundromats are turning "wastewater" into a resource growing food, beauty, and shade that builds community, and more. How to create simple tools to read slope and water flow More than 225 illustrations and photographs

[Accountability in the European Union, , Carol Harlow](#) , 2002, 0199245932, 9780199245932. The debate over the 'democratic deficit' of the European Union has tended to focus on the legitimacy and representativeness of the European Parliament. It has been the policy-making powers of the Parliament and its struggle to secure the dominant role in law-making which have attracted attention. The dramatic resignation of the Santer Commission early in 1999, following a critical report to the Parliament, highlighted the growing problem of accountability in the European Union and echoed concerns regularly expressed by the European Council during inter-governmental conferences for the efficiency and effectiveness of the Union and its institutions. The resignations were followed by the appointment of President Romano Prodi with a mandate for reform of the Commission. The present book approaches the issue of democratic deficit from the angle of accountability, today seen as an essential element of democratic government. It looks at differing understandings of the concept in the Member States and at various techniques, political, legal, and managerial, by which accountability can be ensured. These include the Parliament as well as national parliaments but extend to less familiar institutions, such as the European Court of Auditors. The book caters for a general readership and is intended for all those who are interested in the governance of the European Union. The author draws the conclusion that in trans-national forms of governance such as the European Union, it is difficult to hold policy-makers to account. Some of the

reasons are institutional, others political and social. Without a vibrant civil society, the very notion of accountability may be a mirage.

Sometimes in the twenty-third century, humanity went extinct - leaving only androids behind. Since then, those humanized robots have been fulfilling humanity's dreams - mining asteroids, colonizing planets, and constructing cities throughout the solar system. And, having learned well from their long-dead masters, they've established a hierarchical society - one with humanoid aristo-rulers at the top and slave-chipped workers at the bottom, performing the lowly tasks all androids were originally created to do. Freya, designed as a concubine for a species that hasn't existed for two hundred years, falls somewhere in the middle. She's been a tour guide and an escort, but jobs are scarce for a 'bot with a useless skill set. So when a mysterious stranger offers to pay her well to deliver a small package from Mercury to Mars, she readily accepts. Unfortunately for Freya, she has just made herself a moving target. Some very powerful, very determined humanoids want whatever is in the package - badly.

[Engineering Graphics with SolidWorks 2013 and Video Instruction, Marie Planchard](#) , 2013, 158503780X,

9781585037803. Engineering Graphics with SolidWorks 2013 and Video Instruction DVD is written to assist technical school, two year college, four year university instructor/student or industry professional that is a beginner or intermediate SolidWorks user. The book combines the fundamentals of engineering graphics and dimensioning practices with a step-by-step project based approach to learning SolidWorks with the enclosed 1.5 hour Video Instruction DVD. Learn by doing, not just by reading. The book is divided into two parts: Engineering Graphics and SolidWorks 3D CAD software. In Chapter 1 through Chapter 3, you explore the history of engineering graphics, manual sketching techniques, orthographic projection, isometric projection, multi-view drawings, dimensioning practices and the history of CAD leading to the development of SolidWorks. In Chapter 4 through Chapter 8, you apply engineering graphics fundamentals and learn the SolidWorks User Interface, Document and System properties, simple parts, simple and complex assemblies, design tables, configurations, multi-sheet, multi-view drawings, Bill of Materials, Revision tables, basic and advanced features. Follow the step-by-step instructions in over 70 activities to develop eight parts, four sub-assemblies, three drawings, and six document templates. Formulate the skills to create and modify solid features to model a 3D FLASHLIGHT assembly. Chapter 9 provides a bonus section on the Certified SolidWorks Associate CSWA program with sample exam questions and initial and final SolidWorks models. Passing the CSWA exam proves to employers that you have the necessary fundamental engineering graphics and SolidWorks competencies. Review individual features, commands, and tools for each project with the books 1.5 hour Video Instruction DVD and SolidWorks Help. The chapter exercises analyze and examine usage competencies based on the project objectives. The book is designed to complement the SolidWorks Tutorials located in the SolidWorks Help menu. Each section explores the SolidWorks Online Users Guide to build your working knowledge of SolidWorks. Desired outcomes and usage competencies are listed for each project. Know your objectives up front. Follow the step-by step procedures to achieve your design goals. Work between multiple documents, features, commands, and properties that represent how engineers and designers utilize SolidWorks in industry. The authors developed the industry scenarios by combining their own industry experience with the knowledge of engineers,

have nonspherical shapes. Examples are soot and mineral aerosols, cirrus cloud particles, snow and frost crystals, ocean hydrosols, interplanetary and cometary dust grains, and microorganisms. It is now well known that scattering properties of nonspherical particles can differ dramatically from those of "equivalent" (e.g., equal-volume or equal-surface-area) spheres. Therefore, the ability to accurately compute or measure light scattering by nonspherical particles in order to clearly understand the effects of particle nonsphericity on light scattering is very important. The rapid improvement of computers and experimental techniques over the past 20 years and the development of efficient numerical approaches have resulted in major advances in this field which have not been systematically summarized. Because of the universal importance of electromagnetic scattering by nonspherical particles, papers on different aspects of this subject are scattered over dozens of diverse research and engineering journals. Often experts in one discipline (e.g., biology) are unaware of potentially useful results obtained in another discipline (e.g., antennas and propagation). This leads to an inefficient use of the accumulated knowledge and unnecessary redundancy in research activities. This book offers the first systematic and unified discussion of light scattering by nonspherical particles and its practical applications and represents the state-of-the-art of this important research field. Individual chapters are written by leading experts in respective areas and cover three major disciplines: theoretical and numerical techniques, laboratory measurements, and practical applications. An overview chapter provides a concise general introduction to the subject of nonspherical scattering and should be especially useful to beginners and those interested in fast practical applications. The audience for this book will include graduate students, scientists, and engineers working on specific aspects of electromagnetic scattering by small particles and its applications in remote sensing, geophysics, astrophysics, biomedical optics, and optical engineering. *

The first systematic and comprehensive treatment of electromagnetic scattering by nonspherical particles and its applications* Individual chapters are written by leading experts in respective areas* Includes a survey of all the relevant literature scattered over dozens of basic and applied research journals* Consistent use of unified definitions and notation makes the book a coherent volume* An overview chapter provides a concise general introduction to the subject of light scattering by nonspherical particles* Theoretical chapters describe specific easy-to-use computer codes publicly available on the World Wide Web* Extensively illustrated with over 200 figures, 4 in color

[Patterns for A Purpose: A Rhetorical Reader, Barbara Fine Clouse](#) , 2010, 0073383953, 9780073383958. With a diverse selection of readings chosen to serve as both models for and springboards into student discussion and writing, Patterns for a Purpose is a rhetorically-arranged reader that encourages thoughtful use of the rhetorical pattern either alone or in combination to achieve various writing purposes. The detailed coverage of the writing process emphasizes the importance of critical reading and thinking, offers a rich variety of writing opportunities - including specific material on argument and persuasion.

[Three Dollars, Elliot Perlman](#) , 2011, 1742752977, 9781742752976. The groundbreaking novel about economic rationalism and its effect on good, honest people. At once humorous and dramatic, Three Dollars is about Eddie, an honest, compassionate man who finds himself, at the age of 38, with a wife, a child and three dollars. How did he get that way? And who is Amanda? He cared about people; he was, Amanda notwithstanding, a good husband, father and son. At any other time the world would have smiled on him. But this was the nineties and the world valued other things. Three Dollars chronicles the present breach of the social contract and its effect on a home near you. It is a brilliantly deft portrait of a man attempting to retain his humanity, his family and his sense of humour in grim and pitiless times: times of downsizing, outsourcing and privatising. It is about the legacy of Thatcherism and its effects on people and their relationships. [Marketing Essentials: For Start-ups & New Business, Jay Jason Bartlett](#) , 1994, 0964431904, 9780964431904.

MARKETING ESSENTIALS FOR START-UPS was put together to give the entrepreneur a fighting chance. It is immediately after take-off that most new businesses are vulnerable. Many times businesses close for reasons the owner knew nothing about. They blame it on the economy. They blame it on the competition. They blame it on the labor force. But it never could have been THEM! More times than not--it was. The overall zeal of running your own business & doing it your own way, is well, just that--yours! You get a great idea for a business, hang a sign on the door, & start selling. Unfortunately, in these days when more than half of all businesses are bankrupt or closed within the first year, your way better be more than just "shooting from the hip" when the doors open in the morning. MARKETING ESSENTIALS FOR START-UPS is a practical guide for implementing a sound business & marketing plan. It includes chapters on Direct Mail, Press Releases, Distribution, Research, Telemarketing, & more. Includes sample plans & agreements for easy editing. [Letters to Amanda: The Civil War Letters of Marion Hill Fitzpatrick, Army of Northern Virginia, Jeffrey C. Lowe, Sam Hodges](#) , 2003, 0865548811, 9780865548817. Sergeant Major Marion Hill Fitzpatrick, a soldier in the 45th Georgia Regiment in the Army of Northern Virginia, wrote his wife Amanda over 100 letters, frequently describing both the horror of combat and the deplorable conditions of hospitals. Fighting in the corps of A. P. Hill, Fitzpatrick, an extremely literate individual, reveals his loyalty for the Confederacy and most of all to his family. His letters reveal a man who longed to be home with his beloved wife and their newborn son. These letters testify to the humanity, courage, and dedication of the Civil War soldier. Although they have been around for over two decades in a private family printing, these letters are published complete with annotations in a paperback edition for the first time.

[Eco House Book, Terence Conran](#) , 2009, 1840915226, 9781840915228. A complete guide to home improvement the environmentally friendly way: whether you want to redecorate or redesign your home, this essential book provides all the information you need to reduce your home's carbon footprint and improve the quality of your life. For 40 years, Terence Conran has been a leader in intelligent design, changing the way we think about and furnish our homes. No, Conran shows us that it is possible to convert our existing homes into greener, healthier places without starting from scratch. Whether you want to redecorate or resign your home, Eco House Book explains how relatively small and economic changes can be made, including simple repairs to improve energy efficiency, water saving tips, and productive gardening, to more dramatic overhauls such as redesigning room use, converting basements and extending your home. Environmental issues should be part of every decision you make on the home front--from selecting fabric for soft furnishings to designing and siting a home extension. Special focus is given to reducing the vast amounts of energy and water that homes consume on a daily basis, with advice on low energy lighting strategies and decorative choices, improving insulation and reducing energy use, the latest green heating systems, alternative ways of generating power, and electricity reducing appliances. As we are urged to change our lifestyles to reduce our carbon footprint and consumption of water, there has never been a better time to green your home.

[A Wodehouse Handbook: The World and Words of P.G. Wodehouse, Volume 2, , ISBN 0955420903, 9780955420900, N. T. P. Murphy, Pelham Grenville Wodehouse](#) , 2006, 095542092X, 9780955420924. Did people really speak like Bertie Wooster? Who was the celebrated Maisie? What does a Jubilee watering trough look like? Where is Loose Chippings? What was "Just Like Mother Makes"? Where does "the exile from home splendour dazzles in vain" come from? What was a gazeka? Why was Bertie Wooster more to be pitied than censured? When did young men-about-town start saying

"What"? How did Boshier Street get its name? While P.G. Wodehouse's way with words has long set a standard for literary humour, much in his writing puzzles the modern reader. Volume Two of A Wodehouse Handbook answers many of the questions that arise when reading Wodehouse - especially the constant flow of quotations and deliberate misquotations that he used so skilfully. These range from the Bible and the Greek and Latin writers he knew so well, through Geoffrey Chaucer to writers like Ogden Nash and Mickey Spillane. Often he incorporated them into his stories so cunningly that the reader sometimes does not recognise them as quotations at all. Wodehouse also made a point of being up to date. From his first book in 1902 to his last in 1975, there are topical jokes, catchphrases, advertisements of the time and extracts from popular songs which everyone recognised when the books were published. In this volume, Norman Murphy explains the many references to people, places, and events that were appreciated by contemporary readers but are often mystifying today. He also identifies for us the myriad quotations that abound in Wodehouse's books and the songs, advertisements and long-forgotten catchphrases that Wodehouse used over seventy-five years. His findings, covering an extraordinary range of language and usage, from Aristotle to Variety magazine, will be of interest to all book-lovers and add to their appreciation and enjoyment of Wodehouse's superb writing.

The popular perception of Netaji Subhas Chandra Bose is that of a warrior-hero and revolutionary leader who led a life of suffering and sacrifice and who during the Second World War waged a great armed struggle for the freedom of India. What is often forgotten is that the warrior paused between battles to reflect on and write about the fundamental political, economic and social issues facing India and the world during his lifetime. Distilled out of a twelve-volume set of his Collected Works, this centenary edition of his Essential Writings is designed to provide a single-volume introduction to the thought of India's foremost militant nationalist.

[Fourier Descriptors and Their Applications in Biology, Pete E. Lestrel](#) , 1997, 0521452015, 9780521452014. The purpose of this book is to introduce Fourier descriptors as a method for measuring the shape of whole, or parts of, organisms. Fourier descriptors refers to the utilization of Fourier analysis, primarily the Fourier series as a curve fitting technique, that can numerically describe the shape of irregular structures such as are commonly found in living organisms. The quantitative characterization of irregular forms is often the first step toward elucidation of the underlying biological processes, whether they be genetic, evolutionary, or functional. The first five chapters discuss the theory behind the use of Fourier descriptors and the remaining chapters show case studies of how they can be used in various fields of biology such as anatomy, cell biology, medicine and dentistry. This is the first book solely devoted to this subject.

[Practical C Programming, Steve Oualline](#) , 1997, 1449313043, 9781449313043. There are lots of introductory C books, but this is the first one that has the no-nonsense, practical approach that has made Nutshell Handbooks famous.C programming is more than just getting the syntax right. Style and debugging also play a tremendous part in creating programs that run well and are easy to maintain. This book teaches you not only the mechanics of programming, but also describes how to create programs that are easy to read, debug, and update.Practical rules are stressed. For example, there are fifteen precedence rules in C (&& comes before || comes before ?:). The practical programmer reduces these to two:Multiplication and division come before addition and subtraction.Contrary to popular belief, most programmers do not spend most of their time creating code. Most of their time is spent modifying someone else's code.

This book shows you how to avoid the all-too-common obfuscated uses of C (and also to recognize these uses when you encounter them in existing programs) and thereby to leave code that the programmer responsible for maintenance does not have to struggle with. Electronic Archaeology, the art of going through someone else's code, is described. This third edition introduces popular Integrated Development Environments on Windows systems, as well as UNIX programming utilities, and features a large statistics-generating program to pull together the concepts and features in the language.

For these purposes a highly specialized methodology was developed for analysing native and denatured metalloproteins as a diagnostic tool for neurodegenerative diseases concerning biometal metabolism. Hereby, the main focus is laid on detailed descriptions of a key method (QPNC-PAGE = quantitative preparative native continuous polyacrylamide gel electrophoresis) for isolating metalloproteins (e.g. copper chaperone for superoxide dismutase) in complex protein mixtures. Accordingly, the practical applications of this method in the fields of analytical chemistry, medicine and structural biology, may invite the reader to choose between different issues of interest and help to find out what QPNC-PAGE really stands for: a new basic principle of gel electrophoresis.

In search of his roots and himself, he instead finds a forgotten uncle in a gloomy back room, and an ugly secret about his beloved father... Returning to

London, Sami finds even more to test him as his young wife Muntaha reveals that she is taking up the hijab. Sami embarks on a wilfully ragged journey in the opposite direction, away from religion but towards what? As Sami struggles to understand Muntaha's newly-deepened faith, her brother Ammar's hip hop Islamism and his father-in-law's need to see grandchildren, so his emotional and spiritual unraveling begins to accelerate. And the more he rebels, the closer he comes to betraying those he loves, edging ever-nearer to the brink of losing everything. Set against a powerfully-evoked backdrop of multi-ethnic, multi-faith London, *The Road from Damascus* explores themes as big as love, faith and hope, and as fundamental as our need to believe in something bigger than ourselves, whatever that might be.

An exciting first edition, *Guide to Graphic Design* helps readers learn the mechanisms used to convey information, integrate ideas into full concepts, but most importantly, to think like a graphic designer. Scott W. Santoro focuses on the principle that design is a layered and evolving profession. The text highlights step-by-step design processes and illustrates how to build good work habits. Creations from top design firms and design school programs are presented in each chapter engaging readers through the book. Designers have contributed short essays on their work style, their studio habits, and their inspirations. Each designer, showing a passion for design and communication, offers a new perspective and approach to possible working methods. MyArtsLab is an integral part of the Santoro program. Key learning applications include, Closer Look tours, 12 Designer Profile videos and Writing About Art. A better teaching and learning experience The teaching and learning experience with this program helps to: Personalize Learning - MyArtsLab is an online homework, tutorial, and assessment program. It helps students prepare for class and instructor gauge individual and class performance. [Linux Shells by Example, Ellie Quigley](#) , 2000, 0130147117, 9780130147110. Full of classroom-proven examples from Silicon Valley's top shell programming instructor, *Linux Shells by Example* starts with the basics and carries you all the way to expert-level techniques. Start by discovering what Linux shells are, what they do, and how they integrate with

other "Linux" utilities and processes. Next, master creating, running, and debugging shell scripts; using grep, sed, and gawk, and much more. This edition contains especially detailed and valuable coverage of Gawk, including pattern scanning, text filtering, reporting, and many other key applications. You'll review the Bourne Again (bash) and TC (tcsh) shells in depth, discovering how they compare, and when to use each. The book contains hands-on exercises for every topic, an appendix with detailed syntax listings, examples of many useful Linux utilities, comparison charts, and all the book's code on CD-ROM -- an awesome resource. For everyone who wants to learn shell programming with Linux, including system administrators, application developers, Web professionals, and power users.

[Days Like Floating Water: A Story of Modern China](#), 2008, 097993060X, 9780979930607. Straying from the travel magazine China of the Great Wall or the Forbidden City, this engaging memoir immerses itself in the reality of a nation struggling to emerge into the 21st century. When Susan McKee and her husband Robert travel to China to teach English near a large but antiquated city, they learn to view China from the inside out, without guile or agenda. Challenges await them at every turn, from navigating the complicated communist bureaucracy to simply finding food they can recognize at the market. As they begin to earn the trust and friendship of their students, they gain a deeper understanding of human experience and how it translates across political and cultural boundaries.

[Corporate Social Responsibility: Discussion Paper, Corporations & Markets Advisory Committee, Victoria. Corporations and Markets Advisory Committee](#), 2005, 0975761927, 9780975761922. In March 2005, the Parliamentary Secretary to the Treasurer, the Hon. Chris Pearce MP, referred an issue to the Corporations and Markets Advisory Committee for consideration and advice. The issue concerned the extent to which the duties of directors under the Corporations Act 2001 should include corporate social responsibilities or explicit obligations to take account of the interests of certain classes of stakeholders other than shareholders. This paper reviews the questions raised in the Terms of Reference in the context of the current framework for the governance of companies, developments in corporate practice and debate about the responsibilities of companies. Reference is made to discussion and developments at the international as well as local level. The paper reflects the Advisory Committee's own research and preliminary consideration of the issues. Its purpose is to provide information, draw out issues and stimulate discussion, as part of the Committee's public consultation process.

[Albert Tucker, Gavin Fry, Albert Tucker](#), 2005, 0947349472, 9780947349479. Albert Tucker is one of the major figures in a group of exceptional painters which includes Sidney Nolan and Arthur Boyd, who, during the 1940s in Melbourne caused an artistic revolution which influenced the course of Australian painting for the rest of the century. Tough, determined, original and uncompromising, Tucker sacrificed everything that hindered his art and accepted every challenge that forwarded it. Greatly respected and collected by perceptive curators and connoisseurs, Tucker's work has not until now had a comprehensive monograph devoted to his work which reveals the full scope and extent of his unique

painterly vision. Gavin Fry's penetrating and fluent study fuses the adventures of the artist's life with the record of his artistic development in a single, fascinating story. The author follows Tucker's course from a childhood overshadowed by poverty and family tragedy during the Great Depression through his strenuous self-education in the Victorian State Library and the untutored life-drawing sessions with the Victorian Artists' Society. Fry follows the story of Tucker's steady acceptance by the public and leading galleries and collectors of his own country, and his increasing engagement with landscape and nature, people and portraits, and social concerns that paradoxically echo his early radical interests and the struggle for artistic freedom. With him we become aware of what it meant, in a period of change and revolution in Australian culture, to become an artist, and of the will and dedication required to that end.

In the six essays contained in this text the author reflects on the ethical implications of psychoanalytical insight. Among the topics covered are: Freud's discovery that the human mind can only be studied through a partnership between observer and observed; how clinical evidence is made up of a unique mixture of subjective and objective; an observation on the way issues of identity affect not only individuals but classes of people; and an examination of the links between ego formation and institutions and traditions. Erikson also discusses the origins of ethics and looks at psychiatry as the pragmatic Western version of the universal journey to self-awareness.

[Every Day's a Good Day, William Pike](#) , 2008, 0143304194, 9780143304197. William Pike, a 22-year-old school teacher from Auckland, came to the attention of the nation on 25 September 2007 when, while tramping on Mt Ruapehu, he was critically injured during a volcanic eruption. William was trapped inside the hut, surrounded by mud and rocks and in freezing temperatures, while his friend went for help. When the rescue team arrived he was suffering from such severe hypothermia he was not expected to survive. Defying the odds, William then spent two months in Waikato Hospital, at first fighting for his life as his kidneys and liver shut down, and then in slow, steady recovery. But, despite having had his lower right leg amputated, just barely keeping his left leg and facing yet more reconstruction surgery, William is philosophical about his life-altering injuries. He is determined to return to Mt Ruapehu within the next year to complete the six-day tramp that was cut short by the eruption. William Pike's inspirational story begins with his trip to Nepal at the age of 12, which awakened his interest in outdoor pursuits of all kinds, and continues through his teens and early twenties as a mad-keen trampler, climber, surf-lifesaver and diver. William then retells his miraculous survival tale and reveals his plans for the future with infectious optimism and an approach to life that has remained intact - Every Day's A Good Day.

[Sharpeville: An Apartheid Massacre and Its Consequences, Tom Lodge](#) , 2011, 0192801856, 9780192801852. On March 21, 1960, a line of 150 white policemen fired 1344 rounds into a crowd of several thousand people assembled outside a police station, protesting against the Apartheid regime's racist "pass" laws. The gunfire left in its wake sixty-seven dead and one hundred and eighty six wounded. Most of the people who were killed were shot in the back, hit while running away. The Sharpeville Massacre, as the event has become known, marked the start of armed resistance in South Africa, and prompted worldwide condemnation of South Africa's Apartheid policies. In Sharpeville, Tom Lodge explains how and why the Massacre occurred, looking at the social and political background to the events of March 1960 as well as the long-term consequences of the shootings. Lodge offers a gripping account of the Massacre itself as well as the wider events that accompanied the tragedy, particularly the simultaneous protest in Cape Town which helped prolong the political crisis that developed in the wake of the shootings. Just as important, he sheds light on the long term consequences of these events. He explores how the Sharpeville events affected the perceptions of black and white political leadership in South Africa as well as South Africa's relationship with the rest of the world, and he describes the development of an international "Anti-Apartheid" movement in the wake of the shootings. In South Africa today, March 21 is a public holiday, Human Rights Day, and for many people, it remains a day of mourning and memorial. This book illuminates this pivotal event in South African history.

Abelson focuses on a host of high profile think tanks - including the Brookings Institution, the Heritage Foundation, and the Project for the New American Century - and on the public and private channels they rely on to influence important and controversial foreign policies, including the development and possible deployment of a National Missile Defense and George Bush's controversial war on terror. In the process of uncovering how some of the nation's most prominent think tanks have established themselves as key players in the political arena, he challenges traditional approaches to assessing policy influence and suggests alternative models.

[William Matthews: Working the West,](#) , 2007, 0811857417, 9780811857413. Watercolorist William Matthews has long been hailed as the preeminent painter of the American West. In this new collection of 180 staggering paintings, he captures the full range of western experience: endless skies, high plains, the last working cowboys, the Navajothe mystique of the Living Desert. Steeped in introspection and connected to land, tradition, and identity, Matthews' work evokes a place that is authentic, anachronistic, and dynamic. An essay by award-winning writer Annie Proulx provides insight into both the ranching and the art-making life, resulting in a glorious homage to this ancient terrainsome of the last untamed wilderness in America.

A practical and concise introduction to CoffeeScript, a programming language that compiles into JavaScript and that makes working with JavaScript easier. The book lays out the basics of the language, its syntax, and the interesting features that set it apart from JavaScript. It should satisfy anyone with an intermediate level of understanding of JavaScript who needs a conceptual and practical introduction to CoffeeScript. The book is based around a practical project, leading you through the building of a simple HTML-based 2D game, and explaining the language's philosophy, syntax, and features step-by-step along the way. You'll be able to see results on-screen from the very beginning, starting with a simple JavaScript drawing function transformed into CoffeeScript. The game's code is based on well-understood principles and prior art, using common, simple programming patterns that are easy to grasp while also demonstrating CoffeeScript's expressiveness. This is a fun and fast-paced book that rewards you for each completed step with interesting game features. You will finish the book with the sense of accomplishment that comes from building something fun, as well as having gained a solid understanding of CoffeeScript and an interest in exploring its more advanced features.

[The Splendor of Antiquity, Cheryl Anne Gardner](#) , 2009, 0982214537, 9780982214534. Blurring the boundaries between

reality and fantasy, can faith and science unite to save two desolate hearts. Will love triumph over rumor and deceit, and can a man and a woman put history aside and rediscover just how deep their passion for each other lies. Antiquity follows French Archaeologists Joliette Deneauve and Olivier Botton, as they grapple with the mystic implications of a discovery hidden deep within the Siberian mountains. As Joliette pursues her obsession with death, she becomes bewitched by the spirit of a long dead God-King, and torn with despair, her grip on reality is tested. As Joliette attempts to decipher the incantations of a strange burial rite, painful memories from her own past begin to overcome her, and her faith in Botton is tested. Will she learn to trust him again, or will they slip farther away from one another, into the abyss and beyond.

The dynamic environment of investment banks, hedge funds, and private equity firms comes to life in David Stowell's introduction to the ways they challenge and sustain each other. Capturing their reshaped business plans in the wake of the 2007-2009 global meltdown, his book reveals their key functions, compensation systems, unique roles in wealth creation and risk management, and epic battles for investor funds and corporate influence. Its combination of perspectives drawn from his industry and academic backgrounds delivers insights that illuminate the post-2009 reinvention and acclimation processes. Through a broad view of the ways these financial institutions affect corporations, governments, and individuals, Professor Stowell shows us how and why they will continue to project their power and influence. Emphasizes the needs for capital, sources of capital, and the process of getting capital to those who need it. Integrates into the chapters ten cases about recent transactions, along with case notes and questions Accompanies cases with spreadsheets for readers to create their own analytical frameworks and consider choices and opportunities.

Built around a regimen of biologically identical hormones and other natural treatments, Dr Hotze's model will help you obtain and maintain health and wellness naturally so that you can enjoy a better quality of life. In *Hormones, Health, and Happiness* you are shown how to reach and maintain optimal cell, tissue, and organ functioning so that you will feel at your peak physically, mentally, and emotionally. After your twenties, your hormone levels have already peaked and begun a slow, inexorable decline that may cause you to lose energy and gain weight. You may experience mood problems or have difficulty with thinking, concentration, and short-term memory. Your immune system is likely to become less efficient, leaving you vulnerable to infectious diseases. Dr Hotze reveals how you can restore hormones to their optimal levels using natural, biologically identical hormones in a safe, effective way that preserves vitality as you mature.

[The Whiteman Scenario, Steve McCurdy](#) , 2011, 0976117940, 9780976117940. On the eve of the Nixon resignation, the Soviet Union takes an action that elevates the Strategic Air Command and the North American Air Defense Command to just short of full combat alert status. Under normal circumstances, there would be a direct escalation of responses on both sides that could take us to the brink of nuclear launch. On this evening, though, there is an uncharacteristic hesitation on the part of normally hawkish US leadership. Through riveting narrative the story shows that the hesitation was a reluctance to break an iron clad do not disturb order from the President. A reluctance based in the fear that the event MUST have a rational explanation - an explanation that will vanish in a conflagration of nuclear exchanges if Nixon, in his depressed and panicked state, interprets the event as an attack (and a way out of the Watergate debacle.) The actions of an observant off-duty missile launch officer cause the Joint Chiefs and SAC commanders to back down from an immanent launch. The story is based on a real event and documented evidence that during the Yom Kippur war it was Kissinger, and not Nixon, who handled elevation in DefCon and preparedness. Nixon, it is reported, told Kissinger to handle it. Im dying. Theyre trying to kill me. This was in reference to the Watergate press feeding frenzy that had pushed Nixon to the point of emotional collapse. The Secret Service agent on duty was ordered to lock the door from Nixons Camp David office to the swimming pool for fear he might try to drown himself. The story compresses a series of many

such actual events into the evening before the resignation.

[Recognizing States: International Society and the Establishment of New States Since 1776: International Society and the Establishment of New States Since 1776, Mikulas Fabry](#) , 2010, 0199564442, 9780199564446. This book examines recognition of new states, the practice historically employed to regulate membership in international society. The last twenty years have witnessed new or lingering demands for statehood in different areas of the world. The claims of some, like those of Bosnia and Herzegovina, Eritrea, Croatia, Georgia and East Timor, have achieved general recognition; those of others, like Kosovo, Tamil Eelam, South Ossetia, Abkhazia and Somaliland, have not. However, even as most of these claims gave rise to major conflicts and international controversies, the criteria for acknowledgment of new states have elicited little systematic scholarship. Drawing upon writings of English School theorists, this study charts the practice from the late eighteenth century until the present. Its central argument is that for the past two hundred years state recognition has been tied to the idea of self-determination of peoples. Two versions of the idea have underpinned the practice throughout most of this period - self-determination as a negative and a positive right. The negative idea, dominant from 1815 to 1950, took state recognition to be acknowledgment of an achievement of de facto statehood by a people desiring independence. Self-determination was expressed through, and externally gauged by, self-attainment. The positive idea, prevalent since the 1950s, took state recognition to be acknowledgment of an entitlement to independence in international law. The development of self-determination as a positive international right, however, has not led to a disappearance of claims of statehood that stand outside of its confines. Groups that are deeply dissatisfied with the countries in which they presently find themselves continue to make demands for independence even though they may have no positive entitlement to it. The book concludes by expressing doubt that contemporary international society can

find a sustainable basis for recognizing new states other than the original standard of de facto statehood.

Information modeling technology--the open representation of information for database and other computing applications--has grown significantly in recent years as the need for universal systems of information coding has steadily increased. EXPRESS is a particularly successful ISO International Standard language family for object-flavored information modeling. This cogent introduction to EXPRESS provides numerous, detailed examples of the language family's applicability to a diverse range of endeavors, including mechanical engineering, petroleum exploration, stock exchange asset management, and the human genome project. The book also examines the history, practicalities, and implications of information modeling in general, and considers the vagaries of normal language that necessitate precise communication methods. This first-ever guide to information modeling and EXPRESS offers invaluable advice based on years of practical experience. It will be the introduction that students as well as information and data modeling professionals have been waiting for.

[Autumn: The City, David Moody](#) , 2011, 0575091355, 9780575091351. AUTUMN is a self-publishing phenomenon which has been downloaded more than half a million times since publication in 2001 and has spawned a series of sequels and a movie starring Dexter Fletcher and David Carradine. Film rights to HATER, another book by Moody, have been bought by Guillermo del Toro (HELLBOY, PAN'S LABYRINTH) and Mark Johnson (producer of the CHRONICLES OF NARNIA films). A disease of unimaginable ferocity has torn across the face of the planet leaving billions dead. A small group of survivors shelter in the remains of a devastated city, hiding in terror as the full effects of the horrific infection start to become clear. The sudden appearance of a company of soldiers again threatens the survivors' fragile existence. Do they bring with them hope, help and answers, or more pain, fear and suffering?

Memories and stories about great aunts, uncles, grandparents and family members in both sides of the Pifer, Wanamaker, Guerin families. "As early as memory allows I could run the grassy path between my house and Grandma Pifer's farm, a distance of about 200 feet or so which started at our back door. Often barefoot in the summer, I would push open the wooden screen door and step down on the cold, smooth sandstone step my Dad had placed there when the house was built in 1940. In the early years, my next step would be into a dirt path, but later, Mother laid bricks across the back of the house in a three-foot wide path, which allowed me and my Dad on our many trips in and out - not to track dirt on Mom's clean linoleum floor in the kitchen. From the back of our house, the yard stretched down a hill to the large cement block garage, to the end of the yard and the beginning of the fields. I could see far in those years but later the fields grew into thick woods where deer made their homes." Ch 2, pg 5.

The topics covered comprise Atomic and Molecular Electronic States, Atomic Orbitals, Hybrid Orbitals, Molecular Symmetry, Molecular Geometry and Bonding, Crystal Field Theory, Molecular Orbital Theory, Vibrational Spectroscopy, and Crystal Structure. The central theme running through these topics is symmetry, molecular or crystalline. The problems collected in this volume originate in examination papers and take-home assignments that have been part of the teaching of the book's two senior authors' at The Chinese University of Hong Kong over the past four decades. The authors' courses include Chemical Bonding, Elementary Quantum Chemistry, Advanced Inorganic Chemistry, X-Ray Crystallography, etc. The problems have been tested by generations of students taking these courses.

Program 1 demonstrates proper setup and adjustment of the light microscope to achieve images of the highest possible quality. Key properties of light and lenses--magnification, diffraction, refraction and reflection, resolution and contrast--are explained in the context of the various adjustments. The second program in the series introduces three powerful contrast-generating modes of microscopy. It covers phase contrast, differential interference contrast (DIC), and immunofluorescence microscopy, and points out the advantages of each. The third program introduces a type of microscopy with yet a higher resolving power, electron microscopy. Included is a discussion of the two most common forms of electron microscopy--transmission and scanning EM--in the context of an ongoing infectious disease investigation. Finally, Program Four in the series demonstrates how a functional cell component can be traced in living cells using a fluorescent analog and special fluorescence imaging techniques. [Backpacking Idaho, Douglas Lorain](#) , 2013, 0899973469, 9780899973463. A virtually undiscovered backpacking paradise, Idaho has numerous wilderness areas of mind-boggling size. Backpackers can find complete solitude, wildlife, and some of North America's most outstanding scenery. Idaho's mountains also boast great weather--fewer thunderstorms than the central Rockies, less rain than Oregon and Washington, and cooler summer temperatures than California. Backpacking Idaho takes you to what author Doug Lorain calls a "Shangri-la" for backpackers. In the craggy Selkirk Mountains you'll find lush forests, small cirque lakes, and jagged granite peaks. Watch for ospreys, river otters, and belted kingfishers in the swift Selway River. Explore hundreds of miles of trails in the gently rolling forested hills in north-central Idaho, or head to Hell's Canyon, the deepest gorge in North America, where you'll find both alpine tundra and cactus-studded desert.

[The Limits of Reason in Hobbes's Commonwealth, Michael P. Krom](#) , 2011, 1441182616, 9781441182616. The Limits of Reason in Hobbes's Commonwealth explores Hobbes's attempt to construct a political philosophy of enduring peace on the foundation of the rational individual. Hobbes's rational individual, motivated by self-preservation, obeys the laws of the commonwealth and thus is conceived as the model citizen. Yet Hobbes intimates that there are limits to what such an actor will do for peace, and that the glory-seeker - "too rarely found to be presumed on" - is capable of a generosity that is necessary for political longevity. Michael P. Krom identifies this as a fundamental contradiction in Hobbes's system: he builds the commonwealth on the rational actor, yet acknowledges the need for the irrational glory-seeker. Krom argues that Hobbes's attempt to establish a "king of the proud" fails to overcome the limits of reason and the precariousness of politics. This book synthesizes recent work on Hobbes's understanding of glory and political stability, challenging the view that Hobbes succeeds in incorporating glory-seekers into his political theory and explores the implications of this for contemporary political philosophy after Rawls.

[Puppetry and Puppets: An Illustrated World Survey, Eileen Blumenthal](#) , 2005, 0500512264, 9780500512265. Puppets have existed in one form or another in almost every culture throughout the history of man. In Puppetry: A World History, Eileen Blumenthal provides a comprehensive overview of the history and technique of puppetry and examines in depth and detail the unique nature and abilities of puppets and the countless roles they have played in human societies across the globe for thousands of years. Blumenthal draws examples from an astonishing array of puppeteers and performances, as well as works of art and historical artifacts to provide readers with a comprehensive view of the world of constructed actors and the eclectic, and often eccentric, artists who created them. From bunraku to Miss Piggy, from the shadow puppets of Java to Howdy Doody, from African marionettes with outsize genitalia to sweet and loveable Lamb Chop, from Senor Wences's famous hand (literally) puppet to the minimalism of Russian puppet master Sergei Obraztsov.

[Soul Beginnings: 8 Strategies for Overcoming Life's Challenges, Shellie Anderson-Tazi](#) , 2004, 0425198227, 9780425198223. At 29, Shellie Anderson-Tazi lost her baby to premature labor. Nine months later, she was diagnosed with breast cancer and given less than five years to live. And just when she thought it couldn't get any worse, her husband walked out on her. But rather than admit defeat, Shellie decided to take matters into her own hands. Through hard work and perseverance, a little exercise and a lot of prayer, she was able to overcome her sorrows-and her cancer. Today, she's happily married with a beautiful son. Everyone goes through hard times. What's easy to forget is that the experiences we call tragedies can lead to unexpected blessings-if we know how to overcome them. In Soul Beginnings, Shellie uses her own experiences to show readers how to triumph over tough times and emerge victorious. She outlines an eight-step program that will teach people how to put winning strategies into play, including: - Step 1: P.U.S.H.-Pray Until Something Happens- Step 2: Rally up support- Step 3: Give it up, turn it loose - Step 4: Get an attitude of gratitude- Step 5: Exercise for healing- Step 6: Accept your shortcomings- Step 7: Dream on...- Step 8: Pay it forward

[Neurobiology of Mental Illness, Dennis S. Charney, Benjamin S. Bunney, Eric J. Nestler](#) , 2001, 0195147804, 9780195147803. Advances in molecular and cellular biology and in the basic neurosciences are now bringing the revolution in molecular medicine to the field of psychiatry. This is the first comprehensive text to chart that progress. In 70 concise chapters it describes the current state of knowledge about the neurobiological mechanisms underlying psychiatric disorders and shows how this information has the potential to dramatically improve treatment and ultimately lead to prevention. The text has been written by world-renowned experts in basic neuroscience and the pathophysiology and treatment of psychiatric disorders. It begins with a concise overview of the basic neurosciences followed by an evaluation of the tools that are available for the study of mental disorders in humans. The core of the book is a series of

consistenetly organized sections on affective disorders, anxiety disorders, psychotic disorders, substance abuse disorders, psychiatric disorders in children, and miscellaneous diagnostic entities. Chapters are written in a clear style that is easily accessible to practicing psychiatrists, and yet they are detailed enough to interest researchers and academics. The book is well-illustrated and contains selected references that will prove valuable to readers. Both as a textbook and a reference work, *Neurobiology of Mental Illness* represents a unique and valuable resource for students of medicine, neuroscience and psychology; psychiatric residents and other trainees in the mental health professions; practicing psychiatrists and psychologists; and other healthcare professionals.

[An Introduction to Empirical Legal Research, Lee Epstein, Andrew D. Martin](#) , 2013, 0199669058, 9780199669059. Is the death penalty a more effective deterrent than lengthy prison sentences? Does a judge's gender influence their decisions? Do independent judiciaries promote economic freedom? Answering such questions requires empirical evidence, and arguments based on empirical research have become an everyday part of legal practice, scholarship, and teaching. In litigation judges are confronted with empirical evidence in cases ranging from bankruptcy and taxation to criminal law and environmental infringement. In academia researchers are increasingly turning to sophisticated empirical methods to assess and challenge fundamental assumptions about the law. As empirical methods impact on traditional legal scholarship and practice, new forms of education are needed for today's lawyers. All lawyers asked to present or assess empirical arguments need to understand the fundamental principles of social science methodology that underpin sound

empirical research. An Introduction to Empirical Legal Research introduces that methodology in a legal context, explaining how empirical analysis can inform legal arguments; how lawyers can set about framing empirical questions, conducting empirical research, analysing data, and presenting or evaluating the results. The fundamentals of understanding quantitative and qualitative data, statistical models, and the structure of empirical arguments are explained in a way accessible to lawyers with or without formal training in statistics. Written by two of the world's leading experts in empirical legal analysis, drawing on years of experience in training lawyers in empirical methods, An Introduction to Empirical Legal Research will be an invaluable primer for all students, academics, or practising lawyers coming to empirical research - whether they are embarking themselves on an empirical research project, or engaging with empirical arguments in their field of study, research, or practice.
