9780300124880. In the late 18th and early 19th centuries, burgeoning American cities like New Orleans and Philadelphia seemed increasingly chaotic. Noise, odors, and a feverish level of activity on the streets threatened to overwhelm the senses. Growing populations placed new demands on every aspect of the urban landscape: streets, parks, schools, asylums, cemeteries, markets, waterfronts, and more. In this unique exploration of the early history of urban architecture and design, leading architectural historian Dell Upton reveals the fascinating confluence of sociological, cultural, and psychological factors that shaped American cities in the antebellum years. Through contemporary travel accounts, diaries, and correspondence, as well as maps, architectural drawings, paintings, and prints many previously unpublished--Upton investigates not only how buildings were designed, streets were laid out, and urban space was put to use, but also why. He offers original insights into the way cities were imagined, and an extensive selection of illustrations recreates the various features of the urban landscape in the nineteenth century.

[The Slasher Killings: A Canadian Sex-crime Panic, 1945-1946](#), [Patrick Brode](#) , 2009, 0814334482, 9780814334485. As the city of Windsor, Ontario, celebrated the end of World War II and the return of its troops with parades and public revelry, the industrial city in the south of Canada was shaken by a series of brutal stabbings. The failure of the police to catch the murderer, a "blood lustig maniac" as the local newspaper described him, the turbulence of the times, and the seemingly random nature of the killings plunged the city into a panic. In *The Slasher Killings* Patrick Brode tells the dramatic story of the Windsor slasher, the social frenzy that his attacks created, and the surprising results that this hysteria generated. By July and August of 1945, Windsor residents knew there was a serial killer living among them and that, despite numerous police roundups, no credible suspect had been found. The following summer the panic escalated when the stabbings began again and, this time, focused on "sex deviants" whom the public and police had decided were at the heart of the problem. Brode examines the vicious press campaign that arose out of the paranoia that vilified

drifters, the unemployed, racial minorities, and, finally, sexual outsiders, only further fanning the flames of the growing panic. Brode reveals how the authorities used this hysteria to support their efforts to monitor and control the actions of gay men, a campaign that would be part of the process that led to Canada's 1948 "criminal sexual psychopath" law but would ultimately bring them no closer to the identity of the killer. The Slasher Killings draws heavily on the records of the murder investigations maintained by the Windsor Police Department, bringing firsthand evidence and documents to light in this dramatic mystery and informative historical study. Local history buffs, true-crime enthusiasts, and readers interested in the role of the media in shaping public discourse will appreciate The Slasher Killings.

[Origins of the Civil Rights Movements, Aldon D. Morris](#) , 1986, 0029221307, 9780029221303. A valuable, eye-opening work (The Boston Globe) about the civil rights struggles of the 1950s and 1960s. On December 1, 1955, in Montgomery, Alabama, Mrs. Rosa Parks, weary after a long day at work, refused to give up her bus seat to a white man and ignited the explosion that was the civil rights movement in America. In this powerful saga, Morris tells the complete story behind the ten years that transformed America, tracing the essential role of the black community organizations that was the real power behind the civil rights movement. Drawing on interviews with more than fifty key leaders, original documents, and other moving firsthand material, he brings to life the people behind the scenes who led the fight to end segregation, providing a critical new understanding of the dynamics of social change. An important addition to our knowledge of the strategies of social change for all oppressed peoples. Reverend Jesse Jackson A benchmark study setting the historical record straight. [The Routledge Handbook of Corpus Linguistics, Anne O'Keeffe, Michael McCarthy](#) , 2010, 0203856945, 9780203856949.

The Routledge Handbook of Corpus Linguistics provides a timely overview of a dynamic and rapidly growing area with a widely applied methodology. Through the electronic analysis of large bodies of text, corpus linguistics demonstrates and supports linguistic statements and assumptions. In recent years it has seen an ever-widening application in a variety of fields: computational linguistics, discourse analysis, forensic linguistics, pragmatics and translation studies. Bringing together experts in a number of key areas of development and change, the handbook is structured around six themes which take the reader through building and designing a corpus to using a corpus to study literature and translation. Each theme is preceded by a substantial overview of the area putting the subsequent themes into perspective. A comprehensive introduction covers the historical development of the field and its growing influence and application in other areas. Structured around five headings for ease of reference, each contribution includes further reading sections with three to five key texts highlighted and annotated to facilitate further exploration of the topics. The Routledge Handbook of Corpus Linguistics is the ideal resource for advanced undergraduates and postgraduates. Michael McCarthy is Emeritus Professor of Applied Linguistics at the University of Nottingham, UK, Adjunct Professor of Applied Linguistics at the Pennsylvania State University, USA, and Adjunct Professor of Applied Linguistics at the University of Limerick, Ireland. Anne O'Keeffe is lecturer in Applied Linguistics, Department of English Language and Literature, Mary Immaculate College, University of Limerick, Ireland. When Luke Owen set out to capture the landscapes of Western Australia's farming communities, he discovered beautiful sunrises and sunsets, uninterrupted blue skies and golden fields; landscapes occupied by authentic and generous individuals. Travelling across the Wheatbelt, Great Southern and Midwest regions of WA, Luke and his camera were welcomed into the homes of countless farming families who graciously shared their properties with him. Story after story, visit after visit, Luke came to appreciate the beauty of Western Australia's farming landscape. This

stunning series of photographs collectively chronicles the landscapes of these farming properties. Each image offers a majestic view of these family run properties - properties that for decades have defined our national identity and strengthened and developed our nation's economy. Even as encroaching cities threaten their livelihoods, these men and women continue to find sustenance in the same landscapes in which they grew up. Built On The Sheep's Back is an inspirational and beautiful reminder of what it means to live with natural simplicity and contentment, in a world that is dominated by urban environments.

[Genghis Khan, John Man](#) , 2010, 1409045447, 9781409045441. Genghis Khan - creator of the greatest empire the world has ever seen - is one of history's immortals. In Central Asia, they still use his name to frighten children. In China, he is honoured as the founder of a dynasty. In Mongolia he is the father of the nation. In the USA, Time magazine, voted Genghis Khan 'the most important person of the last millennium'. But how much do we really know about this man? How is it that an unlettered, unsophisticated warrior-nomad came to have such a profound effect on world politics that his influence can still be felt some 800 years later? How he united the deeply divided Mongol peoples and went on to rule an empire that stretched from China in the east to Poland in the west (one substantially larger than Rome's at its zenith) is an epic tale of martial genius and breathtaking cruelty. John Man's towering achievement in this book, enriched by his experiences in China and Mongolia today, is to bring this little-known story vividly and viscerally to life.

[Electric Jesus Corpse, Carlton Mellick, III](#) , 2002, 0971357285, 9780971357280. The story of the messiah, Jesus Christ, thrown into a chaotic and surreal version of modern day Earth where: people naturally turn into zombies after they die and are left to roam the countryside forever, greasers are evil dictators that have taken over America, vodka is the most powerful substance in the world, and flesh is slowly mutating into machine. The story follows Christ's twelve apostles. However, in this world the apostles are pimps, necrophiliacs, skinheads, and other assorted freaks. And they have no desire to follow Jesus Christ on his crusade to save humanity whatsoever. So this novel follows the lives of these never-

been apostles on their separate epic journeys into the bizarre. An awkward and chaotic work of art (or perhaps garbage), that is like nothing you've ever seen.

[Contested Will: Who Wrote Shakespeare?, James Shapiro](#) , 2010, 1439170223, 9781439170229. For more than two hundred years after William Shakespeare's death, no one doubted that he had written his plays. Since then, however, dozens of candidates have been proposed for the authorship of what is generally agreed to be the finest body of work by a writer in the English language. In this remarkable book, Shakespeare scholar James Shapiro explains when and why so many people began to question whether Shakespeare wrote his plays. Among the doubters have been such writers and thinkers as Sigmund Freud, Henry James, Mark Twain, and Helen Keller. It is a fascinating story, replete with forgeries, deception, false claimants, ciphers and codes, conspiracy theories and a stunning failure to grasp the power of the imagination. As *Contested Will* makes clear, much more than proper attribution of Shakespeare's plays is at stake in this authorship controversy. Underlying the arguments over whether Christopher Marlowe, Francis Bacon, or the Earl of Oxford wrote Shakespeare's plays are fundamental questions about literary genius, specifically about the relationship of life and art. Are the plays (and poems) of Shakespeare a sort of hidden autobiography? Do Hamlet, Macbeth, and the other great plays somehow reveal who wrote them? Shapiro is the first Shakespeare scholar to examine the authorship controversy and its history in this way, explaining what it means, why it matters, and how it has persisted despite abundant evidence that William Shakespeare of Stratford wrote the plays attributed to him. This is a brilliant historical investigation that will delight anyone interested in Shakespeare and the literary imagination.

[Standing Bear is a Person: The True Story of a Native American's Quest for Justice, Stephen Dando-Collins](#) , 2004, 030681370X, 9780306813702. In 1877, Standing Bear and his Indian people, the Ponca, were forcibly removed from their land in northern Nebraska. In defiance, Standing Bear sued in U.S. District Court for the right to return home. In a landmark case, the judge, for the first time in U.S. history, recognized Native American rights-acknowledging that "Standing Bear is a person"-and ruled in favor of Standing Bear. Standing Bear Is a Person is the fascinating behind-the-scenes story of that landmark 1879 court case, and the subsequent reverberations of the judge's ruling across nineteenth-century America. It is also a story filled with memorable characters typical of the Old West-the crusty and wise Indian chief, Standing Bear, the Army Indian-fighting general who became a strong Indian supporter, the crusading newspaper editor who championed Standing Bear's cause, and the "most beautiful Indian maiden of her time," Bright Eyes, who became Standing Bear's national spokesperson. At a time when America was obsessed with winning the West, no matter what, this is an intensely human story and a small victory for compassion. It is also the chronicle of an American tragedy: Standing Bear won his case, but the court's decision that should have changed everything, in the end, changed very little for America's Indians.

[The New Barbarian Manifesto: How to Survive the Information Age, Ian O. Angell](#) , 2000, 0749435054, 9780749435059. Ian Angell, dubbed "the Angell of Doom" by The (London) Times, lays out his manifesto for the New Barbarians who will lead the economic elite into a Brave New World over the next two decades. He rejects the long-held view of information technology as our benign liberator from mundane work. Instead, he regards it as the seed for a new society, in which the winners in the knowledge economy will construct their own "smart regions" founded on libertarian principles and enlightened self-interest. The losers, however, face a bleak future. The three evils of religion, ethnicity and socialism will prey on the economic insecurity of the masses, as transnational businesses roam the globe in search of ever cheaper labour. If this scenario seems unlikely, look now at the life prisoners in US jails who operate telesales services for major US companies. Angell predicts that IT, far from creating the path to Utopia, will spell poverty for the many and self-governing opulence for the few. Only those individuals with the knowledge, talent and power to guide this social

revolution will prosper, liberated from taxation, while semi-skilled and unskilled labour become commodities, and the billion disenfranchised production workers worldwide compete on price against more efficient robots.

[APPALACHIAN CASESTUDY: UFO Sightings, Alien Encounters And Unexplained Phenomena VOLUME2, Volume 2, Kyle](#)

[Lovern](#) , 2009, 0982493932, 9780982493939. West Virginia journalist Kyle Lovern is at it again-putting together another fascinating book about eyewitness accounts of UFOs and strange encounters from the Appalachian region. His first book, Appalachian Case Study: UFO Sightings, Alien Encounters, and Unexplained Phenomena, became a cult favorite and took readers on an amazing journey of exploration through the eyes of many down-to-earth people. Using his background in newspaper and radio, Lovern conducted in-depth interviews with citizens about their unusual encounters and experiences. Although that book focused solely on West Virginia, this new project, Volume 2, expands into the larger Appalachian mountain region, where many people from neighboring states have experienced unusual events and circumstances they cannot fully explain. Lovern's books are yet more pieces of the mysterious puzzle regarding UFOs, alien abductions, and other unusual phenomena.

[Emergencies in Respiratory Medicine, Robert Parker, Catherine Thomas, Lesley Bennett](#) , 2007, 0199202443,

9780199202447. This handbook is part of the 'Emergencies in' series, which complements the Oxford Handbooks. It provides a practical, accessible guide to all emergency situations encountered in respiratory medicine, from the immediately life-threatening to the smaller but urgent problems that may arise. It is concise and didactic, and complements the 'Emergencies' section of the Oxford Handbook of Respiratory Medicine. Respiratory disease is the most common illness responsible for an emergency admission to hospital and, as such, requires rapid and effective management. This book combines symptom and disease based sections. The first and second sections are symptom-based, exploring assessment, investigation and differential diagnoses. The third section is disease-based and explains how to manage the diagnoses covered in section one and two. The fourth section addresses practical issues from interpreting tests to practical procedures. The fifth section covers investigations. Aimed at foundation year doctors and trainees, this book will also prove invaluable to staff in accident and emergency medicine, general practitioners, anaesthetists, intensivists, cardiologists, and specialist respiratory nurses during their respiratory medicine training.

[The Alkali Cliffs, Thomas Davis](#) , 2013, 098891316X, 9780988913165. he sound of an explosion ripped through darkness. In the living room glass, china, and knick knacks danced on shelves. A few fell to the floor and shattered. Jimmy, shocked out of a deep sleep, found himself on his feet beside his bed. Still not awake he bumped blindly into his and Toms chester-drawers. Whats going on? Jimmy demanded, frightened in the darkness. The night was alive with shadows of rushing people. In the living room Tom was hopping toward the front door with one leg in his trousers, cussing. The front door was open, and Melissa was rushing outside behind Uncle Solomon and Maw. Jimmy, in panic, grabbed his pants and followed Tom. Outside the shack the air smelled of dust. The sky was stained silver with starlight. The moon cast ghostly ground light that deepened and stretched shadows. Tom was halfway between the shack and Highway 51 cursing loudly and angrily. His voice carried clear through the night air. The Alkali Cliffs is a novel about how a poor family, who lives by raising rabbits, chickens, a garden, and hay on the alkali flats of North Delta, Colorado, struggles against a rich banker determined to build a rendering plant next to their small farm. As the story unfolds in a world different from todays world, Jimmy Smith slowly changes as he struggles with the challenges he and his family face. Decisions lead to consequences that lead to more decisions that lead to more consequences in a cycle of action and reaction. Uncle Solomon, who has always been Jimmys best friend, even though he has always acted like a simpleton, becomes a complex, troubled human being. Tom and Jimmy face dilemmas that threaten the families cherished way of life. The world of the Alkali Cliffs, wild in its beauty, filled with wildlife, seems about to be harmed in ways from which it cannot recover.

[This Cold Country, Annabel Davis-Goff](#) , 2003, 0156027380, 9780156027380. Known for her elegant prose and her keen eye for the nuances of class, Annabel Davis-Goff adds the lush immediacy of a Merchant-Ivory film to her compelling tale of a woman and a culture forever changed by World War II. Only three days after Daisy Creed weds Patrick Nugent, heir of an Anglo-Irish family, he leaves for the war. Having never met her husband's family, Daisy embarks for her new home, Dunmaine, in County Waterford. The family's affairs echo its estate: grand on the outside, decaying within. Left alone with Patrick's eccentric brother and silent grandmother, Daisy is determined to save Dunmaine and secure her place there. But before she can grasp the unspoken rules, she is unwillingly drawn into events that throw her determination off course. Daisy Creed is a resilient, courageous, altogether enterprising Everywoman of her time in this novel about a way of life and the war that precipitated its transformation.

In a seamless blend of prose and verse--and drawing from traditional mythological sources--Robert Burleigh dramatically tells Pandora's story for young readers.

Complemented by Raul Coln's bold illustrations, Pandora is an unforgettable introduction to the classic myth.

[Data Processing and Reconciliation for Chemical Process Operations, Jos A. Romagnoli, Mabel Cristina Sanchez](#) , 1999, 0080530273, 9780080530277. Computer techniques have made online measurements available at every sampling period in a chemical process. However, measurement errors are introduced that require suitable techniques for data reconciliation and improvements in accuracy. Reconciliation of process data and reliable monitoring are essential to decisions about possible system modifications (optimization and control procedures), analysis of equipment performance, design of the monitoring system itself, and general management planning. While the reconciliation of the process data has been studied for more than 20 years, there is no single source providing a unified approach to the area with instructions on implementation. Data Processing and Reconciliation for Chemical Process Operations is that source. Competitiveness on the world market as well as increasingly stringent environmental and product safety regulations have increased the need for the chemical industry to introduce such fast and low cost improvements in process operations. Key Features* Introduces the first unified approach to this important field * Bridges theory and practice through numerous worked examples and industrial case studies* Provides a highly readable account of all aspects of data classification and reconciliation* Presents the reader with material, problems, and directions for further study

[The Wesleyan Quadrilateral, Don Thorsen](#) , 2005, 0975543539, 9780975543535. This book develops the theological method implicit in the theology of John Wesley. The four normative sources for doing theology have been described as the Wesleyan quadrilateral--Scripture, tradition, reason, and experience. The author shows that for Wesley the Protestant concept of "Scripture alone" entails the view that the Scriptures are the primary source, not the only source, of theology. He proposes that Wesley's theological method is the basis for a catholic evangelicalism and ecumenism that is faithful to the Scriptures, to the Early Church Fathers, to a responsible use of reason, and Christian experience enlightened by the Holy Spirit.

[Music Quickens Time, Daniel Barenboim](#) , 2009, 1844674029, 9781844674022. An acclaimed examination of music's power to transform society, from Israel's most celebrated musician and outspoken critic. In this eloquent book, Daniel Barenboim draws on his profound and uniquely influential engagement with music to argue for its central importance in our everyday lives. While we may sometimes think of personal, social and political issues as existing independently of each other, Barenboim shows how music teaches that this is impossible. Turning to his intense involvement with Palestine, he examines the transformative power of music in the world, from his own performances of Wagner in Israel and his foundation, with Edward Said, of the internationally acclaimed West-Eastern Divan Orchestra. Music Quickens Time reveals how the sheer power and eloquence of music offers us a way to explore and shed light on the way in which we live, and to illuminate and resolve some of the most intractable issues of our time.

[Italian Kitchen, Anna Del Conte](#) , 2012, 0224095366, 9780224095365. Italian Kitchen is a classic Italian cookbook and an essential for any modern household. With four chapters -- Antipasti, Pasta, Risottos and Dolci -- Italian Kitchen is a bible for the fundamentals of Italian cooking. There are simple starters like Bruschetta with Tomato; timeless pasta sauces like Pesto; distinctive risottos; and delectable puddings like Chocolate and Pear Cake. Anna Del Conte is the grande dame of Italian cooking. After moving to England from Milan, she wrote her first book, Portrait of Pasta, in 1975. She was the first cookery writer in England to specialise in Italian cooking and she inspired today's generation of chefs. Italian Kitchen resonates with Anna's flair and expertise. Her lively style is punctuated by descriptions of regional dishes, a guide to really understanding pasta, Italian gastronomic traditions, and much more. First published as four separate volumes, these recipes have here been brought together into a single edition with exquisite photography throughout. It is a modern classic by Britain's most influential Italian cookery writer.

The river calls to us, beckons us to sit along its banks, to cast a fly and lure an elusive fish, to canoe its shallows and shoot its rapids. The river even tempts us to capture its spirit with the written word, which each of the eight writers collected here have succeeded in doing. These are essays, adventure stories, reflections, even confessions about the power rivers have over us, written by people who for one reason or another were compelled to explore, to navigate, to conquer the flowing

water. From poets to white-water guides, naturalists to adventures, each contributor brings to their pages a different aspect of the river experience. Complementing this diverse group of writings, gathered by editor Page Stegner, are sixty-one full-color images that add a stunning immediacy to the river experience and make reading this collection and exhilarating journey.

[Selected Poetry of Vali, Vali Deccani, Zafar Iqbal](#) , 2010, 0195478606, 9780195478600. Seventeenth century was proved to be the starting point of the blossoming era of the Urdu poetry. Vali (1667-1707) was the most prominent north Indian Urdu poet of that era. He forms a link between the Deccani poets who wrote in the southern dialect, and the poets of Delhi, who wrote in the northern dialect, which was more Persianised. Vali's poetry gave thus the spur to other poets of Delhi. His Divan became the trendsetter for other poets. Most of his poetry consists of Ghazals but his Divan also includes Rubai, Naat, Mukhammis etc. He represented the dying culture of Mughal civilization. He was the first Urdu poet who stylistically mixed Persian with Hindi in his poetry. His most favorite themes were mystical and earthly love. He is also known as the architect of the modern poetic language which is the blend of Persian and Hindi vocabulary.

It's a summer of record-breaking heat in Charlotte, North Carolina and Dr Temperance Brennan is looking forward to her first vacation in years. She's almost out the door when the bones start appearing. First there's the newborn skeleton found in a wood stove. Who put the baby there? The mother, hardly more than a child herself, has disappeared. Next, a small plane flies into a rock face on a sunny

afternoon. Both pilot and passenger are burned beyond recognition, their bodies covered with a strange black substance. What could it be? What sinister mission might the two have been on? Most puzzling is a cache of bones unearthed in a remote corner of the county. Some animal, some human, the bones are enough to keep Tempe busy for a long time.

[The Physics and Chemistry of Solids, Stephen Elliott](#) , 1998, 047198194X, 9780471981947. Taking an original, imaginative approach to the subject, Stephen Elliott's book is one of the first to bridge the gap between solid state physics and chemistry. Considerable thought has gone into the structure and content of this book, with the first four chapters covering the properties of atoms in solids and the remaining four concentrating on the behaviour of electrons in materials. Fundamental principles are covered together with the very latest developments, such as combinatorial library synthesis, mesoporous materials, fullerenes and nanotubes, optical localization and the experimental observation of fractional electronic charge. Clearly written and richly illustrated, The Physics and Chemistry of Solids will be of great interest to Physicists, Chemists, Material Scientists and Engineers.

[Internal Medicine Clerkship: 150 Biggest Mistakes and how to Avoid Them, Phillip Ramos, William Lee](#) , 2004, 0972556125, 9780972556125. Books about the Internal Medicine clerkship have generally focused on educating medical students on what they should do. What is often left out is any discussion about the things that students should not do. With that being said, it should come as no surprise to anyone that students make the same mistakes year after year. Since students can gain valuable insight by learning about their predecessors' mistakes, we offer you this new book titled the Internal Medicine Clerkship: 150 Biggest Mistakes and How To Avoid Them.This book not only introduces you to these mistakes but also shows you how to avoid them. Avoiding these pitfalls is crucial for rotation success. Once you are familiar with these errors, you can do everything in your power to avoid them, thereby placing yourself in a position to excel during the clerkship.

[Russia Against Japan, 1904-1905: A New Look at the Russo-Japanese War, J. N. Westwood](#) , 1986, 0887061915, 9780887061912. The Russo-Japanese conflict was recognized, in its time, as introducing a new era of warfare, involving millions of men and weapons of mass destruction. In the decade which elapsed after its end much was written about it. The First World War marked a second stage in the development of twentieth-century-style total war, and so overshadowed the Russo-Japanese War that little further study was made of the latter. Subsequent books on this subject

were for popular readerships, and mainly recycled the knowledge and beliefs of the pre-1914 years. This book aims to present a short account of the war, stripped of the legends that successive journalists and authors have attached to it, and at the same time present new angles and interpretations based on hitherto unused Russian-language sources and on the specialized monographs of the few scholars working in this and related fields. While not claiming to be definitive, it does provide a fresh start for the study of this war, whose importance justifies a clear-headed examination, casting light on Russian military and naval tradition. The distinctive psychology of Russian generals and admirals is well illustrated in this book, and the conclusion that the former were for bureaucratic reasons happier in defense than offense, and that the latter thought in military rather than naval terms (regarding battleships as fortresses that, under pressure, they could surrender or demolish), has implications for the understanding of subsequent Russian and Soviet history. Among the incidental implications is that during this war the British and American press sank to such a voluntary and involuntary level of distortion that its performance in subsequent wars can only be regarded as an improvement. Here and there in the book explanations for subsequent Russian and Japanese behavior can be glimpsed; not the least of these is the circumstance that at the end of the war Russian generals and officials felt cheated of certain victory while exactly the same intense and long-term frustration gnawed at Japanese public opinion. It was really an unsatisfactory war for both sides, the innumerable dead winning nothing worth while; in this and many other ways the Russo-Japanese War was a dress rehearsal for the First World War.

Winner of the 1947 Pulitzer Prize, *All the King's Men* is one of the most famous and widely read works in American fiction. It traces the rise and fall of demagogue Willie Talos, a fictional Southern politician who resembles the real-life Huey "Kingfish" Long of Louisiana. Talos begins his career as an idealistic man of the people, but he soon becomes corrupted by success and caught in a lust for power. *All the King's Men* is as relevant today as it was fifty years ago. Robert Penn Warren's masterpiece has been restored by literary scholar Noel Polk, whose work on the texts of William Faulkner has proved so important to American literature. Polk presents the novel as it was originally written, revealing even greater complexity and subtlety of character. *All the King's Men* is a landmark in letters.

[Angeliki Poulymenakou](#) , 2006, 354032884X, 9783540328841. Collaboration of organizations reshapes traditional managerial practices and creates new inter-organizational contexts for strategy, coordination and control, information and knowledge management. Heralded as organizational forms of the future, networks are at the same time fragile and precarious organizational arrangements, which regularly fail. In order to investigate the new realities created by technology-enabled forms of network organizations and to address the emerging managerial challenges, this book introduces an integrative view on inter-firm network management. Centred on a network life cycle perspective, strategic, economic and relational facets of business networking are explored. The network management framework is illustrated onto a broad range of European inter-firm network examples in various industries rendering insights for new management practices.

[UNDERSTANDING ORGANISATIONS: ORGANISATIONAL THEORY AND PRACTICE IN INDIA, MADHUKAR SHUKLA](#) , 2008,

8120311221, 9788120311220. Organisations play a crucial role in our day-to-day life though most of us are unaware of it. They permeate and pervade almost all aspects of our lives and their significance cannot therefore be overemphasized. This easy-to-read and compact book on Organisational Theory (OT) gives an account of what an organisation is and how it operates. It shows that organisations are not static entities, but are dynamic: capable of growing, changing, failing or transforming themselves. The book begins with a discussion on the perspectives and approaches needed for understanding, designing and changing organisations. It then goes on to give a description of the building blocks and the various influences that determine organisational design. The author rightly emphasizes that the ideal organisation is one that is adaptive to a specific situation. He tells not only what an organisation is, but shows how it functions, for instance, how decisions are taken, how conflicts and power interact in moulding an organisation, how values and norms influence performance, and so on. Finally, the author stresses how organisations change or are transformed or why some do not change, and highlights emerging issues in organisational design. What distinguishes the text is its Indian background. The author skillfully elucidates organisational theory with real-life examples from well-known Indian Organisations. Intended as a textbook for the students of Management, this study should also be ideal for practising managers, consultants and teachers.

Marcia Falk has gracefully and intelligently captured Tussman's subtle ironic tone"Miriam Levine, American Book Review.

[Cyber Attacks: Protecting National Infrastructure, Edward Amoroso](#) , 2010, 0123849187, 9780123849182. No nation especially the United States has a coherent technical and architectural strategy for preventing cyber attack from crippling essential critical infrastructure services. This book initiates an intelligent national (and international) dialogue amongst the general technical community around proper methods for reducing national risk. This includes controversial themes such as the deliberate use of deception to trap intruders. It also serves as an attractive framework for a new national strategy for cyber security, something that several Presidential administrations have failed in attempting to create. In addition, nations other than the US might choose to adopt the framework as well Amoroso offers a technical, architectural, and management solution to the problem of protecting national infrastructure. This includes practical and empirically-based guidance for security engineers, network operators, software designers, technology managers, application developers, and even those who simply use computing technology in their work or home. Each principle is presented as a separate security strategy, along with pages of compelling examples that demonstrate use of the principle. A specific set of criteria requirements allows any organization, such as a government agency, to integrate the principles into their local environment. This book takes the national debate on protecting critical infrastructure in an entirely new and fruitful

direction.* Covers cyber security policy development for massively complex infrastructure using ten principles derived from experiences in U.S. Federal Government settings and a range of global commercial environments. * Provides a unique and provocative philosophy of cyber security that directly contradicts conventional wisdom about info sec for small or enterprise-level systems. * Illustrates the use of practical, trial-and-error findings derived from 25 years of hands-on experience protecting critical infrastructure on a daily basis at AT&T.

[Virtually Maria, , John Joyce](#) , 2008, 0955763703, 9780955763700. "Virtually Maria" is the first book in John Joyce's Virtual Trilogy - A quest by one man to save the love of his life from murder by travelling back in time. It is a story of state of the art technology, forgotten forces, and exotic locations all over the world. Our hero will be guided by the artificially intelligent Minerva computer - an electronic Tinkerbell with a mind of its own. Theo Gilkrensky, computer genius and chairman of the electronics multinational GRC, is engrossed in the final stages of development of the revolutionary Minerva computer, when his wife Maria walks out on him and is killed by a car bomb. Wracked by grief and guilt, Theo retreats with Minerva onto a remote island off the south coast of Ireland until the crash of a GRC-owned airliner near Cairo forces Jessica Wright, his chief executive and former lover, to drag him back from exile. Using the Minerva display data from the crash investigation, Theo manages to exonerate his corporation, but in the process reveals that he has reprogrammed the computer's user interface to look, think and speak like his beloved Maria. Investigating further, Theo discovers that the crash was caused not by computer failure, but by a unique radiation coming from the Great Pyramid of Cheops. He finds a previously undiscovered chamber - a place where unseen energies from all over the world are concentrated to warp the very fabric of space and time. Theo is further astounded when Minerva calculates that this phenomenon could be manipulated to travel back in time and save his wife, Maria from death. Meanwhile,

others are out to steal the revolutionary Minerva, while Yukiko Funakoshi, the half-caste daughter of a man Theo once wronged, is homing in on Cairo with an arsenal of arcane weapons and millions of dollars at her disposal for Theo's destruction. First published by Poolbeg Press in 1998, *Virtually Maria* was "Book of the Month" at the Easons Bookstore chain in Ireland. It will be followed in 2008 the other two books in the Virtual Trilogy - "A Matter of Time," and "Yesterday, Today and Tomorrow," both to be published by Spindrift Press, Dublin.

Wavelets are spatially localized functions whose amplitude drops off exponentially outside a small "window". They are used to magnify experimental or numerical data and have become powerful tools in signal processing and other computational sciences. This book gives scientists and engineers a practical understanding of wavelets--their origins, their purpose, their use, and their prospects. It covers the applications of wavelets as a diagnostic tool and the use of wavelet basis functions to solve differential equations. Each chapter was written by one of five lecturers of a course sponsored by the Institute of Computer Applications in Science and Engineering (ICASE) and the NASA Langley Research Center. Not only does this book treat the latest advances on the subject, but it also attempts to impart practical knowledge to allow scientists and engineers to evaluate objectively where these tools stand in relation to their needs.

[Reservation and Affirmative Action: Models of Social Integration in India and the United States, Arvind Sharma](#) , 2005, 0761933808, 9780761933809. This book examines the principles underlining the policies of affirmative action evolved in two non-homogeneous and multi-ethnic societies-India and the United States. Despite the fact that the governments of India and the United States have, for over 50 years now, adopted a series of measures to overcome discrimination based on caste and race respectively, the author maintains that there is as yet no comprehensive account of the grounds on which they have been intellectually justified. He, therefore, analyses the various arguments which have been presented to justify reservations in India and affirmative action in the United States. Addressing the key question 'What is being affirmed through affirmative action?' the author seeks the answer along four lines: - What is the religious component of such an affirmation, if any? - Is there a moral principle (or principles) underlying this affirmation? - Is this affirmation being advocated on ethical principles with which modern liberal thought is imbued? - Are doctrines of human rights invoked in such an affirmation?

[Networks of Outrage and Hope: Social Movements in the Internet Age, Manuel Castells](#) , 2012, 0745662854, 9780745662855. This book is an exploration of the new forms of social movements and protests that are erupting in the world today, from the Arab uprisings to the indignadas movement in Spain, and the Occupy Wall Street movement in the US. While these and similar social movements differ in many important ways, there is one thing they share in common: they are all interwoven inextricably with the creation of autonomous communication networks supported by the Internet and wireless communication. In this timely and important book, Manuel Castells the leading scholar of our contemporary networked society examines the social, cultural and political roots of these new social movements, studies their innovative forms of self-organization, assesses the precise role of technology in the dynamics of the movements, suggests the reasons for the support they have found in large segments of society, and probes their capacity to induce political change by influencing people's minds. Based on original fieldwork by the author and his collaborators as well as secondary sources, this book provides a path-breaking analysis of the new forms of social movements, and offers an analytical template for advancing the debates triggered by them concerning the new forms of social change and political democracy in the global network society.

[A Midsummer Night's Dream, , , , William Shakespeare](#) , 1994, 0198129289, 9780198129288. A Midsummer Night's Dream is perhaps the best-loved of Shakespeare's plays, and certainly the one that children are likely to encounter first; its mixture of aristocrats, workers, and fairies meeting in a wood outside Athens has a magic of its own. Simple and engaging on the surface, it is nonetheless a highly original and sophisticated work, remarkable for both its literary and its theatrical mastery. The fact that it is one of the very few of Shakespeare's plays not to draw on a narrative source suggests the degree to which it reflects his deepest imaginative concerns. In his Introduction, defining the play in both the literary and theatrical traditions to which it belongs, Peter Holland pays particular attention to dreams and dreamers, tracing the materials out of which Shakespeare constructs his world of night and shadows in the strange but enchanting amalgam he makes of them. Both here and in the detailed commentary he draws freely upon the play's extensive performance history to illustrate the wide range of interpretations of which it is capable.

Helps students understand how culture impacts development in adolescence and emerging adulthood. Grounded in a global cultural perspective (within and outside of the US), this text enriches the discussion with historical context and an interdisciplinary approach, including studies from fields such as anthropology and sociology, in addition to the compelling psychological research on adolescent development. This book also takes into account the period of "emerging adulthood" (ages 18-25), a term coined by the author, and an area of study for which Arnett is a leading expert. Arnett continues the fifth edition with new and updated studies, both U.S. and international. With Pearson's MyDevelopmentLab Video Series and Powerpoints embedded with video, students can experience a true cross-cultural experience. A better teaching and learning experience This program will provide a better teaching and learning experience-- for you and your students. Here's how: Personalize Learning - The new MyDevelopmentLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Improve Critical Thinking - Students learn to think critically about the influence of culture on development with pedagogical features such as Culture Focus boxes and Historical Focus boxes. Engage Students - Arnett engages students with cross cultural research and examples throughout. MyVirtualTeen, an interactive simulation, allows students to apply the concepts they are learning to their own "virtual teen." Explore Research - "Research Focus" provides students with a firm grasp of various research methods and helps them see the impact that methods can have on research findings. Support Instructors - This program provides instructors with

unbeatable resources, including video embedded PowerPoints and the new MyDevelopmentLab that includes cross-cultural videos and MyVirtualTeen, an interactive simulation that allows you to raise a child from birth to age 18. [European Arms Export Policies and Democratic Accountability, Sibylle Bauer](#) , 2007, 0199290830, 9780199290833. Arms export policies have traditionally been enshrined in national decision making and have been subjected to a high degree of secrecy. While the laws and regulations governing arms exports remain national, arms export policies are increasingly driven and shaped by European factors. The discussion and coordination of such policies within the European Union are increasingly being accepted and institutionalized, and they have become more transparent. This book examines the characteristics and dynamics of both phenomena and analyses the impact of Europeanization and the transparency of arms export policy on the role of parliaments in this policy area. The book includes case studies of Germany, Sweden, and the United Kingdom.

[Measuring Intelligence: Facts and Fallacies, David J. Bartholomew](#) , 2004, 0521544785, 9780521544788. The testing of intelligence has a long and controversial history. Claims that it is a pseudo-science or a weapon of ideological warfare have been commonplace and there is not even a consensus as to whether intelligence exists and, if it does, whether it can be measured. As a result the debate about it has centred on the nurture versus nature controversy and especially on alleged racial differences and the heritability of intelligence - all of which have major policy implications. This book aims

to penetrate the mists of controversy, ideology and prejudice by providing a clear non-mathematical framework for the definition and measurement of intelligence derived from modern factor analysis. Building on this framework and drawing on everyday ideas the author address key controversies in a clear and accessible style and explores some of the claims made by well known writers in the field such as Stephen Jay Gould and Michael Howe.

[The Knitted Home: Creative and Contemporary Projects for Interiors, Ruth Cross](#) , 2013, 0670077011, 9780670077014.

Hand-crafted items always add an extra layer of personality and interest to a room, and a beautifully designed and knitted piece, whether it is a cover for an existing piece of furniture or a wonderful throw, is a covetable and unique accessory. If you enjoy exploring the different patterns and textures that hand knitting can create, and want to use these skills to produce elegant and appealing pieces for your home, The Knitted Home is for you. Ruth Cross draws on her experience of designing organic and freeform collections to guide you through the process of making and creating your own items. Taking an experimental approach, Ruth combines traditional stitches with new stitches she has devised herself. She creates desirable fabrics that can adorn many different items around the home, from easy chairs to footstools, a doorstop to a table runner, vase covers to wall hangings.

[Habitations of Modernity: Essays in the Wake of Subaltern Studies, Dipesh Chakrabarty](#) , 2002, 0226100391,

9780226100395. In Habitations of Modernity, Dipesh Chakrabarty explores the complexities of modernism in India and seeks principles of humaneness grounded in everyday life that may elude grand political theories. The questions that motivate Chakrabarty are shared by all postcolonial historians and anthropologists: How do we think about the legacy of the European Enlightenment in lands far from Europe in geography or history? How can we envision ways of being modern that speak to what is shared around the world, as well as to cultural diversity? How do we resist the tendency to justify the violence accompanying triumphalist moments of modernity? Chakrabarty pursues these issues in a series of closely linked essays, ranging from a history of the influential Indian series Subaltern Studies to examinations of specific cultural practices in modern India, such as the use of khadi Gandhian style of dress by male politicians and the politics of civic consciousness in public spaces. He concludes with considerations of the ethical dilemmas that arise when one writes on behalf of social justice projects.

[Trinity Island, Enis St. John](#) , 2011, 0978736966, 9780978736965. During one hot summer, Charles Abell, college president, escapes the strictures of his position to teach writing in an arts program on Trinity Island. Little does he realize that, by the time summer ends, he will have completely reexamined his life. Observing the students' exuberance, imagination, and passionate relationships, Charles grasps that he has long since lost the poetry in his own soul. Does he possess the courage to overthrow convention for a life of creativity? In Luke, an aspiring writer, Charles sees the reflection of himself as a young man, and, in the aging and resident playwright, Maestro, the possibility of the man he could become. Just as Luke must confront the dilemma between his all-consuming love affair and his dream of a dazzling

writing career, Maestro must decide whether to finally let go of the three loves of his life. From the idealistic hopes of young adulthood to the introspection of a life fulfilled, Trinity Island depicts Charles' journey towards self-acceptance and authentic manhood.

[A Discourse on the Method: of Correctly Conducting One's Reason and Seeking Truth in the Sciences, Ren Descartes](#) ,

2008, 0199540071, 9780199540075. 'I concluded that I was a substance whose whole essence or nature resides only in thinking, and which, in order to exist, has no need of place and is not dependent on any material thing.' Descartes's *A Discourse on the Method of Correctly Conducting One's Reason and Seeking Truth in the Sciences* marks a watershed in European thought; in it, the author provides an informal intellectual autobiography in the vernacular for a non-specialist readership, sweeps away all previous philosophical traditions, and sets out in brief his radical new philosophy, which begins with a proof of the existence of the self (the famous 'cogito ergo sum'), next deduces from it the existence and nature of God, and ends by offering a radical new account of the physical world and of human and animal nature. This new translation is accompanied by a substantial introductory essay which draws on Descartes's correspondence to examine his motivation and the impact of his great work on his contemporaries. Detailed notes explain his philosophical terminology and ideas. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

[The Later Novels of Victor Hugo: Variations on the Politics and Poetics of Transcendence, Kathryn M. Grossman](#) , 2012, 0199642958, 9780199642953. This study places the last three novels of Victor Hugo's maturity - *Les Travailleurs de la mer* (1866), *L'Homme qui rit* (1869), and *Quatrevingt-Treize* (1874) - within the context of his artistic development after the success of *Les Misérables* (1862). By situating these historical narratives in relation to each other, to all of Hugo's previous fiction, and to a number of poetic and critical works published in exile and in the initial years of the Third Republic, it illuminates the final structural and thematic shifts from a poetics of harmony to one of transcendence. As in *Les Misérables*, the disharmony associated with social tumult, apocalyptic vision, and oxymoronic tensions provides an essential component of the later Hugo's Romantic sublime. Instead of merely capitalizing on the runaway success of *Les Misérables* by recycling its prominent features, however, each novel makes an original contribution to the political and aesthetic trajectory inscribed by the entire oeuvre. Each testifies as well to the wizardry of Hugo's own 'special effects' that contribute to his story-telling genius. Such effects, especially the dizzying spatial optics and manipulation of temporal dimensions, function not as mere playful gimmicks or novelistic flourishes but as strategies for figuring and communicating the ideal, both political and artistic. The unique interplay of poetic and historical discourse in each text reconfigures our disordered experience of the world into something far more coherent: a construction of meaning that strives to change perceptions and to promote social action.

[Chinese Medicine and Healing: An Illustrated History, TJ Hinrichs, Linda L Barnes](#) , 2013, 0674047370, 9780674047372.

Chinese Medicine and Healing is a comprehensive introduction to a rich array of Chinese healing practices as they have developed through time and across cultures. Contributions from fifty-eight leading international scholars in such fields as Chinese archaeology, history, anthropology, religion, and medicine make this a collaborative work of uncommon intellectual synergy, and a vital new resource for anyone working in East Asian or world history, in medical history and anthropology, and in biomedicine and complementary healing arts. This illustrated history explores the emergence and development of a wide range of health interventions, including propitiation of disease-inflicting spirits, divination, vitality-cultivating meditative disciplines, herbal remedies, pulse diagnosis, and acupuncture. The authors investigate processes that contribute to historical change, such as competition between different types of practitioners—shamans, Daoist priests, Buddhist monks, scholar physicians, and even government officials. Accompanying vignettes and illustrations bring to life such diverse arenas of health care as childbirth in the Tang period, Yuan state-established medical schools, fertility control in the Qing, and the search for sexual potency in the People's Republic. The two final chapters illustrate Chinese healing modalities across the globe and address the challenges they have posed as alternatives to biomedical standards of training and licensure. The discussion includes such far-reaching examples as Chinese treatments for diphtheria in colonial Australia and malaria in Africa, the invention of ear acupuncture by the French and its worldwide dissemination, and the varying applications of acupuncture from Germany to Argentina and Iraq.

[Aeschylus: The suppliant maidens, , , Aeschylus](#) , 1991, 0226307948, 9780226307947. The Grene and Lattimore edition of the Greek tragedies has been among the most widely acclaimed and successful publications of the University of

Chicago Press. On the occasion of the Centennial of the University of Chicago and its Press, we take pleasure in reissuing this complete work in a handsome four-volume slipcased edition as well as in redesigned versions of the familiar paperbacks. For the Centennial Edition two of the original translations have been replaced. In the original publication David Grene translated only one of the three Theban plays, Oedipus the King. Now he has added his own translations of the remaining two, Oedipus at Colonus and Antigone, thus bringing a new unity of tone and style to this group. Grene has also revised his earlier translation of Prometheus Bound and rendered some of the former prose sections in verse. These new translations replace the originals included in the paperback volumes Sophocles I (which contains all three Theban plays), Aeschylus II, Greek Tragedies, Volume I, and Greek Tragedies, Volume III, all of which are now being published in second editions. All other volumes contain the translations of the tragedies of Aeschylus, Sophocles, and Euripides for the most part from the original versions first published in the 1940s and 1950s. These translations have been the choice of generations of teachers and students, selling in the past forty years over three million copies.

[The Subterraneans, Jack Kerouac](#) , 2001, 0141184892, 9780141184890. Regarded by many as Jack Kerouac's most touching works, *The Subterraneans* and *Pic* are an evocative and poignant pair of novels from the author of *On the Road*. This Penguin Modern Classics edition includes an introduction by Ann Douglas. Leo Percepied, aspiring writer and self-styled free-wheeling bum, gravitates to the Subterraneans, impoverished intellectuals who haunt the bars and clubs of San Francisco, surviving on a diet of booze and benzedrine, Proust and Verlaine. Living among them is Mardou Fox, beautiful and a little crazy, whose dark eyes, full of suffering and sweetness, find recognition in Leo. But, afraid of his growing involvement, Leo sets out to destroy their love. Exuberant and melancholy, Kerouac's spontaneous prose flows across the pages. Written in three days, *The Subterraneans* is, like all Kerouac's work, closely related to his own life while encapsulating his great vision of America. Also included here is the novel *Pic*, the story of a young black boy who makes his own journey on the road. Jack Kerouac (1922-69) was an American novelist, poet, artist and part of the Beat Generation. His first published novel, *The Town and the City*, appeared in 1950, but it was *On the Road*, published in 1957, that made Kerouac famous. Publication of his many other books followed, among them *The Subterraneans*, *Big Sur*, and *The Dharma Bums*. Kerouac died in Florida at the age of forty-seven. If you enjoyed *The Subterraneans* and *Pic*, you might like Kerouac's *Maggie Cassidy*, also available in Penguin Modern Classics. While the issue of invasive alien species (IAS) has important biological components, the human dimensions deserve much greater attention. Humans, with all their diversity of quirks, strengths, and weaknesses, are at the heart of the problem of IAS and, paradoxically, also at the heart of the solution. This compilation of papers delivered during a workshop on the human dimensions of the IAS problem, held in Cape Town, South Africa on 15-17 September

2000, covers some of the many causes, consequences and responses to this problem.

[The Mastery of Music: Ten Pathways to True Artistry, Barry Green](#) , 2008, 076791158X, 9780767911580. The Inner Game of Music, the breakout hit that became a standard primer in the music world, has taught thousands of musicians professionals and amateurs alike how to overcome self-consciousness and stage fright and to recapture a youthful, almost effortless capacity to learn. Now, in his follow-up book, The Mastery of Music, Barry Green turns his expert hand to the artistic qualities that make an extraordinary musician. Culling advice from dozens of interviews with legends including Joshua Bell, Dave Brubeck, Jeffrey Kahane, Bobby McFerrin, Christopher Parkening, Doc Severinsen, Frederica von Stade, the Harlem Boys Choir, and the Turtle Island String Quartet, he reveals that its not enough to have a cerebral and emotional connection to the notes. Green hows how musical excellence, exhibited by true virtuosos, requires a mastery of ten unique qualities of the soul and the human spirit, such as confidence, passion, discipline, creativity, and relaxed concentration, and he discusses specific ways in which all musicians, composers, and conductors can take their skills to higher levels. He carefully incorporates all instruments and techniques in his rejuvenating discussions, inspiring the stifled student to have fun again and the over-rehearsed performer to rediscover the joy of passionate expression. Essential reading for every musician, The Mastery of Music strikes a beautiful new chord. From the Trade Paperback edition.

Since the publication of the first edition of Signal Transduction: A Practical Approach in 1992 there has been a great deal of new information about the processes of signal transduction and consequently many new methods have been developed. This new edition has therefore been updated and extended to include the major new methods now available. The first part of the book is mainly concerned with G protein-coupled receptors and covers structural studies of conformational changes and binding sites, phosphorylation and desensitisation, identification, receptor fusion proteins, and reporter gene systems. The second part includes methods for studying components of the other major families of signal transduction: adenylyl cyclase and cAMP, phosphorylated inositol lipids, phosphoinositide 3-kinases, phospholipase D and phosphatidylcholine, sphingosine kinase, and inositol 1,4,5-triphosphate. Also included are chapters on baculoviral expression systems and the quantitative assay of mitogen activated protein kinases in intact cells and tissues. As with the previous edition Signal Transduction 2e covers a wide range of techniques and will be useful to both experienced researchers and newcomers.

[Millennial Masculinity: Men in Contemporary American Cinema, Timothy Shary](#) , 2013, 0814334350, 9780814334355. In virtually every aspect of culture-health, marriage, family, morals, politics, sex, race, economics-American men of the past two decades have faced changing social conditions and confronted radical questions about themselves. In Millennial Masculinity: Men in Contemporary American Cinema, editor Timothy Shary collects fourteen contributions that consider male representation in films made at the turn of the century to explore precisely how those questions have been dealt with in cinema. Contributors move beyond the recent wave of "masculinity in crisis" arguments to provide sophisticated and often surprising insight into accessible films. Chapters are arranged in four sections: "Performing Masculinity" includes a discussion of Adam Sandler and movies such as Milk; "Patriarchal Problems" looks at issues of fathers from

directors such as Martin Scorsese, Wes Anderson, and David Fincher; "Exceptional Sexualities" examines male love and sex through movies like Brokeback Mountain and Wedding Crashers; and "Facing Race" explores masculinity through race in film. Sean Penn, Jackie Chan, Brad Pitt, Will Smith, and Philip Seymour Hoffman are some of the actors included in these analyses, while themes considered include police thrillers, psychotic killers, gay tensions, fashion sense, and the burgeoning "bromance" genre. Taken together, the essays in Millennial Masculinity shed light on the high stakes of masculine roles in contemporary American cinema. Film and television scholars as well as readers interested in gender and sexuality in film will appreciate this timely collection.

[Technical Progress and Profits: Process Improvements in Petroleum Refining, John Lawrence Enos](#) , 2002, 0197300235, 9780197300237. Throughout the twentieth century the technology employed by the petroleum refining industry has been advancing rapidly, yet it has generally escaped study. Whatever the explanation for its scholarly neglect, the advances that have been secured over the century have enabled the producers of petroleum products to meet the ever-increasing demands for their products throughout the world. No other manufactured goods are so universally and so cheaply available. This book concentrates on the technical changes that have been secured in the second half of this century, using as its basis the main petroleum refining process, Fluid Catalytic Cracking. Both technological and economic aspects are examined over the sixty years of the process's history; and, in a novel attempt, related the one to the other: an

accomplishment that reveals more about the technology and the economics rather than either engineering or economic analysis would separately. Technology and economics are connected in the real world: in this study they are connected in their exposition. As in conventional economic history, technological improvements are summarized and their sources and consequences determined. In addition, the long-term pattern of costs and profits is displayed; and regular measurements are taken throughout, so that experience can be seen as the continuous unfolding of industrial progress.

Determined above all else to transcend the materialistic values of the Old World, they made a commitment to live materially simple lives, convinced that this was the surest path to genuine freedom, peace, and sustainable prosperity. Seven decades later, in the year 2099, this book describes the results of their remarkable living experiment.

[Touch, representation, and blindness, Morton A. Heller](#) , 2000, 0198503881, 9780198503880. Psychological studies of touch and blindness have been fraught with controversy. Is it necessary to explain perception in terms of representation and inferential processes? In addition, psychologists differ in the relative importance they place on the modality of sensory stimulation for subsequent perceptual experiences. Thus, some psychologists argue that touch can do many of the things that are accomplished by vision, and claim that the mode of sensory stimulation is not critically important for perception. Others suggest that there are important consequences of a lack of visual experience, arguing for the importance of multiple forms of sensory input for conceptual development. A deep theoretical split divides researchers in these areas. Many researchers adopt a cognitive orientation, relate research on touch and blindness to higher order processes, such as memory and concept formation. Others adopt a theoretical perspective, explaining perception without recourse to concepts like mind. As part of the Debates in Psychology Series, this book clarifies the issues which divide the field of touch.

[The Best American Short Stories 2012, ISSN 0067-6233, Tom Perrotta, Heidi Pitlor](#) , 2012, 0547242107, 9780547242101.

Tom Perrotta explains in his introduction that "all of [these stories] took me somewhere I didn't expect to go, and jolted me into that state of heightened awareness and emotional receptivity that's one of the great rewards of reading good fiction." The characters in these stories seek to discover something lacking in their life. Their stories take sharp and surprising turns and often reach dazzling conclusions. In Nathan Englander's "What We Talk About When We Talk About Anne Frank," a playful discussion between two married couples veers into darker territory, exposing a secret that might have been better left unspoken. Taiye Selasi writes a portrait of a motherless girl on the cusp of pubescence in Africa,

where womanhood may not be something to be celebrated. "What's Important is Feeling: by Adam Wilson gives us a window onto a movie set where the narrator aches for something cinematic to happen in his life. Roxane Gay's "North Country" introduces us to an unlikely couple who circle each other in a wary dance of approach and avoidance. An unexpected visitor with a brown glass bottle kicks off a wonderfully strange fable about how we look at ourselves in Steven Millhauser's "Miracle Polish." Full of clear, idiosyncratic voices and intriguing points of view, this multifaceted collection will reward readers. And, as Perrotta unapologetically states, "By any standard, this year's batch of stories is pretty damn good."

She kept extensive diaries, written partly in code, of her life and loves. The diaries have been edited by Helena Whitbread, who spent years decoding and transcribing them. '[Anne Lister's] sense of self, and self-awareness, is what makes her modern to us. She was a woman exercising conscious choice. She controlled her cash and her body. At a time when women had to marry, or be looked after by a male relative, and when all their property on marriage passed to their husband, Anne Lister not only dodged the traps of being female, she set up a liaison with another woman that enhanced her own wealth and left both of them free to live as they wished . . .
