Students will begin with the most basic and fundamental skill, comprehension, move on to reader response, analysis, and synthesis, and gradually build to the highest skill, evaluation. Not only will these guides help you prepare your students for standardized tests like the AP Language and Literature exam, the SATs, and the ACTs, but they will also give students the self-assurance to develop and articulate a personal assessment of the text a skill that will be advantageous in college and beyond.

Telling the story of Pauker's youth in an increasingly anti-Semitic environment, her commitment to a revolutionary career, and her rise in the Romanian Communist movement, Levy makes no attempt to whitewash Pauker's life and actions, but rather explores every contour of the complicated persona he found expressed in masses of newly accessible archival documents.

[The Rise and Fall of the Bible: The Unexpected History of an Accidental Book, Timothy Kandler Beal](#) , 2011, 0151013586, 9780151013586. "Personal and accessible . . . The Rise and Fall of the Bible is Beal's attempt to shatter this popular understanding of the Bible as a combination of divine instruction manual and self-help book."--Adam Kirsch, Tablet In this revelatory exploration, a noted religion scholar and former evangelical Christian takes us back to early Christianity to

ask how a box of handwritten scrolls became the Bible, and forward to see how the multibillion-dollar business that has brought us Biblezines and manga Bibles is selling down the Bible's sacred capital. Among his surprising insights:

\*Christianity thrived for centuries without any Bible. Early congregations used collections of scrolls; there was no official canon of scriptures and no book existed that was big enough to hold them.\*The idea of the Bible as the literal Word of God is only about a century old.\*There is no "original" Bible behind the thousands of Bibles on the market today. The further back we go in the Bible's history, the more versions we find. In *The Rise and Fall of the Bible* Beal offers a chance to rediscover a Bible, and a faith, that is truer to its own history--not a book of answers but a library of questions. "Part autobiography, part social scientific research, part shrewd discernment, and part theological interpretation--Tim Beal has written a zinger of a book about the cultural history of the Bible. This welcome and important book will cause a pause before we make glib claims for 'the Word of the Lord.'" --Walter Brueggemann "Beal . . . makes a compelling case against the idea of a fully consistent and unerring book, positing instead a very human volume with all the twists and foibles of the human experience, truly reflecting that human experience. He presents a convincing case for a radical rereading of the text, an honest appreciation of this sacred book. An engrossing and excellent work, highly recommended."--Publishers Weekly, starred review

[Islamic Natural Law Theories, Anver M. Emon](#) , 2010, 0199579008, 9780199579006. This book offers the first sustained jurisprudential inquiry into Islamic natural law theory. It introduces readers to competing theories of Islamic natural law theory based on close readings of Islamic legal sources from as early as the 9th and 10th centuries CE. In popular debates about Islamic law, modern Muslims perpetuate an image of Islamic law as legislated by God, to whom the devout are bound to obey. Reason alone cannot obligate obedience; at most it can confirm or corroborate what is established by source texts endowed with divine authority. This book shows, however, that premodern Sunni Muslim jurists were not so resolute. Instead, they asked whether and how reason alone can be the basis for asserting the good and the bad, thereby justifying obligations and prohibitions under Shari'a. They theorized about the authority of reason amidst competing theologies of God. For premodern Sunni Muslim jurists, nature became the link between the divine will and human reason. Nature is the product of God's purposeful creation for the benefit of humanity. Since nature is created by God and thereby reflects His goodness, nature is fused with both fact and value. Consequently, as a divinely created good, nature can be investigated to reach both empirical and normative conclusions about the good and bad. They disagreed, however, whether nature's goodness is contingent upon a theology of God's justice or God's potentially contingent grace upon humanity, thus contributing to different theories of natural law. By recasting the Islamic legal tradition in terms of legal philosophy, the book sheds substantial light on an uncharted tradition of natural law theory and offers critical insights into contemporary global debates about Islamic law and reform.

[Children of the Poor Clares: The Collusion between Church and State that Betrayed Thousands of Children in Ireland? Industrial Schools, Mavis Arnold and Heather Laskey](#) , 2012, 146690903X, 9781466909038. The original 1985 edition of Children of the Poor Clares was the first book to expose the reality of the treatment of children placed in church care in Ireland's post-independence horrendous industrial school system. Giving an intimate picture, covering over four decades, of life in one of these institutions, it documented the gross physical and emotional abuse, neglect, malnourishment, exploitation, lack of proper education, deprivation, and humiliation that scarred the children for life. It further identified the collusion of the state and its own lawbreaking that enabled the abuse in its vast apparatus of incarceration of impoverished children. This revised updated edition gives chilling details of revelations that have since become public and of the state's ultimate responsibility for what took place.

[Ritual : Perspectives and Dimensions--Revised Edition: Perspectives and Dimensions--Revised Edition,](#) , 2009, 0199739471, 9780199739479. From handshakes and toasts to chant and genuflection, ritual pervades our social interactions and religious practices. Still, few of us could identify all of our daily and festal ritual behaviors, much less explain them to an outsider. Similarly, because of the variety of activities that qualify as ritual and their many contradictory yet, in many ways, equally legitimate interpretations, ritual seems to elude any systematic historical and comparative scrutiny. In this book, Catherine Bell offers a practical introduction to ritual practice and its study; she surveys the most influential theories of religion and ritual, the major categories of ritual activity, and the key debates that have shaped our understanding of ritualism. Bell refuses to nail down ritual with any one definition or understanding. Instead, her purpose is to reveal how definitions emerge and evolve and to help us become more familiar with the interplay of tradition, exigency, and self-expression that goes into constructing this complex social medium.

[Plato's Utopia Recast: His Later Ethics and Politics, Christopher Bobonich](#) , 2004, 019927410X, 9780199274109. Plato's Utopia Recast is an illuminating reappraisal of Plato's later works, which reveals radical changes in his ethical and political theory. Christopher Bobonich argues that in these works Plato both rethinks and revises important positions which he held in his better-known earlier works such as the Republic and the Phaedo. Bobonich analyses Plato's shift from a deeply pessimistic view of non-philosophers in the Republic, where he held that only philosophers were capable of virtue and happiness, to his far more optimistic position in the Laws, where he holds that the constitution and laws of his ideal city of Magnesia would allow all citizens to achieve a truly good life. Bobonich sheds light on how this and other highly significant changes in Plato's views are grounded in changes in his psychology and epistemology. This book will change our understanding of Plato. His controversial moral and political theory, so influential in Western thought, will henceforth be seen in a new light.

This new book provides a clear and accessible analysis of the various ways in which human reproduction is regulated. A comprehensive exposition of the law relating to birth control, abortion, pregnancy, childbirth, surrogacy and assisted conception is accompanied by an exploration of some of the complex ethical dilemmas that emerge when one of the most intimate areas of human life is subjected to regulatory control. Throughout the book, two principal themes recur. First, particular emphasis is placed upon the special difficulties that arise in regulating new technological intervention in all aspects of the reproductive process. Second, the concept of reproductive autonomy is both interrogated and defended. This book offers a readable and engaging account of the complex relationships between law, technology and reproduction. It will be useful for lecturers and students taking medical law or ethics courses. It should also be of interest to anyone with a more general interest in women's bodies and the law, or with the profound regulatory consequences of new technologies.

In *The Worldly Philosophers*, Robert Heilbroner set out to describe what the great economists thought would happen to the system of capitalism. In later books, Professor Heilbroner projected his own views about the future of the capitalist system. Now he asks a still more demanding question: What is capitalism? In search of an answer, *The Nature and Logic of Capitalism* takes us on a far-ranging exploration to the unconscious levels of the human psyche and the roots of domination and submission; to the organization of primitive society and the origins of wealth; to the sources of profit and the conception of a "regime" of capital; to the interplay of relatively slow-changing institutions and the powerful force of the accumulation of wealth. By the end of this tour we have grappled not only with ideas of Adam Smith and Karl Marx but with Freud and modern anthropologists as well. And we are far closer to understanding capitalism in our time, its possibilities and limits.

[Evangelical Christianity in Australia: Spirit, Word and World, Stuart Piggin](#) , 1996, 0195535383, 9780195535389.

Evangelical Christianity is one of the most formative and least acknowledged movements in Australian history. This book restores evangelicals to their place as a dynamic element in the dialogue between Christianity and general Australian society. Evangelicalism focuses on the Gospel, the God-given means not only of the salvation of individual souls, but also of the renovation of society and culture. In this novel and well-sustained study, Stuart Piggin argues that evangelicalism is strongest when it synthesises Biblical orthodoxy with spiritual passion and human compassion. When this synthesis was achieved, it resulted in spiritual vitality and the strengthening of Australian nationhood. Piggin draws on a wealth of personal accounts and out-of-the-way sources to shed light on matters as disparate as the character of the Reverend Samuel Marsden, the 'sinless perfection' movement among students at the University of Sydney in the 1930s, the Billy Graham Crusades, and the Anglican debate on the ordination of women. By analysing the experience and contribution of the evangelical movement, this book challenges readers to rethink their national history.

[Bataan Death March: A Survivor's Account, William Edwin Dyess](#) , , 0803266561, 9780803266568. The hopeless yet determined resistance of American and Filipino forces against the Japanese invasion has made Bataan and Corregidor symbols of pride, but Bataan has a notorious darker side. After the U.S.-Filipino remnants surrendered to a far stronger force, they unwittingly placed themselves at the mercy of a foe who considered itself unimpaired by the Geneva Convention. The already ill and hungry survivors, including many wounded, were forced to march at gunpoint many miles to a harsh and oppressive POW camp & many were murdered or died on the way in a nightmare of wanton cruelty that has made the term "Death March" synonymous with the Bataan peninsula. Among the prisoners was army pilot William E. Dyess. With a few others, Dyess escaped from his POW camp and was among the very first to bring reports of the horrors back to a shocked United States. His story galvanized the nation and remains one of the most powerful personal narratives of American fighting men. Stanley L. Falk provides a scene-setting introduction for this Bison Books edition. William E. Dyess was born in Albany, Texas. As a young army air forces pilot he was shipped to Manila in the spring of 1941. Shortly after his escape and return to the United States, Colonel Dyess was killed while testing a new airplane. He did not survive long enough to learn that he had been awarded a Congressional Medal of Honor.

[Charles Banks Wilson, Carol Haralson](#) , 2010, 0972565736, 9780972565738. Charles Banks Wilson is one of Oklahoma's most beloved and accomplished artists. Known for his portraits and murals honoring great Oklahomans and Oklahoma history, and for his career-spanning series of portraits of Native Americans, his place in the history of American art is assured. This stunning book, featuring nearly two hundred reproductions of his works, celebrates both his life story and his artistic legacy. As demonstrated in this book, Wilson's work is characterized both by technical expertise and aesthetic genius. But his place in the hearts of Americans and in the company of such great regionalists as Thomas Hart Benton is secured by his eye for the everyday truths of humbler subjects: for example, boys leaping into a swimming hole or cooks stirring the bean pot at a powwow. His work ranges widely across media; he is equally skilled in pencil, ink, watercolor, and oil, and he is a master lithographer. The contributors to this book reveal Wilson's devotion to American heartland life through detailed analysis of his works, many from the Gilcrease Collection, created over nearly seven decades of the artist's life. Focusing on Wilson's life as well as his art, the contributors make a special effort to convey his artistic philosophy through his own words. As a result, this remarkable volume offers unprecedented access to the man and his work.

[The Turning of the Tide, Reginald Hill](#) , 1999, 0727822594, 9780727822598. 'I will never divorce you, though that is not to say that I might not be constrained some day to dispose of you.' Emily Salter returned to the sleepy seaside resort of Skinburness where she had spent her childhood holidays to come to terms with the break-up of her marriage to the enigmatic, controlling Sterne Follet. Using her maiden name Emily finally felt free from her husband's presence and the threat that he had calmly issued when she mentioned her plans to leave him. But Emily's illusion of safety is rapidly shattered as a sequence of sinister events unfolds that culminates in the finding of a body in the water's shallows. It gradually becomes apparent to Emily that whatever is going on she is somehow involved, and so is her husband, but not necessarily on the same side.

[The Asset Protection Scheme: HM Treasury, Great Britain: National Audit Office](#) , 2010, 0102965609, 9780102965605.

The Treasury's Asset Protection Scheme to protect over 280 billion of Royal Bank of Scotland's financial assets against losses has, so far, only been partially successful in encouraging lending to creditworthy borrowers on the scale originally envisaged. The Scheme, launched in early 2009, initially involved two banks. RBS eventually put 282 billion of assets into the Scheme, while Lloyds Banking Group paid 2.5 billion to exit the Scheme in November 2009 and instead raised additional capital from shareholders. The principal elements of the Scheme, particularly the first loss, were based on a robust assessment of incentives and on as complete information on the underlying assets as were available at the time. As part of the Scheme, Lloyds and RBS agreed lending targets. While both banks met targets for mortgage lending, there was a shortfall of 30 billion against targets for lending to business. Value for money in the longer term will depend heavily on incentives built into the Scheme to encourage good management of assets. Establishing a requirement for RBS

to bear the first 60 billion of losses (a 'first loss') was crucial in providing the right incentive for the bank to manage its assets effectively. However, if the first loss is exceeded, RBS will have less financial incentive to avoid further losses although the bank considers it will still have a legal and moral obligation to manage the assets as best it can. The position of taxpayers would be particularly vulnerable if losses were to exceed about 73 billion

[Computers as Theatre, Brenda Laurel](#) , 2013, 0321918622, 9780321918628. Brenda Laurel's Computers as Theatre revolutionized the field of human-computer interaction, offering ideas that inspired generations of interface and interaction designers-and continue to inspire them. Laurel's insight was that effective interface design, like effective drama, must engage the user directly in an experience involving both thought and emotion. Her practical conclusion was that a user's enjoyment must be a paramount design consideration, and this demands a deep awareness of dramatic theory and technique, both ancient and modern. Now, two decades later, Laurel has revised and revamped her influential work, reflecting back on enormous change and personal experience and forward toward emerging technologies and ideas that will transform human-computer interaction yet again. Beginning with a clear analysis of classical drama theory, Laurel explores new territory through the lens of dramatic structure and purpose. Computers as Theatre, Second Edition, is directed to a far wider audience, is written more simply and elegantly, is packed with new examples, and is replete with exciting and important new ideas. This book Draws lessons from massively multiplayer online games and systems, social networks, and mobile devices with embedded sensors Integrates values-driven design as a key principle Integrates key ideas about virtual reality Covers new frontiers, including augmented reality, distributed and participatory sensing, interactive public installations and venues, and design for emergence Once more, Brenda Laurel will help you see the connection between humans and computers as you never have before-and help you build interfaces and interactions that are pleasurable, joyously right!

[It Starts with One: Changing Individuals Changes Organizations, J. Stewart Black, Hal Gregersen](#) , 2013, 0133407306, 9780133407303. As many as 60% of organizational change initiatives fail. This means that many normally successful, motivated, and determined managers nonetheless struggle to lead change effectively. Most of those leadership failures share a common cause: managers mistakenly believe that organizational change is brought about by changing the organization. The truth is this: organizations change only as much or as fast as individuals change. And, to change

individual behavior, you must first change the mental maps guiding that behavior. In *It Starts with One*, Third Edition, J. Stewart Black identifies the three critical "brain barriers" managers must break through in order to start, deepen, and sustain needed change. With new cases, examples, and tools for executing successful change initiatives, this edition dives even more deeply into the personal aspects of leading strategic change as well as the unique challenges posed by driving change in global business environments. One step at a time, Black shows how to use their tools and techniques to bring solutions to life -- and transform change from a hope to a profitable reality.

As they pass sweet yet hazardous hours in a china tree, *The Grass Harp* manages to convey all the pleasures and responsibilities of freedom. But most of all it teaches us about the sacredness of love, that love is a chain of love, as nature is a chain of life. This volume also includes Capote's *A Tree of Night and Other Stories*, which the *Washington Post* called unobtrusively beautiful . . . a superlative book.

Niles Eldredge If you want to read one book to get up to speed on evolution, read *Written in Stone*. Brian Switek's clear and compelling book is full of fascinating stories about how scientists have read the fossil record to trace the evolution of life on Earth. Ann Gibbons [Switek's] accounts of dinosaurs, birds, whales, and our own primate ancestors are not just fascinating for their rich historical detail, but also for their up-to-date reporting on paleontology's latest discoveries. Carl Zimmer "After reading this book, you will have a totally new context in which to interpret the evolutionary history of amphibians, mammals, whales, elephants, horses, and especially humans. Donald R. Prothero Spectacular fossil finds make today's headlines; new technology unlocks secrets of skeletons unearthed a hundred years ago. [The Camino: A Journey of the Spirit, Shirley MacLaine](#) , 2001, 0743400739, 9780743400732. It has been nearly three decades since Shirley MacLaine commenced her brave and public commitment to chronicling her personal quest for spiritual understanding. In testament to the endurance and vitality of her message, each of her eight legendary bestsellers -- from Don't Fall Off the Mountain to My Lucky Stars -- continues today to attract, dazzle, and transform countless new readers. Now Shirley is back -- with her most breathtakingly powerful and unique book yet. This is the story of a journey. It is the eagerly anticipated and altogether startling culmination of Shirley MacLaine's extraordinary -- and ultimately rewarding -- road through life. The riveting odyssey began with a pair of anonymous handwritten letters imploring Shirley to make a difficult pilgrimage along the Santiago de Compostela Camino in Spain. Throughout history, countless illustrious pilgrims from all over Europe have taken up the trail. It is an ancient -- and allegedly enchanted -- pilgrimage. People from St. Francis of Assisi and Charlemagne to Ferdinand and Isabella to Dante and Chaucer have taken the journey, which comprises a nearly 500-mile trek across highways, mountains and valleys, cities and towns, and fields. Now it would be Shirley's turn. For Shirley, the Camino was both an intense spiritual and physical challenge. A woman in her sixth decade completing such a grueling trip on foot in thirty days at twenty miles per day was nothing short of remarkable. But even more astounding was the route she took spiritually: back thousands of years, through past lives to the very origin of the universe. Immensely gifted with intelligence, curiosity, warmth, and a profound openness to people and places outside her own experience, Shirley MacLaine is truly an American treasure. And once again, she brings her inimitable qualities of mind and heart to her writing. Balancing and negotiating the revelations inspired by the

mysterious energy of the Camino, she endured her exhausting journey to Compostela until it gradually gave way to a far more universal voyage: that of the soul. Through a range of astonishing and liberating visions and revelations, Shirley saw into the meaning of the cosmos, including the secrets of the ancient civilizations of Atlantis and Lemuria, insights into human genesis, the essence of gender and sexuality, and the true path to higher love. With rich insight, humility, and her trademark grace, Shirley MacLaine gently leads us on a sacred adventure toward an inexpressibly transcendent climax. The Camino promises readers the journey of a thousand lifetimes.

[Civic Ideals: Conflicting Visions of Citizenship in U.S. History, Rogers M. Smith](#) , 1997, 0300069898, 9780300069891. Is civic identity in the United States really defined by liberal, democratic political principles? Or is U.S. citizenship the product of multiple traditions -- not only liberalism and republicanism but also white supremacy, Anglo-Saxon supremacy, Protestant supremacy, and male Supremacy? In this powerful and disturbing book, Rogers Smith traces political struggles over U.S. citizenship laws from the colonial period through the Progressive era and shows that throughout this time, most adults were legally denied access to full citizenship, including political rights, solely because of their race, ethnicity, or gender. Basic conflicts over these denials have driven political development and civic membership in the U.S., Smith argues. These conflicts are what truly define U.S. civic identity up to this day. Others have claimed that nativist, racist, and sexist traditions have been marginal or that they are purely products of capitalist institutions. In contrast, Smith's

pathbreaking account explains why these traditions have been central to American political and economic life. He shows that in the politics of nation building, principles of democracy and liberty have often failed to foster a sense of shared "peoplehood" and have instead led many Americans to claim that they are a "chosen people", a "master race" or superior culture, with distinctive gender roles. Smith concludes that today the United States is in a period of reaction against the egalitarian civic reforms of the last generation, with nativist, racist, and sexist beliefs regaining influence. He suggests ways that proponents of liberal democracy should alter their view of U.S. citizenship in order to combat these developments more effectively. "An important and original argument that ranges through a long period of American history and makes a major contribution to the debate about the bases of American nationality and civic identity". -- Eri

[The Big Year: A Tale of Man, Nature, and Fowl Obsession, Mark Obmascik](#) , 2008, 1439107459, 9781439107454. Every year on January 1, a quirky crowd of adventurers storms out across North America for a spectacularly competitive event called a Big Year -- a grand, grueling, expensive, and occasionally vicious, "extreme" 365-day marathon of birdwatching. For three men in particular, 1998 would be a whirlwind, a winner-takes-nothing battle for a new North American birding record. In frenetic pilgrimages for once-in-a-lifetime rarities that can make or break their lead, the birders race each other from Del Rio, Texas, in search of the rufous-capped warbler, to Gibsons, British Columbia, on a quest for Xantus's hummingbird, to Cape May, New Jersey, seeking the offshore great skua. Bouncing from coast to coast on their potholed road to glory, they brave broiling deserts, roiling oceans, bug-infested swamps, a charge by a disgruntled mountain lion, and some of the lumpiest motel mattresses known to man. The unprecedented year of beat-the-clock adventures ultimately leads one man to a new record -- one so gigantic that it is unlikely ever to be bested...finding and identifying an extraordinary 745 different species by official year-end count. Prize-winning journalist Mark Obmascik creates a rollicking, dazzling narrative of the 275,000-mile odyssey of these three obsessives as they fight to the finish to claim the title in the greatest -- or maybe the worst -- birding contest of all time. With an engaging, unflappably wry humor, Obmascik memorializes their wild and crazy exploits and, along the way, interweaves an entertaining smattering of science about birds and their own strange behavior with a brief history of other bird-men and -women; turns out even Audubon pushed himself beyond the brink when he was chasing and painting the birds of America. A captivating tour of human and avian nature, passion and paranoia, honor and deceit, fear and loathing, The Big Year shows the lengths to which people will go to pursue their dreams, to conquer and categorize -- no matter how low the stakes. This is a lark of a read for anyone with birds on the brain -- or not.

[Empires of Mud: Wars and Warlords in Afghanistan, Antonio Giustozzi](#) , 2012, 0199326789, 9780199326785. Warlords, namely charismatic military leaders who exploit the weakness of central authorities to seize control of and autonomously rule a sub-national area, have earned much notoriety in recent years on account of the excesses of civil wars in Liberia, Somalia and Afghanistan. But notwithstanding their bad reputation, warlords have often participated in state formation. In Empires of Mud, Giustozzi analyses the dynamics of warlordism in Afghanistan within the context of such debates. He approaches this complex task by first analysing aspects of the Afghan environment that might have been conducive to the fragmentation of central authority and the emergence of warlords and then accounts for the emergence of warlordism in the 1980s and subsequently the lion's share of this book consists of an in-depth analysis of the systems of rule--political, economic, military--which developed under Afghanistan's two foremost warlords, Ismail Khan and Abdul Rashid Dostum, both of whom still wield considerable power even after the intervention of Allied forces in Afghanistan in

2001. Their two systems are compared, highlighting convergences and divergences, in order to explain how warlords administer the areas that they control within so-called "failed states", in the process challenging much of the received wisdom in scholarly and policy circles about warlordism. The author also discusses Ahmad Shah Massoud, whose "system" incorporated elements of rule not dissimilar from that of the warlords. Giustozzi concludes that although charismatic leaders play a key role in shaping the specific characteristics of each warlord polity, there are some common elements that underlie the emergence of warlordism. In particular, the role of local military leaders and their gradual acquisition of a form of "class consciousness" appear to be key processes in allowing the formation of warlord polities, while the latter have repeatedly shown the ability over time to evolve in to more sophisticated, state-like, or political party-like, structures.

[Birdsville, Evan Mchugh](#) , 2011, 1459621379, 9781459621374. For a town with seventy residents (on a good day), Birdsville is remarkably well known - the Birdsville Track, the rodeo, the pub, the infamous races. With its ruggedness, inaccessibility and larrikin charm, this small town on the edge of the Simpson Desert has become a symbol of the great Australian outback. What is it about Birdsville that has made it stand so large in our legends? And what's it like to live there amongst the floods and the heat and the dust storms? To find out, Evan McHugh packed up his Sydney home, bought a four-wheel drive and headed off with his wife for a year in the back of beyond. Here, he tells us of the large adventures - midnight desert rescues, aerial mustering on vast cattle stations, relentless heat and massive floods - but also the small details of life in one of Australia's most isolated towns, like driving 700 km to go shopping. As the months fly by, Evan learns about an ancient culture, sees dunes carpeted in millions of tiny wildflowers, and meets the members of an outback community facing extraordinary challenges with quiet determination and buckets of good humour.

[Wakefield, Nancy Bertrand](#) , 2000, 0738504955, 9780738504957. First explored by a small band of colonists from Lynn, the land we now know as Wakefield was formally settled in 1644 when seven families and seven houses were clustered around the shores of the "Great Pond" (Lake Quannapowitt). From this pioneer settlement in the middle of the forest primeval, the town grew into a sleepy farming village, then a bustling industrial center, and finally emerged as a settled suburban community. Along the way, it changed its name several times but always retained its essential character. Through the pages of Images of America: Wakefield walk a collection of fascinating characters, whose exploits and accomplishments shaped their town and whose talents preserved its history. In this volume, readers will glimpse the

character of these individuals and of the town they helped to shape, along with the images of the byways and the buildings, the places and the faces that contributed to the growth of the modern-day town of Wakefield.

[Between Integration and Secession: The Muslim Communities of the Southern Philippines, Southern Thailand, and Western Burma/Myanmar, Moshe Yegar](#) , 2002, 0739103563, 9780739103562. Between Integration and Secession asks whether Muslim minorities can co-exist with the majority and other cultures within non-Muslim states. Moshe Yegar's excellent new work examines the radicalization of Muslim communities during the nationalist fervor that swept southeast Asia in the aftermath of World War II. The book's grand historical scope traces the theological and political impact of the postwar Islamic renaissance on the creation of Muslim separatist tendencies and heightened religious consciousness. Drawing on a wealth of archival and secondary sources, Yegar examines three cases of rebellion in Muslim minorities: in the Philippines, in Thailand, and in Burma/Myanmar. He studies the communities' struggle to define their aims be it for communal separation, autonomy, or independence and the means each has at their disposal to achieve them."

[Phase Diagrams in Advanced Ceramics, Allen M. Alper](#) , 1995, 008053872X, 9780080538723. The investigation of multi-component complex systems composed of oxides, nitrides, and carbides has intensified in the last few years. Phase Diagrams in Advanced Ceramics reviews some of the recent advances in the understanding of these composite systems, providing insight into how phase diagrams can be utilized in the fabrication of whiskers and ceramic-matrix whisker-reinforced ceramics. Phase relations and sintering information is reviewed for transparent polycrystalline oxides. Phase diagrams are discussed to predict alkali oxide corrosion of alumino-silicate references. Key Features\* This Treatise Provides Coverage of:\* Understanding the development, manufacture, and use of complex, multi-component ceramic materials composed of silicon nitride-metal oxides-nitride-carbide systems\* Development and use of whisker and whisker-reinforced ceramics composed of materials such as alumina, silicon-nitride, silicon carbide, and directly solidified eutectic ceramics\* Application of phase diagrams to the production of advanced composites such as alumina-matrix, zirconium diboride and titanium, hafnium, zirconium, carbides, and borides\* Phase chemistry in the development of transparent poly-crystal and oxides, including yttria, alumina, and magnesium aluminate\* Improvements concerning the knowledge of complex multi-component materials composed of oxides, nitrides, and carbides, and knowledge of how to fabricate composite materials containing whiskers and ceramic hosts\* New developments in making transparent ceramic materials

[Innocence Betrayed: Paedophilia, the Media and Society, David C. Wilson, Ian Silverman](#) , 2002, 0745628885, 9780745628882. Innocence Betrayed is the first sustained attempt to address the issue of how we can best protect children from the threat posed by predatory paedophiles. It asks all the difficult questions: Can paedophiles be treated? Do they change their behaviour? Does naming and shaming help protect our children or make matters worse? Combining the skills of journalistic research and academic scholarship, this engaging and accessible book carefully untangles the News of the World's 'Sarah's Law' and presents, for the first time, the behind-the-scenes reaction to the newspaper. It contains an enlightening series of interviews with paedophiles, both in a penal setting and after release, in England, Wales and North America, as well as interviews with the victims of sexual abuse. This important and timely book will be of interest to anyone who wishes to understand the complexity of the problem posed by paedophiles and how we can make our communities safer places for children.

[Traveling the Pennsylvania Railroad: The Photographs of William H. Rau, Kenneth Finkel, Mary Panzer, John R. Stilgoe](#) , 2002, 0812236254, 9780812236255. In the 1890s Philadelphia's preeminent photographer, William H. Rau, was commissioned to take more than 450 photographs along the routes of the Pennsylvania Railroad in order to promote travel on the railway to the general public. Known as "the standard railroad of the world," the PRR was the largest rail system in the East and linked metropolitan New York and Philadelphia to Pittsburgh and such industrial cities of the Midwest as Chicago and St. Louis. Using a mammoth view camera that made 18-inch by 22-inch glass negatives, Rau produced a spectacular series of images for the railroad's promotional use. The remarkably detailed and texturally rich albumen prints, on deposit at The Library Company of Philadelphia, display a harmony between the railroad and the natural and industrial landscapes through which the line passed. The collection includes striking views not just of railcars, tracks, and stations but also of cities and towns, bridges, ferry boats, rivers, canals, factories, residences, and hotels, mostly in Pennsylvania, but with some views also of New York, New Jersey, and Maryland. This oversize volume reproduces almost 100 of the photographs, carefully selected for their historical and artistic significance, as full-page quadtone images, capturing the impact of the originals as closely as possible. The photographs are arranged in geographical order along the various branches of the PRR, and each photograph is accompanied by a descriptive caption provided by PRR expert James J. D. Lynch, Jr. In the three essays that complement the photographs, Kenneth Finkel details Rau's career and early commercial photography, Mary Panzer places Rau and his PRR photographs in the context

of the history of American landscape photography, and John R. Stilgoe discusses the advent of railroad advertising photography and its role in shaping perceptions of the American landscape. Published in cooperation with The Library Company of Philadelphia.

[An American Summer, Frank Deford](#) , 2003, 1574904744, 9781574904741. Fourteen-year-old Christy Bannister represents the prototypical innocent boy, just on the verge of becoming a man. After moving from Indiana to Baltimore in 1954, Christy is suddenly forced to come to grips with some of life's most difficult realities. The father he idolizes is indeed human, his family is not impenetrable to harm and injustice and polio, the disease that has gripped the nation with fear, suddenly has a face and name: Kathryn Slade a beautiful woman paralyzed from the neck down by the disease. Christy is introduced to Kathryn as the hero who saved her dog, and, even though she is an "older woman" of 23, they take an immediate liking to one another. Although Christy is among dozens of children who frequent Kathryn's backyard pool, it is clear that she shows a special interest in him. Perhaps it is because he is the one person who doesn't treat her like a polio victim. Soon, she is training him to win the most anticipated swim race of the summer and developing a once-in-a-lifetime friendship at the same time.
