[Hidden Depths, Emma Holly](#) , 2011, 0983540276, 9780983540274. James and Olivia Forster have been happily married for many years. Their grown-up daughter is thriving, as is their successful family-owned business. A harmless kink here or there spices up their love life, but never in a million years do they imagine the kinks they'll encounter while sneaking off to their beach house for a long hot weekend. Certainly, they don't expect their understanding of the world they live in to be turned upside down. Anso Vitul has ruled the wereseals for one short month. He hardly needs his authority questioned because he's going crazy from mating heat, a condition made more tormenting by having been forbidden to have sex with a female. Anso's best friend and male lover Ty volunteers to help him find the human mate his royal genes are driving him to seek. To Ty's amazement, Anso's quest leads him claim not one partner but a pair. Ty would object, except he too finds the Forsters hopelessly attractive. When this hot-blooded foursome embark on their erotic voyage, more than the ocean is going to make waves. "I am utterly insane for Emma Holly. The way she sucks you into her world is pure genius " - Jacquelyn Frank, NYT bestselling author

This book is the result of five years' exhaustive work by the BNHS. The data, which form the core of the book, have been collected by more than 1,000 people: many hundreds of professional and amateur ornithologists, birdwatchers, conservationists, forest officials, and others interested in birds. It is the most detailed publication ever produced on the subject of birds or conservation and it uncovers, analyzes and assesses all of the evidence, presenting it together with all the sources. The study has given a detailed analysis of sites that have been identified for bird conservation in India on the basis of globally accepted criteria. Each bird area is introduced with maps, analysis, avifauna section with tables of threatened species present, and a brief description of threatened birds, which have important habitats in the relevant states. The study shows that out of 465 important birds

in India, 191 wildlife sanctuaries have been identified as IBAs, 52 are national parks, 23 are tiger reserves, while 198 are not officially protected.

[Islam and Dhimmitude: Where Civilizations Collide, Bat Yeor](#) , 2002, 0838639429, 9780838639429. In this study of the legal and social condition of Jews and Christians subjected to Islamic rule (the dhimmis), Bat Ye'or examines various religious and historical sources, using the new term "dhimmitude" to describe their common history and legal status. Some of the laws derive from the special status institutionalized by the Church Fathers for Jews; once Islamized, these laws were incorporated into Muslim jurisprudence applicable for Christians and Jews alike. Dhimmitude is thus discussed from the perspective of Muslim theology, and also in regard to Christian attitudes to both Jews and Zionists.

[It Takes a Pillage: An Epic Tale of Power, Deceit, and Untold Trillions, Nomi Prins](#) , 2009, 0470555505, 9780470555507.

A former Wall Street manager turned muckraking journalist gets inside how the banks looted the Treasury, stole the bailout, and continued with business as usual. We all watched as packs of former Big Financiers commandeered posts in Washington and lavished trillions in bailouts to "save" big Wall Street firms that used that money for anything and everything except to fill in Main Street's potholes. We all watched as Wall Street heavyweights fought tooth and nail to decelerate financial reform and won. Former Wall Streeter Nomi Prins has been watching, too, and she is not going to let them get away with it. More than just an angry populist, commentator stuck on the sidelines, Prins understands Big Finance and big money and big schemes—and in this book she exposes the fundamental follies of our economic system and the schemes of the bigwigs who have no intention of letting it change. Remarkably combines detail, clarity, and narrative momentum, revealing all the ways in which banks gamed the system to get the most money with the least oversight. Exposes the power-bankers who bagged more than \$5 billion in compensation before and after their companies grabbed more than a trillion dollars in federal bailout subsidies—and how the government's indignation at this didn't lead to change. Shows how the most egregious pillagers work at the Fed and Treasury department, detailing how Hank Paulson, Ben Bernanke, and Tim Geithner siphoned off \$10.7 trillion from the public's future for Big Finance's present, all the while telling us it was for our own good. Slams a financial system that will not change, if our government doesn't force it to change, no matter what happens in the so-called free market and why the 'sweeping' financial reform bill

passed after Wall Street reconsolidated its power, is anything but sweeping or reformative. Written by a former managing director at Goldman Sachs, now a senior fellow at Demos, who writes regularly on corruption in Washington and Wall Street for news outlets ranging from Fortune to Mother Jones. If you're still enraged and frustrated with how the bank bailout went bust for the American people, or how Wall Street continues to operate as if the rest of the world doesn't matter, or how the banks are once again rolling in outsized profits and obscene bonuses while average Americans continue to struggle through a bleak landscape of foreclosures and job loss, *It Takes a Pillage* gives voice to your outrage, and provides a deeper insight into what we really have to be angry about and how we can fight for some real change.

[The Roots of Bioethics: Health, Progress, Technology, Death, Daniel Callahan](#) , 2012, 0199931372, 9780199931378.

Daniel Callahan---whose cofounding of The Hastings Center in 1969 was one of the most important milestones in the history of bioethics--has written on an uncommonly wide range of issues over a long career. They have moved back and forth between clinical care of individual patients and the ethical problems of health care research and delivery. Through his many writings, four core problems have recurred in all of his work, and influence each of the others. What is health and how has its understanding been shaped by medical progress and the culture of medicine and society? What is progress, a deep value in modern health care and how should we judge it? What kinds of technological innovations that come out of the drive for progress are really good for us--and what do we do when there is a clash between individual good and social good in the use of expensive technologies, a problem now evident in the unsustainable high costs of health care? How should our understanding of the place of an inevitable death in all our lives, and its place in medicine, help us to better think of the goals of medicine and the goals of our life in seeking a good death? Those four questions have been with bioethics from its beginning and will remain with it for the indefinite future. They are the roots of bioethics.

[Living Together in a World Falling Apart, Dave Jackson](#) , 2009, 0982054416, 9780982054413. LIVING TOGETHER IN A WORLD FALLING APART The classic "handbook on Christian community," with updated reflections By Dave and Neta Jackson When LIVING TOGETHER IN A WORLD FALLING APART was first published in 1974, tensions in society-an unpopular war, racial divisions, fearful economics, the seeming futility of "success," and widespread alienation-were not addressed in most churches. Racism still thrived, worship meant three hymns and you're out, and relationships had deteriorated to weekly handshakes. But many believed-based on New Testament descriptions of the early church-that this couldn't be all God planned for his people. These restless souls eagerly read about Dave and Neta Jackson's personal search as they experimented with household living and took a road trip visiting the crop of emerging Christian communities around the country. Written in a breezy, candid manner, LIVING TOGETHER became not only a bestseller and classic "handbook on Christian community," but provided perhaps the only sociological snapshot of the many Christian communities from that era. Now, because many conditions in church and society are repeating themselves, interest in Christian community is reviving-whether through small groups, house churches, the emerging church movement, the new monasticism, or among Christians experimenting with communal living as a way to be more faithful, effective, and connected. This updated edition contains the original text of LIVING TOGETHER as well as many of the Jacksons' personal reflections and evaluations after living in Christian community for over 25 years, thereby providing nearly 30 percent new material.

[Stand the Pain, Greener Greetings , 2003, .](#) The true account of a young woman who has had her rights, her life and her sanity ripped away from her by her abuser. A person who kept her prisoner in her own home as she tried to retain her life again from him until finally there was no choice but to give it all up and escape. The text touches on social issues that played a part in preventing the young girl from receiving help from the abuse. After being attacked, raped, and stalked and nearly murdered she gave up trying to get help and took matters into her own hands and left with three babies to start a new life only to discover that she was left with a life long disability due to the violence she endured for years. The text explains the violent incidents and betrayal by so called family and powers of authority. Events are explained throughout the text in detail as the young girl has flashbacks of the horrors she has suffered with physical feelings, deep pain and emotion before, during, and after the violence took place. It is an account of her struggles, desperation, and helplessness that leaves her to feel that she has been rejected as human by those who were supposed to "love" her "the most."

When *Biology: A Search for Order in Complexity* was originally released in the early 1970s, it was the first text of its kind to challenge the long-standing assumption that a study of biology must be predicated upon the atheistic philosophy of Darwinian evolution. Now, over three decades later, as the so-called theory of evolution faces a deepening crisis, Christian Liberty Press is pleased to present a newly updated and improved version of the textbook that first challenged the modern scientific community with the validity of biblical creationism. *Biology: A Search for Order in Complexity, Second Edition*, is the culmination of over two years of diligent study and labor by a team of educators and scientists who are committed to giving students a greater understanding of and appreciation for the handiwork of Almighty God. Every effort has been made to ensure that this biology text is scientifically accurate and relevant to the needs of students in the twenty-first century. With gratefulness to the Creator of the whole earth, we humbly present this new edition to the public in the hope that it will be a powerful influence in the lives of those who are seeking true science and an understanding of life.

[Life Stories, Mark Kennedy](#) , 2008, 0981617239, 9780981617237. As an editor, Mark Kennedy allows the work of other writers to sing. He takes a wannabe wordsmith's messy piece and reshapes it with such subtlety that even a mediocre author can believe the melodious composition is her own. As a mentor, he shares long-honed craft secrets as if they were mere road directions. He teaches a rookie columnist how to hit the desirable self-deprecatory tone by likening the look of his own balding head to a skinless chicken breast. As the voice of *Life Stories*, he makes his audience care about his prose and his people. He pens the desperate plight of a trailer-park dweller's eviction, and cash donations come in the

mail; he writes of his wife's unwitting embrace of a grocery-store stranger and readers recall similar gaffes, even as they guffaw. He describes an Alzheimer's victim with a flower on her nose and creates a poignant image of loss that comes with a curious saving levity. There's a reason Mark Kennedy wins all those awards. [Richard Wagner and the Nibelungs, Elizabeth Magee](#) , 1990, 0198161905, 9780198161905. The four operas of Richard Wagner's epic opera cycle, the Ring, are among the greatest and most influential works in the genre. While their music has been the subject of lengthy discussion and analysis, there has hitherto been little scrutiny of their libretti, which Wagner wrote himself based on the German Nibelung sagas. This book reveals the resurgence of interest in saga and myth in Wagner's day, and, in establishing an authoritative bibliography of Wagner's Nibelung reading, shows how contemporary editors, scholars, and poets influenced the shape of Wagner's libretti. The resulting study sheds fascinating new light on these musical masterpieces.

[BA to Boardroom with No BS: Skills for Life, Christopher Wilson](#) , 2013, 0985190140, 9780985190149. What does a person have to do to achieve success in the workforce, or more broadly, in life? If you've ever asked yourself these questions, look no further than here. Author Christopher Wilson's BA to Boardroom with No BS, Skills for Life delivers an answer that's straightforward, sensible, and, as the title suggests, devoid of all the "BS" clouding most forms of career advice these days. Described by Paul F. Levy, former CEO of Beth Israel Deaconess Medical Center, as "one of those essential life guides that everyone should have," BA to Boardroom with No BS gives readers what they need to know. The book offers pragmatic, usable advice on how to affect positive change and practical growth in one's career and personal life. By honing the interpersonal and professional skills necessary not only to spur, but also to respond to, one's rise through the ranks, individuals are set up to achieve more successful outcomes. Wilson's unique brand of no-nonsense advice is based on the premise that, while knowledge is important in any job, skills are what ultimately move people forward and enable them to climb the workplace ladder. To illustrate this point, Wilson compares the accumulation of job skills to the act of filling a toolbox with tools. With each new tool added to the box, one becomes more equipped to build a better outcome, more mindful of the results each tool produces, and more capable of choosing, and effectively using, the right tools for the right job. Through a series of very relatable, often funny, and always edifying stories, Wilson identifies very specific personal and professional skills and depicts the application of those skills to actual workplace scenarios, as he encountered them during his thirty-plus years working as a corporate employee, CEO, mentor, parent, and executive coach. While the stories in BA to Boardroom with No BS can be read straight through and in order, success-driven individuals will want to revisit the text over and over again as they progress through career and life, calling upon it as a reference whenever the need arises to learn how to deal with a new, different, or challenging work or personal situation. An "Index of Skills" near the front of the book enables readers to do just that. After finding the desired skill in the index, they need only flip to the correct page to find the desired information. Some of the skills featured in the book include: personal skills, such as resume writing, salary negotiation, and peer relations; management skills, such as hiring people, building a team, and managing up; leadership skills, such as influencing, situational leadership, and stakeholder analysis; and life skills, such as investing, credit, and insurance basics. However accurate the title may be when it comes to "No BS," do not be deceived by the appearance of "BA" in the title. Though the book is intended primarily for college students and graduates entering the workforce for the first time, BA to Boardroom with No BS offers benefits to a much larger audience. In addition to providing a resource for new workers, the book offers invaluable information, instruction,

and motivation for those who are returning to work after hiatus, assuming greater leadership and/or management roles in an existing job, looking to get a tighter grasp on workplace dynamics, or simply looking to get ahead in any aspect of life. [Culturally Responsive Methodologies, Mere Berryman, Suzanne SooHoo, Ann Nevin](#) , 2013, 1780528159, 9781780528151. "Culturally Responsive Methodology puts forward a new position from which to navigate our research in the hope that we can contribute to a more respectful and humble way of working with all peoples. These new methodologies require the researcher to develop relationships that may enable them to intimately come to respect and know the Other with whom they seek to study. Such a process of reciprocity challenges traditional research notions of distance and neutrality, opening up instead streams of research that call for engagement through the establishment of relational discourses. The chapters included in the book show how the researchers find, discover, and invent methodology that benefits both the researcher and subject, from their insider knowledge and from the epistemology of others. Culturally Responsive Methodologies is ideally suited for qualitative research work and therefore would be used in Research Qualitative Methods courses. The book will also appeal to researchers, doctoral students, teacher educators and educators throughout the world who share an interest in culturally responsive research and practice."

[The Epidemiology of Diabetes Mellitus, Jean Marie Eko, Marian Rewers, Rhys Williams, Paul Zimmet](#) , 2008, 0470779764, 9780470779767. The first edition of this book gained recognition as the definitive textbook of diabetes epidemiology. The second edition builds on this success, gathering recent information on international trends and data for diabetes mellitus. In particular, the book highlights the dramatic rise of Type 2 diabetes in children, adolescents and the elderly throughout the world. One new section features prevention and screening of both Type 1 and Type 2 diabetes. Other new chapters cover the epidemiology of obesity and the impact of nutrition, and review available guidelines for better worldwide glycemic control. Future challenges, including the effects of antipsychotic treatment and HIV infection and therapy on

diabetes, are also addressed. All chapters have been completely revised and updated, covering: definitions, classification and risk factors for diabetes; new evidence for screening and prevention of Type 1 and Type 2 diabetes; epidemiology of complications and associated risk factors; economic aspects: the direct and indirect costs of diabetes. *The Epidemiology of Diabetes Mellitus* fills the need for a current compendium of diabetes epidemiology in the tradition of the first monumental text of the late Kelly West. It is essential reading for general practitioners, diabetologists, clinical endocrinologists, cardiologists, epidemiologists, nurses, dieticians, and other diabetes care providers, as well as health care decision makers.

[Chaim Weizmann: The Making of a Zionist Leader, , Jehuda Reinharz](#) , 1985, 0195034465, 9780195034462. In the pantheon of modern Jewish leaders, Chaim Weizmann is a giant. One of the founding fathers of the state of Israel and its first president, he was also a president of the World Zionist Organization and a chemist of the first rank, for whom Israel's renowned Weizmann Institute of Science was named. Yet there has never been a scholarly biography of Weizmann. His own autobiography, *Trial and Error*, written largely from memory, is riddled with errors. Here at last is a book by an authority on the history of Zionism that fills the gaps in our knowledge. A biography of Weizmann is in many ways a history of the Jewish people in the modern period. This book delves into the factors that shaped Weizmann's personality and world view. It analyzes his relations with his family and other men and women, among them the major Jewish personalities of his day. In the process it deals with the tensions between Zionists and anti-Zionists, the impact of Zionism on the Eastern and Western Jewish communities, and the role of British, French, and German governments during various phases of the movement to establish a Jewish homeland. The book also pays much attention to Weizmann's scientific work. This volume ends with Weizmann at the age of 40 on the eve of World War I, when he was thrust into the center stage of world politics as a major negotiator for the Balfour Declaration. A subsequent volume will cover the remainder of his life. About the Author: Jehuda Reinharz is Richard Koret Professor of Modern Jewish History and Director of the Tauber Institute for the Study of European Jewry at Brandeis University. He is author of *Fatherland or Promised Land: The Dilemma of the German Jew, 1893-1914* and the editor of *The Letters and Papers of Chaim Weizmann, 1918-1920*.

[The Cyrus Syndrome, Arley Owens, Jr.](#) , 2013, 0984819533, 9780984819539. Darius Darkfire has been told by his mother since birth that he's a direct descendant of Cyrus the Great who ruled over the ancient Persian Empire conquered by Alexander some years after the monarch died in five-twenty-nine BC. A ring purported to have been given to the king by a prophet has been passed down through the generations, ceremoniously bestowed every seventy years on the oldest child of the one possessing it at the time. Never to be worn except by Christ at His Second Coming, the finger adornment must be kept in a container chosen by the recipient at the ceremony of presentation. Believing it to be only a legend, Darius in the presence of ten friends as required by tradition reluctantly accepts the ring from his mom who inherited it when her mother died. A senior at Southern Methodist University, he stashes the heirloom and forgets all about it. Nine years later he falls in love with a woman named Robyn Tuscani and proposes. His mother embarrasses him by telling his fiancée about the ring and Robyn soon becomes obsessed with it. When her ex-boyfriend Raul Wyncote enters the picture, Darius discovers there's much more to the legacy than what his ancestors knew. Allied with a mysterious Arab named Arash Arshia, called The Mede, Wyncote presides over a large, secret organization with a most sinister purpose. The two cult leaders need the legendary ring to complete their mission and will stop at nothing to obtain it. By the time Darius becomes aware of their plot his life is in grave jeopardy and his only hope for survival is uncovering the real truth behind Cyrus's band of gold.

"Those of us who try to understand what is happening in North American Indian communities have learned to see Vine Deloria, Jr., both as an influential actor in the ongoing drama and also as its most knowledgeable interpreter. This new book on Indian self-rule is the most informative that I have seen in my own half-century of reading. Deloria and his co-author focus on John Collier's struggle with both the U.S. Congress and the Indian tribes to develop a New Deal for Indians fifty years ago. It is a blow-by-blow historical account, perhaps unique in the literature, which may be the only way to show the full complexity of American Indian relations with federal and state governments. This makes it possible in two brilliant concluding chapters to clarify current Indian points of view and to build onto initiatives that Indians have already taken to suggest which of these might be most useful for them to pursue. The unheeded message has been clear throughout history, but now we see how if we let Indians do it their own way they might, more quickly than we have imagined, rebuild their communities." [Born to Run: The Hidden Tribe, the Ultra-runners, and the Greatest Race the World Has Never Seen, Christopher McDougall](#) , 2010, 1861978774, 9781861978776. At the heart of Born to Run lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

[The Eternal Struggle: Two Worlds, One War, James Rourke](#) , 2011, 0984635920, 9780984635924. When your life ends...the adventure begins! Niccolo Bontecelli and Seamus O'Malley thought their afterlife would simply be a peaceful journey to Heaven. Little did they suspect their path would lead through Hell! Satan, seeking a final victory in his eternal struggle with Goodness, strives to gain dominion over both the spiritual realm of Limbo and Earth. Hitler and Stalin are released from Hell with orders to bring havoc to Limbo and manipulate the upcoming US Presidential election. Niccolo and Seamus battle evil with the aid of Abraham Lincoln, Stephen Biko and other historic figures. Can they save Limbo, Earth, and their own souls, or will Satan's soldiers achieve their malicious goals?

[Tradition and Modernity: Philosophical Reflections on the African Experience, Kwame Gyekye](#) , 1997, 0195112253, 9780195112252. This book offers a philosophical interpretation and critical analysis of the African cultural experience in modern times. In their attempt to evolve ways of life appropriate to our modern world culture, says Kwame Gyekye, African people face a number of unique societal challenges, some stemming from the values and practices of their traditional cultures, others representing the legacy of European colonialism. Defending the cross-cultural applicability of philosophical concepts developed in Western culture, Gyekye attempts to show the usefulness of such concepts in addressing a wide range of concrete and specifically African problems. Among the issues he considers are: economic development, nation-building, the evolution of viable and appropriate democratic political institutions, the development of appropriate and credible ideologies, political corruption, and the crumbling of traditional moral standards in the wake of rapid social change. Throughout, Gyekye challenges the notion that modernity for Africa must be equated with Western values and institutions, arguing instead that African modernity must be forged creatively within the furnace of Africa's many-sided cultural experience. A timely and powerful addition to postcolonial theory, Tradition and Modernity will interest scholars and students working in philosophy, political science, sociology, and African studies.

A first in its field, this guide draws a new conceptualization for high schools from the powerful nexus of research and practice found in the best research hospitals in the country. This original idea is applied to a new set of expectations for the 21st-century high school where all students are prepared for college and careers. Detailed are key insights, such as how to develop a system of innovations and build state university relationships for college programming that is affordable and accountable, and offers a pragmatic approach to high school strategic planning. This book will inspire business, policy, and education leaders to act with a common focus college acceleration that transforms high schools to improve state and regional economies.

[Currents of Change: Impacts of El Nio and La Nia on Climate and Society, Michael H. Glantz](#) , 2001, 052178672X, 9780521786720. Headlines around the world about severe droughts, hurricanes, and floods caused by El Nio and La Nia appear every few years. El Nio is the second most important climate process after the changing seasons; its effects are widely known, but the equally serious impact of La Nia is only now beginning to be appreciated. Fully revised, Currents of Change clearly explains what El Nio and La Nia are and how they can be forecast. Examining for the first time the major El Nio of 1997-1998, Michael Glantz explains what we can learn from past events, how we can better manage climate-sensitive activities, and how to anticipate what future storms and droughts may occur. A century ago, it was of interest only to Peruvian fishermen and farmers. Today, scientists armed with tremendous computer models and satellites realize

that El Nio and La Nia affect climatic conditions in seemingly remote parts of the world and are better able to predict which regions will be affected. Including the latest information about El Nio and La Nia, this new edition of Currents of Change will be useful to scientists, policymakers, economists, and interested readers alike. Michael Glantz is a Senior Scientist with the US National Center for Atmospheric Research (NCAR) in the Environmental and Societal Impacts Group, a program of NCAR. He is the coordinator of a 16-country El Nio impacts and response strategies study for the United Nations. Glantz is a member of numerous national and international committees and advisory bodies and is a recipient of the 1987 World Hunger Media Award, of UNEP's Global 500 Award, and the 1991 Mitchell Prize for Sustainable Development. [Kona Snow, Terry Fritts](#) , 2007, 0979151422, 9780979151422. TERROR AND INTRIGUE NOW SPREADS ACROSS ALL THE HAWAIIAN ISLANDS! Two Russian FSB agents' throats are ripped away by a 'Lei O Mano', an ancient Hawaiian warrior's weapon. When a group of missionaries are found slaughtered in Perm, Russia and the Russian's top genetic scientist turns up missing, a single potato arrives in Hawaii starting agent Jim Rikey on a quest to find out how this potato is linked to his uncle's murder in Perm. Viktor, a top Russian FSB officer as well as Taka Matsuura, a wealthy Japanese businessman, are prepared to use all of their resources to retrieve and exploit the genetic secrets this potato holds before Jim can uncover the shocking truth. Haruko, Jotty, and Jim are reunited, and Eddie Popp, a CIA operative, joins Jotty's NCTC team on their mission to prove Taka is the leader of the deadly Red Summit terrorist group. They must stop Taka from using the secrets of the genetic modifications before millions suffer the consequences of the Kona Snow. And just what is the significance of the weaponized anthrax found on a dive boat off the Big Island? Kona Snow is Book Two in author Terry Fritts' bio-terror series and features many of the same characters in his first novel Taka. Kona Snow adds several other interesting characters in a much more complex web of intrigue and action that takes place on several of the Hawaiian Islands, primarily the Big Island, Kauai, and Oahu, as well as Russia, Thailand, Japan, and Southern California. Kona Snow continues the saga of the terrorist cell the Red Summit, led by Taka, as he now plans a two-prong attack on America.

[Providence and Empire: Religion, Politics and Society in the United Kingdom, 1815-1914, Stewart J. Brown](#) , 2008,

0582299608, 9780582299603. For most of the nineteenth century, the United Kingdom was the great world power. The industrial revolution brought it unprecedented wealth, and it possessed the largest empire the world had ever seen. During the nineteenth-century the UK was also highly religious. The evangelical revival had exercised a profound social influence, the churches were powerful institutions, the overwhelming majority of the population were Christian, and the United Kingdom was the main promoter of Protestant overseas missions. This book explores the religious beliefs and practices among the peoples of the UK during the height of its world influence, and considers the relationship of religion to the profound political and social changes associated with industrialisation, imperialism and the growth of democracy. It explores the tensions surrounding the state establishment of religion, the role of religion in shaping national and communal identities in Ireland, and the religious controversies emerging from developments in natural science and biblical criticism. The book gives particular attention to notions of a providential ordering of the world, including the widespread belief that the UK had a divine mission to spread the benefits of Christianity, free trade and civilisation to the wider world, and that its empire existed for a higher purpose.

Protect your wealth from tax collectors and greedy lawsuits, plus the ravages of divorce, illness, and accidents. Reduce or eliminate probate and taxes entirely. Understand the secrets lawyers use to build wealth and protect their clients. Includes a foreword by radio's Bruce Williams, ten asset protection tips anyone can use to protect against lawsuits or financial grief, sample legal documents and a glossary of terms. From the Author: I am ready to transfer my most specialized strategies to you. These are the legal loopholes my wealthiest clients have paid me thousands to research and implement for them. I am on a mission to give everyone the opportunity to use these techniques. I have given thousands of seminars throughout the United States and Canada on asset protection to more than a million people. Doctors, engineers, architects, small business owners, and even lawyers have collectively paid millions of dollars to attend my seminars. I strongly feel the information in my seminars is necessary for every family; especially considering today's complex society. This book gives readers a mega dose of what I lecture about.

[Queen of the Wits: A Life of Laetitia Pilkington, Norma Clarke](#) , 2009, 0571224296, 9780571224296. Poetess, fallen woman and wit, Laetitia Pilkington spent her life as close to fame as she was near to ruin. Favoured by, among others, the newly celebrated Jonathan Swift in Ireland in the 1730s, she collected stories and developed the brazen femininity that would be her only currency in London a decade later. Divorced by her husband after she was exposed as an adulteress, she led a life of precarious self-sufficiency. Through humour, intelligence and her skilful use of scandal, she survived on the very fringes of respectability.

[A Means to an End: The Biological Basis of Aging and Death, William R. Clark](#) , 1999, 0195125932, 9780195125931. Why do we age? Is aging inevitable? Will advances in medical knowledge allow us to extend the human lifespan beyond its present limits? Because growing old has long been the one irreducible reality of human existence, these intriguing questions arise more often in the context of science fiction than science fact. But recent discoveries in the fields of cell biology and molecular genetics are seriously challenging the assumption that human lifespans are beyond our control. With such discoveries in mind, noted cell biologist William R. Clark clearly and skillfully describes how senescence begins at the level of individual cells and how cellular replication may be bound up with aging of the entire organism. He explores the evolutionary origin and function of aging, the cellular connections between aging and cancer, the parallels between cellular senescence and Alzheimer's disease, and the insights gained through studying human genetic disorders--such as Werner's syndrome--that mimic the symptoms of aging. Clark also explains how reduction in caloric intake may actually help increase lifespan, and how the destructive effects of oxidative elements in the body may be limited by the consumption of antioxidants found in fruits and vegetables. In a final chapter, Clark considers the social and economic aspects of living longer, the implications of gene therapy on senescence, and what we might learn about aging from experiments in cloning. This is a highly readable, provocative account of some of the most far-reaching and controversial questions we are likely to ask in the next century.

[Nuer Religion, Edward Evan Evans-Pritchard](#) , 1956, 0198740034, 9780198740032. A study of Nuer religion is a study of what they consider to be the nature of Spirit and of man's relation to it. I had previously spent many months among the Azande people of the Nile-Uelle divide. From my earliest days among them I was constantly hearing the word mangu, witchcraft, and it was soon clear that if I could gain a full understanding of the meaning of this word I should have the key to Zande philosophy. When I started my study of the Nuer I had a similar experience. I constantly heard them speaking of kwoth, Spirit, and I realized that a full understanding of that word was the key to their -- very different -- philosophy. The attempt to reach it and, even more, to present my conclusions has occupied me for a long time and has proved to be a formidable task. The difficulties which had to be overcome will be very apparent in the pages which follow, but I mention some of them now. -- from Preface (p. vi.).

[Asian Perspectives on Teacher Education, Shin'ichi Suzuki, Edward R. Howe](#) , 2010, 0415560373, 9780415560375.

Research into teacher education is dominated by Anglophone literature, with the inevitable result that teacher education in non-English speaking regions of the world largely remains unexamined. This book fills the gap in the existing literature and comprises twelve invited contributions from an international panel of educationists. To provide the reader with a clear structure, the book offers a detailed introduction and afterword which brings together the various themes examined in each chapter. The contributions offer perspectives on teacher education in the Asian region, perspectives which, until now, have been missing from contemporary debate on teacher education. Presenting research from Australia, Japan, the USA, the People's Republic of China, the Republic of Korea and Vietnam, this book examines the varied situations teacher educators experience in their own countries; in so doing the researchers identify resonances and dissonances in comparison with the dominant Anglophone research literature on the same subjects. This book is an important contribution

to the comparative study of teacher education in the first decade of the twenty-first century, giving a voice to an important sector of the international community of teacher educators. This book was published as a special issue of Journal of Education for Teaching: International research and pedagogy.

However, there was one Pearl different from the rest. She began to talk more, ask questions. She began looking at other relationships how they worked outside the confines, guidance, and support like the Elders. She found out secrets. She exposed behaviors by befriending women outside of the family. She changed; some say she turned her back. There was no doubt that the lives of the Pearls would never be the same. Latrika can't go on living the life she had led for so many years. She can't keep to herself anymore. She can't hold back. She needs help. She's getting a divorce from a man that the Elders had approved of, even if he did cheat on her with multiple women. Her friend Blair crosses the line and schedules Latrika an appointment with a therapist. Begrudgingly, Latrika goes to the appointment, but it's not like what she thought it was going to be. Her mind is opened, and memories that she struggled to forget surge to the surface. Family secrets, betrayals of her heart, and life-changing mistakes Latrika made in her adolescence swirl around her mind. Latrika is not so sure she's ready or willing to deal with everything, and she looks to alcohol to numb her pain. Will Latrika choose to deal with the pain, or will she order another Appletini? Can she survive without the aid and approval of the Elders? Will she be stripped of her title of a Pearl?

[Living in the Future: The Education and Adventures of an Advanced Aircraft Designer, Daniel P. Raymer](#) , 2010, 0972239723, 9780972239721. Dan Raymer, noted aircraft designer and author of the industry standard textbook Aircraft Design: A Conceptual Approach, has written a non-technical book that will be treasured by everyone who loves airplanes, wonders how they get designed, and wants to know how somebody becomes an aircraft designer. Half the book is Raymer's warm and personal memoir of growing up in the 50's and 60's as the son of a Navy Test Pilot, discovering his own love of aviation, and entering the rarefied club of those who stare at a blank sheet of paper and turn it into a new aircraft or spacecraft design. The other half covers Raymer's early involvement in the projects that became the B-2, F-22, T-45, F-35, and many more. The book is an "easy" read, quick-paced, funny, and aimed at a general audience. Raymer includes his mistakes, disappointments, and downright stupid decisions. It's not all airplanes either - read about Raymer's aborted musical career, his misadventures in exotic destinations like Belarus, Turkey, and Bulgaria, how he got on the Internet early enough to grab www.aircraftdesign.com, and how he came to write his design textbook. The book is in paperback and is due out this fall from Design Dimension Press (Los Angeles, CA).

[A Day, A Night, Another Day, Summer: Stories, Christine Schutt](#) , 2005, 0810151537, 9780810151536. The title of Christine Schutt's second collection strikes the theme of swiftly passing time that runs through each of the stories. In "The Life of the Palm and the Breast" a woman watches her half-grown children running through the house and wonders: Whose boys are these? Whose life is this? The title story tells of a grandfather who has lived long enough to see his daughter's struggles echoed in his granddaughter and how her unhappiness leads him to unexpectedly feel the weight of his years. In "Darkest of All" a mother's relationship with her sons is wrecked by a repeated cycle of drugs and abusive relationships, the years pass and the pain-and its chosen remedy-remains the same. The narrator in "Winterreise" evokes Thoreau and strives to be heroic in the face of her longtime friend's imminent death, a harsh reminder of the time that is allotted to each of us. Schutt's indomitable, original talent is once again on full display in each of these deeply informed, intensely realized stories. Many of the narratives take place in a space as small as a house, where the doors are many and what is hidden behind these thin domestic barriers tends towards violence, abusive sex, and mental anguish. Schutt opens these doors in sudden, bold moments that also reveal how the characters are often hopeful, even optimistic. With a style that is at once sensual and spare, dreamlike and deliberate, she exposes the terrible intimacy of the rooms and corridors of our innermost lives.

We may think of Nashville as the country & Western capital of America, but L.A. had more hillbilly singers at work in the early years--in the movies, at the recording studios and on C&W radio shows. The style adopted by these music pioneers, a colorful mix of cowboy and show business, still defines fancy Western wear. [Justice and Foreign Policy, Michael Blake](#) , 2013, 0199552002, 9780199552009. This book is an argument about the moral foundations of foreign policy. It argues that a liberal state can insist upon the universal reach of liberal ideas, while still distinguishing between what is owed to citizens and what is owed to foreign citizens. This liberalism includes a concern for liberal toleration, which is intended to defend the proposition that a liberal state can work for democratization and liberalism abroad, without being intolerant or illiberal in doing so. What constraints there are on foreign policy emerge not from the need to tolerate undemocratic regimes, but from the prudential reason that there are few effective and proportional means by which such regimes might be liberalized. It also argues that international inequality is wrong

only when and to the extent this inequality can be shown to undermine the democratic self-rule of a society. Global poverty and underdevelopment is wrong for reasons quite unlike the reasons given to condemn domestic inequality. These facts are combined to give an attractive and coherent picture of how the foreign policy of a liberal state might be morally evaluated.

This inspirational collection of short essays is devoted to self-realization and spiritual growth through personal responsibility, self-esteem, and respect for others. Fifteen passages emphasize self-examination of our responses to others and to those in our spiritual past; responses to our environment, both human-made and physical; and responses to our personal spirituality. A multitude of sensible, cheerful, and empowering life principles are included, making this an uplifting gift to others or to oneself.

[The 9th Inning: And Other Stories, E. R. Wytrykus](#) , 2010, 0974221686, 9780974221687. The Continental League is dying, unable to compete with the "Big Leagues." In a game that will decide who goes to the final Championship Series, the Cowboys and the Jets face off, for one team their last game ever. The Jets, the dominant team in the league, and their ace, Jack Sevan, are resolved to win the Championship one last time. In The 9th Inning we go inside the minds of the players, with the entire novella covering one batter during a crucial sequence in the 9th inning. The Jets have a slim lead and Sevan is determined to finish the game. The manager, the catcher, the base runners, are all thinking what they must be ready to do, depending on each pitch. In between pitches we learn about the player's backgrounds and history; how they got here and what they hope and fear will happen after the league ends. The story unfolds from several viewpoints, down to the climactic final pitch. In The Prey we meet Andrew Jones, who has agreed to be hunted, to the death, on an isolated island, watched by millions of global viewers! The reward is a million dollars for the wife and child he has treated badly. But once the concept of death comes close at hand, Andrew isn't sure he's willing to die, million dollars or not. Tired and hurt and unarmed, Andrew must find a way to save himself from the Hunter. In The Blue Blouse we take a quick journey through the lives of two people who fall in love, but cannot be together. They maintain a long-distance, on again, off again friendship. Tied together by memories, they are never far apart in spirit, until the fickle fates insist they will be together, even if for only a short time. The Kids is a light-hearted romp into a quiet neighborhood that is disrupted when the kids find a creepy treasure buried under a mound of dirt they are playing on. Two of the kids become heroes when they must save their neighbor who has been set upon by ghouls trying to find what else may be buried under the mound!

Four hundred vintage images and a meticulously researched text, including 16 essays by renowned experts in the fields of art and interior design, illuminate and trace the public and private lives of Helena Rubinstein. Rubinstein's bold and influential flair for decor - sleekly modern at times, and at other times a wildly eclectic sampling from different eras - was showcased globally in her beauty salons and in her glamorous residences in New York, Paris, and the South of France. An astute patron, she invested in artworks by the luminaries of Parisian bohemia just as they began their ascent. Her vast collection included tapestries by Picasso and Rouault, paintings by Degas, Dufy, Matisse, Miró, Modigliani,

[Can Students Do Mathematical Problem Solving?: Results from Constructed-response Questions in NAEP's 1992](#)

[Mathematics Assessment, John A. Dossey, Ina V. S. Mullis, Chancey O. Jones](#) , 1993, 0160419212, 9780160419218. In the 1992 mathematics assessment of the National Assessment of Educational Progress (NAEP), approximately one-third of the questions and about half of the student response time were devoted to questions asking students to construct their own responses. Regular constructed response items required a short answer with a problem solution, while extended constructed response required demonstration of student reasoning. Analysis of student papers shows that most made a conscientious effort to respond, but that performance left much to be desired. On regular constructed response questions, the average percent correct by grade level was 42 percent of grade 4, 53 percent of grade 8, and 40 percent of grade 12. For extended constructed response questions, the average percentages of student producing correct responses were 16 percent at grade 4, 8 percent at grade 8, and 9 percent at grade 12. Results indicate that extended constructed response questions can be successfully used in large-scale assessment and that they do signify student proficiency. The levels of performance on multiple-choice items were higher than for constructed responses. Sixty tables present study findings. A procedural appendix explains study methodology, with an additional seven tables. (SLD)

[The Flight of the Century: Charles Lindbergh and the Rise of American Aviation, Thomas Kessner](#) , 2012, 0199931178, 9780199931170. In late May 1927 an inexperienced and unassuming 25-year-old Air Mail pilot from rural Minnesota stunned the world by making the first nonstop transatlantic flight. A spectacular feat of individual daring and collective technological accomplishment, Charles Lindbergh's flight from New York to Paris ushered in America's age of commercial aviation. In *The Flight of the Century*, Thomas Kessner takes a fresh look at one of America's greatest moments, explaining how what was essentially a publicity stunt became a turning point in history. Kessner vividly recreates the

flight itself and the euphoric reaction to it on both sides of the Atlantic, and argues that Lindbergh's amazing feat occurred just when the world--still struggling with the disillusionment of WWI--desperately needed a hero to restore a sense of optimism and innocence. Kessner also shows how new forms of mass media made Lindbergh into the most famous international celebrity of his time, casting him in the role of a humble yet dashing American hero of rural origins and traditional values. Much has been made of Lindbergh's personal integrity and his refusal to cash in on his fame. But Kessner reveals that Lindbergh was closely allied with, and managed by, a group of powerful businessmen--Harry Guggenheim, Dwight Morrow, and Henry Breckenridge chief among them--who sought to exploit aviation for mass transport and massive profits. Their efforts paid off as commercial air traffic soared from 6,000 passengers in 1926 to 173,000 passengers in 1929. Kessner's book is the first to fully explore Lindbergh's central role in promoting the airline industry--the rise of which has influenced everything from where we live to how we wage war and do business. The Flight of the Century sheds new light on one of America's fascinatingly enigmatic heroes and most transformative moments.

[The Mill on Halfway Brook, Louise Elizabeth Smith](#) , 2010, 0982637403, 9780982637401. The Mill on Halfway Brook recounts the life and times of families who settled near Halfway Brook in the heavily forested original Town of Lumberland, Sullivan County, New York. It spans the years from 1800 to 1880, and is the first in the series, *Memoirs from Eldred, New York, 1800-1950*. The principal families in the book (Eldred, Austin, Leavenworth, and Myers) built their homes in what became the hamlet of Eldred, in the Town of Highland. Some of their friends and kinsfolk (the Clarks, Gardners, Hallocks, Hickoks, Sergeants, Van Tuyls, and others) lived in nearby hamlets (Barryville, Pond Eddy, Glen Spey, Narrowsburg, Tusten, or Bethel). The story includes references to the neighboring Pennsylvania towns of Shohola, Lackawaxen, and Mast Hope. The Mill on Halfway Brook follows the main occupations of the community, including lumbering, tanning, river rafting, working for the D&H Canal Company, and bluestone quarrying. The Civil War chapter mentions many of the men from the Town of Highland who fought in the war, and has major excerpts from 50 letters written by Corporal Sherman S. Leavenworth. The narrative weaves vignettes of townsfolk, preachers, Congregational and Methodist Churches, regional and national events with historical information, censuses, an 1875 biography, Church records, and family and land documents. The book has 300 photos and postcards, 17 old and new maps, and 200 letters (1845-1880). The Mill on Halfway Brook is fully indexed, with names of over 900 people, places, and events.

[Amines: Synthesis, Properties and Applications, Stephen A. Lawrence](#) , 2004, 0521782848, 9780521782845. The understanding of amine chemistry is of paramount importance to numerous chemical industries, as well as to academic research. This book provides an authoritative account of the properties and applications of amines with respect to the characteristics of bonded substituents and the nature of their surrounding chemical and physical environments. The synthesis of alkyl, aryl and heterocyclic amines and inorganic amines with a review of their typical reactions is comprehensively treated, whilst practical synthetic and analytical methods for laboratory preparation and detection are provided. The importance of amine chemistry from the nineteenth century to the modern day, with a brief history of the development of ammonia synthesis, is included. This book is an invaluable reference for undergraduates, postgraduates and chemical researchers working in industry.

It was none other than Louis Armstrong who said, "These people who make the restrictions, they don't know nothing about music. It's no crime for cats of any color to get together and blow." "You can't know what it means to be black in the United States--in any field," Dizzy Gillespie once said, but Gillespie vigorously objected to the proposition that only black people could play jazz. "If you accept that premise, well then what you're saying is that maybe black people can only play jazz. And black people, like anyone else, can be anything they want to be." In *Cats of Any Color*, Gene Lees, the acclaimed author of three previous collections of essays on jazz and popular music, takes a long overdue look at the shocking pervasiveness of racism in jazz's past and present--both the white racism that long ghettoized the music and generations of talented black musicians, and what Lees maintains is an increasingly virulent reverse racism aimed at white jazz musicians. In candid interviews, living jazz legends, critics, and composers step forward and share their thoughts on how racism has affected their lives. Dave Brubeck, part Modoc Indian, discusses native Americans' contribution to jazz and the deeply ingrained racism that for a time made it all but impossible for jazz groups with black and white players to book tours and television

appearances. Horace Silver looks back on his long career, including the first time he ever heard jazz played live. Blacks were not not allowed into the pavilion in Connecticut where Jimmie Lunceford's band was performing, so the ten-year-old Silver listened and watched through the wooden slats surrounding the pavilion. "And oh man! That was it!" Silver recalls. Red Rodney recalls his early days with Charlie "Bird" Parker, and pianist and composer Cedar Walton tells of the time Duke Ellington played at the army base at Ford Dix and allowed the young enlisted Walton to sit in. Tracing the jazz world's shifting attitude towards race, many of the stories Lees tells are inspiring--Brubeck cancelling 23 out of 25 concert dates in the South rather than replace black bass player Eugene Wright, or Silver insisting that while he strives to provide his fellow black musicians opportunities, "I just want the best musicians I can get. I don't give a damn if they're pink or polka dot." Others are profoundly disturbing--Lees' first encounter with Oscar Peterson, after a Canadian barber flatly refused to cut Peterson's hair, or Wynton Marsalis on television claiming that blacks have been held back for so many years because the music business is controlled by "people who read the Torah and stuff." From the old shantytowns of Louisville, to the streets of South Central L.A., to the up-to-the-minute controversies surrounding Marsalis's jazz program at Lincoln Center, and the Jazz Masters awards given by the NEA, *Cats of Any Color* confronts racism head-on. At its heart is a passionate plea to recognize jazz not as the sole property of any one group, but as an art form celebrating the human spirit--not just for the protection of individual musicians, but for the preservation of the music itself.

[Large Scale: Fabricating Sculpture in the 1960s and 1970s, Jonathan D. Lippincott](#) , 2010, 1568989342, 9781568989341.

Prior to 1966, if artists wanted to create works larger than their studios or metalworking abilities allowed, they had to turn to industrial manufacturers, usually steel fabricators or boat builders, who, not surprisingly, were often unable to accommodate the creative process of making art. The opening that spring of Lippincott, Inc. changed that and the direction of American art in the process. Functioning as an extension of the artists' studios, Lippincott, Inc. was also a new kind of all-in-one sculpture production center that put the tools of industrial fabrication in the hands of artists, allowing them to produce at a scale they had previously only dreamt of on paper. Over the years of the shop's operation from 1966 to 1994, Lippincott, Inc. has produced sculptures by nearly one hundred artists. Fortuitously, the shop's founders, Donald Lippincott and Roxanne Everett, meticulously documented the working processes of some of the most important American artists of the twentieth century such as Claes Oldenburg, Louise Nevelson, Ellsworth Kelly, Robert Indiana, and Barnett Newman. Drawing on the vast collection of the images in the Lippincott archive, *Large Scale* presents over three hundred photographs of these artists and their iconic large scale works including Newman's Broken Obelisk, Indiana's Love, Oldenburg's Mouse, and Rosenthal's Alamo, many of which have been previously unseen. These rare, behind-the-scenes images offer fresh insight on an important chapter of art history and compel us all to see these

enduring works with fresh eyes. An introduction by curator Patterson Sims places the evolution of Lippincott, Inc. in the context of the history of American art.

[Crooked River Burning, Mark Winegardner](#) , 2001, 015601422X, 9780156014229. The critically acclaimed novel of a compelling love affair and the decline of a once prosperous city . The birthplace of rock 'n' roll, Cleveland was an economic powerhouse and America's sixth-largest city in the late 1940s. By 1969, it had dropped to twelfth. In the summer of 1948, fourteen-year-old David Zielinsky can look forward to a job at the docks, the only way to make a living on his side of the city. Across the river is twelve-year-old Anne O'Connor, daughter of the reigning political boss of Cuyahoga County. In this richly entertaining novel, the two will meet and fall in love, and for twenty turbulent years, as Cleveland falls from grace, they will be consumed by a fiery, star-crossed romance. A natural-born storyteller, Mark Winegardner charts the demise of this fascinating city, artfully weaving in such real-life Clevelanders as Eliot Ness, Alan Freed, and Carl Stokes. A saga reminiscent of the best writing of E. L. Doctorow, Tom Wolfe, and John Dos Passos, Crooked River Burning is masterfully crafted and vastly entertaining-a great American novel in the truest sense.

[Imperialism: A Study, J. A. Hobson](#) , 2006, 1596059486, 9781596059481. In his Preface to the 1902 first edition of Imperialism: A Study, imperial critic J.A. Hobson demonstrates his prophetic talents by noting, just as the Victorian age was ending and World War I was brewing, that "Imperialism has been adopted as a more or less conscious policy by several European States and threatens to break down the political isolation of the United States." Though the book speaks mostly of British imperialism of the period, Hobson inevitably explores the general principals-and hidden motives-of imperialist policy. Hobson covers: . the commercial value of imperialism . imperialism as an outlet for population . economic parasites of imperialism . imperialist finance . moral and sentimental factors . and much more. With imperialism again a hot topic in the political arena, Hobson's treatise continues to lend invaluable, necessary insight into a complex ideology. British writer JOHN ATKINSON HOBSON (1858-1940) was an historian and economist as well as a popular lecturer on the topics. His other books include The Evolution of Modern Capitalism (1894), The Economics of Distribution (1900), The Economics of Unemployment (1922), and the autobiographical Confessions of an Economic Heretic (1938).

[UC/OS-III: The Real-Time Kernel and the Renesas SH7216, Jean J Labrosse](#) , 2010, 098233754X, 9780982337547. This two-part book puts the spotlight on how a real-time kernel works using Micrium's C/OS-III kernel as a reference. Part I includes an overview of the operation of real-time kernels, and walks through various aspects of C/OS-III implementation and usage. Part II provides application examples (using the versatile Renesas YRDKSH7216 Evaluation Board, available separately) that enable readers to rapidly develop their own prototypes. This book is written for serious embedded systems programmers, consultants, hobbyists, and students interested in understanding the inner workings of a real-time kernel. C/OS-III is not just a great learning platform, but also a full commercial-grade software package, ready to be part of a wide range of products. C/OS-III is a highly portable, ROMable, scalable, preemptive real-time, multitasking kernel

designed specifically to address the demanding requirements of today 's embedded systems. C/OS-III is the successor to the highly popular C/OS-II real-time kernel but can use most of C/OS-II 's ports with minor modifications. Some of the features of C/OS-III are: Preemptive multitasking with round-robin scheduling of tasks at the same priority Supports and unlimited number of tasks and other kernel objects Rich set of services: semaphores, mutual exclusion semaphores with full priority inheritance, event flags, message queues, timers, fixed-size memory block management, and more. [The Geography of Childhood: Why Children Need Wild Places, Gary Paul Nabhan](#) , 1994, 0807085243, 9780807085240.

"In this unique collaboration, naturalists Gary Nabhan and Stephen Trimble investigate how children come to care deeply about the natural world. They ask searching questions about what may happen to children denied exposure to wild places - a reality for more children today than at any time in human history." "The authors remember pivotal events in

their own childhood that led each to a life-long relationship with the land: Nabhan's wanderings in the wasteland of steel mills and power plants of Gary, Indiana, and in the Indiana Dunes; Trimble's travels in the West with a geologist father. They tell stories of children learning about wild places and creatures in settings ranging from cities and suburbs to isolated Nevada sheep ranches to Native American communities in the Southwest and Mexico." "The Geography of Childhood draws insights from fields as various as evolutionary biology, child psychology, education, and ethnography. The book urges adults to rethink our children's contact with nature. Small children have less need for large-scale wilderness than for a garden, gully, or field to create a crucial tie to the natural world. Nabhan suggests that traditional wilderness-oriented rites of passage may help cure the alienation of adolescence: "Those who as adolescents fail to pass through such rites remain in an arrested state of immaturity for the remainder of their lives." Trimble's fatherhood leads him to question how we grant different freedoms to girls and boys in their exploration of nature - and how this bias powerfully affects adult lives. Both authors return to their experiences with indigenous peoples to show how nature is taught and wilderness understood in cultures historically grounded outside of America's cities and suburbs." "The Geography of Childhood makes clear how human growth remains rooted, as it always has, both in childhood and in wild landscapes. It is an essential book for all parents and teachers who wonder what our children may miss if they never experience local wildlife or wild landscapes."--BOOK JACKET. [It's Always Today, Wood Butler Jr](#) , 2011, 0983685401, 9780983685401. Change Your Entire Life In Just 24 Hours! Every journey begins with the first step. For many of us, taking that step is often easier said than done. Life has a way of getting in the way of life. Something always seems to pop up, preventing us from embarking upon our journey, ultimately leaving us at square one indefinitely. While it's human nature to think that we will just try again tomorrow, it is important to realize that tomorrow never really arrives. At any given point in your life that you stop to think about it, it's always today. There's no better time to get moving than right now. It's Always Today explores some of life's most perplexing concepts in a conversational tone making comprehension and application a breeze. It is truly a self-empowerment handbook which provokes you to ponder your past and plan your future. Each of the concepts are stand-alone in nature but are woven together by powerful threads of focus, effort, and discipline. By the end of the 24th chapter, you will believe that you can achieve whatever you want in your life.

[Graph Design for the Eye and Mind, Stephen M. Kosslyn](#) , 2006, 0199775001, 9780199775002. Graphs have become a fixture of everyday life, used in scientific and business publications, in magazines and newspapers, on television, on billboards, and even on cereal boxes. Nonetheless, surprisingly few graphs communicate effectively, and most graphs fail because they do not take into account the goals, needs, and abilities of the viewers. In raph Design for Eye and Mind, Stephen Kosslyn addresses these problems by presenting eight psychological principles for constructing effective graphs. Each principle is solidly rooted both in the scientific literature on how we perceive and comprehend graphs and in general facts about how our eyes and brains process visual information. Kosslyn then uses these eight psychological principles as the basis for hundreds of specific recommendations that serve as a concrete, step-by-step guide to deciding whether a graph is an appropriate display to use, choosing the correct type of graph for a specific type of data and message, and then constructing graphs that will be understood at a glance. Kosslyn also includes a complete review of the scientific literature on graph perception and comprehension, and appendices that provide a quick tutorial on basic statistics and a checklist for evaluating computer-graphics programs. Graph Design for Eye and Mind is an invaluable reference for anyone who uses visual displays to convey information in the sciences, humanities, and businesses such as finance, marketing, and advertising.
