[Theoretical Atomic Physics, Harald Friedrich](#) , 2006, 354025644X, 9783540256441. level, and a good understanding of the links to classical mechanics is almost always helpful. The aim of Theoretical Atomic Physics remains to provide the reader with a solid foundation of this sort of advanced quantum mechanics. In preparing the third edition I have again tried to do justice to the rapid development of the field. I have included references to important new work whenever this seemed appropriate and easy to do. Chapter 1 now includes a section on processes involving (wave packets of) continuum states and also an expanded treatment of the semiclassical approximation. Chapter 3 begins with a section illuminating the characteristic differences in the near-threshold properties of long-ranged and shorter-ranged potentials, and the first section of Chap. 4 contains a more elaborate discussion of scattering lengths. As a further special topic in Chap. 5 there is a section describing some aspects of atom optics, including discussions of the interactions of atoms with material surfaces and with light-fields. The appendix on special mathematical functions has been slightly expanded to accommodate a few results that I repeatedly found to be useful. I am grateful to many colleagues who continue to inspire me with numerous discussions involving atomic physics, quantum mechanics and semiclassical connections, in particular Robin Cote at the University of Connecticut, Manfred Kleber at the Technical University Munich and Jan-Michael Rost at the Max-Planck-Institute for Complex Systems in Dresden.

[The Contrary Farmer, Gene Logsdon](#) , 1995, 0930031741, 9780930031749. Gene Logsdon has become something of a rabble-rouser in progressive farm circles, stirring up debates and controversies with his popular New Farm magazine column, The Contrary Farmer. One of Logsdons principle contrarieties is the opinion that popular images of the vanishing American farmer, notwithstanding greater numbers of people in the U.S. will soon be growing and raising a greater share of their own food than at any time since the last century. Instead of vanishing, more and more farmers will be cottage farming, part-time. This detailed and personal account of how Logsdons family uses the art and science of agriculture to achieve a reasonably happy and ecologically sane way of life in an example for all who seek a sustainable lifestyle. In The Contrary Farmer, Logsdon offers the tried-and-true, practical advice of a manual for the cottage farmer, as well as the subtler delights of a meditation in praise of work and pleasure. The Contrary Farmer will give its readers tools and tenets, but also hilarious commentaries and beautiful evocations of the Ohio countryside that Logsdon knows as his place in the universe.

[A Little History of Philosophy, Nigel Warburton](#) , 2012, 0300187793, 9780300187793. Philosophy begins with questions about the nature of reality and how we should live. These were the concerns of Socrates, who spent his days in the ancient Athenian marketplace asking awkward questions, disconcerting the people he met by showing them how little they genuinely understood. This engaging book introduces the great thinkers in Western philosophy and explores their most compelling ideas about the world and how best to live in it. In forty brief chapters, Nigel Warburton takes us on a chronological tour of the major ideas in the history of philosophy. He provides interesting and often quirky stories of the lives and deaths of thought-provoking philosophers from Socrates, who chose to die by hemlock poisoning rather than live on without the freedom to think for himself, to Peter Singer, who asks the disquieting philosophical and ethical questions that haunt our own times. Warburton not only makes philosophy accessible, he offers inspiration to think, argue, reason, and question in the tradition of Socrates. "A Little History of Philosophy" presents the grand sweep of humanity's search for philosophical understanding and invites all to join in the discussion.

[Court of Remorse: Inside the International Criminal Tribunal for Rwanda, Thierry Cruvellier](#) , 2010, 0299236730, 9780299236731. When genocidal violence gripped Rwanda in 1994, the international community recoiled, hastily withdrawing its peacekeepers. Late that year, in an effort to redeem itself, the United Nations Security Council created the International Criminal Tribunal for Rwanda to seek accountability for some of the worst atrocities since World War II:

the genocide suffered by the Tutsi and crimes against humanity suffered by the Hutu. But faced with competing claims, the prosecution focused exclusively on the crimes of Hutu extremists. No charges would be brought against the Tutsi-led Rwandan Patriotic Front, which ultimately won control of the country. The UN, as if racked by guilt for its past inaction, gave in to pressure by Rwanda's new leadership. With the Hutu effectively silenced, and the RPF constantly reminding the international community of its failure to protect the Tutsi during the war, the Tribunal pursued an unusual form of one-sided justice, born out of contrition. Fascinated by the Tribunal's rich complexities, journalist Thierry Cruvellier came back day after day to watch the proceedings, spending more time there than any other outside observer. Gradually he gained the confidence of the victims, defendants, lawyers, and judges. Drawing on interviews with these protagonists and his close observations of their interactions, Cruvellier takes readers inside the courtroom to witness the motivations, mechanisms, and manipulations of justice as it unfolded on the stage of high-stakes, global politics. It is this ground-level view that makes his account so valuable and so absorbing. A must-read for those who want to understand the dynamics of international criminal tribunals, *Court of Remorse* reveals both the possibilities and the challenges of prosecuting human rights violations. [Bible and Novel: Narrative Authority and the Death of God, Norman Vance](#) , 2013, 0199680574, 9780199680573. The Victorian novel acquired greater cultural centrality just as the authority of the scriptures and of traditional religious teaching seemed to be declining. Did the novel supplant the Bible? The novelists often adopted or participated in a broadly progressive narrative of social change which can be seen as a secular replacement for the theological narrative of 'salvation history' and the waning authority of biblical narrative. Victorian fiction seems in some ways to enact the process of secularization. But contemporary religious resurgence in various parts of the world and postmodern scepticism about grand narratives have challenged and complicated the conventional view of secularization as an irreversible process, an inevitable 'disenchantment of the world' which is an aspect and function of the grand narrative of modernization. Such developments raise new questions about apparently post-Christian Victorian fiction. In our increasingly secular society novel-reading is now more popular than Bible-reading. Serious novels are often taken more seriously than scripture. Norman Vance looks at how this may have come about as an introduction to four best-selling late-Victorian novelists: George Eliot, Thomas Hardy, Mary Ward and Rider Haggard. Does the novel in their hands take the place of the Bible?

Can apparently secular novels still have religious significance? Can they make new imaginative sense of some of the religious and moral themes and experiences to be found in the Bible? Do Eliot and her successors anticipate some of the insights of modern theology and contemporary investigations of religious experience? Do they call in question long-standing rumours of the death of God and the triumph of the secular? *Bible and Novel* develops a new context for reading later Victorian fiction, using it to illuminate the increasingly perplexed and confusing issue of 'secularization' and recent negotiations of the 'post-secular'.

With One Million Tattoos: Designs to Create and Colour you can print out unique combinations of original tattoo designs from the CD to colour and incorporate into your own artwork, or adapt and take to a tattooist. Over a million combinations are possible! The discs easily accessible art is useable in two ways: firstly, by simply choosing from 100 complete tattoo designs to either save as a JPEG or print from the disc. And alternatively, by constructing your own tattoo design by selecting keywords from a drop down menu. Because there are 100 top, 200 centre, 100 side, and 100 lower designs, there are 200,000,000 possible permutations. There are classic Sailor Jerry-style banners, anchors, hearts, and birds, along with popular tribal designs, motifs and animals that can be mixed-and-matched. The book explains how to colour the tattoos using professional techniques and how to insert them into existing art, while also acting as a visual catalogue of the tattoo designs that are on the disc.

[Meeting Jesus Again for the First Time, Marcus J. Borg](#) , 2009, 0061747629, 9780061747625. Of the many recent books on the historical Jesus, none has explored what the latest biblical scholarship means for personal faith. Now, in Meeting Jesus Again for the First Time, Marcus Borg addresses the yearnings of those who want a fully contemporary faith that welcomes rather than oppresses our critical intelligence and openness to the best of historical scholarship. Borg shows how a rigorous examination of historical findings can lead to a new faith in Christ, one that is critical and, at the same time, sustaining."Believing in Jesus does not mean believing doctrines about him," Borg writes. "Rather, it means to give one's heart, one's self at its deepest level, to . . . the living Lord."Drawing on his own journey from a naive,

unquestioning belief in Christ through collegiate skepticism to a mature and contemporary Christian faith, Borg illustrates how an understanding of the historical Jesus can actually lead to a more authentic Christian life one not rooted in creeds or dogma, but in a life of spiritual challenge, compassion, and community. In straightforward, accessible prose, Borg looks at the major findings of modern Jesus scholarship from the perspective of faith, bringing alive the many levels of Jesus' character: spirit person, teacher of alternative wisdom, social prophet, and movement founder. He also reexamines the major stories of the Old Testament vital to an authentic understanding of Jesus, showing how an enriched understanding of these stories can uncover new truths and new pathways to faith. For questioning believers, doubters, and reluctant unbelievers alike, *Meeting Jesus Again for the First Time* frees our understanding of Jesus' life and message from popular misconceptions and outlines the way to a sound and contemporary faith: "For ultimately, Jesus is not simply a figure of the past, but a figure of the present. Meeting that Jesus the living one who comes to us even now will be like meeting Jesus again for the first time."

0521859816, 9780521859813. This is the first textbook in microeconomics written exclusively for MBA students.

McKenzie/Lee minimizes attention to mathematics and maximizes attention to intuitive economic thinking. The text is structured clearly and accessibly: Part I of each chapter outlines the basic theory and Part II applies this basic theory to management issues. 'Perspective' sections in each chapter provide a new line of argument or different take on a business or policy issue, and carefully chosen topics and review questions are designed to spark lively and instructive debates. The accompanying DVD contains modules of Professor McKenzie talking informally with students, and elucidates complex lines of argument as well as acting as a revision aid. Throughout the book, McKenzie and Lee aim to infuse students with the economic way of thinking in the context of a host of problems that MBA students, as future managers of real-world firms, will find relevant to their career goals.

[The Diary of a Nose: A Year in the Life of a Perfumeur, Jean-Claude Ellena](#) , 2012, 1846145597, 9781846145599. Smell is a word, perfume is literature. Perfume creation is an exclusive and secretive endeavour. What is day to day life like for a perfume-maker? How does the creation of a new scent begin? How do you capture the essence of a smell on the skin? For one year, Jean-Claude Ellena kept a diary of his life as 'parfumeur exclusif' ('le nez' or 'the nose') for Herms. Believing that creating a scent is like creating a work of art, and describing himself as a writer using 'olfactory colours', he explains how all of the five senses come into play when creating a perfume: 'the painter learns to see, the pianist learns to listen, I learned to smell.' He also reveals how inspiration can come from a market stall, a landscape, or even the movement of calligraphy, and concludes this charming, perceptive diary with recipes for natural fragrances, each made up of three synthetic ingredients, to create the illusion of smells like freesia, orange blossom, grapefruit, pear, chocolate, cashew and cotton candy. This is the story behind the creation of scent. the quest to capture what is most elusive. With this diary, Jean-Claude Ellena offer readers a rare insight into the secrets of his business, his art, and his life as one of the world's most important and admired perfumers.

Give a Little: How Your Small Donations Can Transform Our World not only contains remarkable, inspiring stories of how small donations are making an extraordinary difference in the lives of millions both here in the United States and around the world, but also lays out where and how to start giving . . . today. Together, ordinary Americans have far more transformational power than any government or big foundation. In 2007, giving by American individuals amounted to \$229 billion--that is, 82 times the amount the Gates Foundation gave that same year. Simple, inexpensive things--a water filter, a bike, an irrigation pump, a bed net, a goat--cause a ripple effect that lifts a whole family, a town, and, astonishingly, even a nation out of poverty. Inspired by Smith's twenty years in the nonprofit sector, Give a Little shows how easily we can dip into our pockets and, with just a few dollars, change the world.

[7 Miles a Second, David Wojnarowicz](#) , 2012, 1606996142, 9781606996140. 7 Miles a Second is the story of legendary artist David Wojnarowicz, written during the last years before his AIDS-related death in 1992, and drawn by James Romberger with colors by Marguerite Van Cook. The graphic novel depicts Wojnarowicz's childhood of prostitution and drugs on the streets of Manhattan, through his adulthood living with AIDS, and his anger at the indifference of government and health agencies. Originally published as a comic book in 1996 by DC's Vertigo Comics, an imprint best-known for horror and fantasy material such as The Sandman, 7 Miles a Second was an instant critical success, but struggled to find an audience amongst the typical Vertigo readership. It has become a cult classic amongst fans of literary and art comics, just as Wojnarowicz's influence and reputation have widened in the larger art world. Romberger and Van Cook's visuals give stunning life to Wojnarowicz's words, blending the gritty naturalism of Lower East Side street

life with a hallucinatory, psychedelic imagination that takes perfect advantage of the comics medium. This new edition will finally present the artwork as it was intended: oversized, and with Van Cook's elegant watercolors restored. It also includes several new pages created for this edition.

The guide includes tips on how to investigate healthcare providers, what to insist on for a high-risk pregnancy, how to recognize and avoid labor-room problems, why "keepsake ultrasounds" are dangerous, how to cope with insurance companies that refuse procedures ordered by providers, and how to make a hospital accountable during admission. This important resource will transform pregnant couples from passive patients into empowered consumers in the medical market and will increase their chances of bringing home healthy and happy babies.

[Web Design Companion for the Digital Artist, Gary Poysick](#) , 2002, 0130973556, 9780130973559. The Against the Clock Companion Series was designed to work together with application-specific training and skills development books. The books in the series provide background in fundamental design and artistic issues and complement the hands-on, skills-based approach of the Against the Clock applications titles. Courses can be found in Office Information Systems, Computer Science, and Fine Arts Departments, as well as Continuing Education, Journalism, and Printing and Lithography. Today's web design and site management tools have come a long way toward providing even inexperienced designers the tools they need to build complex pages. Little energy is focused, however, on making those pages look good. Simply having functional buttons, images, and even animations on your pages doesn't address fundamental design issues. What looks good? What works best at getting the viewer's attention? These questions and many others are the subject of the Web Design Companion for the Digital Artist. use of type elements, positioning and formatting of graphic objects, the inclusion of rich media objects, this book is a powerful addition to any application-specific web design text. Focusing on balance, readability, and effectiveness, this companion book is sure to improve the results of the reader's efforts.

[Left-Handers' Golf Manual, Larry F. Nelson](#) , 2008, 1425128475, 9781425128470. The Left Handers' Golf Manual addresses the principal obstacles which prevent you from making improvements in your golf game. Playing better golf is directly associated with the proper application of the fundamentals to all aspects of the golf game from tee to green. Emphasis is placed on not solely relying on new equipment to make the improvements you are looking for in your golf game. It's how you do at establishing a strong foundation of the fundamentals that will determine whether you are able to make significant improvements in the way you play. The manual takes the golfer through the fundamentals of establishing the proper grip, correct stance, balance, proper body pivot, ball position, aim and alignment. It describes in detail how to set up properly to execute a good golf shot from the tee to green. There are chapters on using the woods

and irons, bunker play, putting, playing from different lies, establishing a good pre-shot routine and how to practice effectively. A chapter on exercises to improve flexibility and endurance is also included. One should not expect to read this manual and become a scratch golfer overnight. However, if the instructions in the manual are followed and time is devoted to properly practicing the fundamentals, I can guarantee there will be a definite improvement in your golf game. The end result will be a greater sense of satisfaction with your game each time you play.

[An Introduction to Environmental Biophysics: 2nd edition, Gaylon S. Campbell, John M. Norman](#) , 1998, 0387949372, 9780387949376. The objectives of the first edition of "An Introduction to Environmental Biophysics" were "to describe the physical microenvironment in which living organisms reside" and "to present a simplified discussion of heat and mass transfer models and apply them to exchange processes between organisms and their surroundings." These remain the objectives of this edition. This book is used as a text in courses taught at Washington State University and University of Wisconsin and the new edition incorporates knowledge gained through teaching this subject over the past 20 years. Suggestions of colleagues and students have been incorporated, and all of the material has been revised to reflect changes and trends in the science. Those familiar with the first edition will note that the order of presentation is changed somewhat. We now start by describing the physical environment of living organisms (temperature, moisture, wind) and then consider the physics of heat and mass transport between organisms and their surroundings. Radiative transport is treated later in this edition, and is covered in two chapters, rather than one, as in the first edition. Since remote sensing is playing an increasingly important role in environmental biophysics, we have included material on this important topic as well. As with the first edition, the final chapters are applications of previously described principles to animal and plant systems. Many of the students who take our courses come from the biological sciences where mathematical skills are often less developed than in physics and engineering. Our approach, which starts with more descriptive topics, and progresses to topics that are more mathematically demanding, appears to meet the needs of students with this type of background. Since we expect students to develop the mathematical skills necessary to solve problems in mass and energy exchange, we have added many example problems, and have also provided additional problems for students to work at the end of chapters.

[Social Work Practice: Problem Solving and Beyond, Tuula Heinonen, Leonard B. Spearman, Michael Hart](#) , 2006, 0176414126, 9780176414122. Social Work Practice: Problem Solving and Beyond presents a view of social work that incorporates, not without criticism, problem solving as foundational to traditional practice. While drawing upon international and American content, the text emphasizes Canadian social work experience and developments. Tuula Heinonen and Len Spearman also argue that there are newer approaches that both critique and enrich generalist social work practice: strengths, Aboriginal, structural, and feminist approaches need to be incorporated into generalist social work practice. The goal of Social Work Practice: Problem Solving and Beyond is to expand students' exposure to a broad set of approaches and principles of social work within the generalist context.

[Slave Narratives after Slavery, William L. Andrews](#) , 2011, 0195179439, 9780195179439. The pre-Civil War autobiographies of famous fugitives such as Frederick Douglass, William Wells Brown, and Harriet Jacobs form the bedrock of the African American narrative tradition. After emancipation arrived in 1865, former slaves continued to write about their experience of enslavement and their upward struggle to realize the promise of freedom and citizenship. Slave Narratives After Slavery reprints five of the most important and revealing first-person narratives of slavery and freedom published after 1865. Elizabeth Keckleys controversial Behind the Scenes (1868) introduced white America to the industry and progressive outlook of an emerging black middle class. The little-known Narrative of the life of John Quincy Adams, When in Slavery, and Now as a Freeman (1872) gave eloquent voice to the African American working class as it migrated from the South to the North in search of opportunity. William Wells Browns My Southern Home (1880) retooled the image of slavery delineated in his widely-read antebellum Narrative and offered his reader a first-hand assessment of the South at the close of Reconstruction. Lucy Ann Delaney used From the Darkness Cometh the Light (1891) to pay tribute to her enslaved mother and to exemplify the qualities of mind and spirit that had ensured her own fulfillment in freedom. Louis Hughess Thirty Years a Slave (1897) spoke for a generation of black Americans who, perceiving the spread of segregation across the South, sought to remind the nation of the horrors of its racial history and of the continued dedication of the once enslaved to dignity, opportunity, and independence.

The report notes that the Home Office failed to provide answers to a number of questions in time for the Committee to report before the House of Commons examined the Bill. The Committee recommends that in future, if a Department cannot meet the deadline for replying to its questions about a Bill with significant human rights implications, the Government's business managers should ensure that the Bill's timetable is set to give time for the Committee to

The three short novels in this volume are related not simply by their milieu of Chinese culture but also by how the supernatural world - or our fears of it - can dramatically shape events in our daily lives. In Bones of the Chinamen the hellish world of the Chinese slave trade is recreated; a world of violence, cruelty and sudden death. In Dragon Slayer, an American helicopter crew is suddenly transported from 1968 Vietnam into 1857 China where they find themselves caught up in the midst of yet another war. In Golden Dragon, along the barren coast of Down East Maine, local thugs kill employees of a Chinese restaurant, and believe themselves safe from retribution; until a mysterious and beautiful Chinese woman appears.

[Explanation and Power: The Control of Human Behavior, Morse Peckham](#) , 1988, 0816616574, 9780816616572.

Explanation and Power was first published in 1988. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. The meaning of any utterance or any sign is the response to that utterance or sign: this is the fundamental proposition behind Morse Peckham's Explanation and Power. Published in 1979 and now available in paperback for the first time, Explanation and Power grew out of Peckham's efforts, as a scholar of Victorian literature, to understand the nature of Romanticism. His search ultimately led back to and built upon the tradition of signs developed by the American Pragmatists. Since, in Peckham's view, meaning is not inherent in word or sign, only in response, human behavior itself must depend upon interaction, which in turn relies upon the stability of verbal and nonverbal signs. In the end, meaning can be stabilized only by explanation, and when explanation fails, by force. Peckham's semiotic account of human behavior, radical in its time, contends with the same issues that animate today's debates in critical theory how culture is produced, how meaning is arrived at, the relation of knowledge to power and of society to its institutions. Readers across a wide range of disciplines, in the humanities and social sciences, will welcome its reappearance.

There have been many accounts of prehistoric 'art', but nearly all of them begin by assuming that the concept is a useful one. In this extensively illustrated study, Richard Bradley asks why ancient objects were created and when and how they were used. He considers how the first definitions of prehistoric artworks were made, and the ways in which they might be related to practices in the visual arts today. Extended case studies of two immensely popular and much-visited sites illustrate his argument: one considers the megalithic tombs of Western Europe, whilst the other investigates the decorated metalwork and rock carvings of Bronze Age Scandinavia.

From the best-selling author of *The Seven Daughters of Eve*, a perfect book for anyone interested in the genetic history of Britain, Ireland, and America. One of the world's leading geneticists, Bryan Sykes has helped thousands find their ancestry in the British Isles. *Saxons, Vikings, and Celts*, which resulted from a systematic ten-year DNA survey of more than 10,000 volunteers, traces the true genetic makeup of the British Isles and its descendants, taking readers from the Pontnewydd cave in North Wales to the resting place of the Red Lady of Paviland and the tomb of King Arthur. This illuminating guide provides a much-needed introduction to the genetic history of the people of the British Isles and their descendants throughout the world.

[Unheroic Conduct: The Rise of Heterosexuality and the Invention of the Jewish Man, Daniel Boyarin , 1997, 0520919769,](#)

9780520919761. In a book that will both enlighten and provoke, Daniel Boyarin offers an alternative to the prevailing Euroamerican warrior/patriarch model of masculinity and recovers the Jewish ideal of the gentle, receptive male. The Western notion of the aggressive, sexually dominant male and the passive female reaches back through Freud to Roman times, but as Boyarin makes clear, such gender roles are not universal. Analyzing ancient and modern texts, he reveals early rabbis studious, family-oriented as exemplars of manhood and the prime objects of female desire in traditional Jewish society. Challenging those who view the "feminized Jew" as a pathological product of the Diaspora or a figment of anti-Semitic imagination, Boyarin argues that the Diaspora produced valuable alternatives to the dominant cultures' overriding gender norms. He finds the origins of the rabbinic model of masculinity in the Talmud, and though

unrelentingly critical of rabbinic society's oppressive aspects, he shows how it could provide greater happiness for women than the passive gentility required by bourgeois European standards. Boyarin also analyzes the self-transformation of three iconic Viennese modern Jews: Sigmund Freud, the father of psychoanalysis; Theodor Herzl, the founder of Zionism; and Bertha Pappenheim (Anna O.), the first psychoanalytic patient and founder of Jewish feminism in Germany. Pappenheim is Boyarin's hero: it is she who provides him with a model for a militant feminist, anti-homophobic transformation of Orthodox Jewish society today. Like his groundbreaking "Carnal Israel," this book is talmudic scholarship in a whole new light, with a vitality that will command attention from readers in feminist studies, history of sexuality, Jewish culture, and the history of psychoanalysis.

[Plowing the Dark: A Novel, Richard Powers](#) , 2001, 0312280122, 9780312280123. In a digital laboratory on the shores of Puget Sound, a band of virtual reality researchers race to complete the Cavern, an empty white room that can become a jungle, a painting, or a vast Byzantine cathedral. In a war-torn Mediterranean city, an American is held hostage, chained to a radiator in another empty white room. What can possibly join two such remote places? Only the shared imagination, a room that these people unwittingly build in common, where they are all about to meet, where the dual frames of this inventive novel to coalesce. Adie Klarpol, a skilled but disillusioned artist, comes back to life, revived by the thrill of working with the Cavern's cutting-edge technology. Against the collapse of Cold War empires and the fall of the Berlin Wall, she retreats dangerously into the cyber-realities she has been hired to create. As her ex-husband lies dying and the outbreak of computerized war fills her with a sense of guilty complicity, Adie is thrown deeper into building a place of beauty and unknown power, were she might fend off the incursions of the real world gone wrong. On the other side of the globe, Taimur Martin, an English teacher retreating from a failed love affair, is picked up off the streets in Beirut by Islamic fundamentalists and held in solitary captivity. Without distraction or hope of release, he must keep himself whole by the force of his memory alone. Each infinite, empty day moves him closer to insanity, and only the surprising arrival of sanctuary sustains him for the shattering conclusion. Plowing the Dark is fiction that explores the imagination's power to both destroy and save.

Mohammed Ahmed, a Moroccan girl raised as a boy in order to circumvent Islamic inheritance laws regarding female children, remains deeply conflicted about her identity. In a narrative that shifts in and out of reality moving between a mysterious present and a painful past, Ben Jelloun relates the events of Ahmed's adult life. Now calling herself Zahra, she renounces her role as only son and heir after her father's death and journeys through a dreamlike Moroccan landscape. A searing allegorical portrait of North African society, The Sacred Night uses Arabic fairy tales and surrealist elements to craft a stunning and disturbing vision of protest and rebellion against the strictures of hidebound traditions governing gender roles and sexuality.

[Broken Water, Paula Martin Morell](#) , 2006, 0978564820, 9780978564827. Beautifully written with striking imagery, broken water revolves around a mother (Elizabeth) and her 28-year-old daughter (Ellie). Through the interweaving of their stories, we see that Elizabeth sadly and tragically denies truth, while Ellie is unable and sometimes unwilling to see all the things that would connect her to others and herself. As the novel progresses, Ellie is slowly opening up to the possibility of these connections as she approaches her own truth, her own rebirth. The effects of these characters and their lives ripple throughout the novel, affecting all of the family members on different levels. Six of the ten stories have been published independently in literary journals and magazines. Now the stories are brought together in the novel, the way that they were conceived and created. While the stories resonate on their own, in the novel they now reverberate as they illuminate the characters, themes, and imagery on a whole new level.

[The Cold Six Thousand: Underworld USA 2, James Ellroy](#) , 2011, 0307798453, 9780307798459. The Black Dahlia, The Big Nowhere, L.A. Confidential, White Jazz, American Tabloid... James Ellroy's high-velocity, best-selling novels have redefined noir for our age, propelling us within inches of the dark realities of America's recent history. Now, in The Cold Six Thousand, his most ambitious and explosive novel yet, he puts the whole of the 1960s under his blistering lens. The result is a work of fierce, epic fiction, a speedball through our most tumultuous time. It begins in Dallas. November 22, 1963. The heart of the American Dream detonated. Wayne Tedrow Jr., a young Vegas cop, arrives with a loathsome job to do. He's got \$6,000 in cash and no idea that he is about to plunge into the cover-up conspiracy already brewing around Kennedy's assassination, no idea that this will mark the beginning of a hellish five-year ride through the private underbelly of public policy. Ellroy's furiously paced narrative tracks Tedrow's ride: Dallas back to Vegas, with the Mob and Howard Hughes, south with the Klan and J. Edgar Hoover, shipping out to Vietnam and returning home, the bearer of white powder, plotting new deaths as 1968 approaches ... Tedrow stands witness, as the icons of an iconic era mingle with cops, killers, hoods, and provocateurs. His story is ground zero in Ellroy's stunning vision: historical confluence as American Nightmare. The Cold Six Thousand is a masterpiece.

The Joint Committee on Human Rights examined the implementation of the UN International Covenant on Economic, Social and Cultural Rights in the UK. Domestic legislation protects many of the economic, social and cultural rights, with the Covenant itself having little impact in UK domestic law. The Committee believes that there is scope for incorporating further protection of rights in the UK, by enshrining some of the guarantees contained in the Covenant. Further, that for the Covenant rights to be effective, they should be part of a framework for government policy development, and that Government along with the Commission for Equality and Human Rights should develop ways of measuring the progress of these rights. The Committee also recommends, that explanatory notes to Bills, should include discussion of the Bills compatibility with Covenant rights, which is a way of enhancing the scrutiny of proposed Government legislation. Furthermore, the Committee recommends the introduction of an Equality Bill, to address the concerns of discrimination faced by ethnic minorities and persons with disabilities in employment, housing and education.

Nanomaterials - structures with characteristic dimensions between 1 and 100 nm -exhibit a variety of unique and tunable chemical and physical properties that have made engineered nanoparticles central components in an array of emerging technologies. The use of nanotechnology is increasing; however its potential adverse effects on human health are not well understood. In order to accurately conduct hazard assessments, scientists need to understand the broad concepts that apply to pathways of dermal, oral, and respiratory exposure. This title is designed to elucidate those concepts and to examine the interaction of nanomaterials with the biological system, including membrane transfer, screening methods, and impact on major organs.

[On Kissing, Tickling, and Being Bored: Psychoanalytic Essays on the Unexamined Life, Adam Phillips](#) , 1994, 0674634632, 9780674634633. Tickle a child, and she peals with laughter. Go on too long, and her laughter is sure to turn to tears. Where is that ticklish line between pleasure and pain? Why do we risk its being crossed? Does psychoanalysis possess the language to talk about such an extraordinary ordinary thing? In a style that is writerly and audacious, Adam Phillips takes up this subject and others largely overlooked by psychoanalysis - kissing, worrying, risk, solitude, and composure. He writes about phobias as a kind of theory, a form of protection against curiosity; about analysis as a patient's way of reconstituting solitude; about "good-enough" mothering as the antithesis of "bad-enough" imperialism; about psychoanalysis as an attempt to cure idolatry through idolatry; and even about farting as it relates to worrying. Psychoanalysis began as a virtuoso improvisation within the science of medicine, but virtuosity has given way to the dream of science that only the examined life is worth living. Phillips shows that the drive to omniscience has been unfortunate both for psychoanalysis and for life. On Kissing, Tickling, and Being Bored is a set of meditations on underinvestigated themes in psychoanalysis that shows how much one's psychic health depends on establishing a realm of life that successfully resists examination.

Over the past several decades, the sciences have witnessed a significant paradigm shift. Our traditional notions of order, energy, causality and methodology have all been upended. A new set of views has arisen that enables us to better understand and examine the complexity of nature. In this perspective, behavior is nonlinear, order emerges spontaneously and responses are best understood as the movement of trajectories through multi-dimensional space. This book examines the role that dynamical systems, complexity science, networks, and fractals play in helping to explain the most difficult thing of all: ourselves.

the backdrop for generations of family memories, spanning three centuries. A remarkable visionary, park founder Volney Rogers argued that the land itself could improve the lives of Youngstown's residents. Through fresh air for mill-weary lungs and tree laced horizons for workroom-bound spirits, he knew a park would make the community a better place for families. And he succeeded magnificently. Rogers and the nationally known landscape architects that he hired created breathtaking vistas of Lanterman's Falls and scenic gorges and designed trails, drives, and three pleasure lakes. Other park features include nature preserves, display gardens, recreational fields, a Donald Ross-designed golf course, and a legacy of historic structures. Mill Creek Park indeed has earned its legendary claim as the most beautiful urban park in America.

[Social Anxiety in Adolescents and Young Adults: Translating Developmental Science Into Practice, Candice A. Alfano, Deborah C. Beidel](#) , 2011, 1433809486, 9781433809484. During adolescence, the physical, cognitive, and behavioral hallmarks of social anxiety disorder (SAD) often make their first appearance. This developmental period is characterized by rapid physical growth and sexual maturation, as well as unique emotional and cognitive developments and underlying neurological changes. At the same time, increasing social demands, peer pressure, romantic interests, hormonal changes, and greater independence present a dizzying and sometimes overwhelming array of challenges. Although symptoms of social anxiety are common in adolescents, only recently have researchers begun to examine the problem in this age group. Fortunately, an increasing number of studies have uncovered important nuances in the development and presentation of social anxiety symptoms and SAD in adolescents and young adults. This book assesses the implications of the research for both researchers and clinicians who want to provide the latest and most up-to-date treatments for their anxiety-plagued patients. The contributors to this book examine social anxiety in the lives of young people (aged 12 to 25) in the context of dating and romantic relationships, alcohol and drug use, performance anxiety and school refusal, and alongside comorbid disorders such as depression. The unique challenges faced by special populations including LGBT, ethnic minority, and autistic adolescents are also considered, while clinically-oriented authors describe the latest techniques in assessment and treatment, including pharmacotherapy and cognitive-behavioral approaches. The final chapter presents a model for SAD treatment in schools, with an eye towards the development of future programs for large-scale intervention. Compassionate in tone and comprehensive in scope, Social Anxiety in Adolescents and Young Adults represents a significant step forward in the field of social anxiety.

[Lee Miller in Fashion, Becky Conekin](#) , 2013, 1580933769, 9781580933766. Fashion model, surrealist artist, muse, photographer, war correspondentLee Miller defies categorization. She was a woman who refused to be penned in, a free spirit constantly on the move from New York to London to Paris, from husbands to lovers and back, from photojournalistic objectivism to surrealism. Midcareer, she made the unprecedented transition from one side of the lens to the other, from a Cond Nast model in Jazz Age New York to fashion photographer, creating stunning images that imbued fashion with her signature wit and whimsy. Miller became a celebrated Surrealist under the tutelage of her lover, Man Ray, and then joined the war effort during World War II, documenting everything from the liberation of concentration camps to the daily life of Nazi-occupied Paris. Miller was recognized as one of the most distinguished living photographers during her hey-day as a fashion photographer, but an astonishing number of these images have remained unpublished. Lee Miller in Fashion is the first book to examine how her career as a model and fashion photographer illuminates her life story and connects to international fashion history from the late 1920s until the early 1950s. The world of fashion emerges as the backbone of Miller's creative development, as well as an integral lens through which to understand the effects of war on the lives of women in the 1940s and 1950s. Miller witnessed incredible acts of resistance born out through fashionand her photographic record of women's indomitable spirit even in times of war has remained an invaluable resource in fashion and global history. Lee Miller in Fashion presents these striking archival fashion photographs as well as contact sheets, memos, and Miller's published illustrations, vividly setting the wit, irrepressible creativity, and daring of Miller within the larger story of women's experience of fashion, art, and war in the twentieth century. In all her different worlds, she moved with freedom. In all her roles, she was her own bold self.

Lydia is still wearing the scars from her traumatic childhood and although she is wealthy and successful, her life is lonely and disjointed. Her best friend has just had a baby and the closest thing she has to a physical relationship is with her personal fitness trainer u who is probably gay. An unexpected letter from her long-lost uncle reveals a shocking truth about her childhood. Dean is a young man whose life is going nowhere. He is jobless and about to have a baby with a girl who hates him. But then one afternoon, life flips over and leaves him somewhere he never expected to be: a single dad to an ill daughter and he is forced to re-evaluate his whole life. Robyn is nineteen. She is training to be a doctor and is determined one day to be a paediatrician, just like her dad. She has never met her dad. Neither has her mother. He was an anonymous donor, and that's exactly what she wants him to stay. The man who brought her up is the only dad she wants. Her donor dad is just a character in her own personal fairy tale. Until the day she meets the man of dreams and falls in love. He looks like her, he thinks like her, he even has the same freckle in the same place on his left hand. It could be just a coincidence, but she needs to be sure before she can allow herself to be

with him. Meanwhile in a hospice in Bury St Edmunds, a man called Daniel is slowly fading away. His friend Maggie sits with him every day; she holds his hand and she moistens his mouth and she listens to the story of his life, to his regrets and to his secrets. And then he tells her about the children he has never met and never will, conceived with women he has never slept with, never even touched. Four of them , apparently, two boys, two girls. He talks of them wistfully. His legacy, he calls them. As his children slowly find their way into each other's lives, will Daniel have a chance to meet his legacy and to say goodbye to his children before his time is up?

[Copicide: Concepts, Cases and Controversies of Suicide by Cop, John M. Violanti, James J. Drylie](#) , 2008, 0398085005, 9780398085001. This book provides an important insight by poignantly establishing a much clearer definition of what has been known historically as "suicide by cop" or "SbC." As explored in the chapters of this book, "copicide" can be defined as an incident involving the use of deadly force by law enforcement agent(s) in response to the provocation of a threat/use of deadly force against the agent(s) or others by an actor who has voluntarily entered the suicidal drama and has communicated verbally or nonverbally the desire to commit suicide. Officers involved in copicide and use of deadly force experience a myriad of emotions before, during, and after these critical incidents, including Post Traumatic Stress Disorder. Understanding and defining what did and did not occur in copicide is paramount to an officer's capacity for resilience. A considerable amount of recent research has been conducted on suicide by cop. The purpose of this book is

to bring together this research within the framework of issues involved with this phenomenon. Topics covered include: What is suicide by cop? Several definitions of the concept are characterized, with discussion of strong and weak points. A review of current research on SbC is outlined and discussed. A compilation of actual cases is presented, with an analysis of police situations in which they occur, descriptions of the perpetrator's background, and motivation to engage the police in this act. A typology for SbC is provided in a later chapter. The psychological aftermath of SbC shootings is also discussed followed by a discussion of suicide risk among police officers and the phenomenon of "suicide by suspect" referring to a police officer who intentionally places him/herself in harm's way in order to die. It is hoped that this book will help to provide a starting point for further discussions and development of a clear conceptual basis for suicide by cop, which is essential if we are to clarify this elusive concept that intermixes between suicide, homicide, and cause for blame.

[Understanding Regulation: Theory, Strategy, and Practice, Robert Baldwin, Martin Cave](#) , 1999, 0198774389, 9780198774389. The way in which regulation works is a key concern of industries, consumers, citizens, and governments alike. Understanding Regulation takes the reader through the central issues of regulation and discusses these from a number of disciplinary perspectives. This book is written by a lawyer and an economist, but looks also towards business, political science, sociology, social administration, anthropology, and other disciplines. The fundamental strategies, institutions, and explanations of regulation are reviewed and the means of identifying 'good' regulation are outlined. Individual chapters look at such topics as self-regulation, the regulation of risks, the cost-benefit testing of regulation, the importance of enforcement, and the challenge of regulating within Europe. The book's second part considers a series of issues of particular concern in modern utilities regulation, including the use of RPI-X price caps, the control of service quality, franchising techniques and ways of measuring regulatory performance. Questions of accountability and procedure are then examined and recent public debates on regulatory reform are reviewed. A central argument of Understanding Regulation is that regulation inevitably gives rise to political contention but that persons of different political persuasion can nevertheless converse sensibly on the search for better regulation.

[Doctoring the Mind: Why Psychiatric Treatments Fail, Richard P Bentall](#) , 2009, 0141023694, 9780141023694. Towards the end of the twentieth century, the solution to mental illness seemed to be found. It lay in biological solutions, focusing on mental illness as a problem of the brain, to be managed or improved through drugs. We entered the 'Prozac Age' and believed we had moved on definitively from the time of frontal lobotomies to an age of good and successful mental healthcare. Biological psychiatry had triumphed. Except maybe it hadn't. Starting with surprising evidence from the World Health Organisation that suggests people recover better from mental illness in a developing country than in the first world, Doctoring the Mind asks the question: how good are our mental health services, really? Richard Bentall picks apart

the science that underlies current psychiatric practice across the US and UK. Arguing passionately for a future of mental health treatment that focuses as much on patients as individuals as on the brain itself, this is a book set to redefine our understanding of the treatment of madness in the twenty-first century.

[Positively Parents: Caring for a Severely Disabled Child, Bryony Beresford](#) , 1994, 0117018376, 9780117018372. How do parents cope with the daily hassles and long-term strains of caring for a disabled child? How important are support networks for these parents? Do services help or hinder the coping process? These are some of the questions being voiced by practitioners, researchers, lay people and even parents themselves about families who are caring for and bringing up a disabled child.

Excitatory amino acids (EAAs) as neurotransmitters are the subject of vast and rapidly expanding interest. The First Edition of Excitatory Amino Acids and Synaptic Transmission was the first text to provide an overview of the function of EAAs in transmission at the synapses and in the organization of the nervous system. The First Edition is a well-respected reference text for neuroscience researchers; it provides a comprehensive account of the physiological, pharmacological, chemical, molecular, biological, and neural networking aspects of the EAAs. The Second Edition has been revised so that its text is even more user-friendly; plus its coverage has been expanded to include the up-to-date approaches of molecular biology and biophysics. The well-praised explanatory glossary has also been improved.

[The Lion Sleeps Tonight, Rian Malan](#) , 2012, 0802194834, 9780802194831. Since its original publication twenty years

ago Rian Malan's classic work of narrative nonfiction "My Traitor's Heart" has earned its author comparisons to masters of literary nonfiction like Michael Herr and Ryszard Kapuscinski. "The Lion Sleeps Tonight" is Malan's remarkable chronicle of South Africa's halting steps and missteps, taken as blacks and whites try to build a new country. Some of the essays previously appeared in a collection published only in South Africa, "Resident Alien," but others are collected here for the first time. The collection comprises twenty-three pieces; the title story investigates the provenance of the world famous song "The Lion Sleeps Tonight," which Malan traces back to a Zulu singer named Solomon Linda who recorded a song called "Mbube" in the 1930s, which went on to be covered by Pete Seeger, REM, and Phish, and was incorporated into the musical "The Lion King." In other stories, Malan follows the trial of Winnie Mandela and plunges into the explosive controversy over President Mbeki's AIDS policies of the 1990s. The stories, combined with Malan's sardonic interstitial commentary, offer a brilliantly observed portrait of contemporary South Africa.

[Tour Secrets 2, Winkk](#) , 2011, 098377594X, 9780983775942. Music and Raven's passion has secured their position as dancers in the music industry. They realize how low-down and dirty the business can be with sex, money and power ruling the people around them. They continue their dreams as they prepare to dance on tour with Que, a Platinum-selling recording artist. Unaware of his grueling rehearsals and his controlling and erratic personality, they are unsure if they can keep up with his tour. As much as they want to simply enjoy their new-found fame, the two are constantly chased by scandals and haunted by the past a murder they both witnessed. Now that they have received everything they dreamed of and more, they are not sure if they can handle their new successful life. They struggle to live their passion for dancing while keeping their secrets amidst the judgmental eyes of the music industry.

Berlin, 1922: A city of fading beauty plagued by unemployment and rampant inflation becomes home to a growing number of refugees. Esther Solomonova survives by working as secretary to her fellow Russian migr, "Prince" Nick, a scheming cabaret owner. Always on the prowl for a deal, Nick smells money when he hears of a woman in an asylum claiming to be the Grand Duchess Anastasia, daughter of the Russian Czar, the lone member of her family to escape assassination by the Bolsheviks. Enlisting a highly suspicious Esther, Nick plans to prepare the womankind known as Anna Andersonto claim the Romanov fortune. But Anna is being hunted. Or so she claims. At first Esther believes Annas fears to be just in her imaginationuntil innocent people around them begin to die. Together with a German police officer, a dogged inspector named Schmidt, Esther tries to discover who wants Anna deadand why. Yet the deeper she and Schmidt dig, the more they realize that their own lives are at risk.

Deeply atmospheric, peopled with rich, complex characters, City of Shadows is an enthralling novel.

[Harpsichord technique: a guide to expressivity, Nancy Metzger](#) , 1998, 0962493414, 9780962493416. Designed for use at the keyboard, the book combines technique for harpsichord touch with guidelines for historically informed performance of Baroque music.This manual works with or without a teacher, to help harpsichordists achieve musically expressive performances. For 'Hands on practice," the book contains 30 short "Bach/Ricci" teaching pieces, and other pieces by J. S. Bach, The Couperins and George Bohm. Clear, expansive suggestions for playing these examples make up the bulk of this work. There is also a complete bibliography and 3 appendices. Author Nancy Metzger performs the examples and pieces from the book on the cassette. Many individuals, teachers and librarians helped to make the first edition of this book a clear success. Now the 2nd Edition is garnering praise also. Laurette Goldberg, venerable harpsichordist and teacher, wrote the Foreword in which she says: "This valuable volume now makes accessible the secrets of the harpsichord's expressive possibilities." Dr. Larry Palmer's review in The Diapason says: "Whether one proceeds from beginning to end of this well organized method, or picks and chooses from the pedagogically sound examples, Nancy Metzger's book will aid immensely in the journey toward artistic expression at the harpsichord."

[By Blood We Live, Stephen King](#) , 2009, 1597801569, 9781597801560. From Dracula to Buffy the Vampire Slayer; from Castlevania to Tru Blood, the romance between popular culture and vampires hearkens back to humanity's darkest, deepest fears, flowing through our very blood, fears of death, and life, and insatiable hunger. And yet, there is an attraction, undeniable, to the vampire archetype, whether the pale European count, impeccably dressed and coldly masculine, yet strangely ambiguous, ready to sink his sharp teeth deep into his victims' necks, draining or converting them, or the vamp, the count's feminine counterpart, villain and victim in one, using her wiles and icy sexuality to corrupt man and woman alike... Edited by John Joseph Adams (Wastelands, The Living Dead), By Blood We Live gathers together the best vampire literature of the last three decades from many of today's most renowned authors of fantasy, speculative fiction, and horror, including Stephen King, Joe Hill, Garth Nix, Neil Gaiman, Kelley Armstrong, Ken Macleod,

Harry Turtledove, Carrie Vaughn, and Tad Williams.
