[Quarry Land: Impermanent Landscapes of the Cleve Hills, Simon Denison](#) , 2005, 0954187814, 9780954187811. A book of stunning and evocative black-and-white photographs of abandoned post-industrial landscapes in Britain, which reflect Britain's changing countryside, the passage of time and the impermanence of human endeavour. The book is related to a major travelling exhibition, funded by the Arts Council of England, which will be seen at various venues across Britain in

2005. The images were made on the Clee Hills in Shropshire, once heavily industrialised but now abandoned to telecoms stations, forestry and marginal hill farming. The book, printed to the highest art-book standards in rich duotone, also contains interviews and portraits of people who live on the hills, and an extended introduction by the author. In his Foreword to the book, the celebrated British landscape photographer Paul Hill writes: 'Simon Denison's metaphoric vision of the Clees is one that is full of industrial remnants and abandoned objects. The impression is of a harsh and unforgiving landscape - a place forgotten, overlooked and apart. The work is beautifully elegiac.'

[The Edwardians, Mr Paul R Thompson, Paul Thompson](#) , 2002, 0203413202, 9780203413203. Everyone who lived during the reign of Edward VII was an Edwardian, not merely the rich, the literary or the scandalous. In this classic work, Paul Thompson records the life stories of some five hundred Edwardians born between 1872 and 1906 in a pioneering use of oral history, which captures a unique record of their times. Domestic, labourers, skilled and semi-skilled workers, professionals and high society men and women describe their work, their families, their politics and their leisure. The Edwardians establishes and describes the most important dimensions of social change in the early twentieth century: class structure, gender distinctions, age distinctions - urban and rural - and regional differences. It also evaluates the forces for social change in the period: economic pressures, religious and political conviction, feminism and socialism, patriotism and the war, to reveal how near and how far Edwardian society was to revolution in this time of critical social change. By giving a voice to the contribution and experience of ordinary people, Paul Thompson brings the Edwardian era vividly to life. This new edition, is substantially revised and includes a new chapter on Identity and Power, to take into account major historiographical and social changes since its publication in 1975. It has new photographs and an up-to-date bibliography.

The paediatric endocrinologist deals not only with common problems involving growth, puberty, and diabetes, but also with specific hormonal defects involving glands such as the thyroid, parathyroid, adrenals, and pituitary. These can vary from common variants of normals which will be encountered by all doctors dealing with children, to more rare disorders requiring specialist input. Paediatric Endocrinology and Diabetes is written by two experienced paediatric endocrinologists, and deals with anatomy and physiology before moving on to identification, investigation and management of specific endocrine disorders. As well as covering common and less common endocrine problems, there are also chapters on endocrine investigations and endocrine emergencies, designed for quick reference. The handbook is aimed at junior doctors in training both as specialists and as general paediatricians, as well as specialist nurses in endocrinology and diabetes, but will also be of interest to consultants in general paediatrics and paediatricians with an interest in endocrinology and diabetes.

[Chickamauga: And Other Civil War Stories,](#) Shelby Foote , 2011, 0307779238, 9780307779236. Shelby Foote's monumental historical trilogy, "The Civil War: A Narrative," is our window into the day-by-day unfolding of our nation's defining event. Now Foote reveals the deeper human truth behind the battles and speeches through the fiction he has

chosen for this vivid, moving collection. These ten stories of the Civil War give us the experience of joining a coachload of whores left on a siding during a battle in Virginia. . . marching into an old man's house to tell him it's about to be burned down . . . or seeing a childhood friend shot down at Chickamauga. The result is history that lives again in our imagination, as the creative vision of these great writers touches our emotions and makes us witness to the human tragedy of this war, fought so bravely by those in blue and gray. [Art Therapy and Anger, Marian Liebmann](#) , 2008, 1846428106, 9781846428104. Professionals working in a range of clinical settings are regularly called upon to work with angry clients, and they may find their skills and resources for working with this powerful emotion limited. Art Therapy and Anger demonstrates how the non-verbal medium of art therapy provides an ideal outlet for the expression of thoughts and feelings that are too complex and painful to put into words, presenting a new and practical approach to dealing with this area of need. Marian Liebmann argues that clients of all ages will benefit from the art-making process, which helps them to slow down and consider their emotions more calmly. The tangible product of their efforts allows clients to assess and react to what they have depicted, providing a lucid and safe framework for better understanding the causes and effects of their anger. This book draws together contributions from art therapists who work in a wide variety of contexts, including work with offenders, mental health clients, clients with brain injury and those with cancer, with the view of helping clients to manage their anger more constructively. This positive, practical volume will be of great interest to art therapists and students, as well as practitioners working with angry clients in various fields such as mental health, probation, counselling and medicine.

[Cognitive Ecology, Morton P. Friedman, Edward C. Carterette](#) , 1996, 0121619664, 9780121619664. Cognitive Ecology identifies the richness of input to our sensory evaluations, from our cultural heritage and philosophies of aesthetics to perceptual cognition and judgment. Integrating the arts, humanities, and sciences, Cognitive Ecology investigates the relationship of perception and cognition to wider issues of how science is conducted, and how the questions we ask

about perception influence the answers we find. Part One discusses how issues of the human mind are inseparable from the culture from which the investigations arise, how mind and environment co-define experience and actions, and how culture otherwise influences cognitive function. Part Two outlines how philosophical themes of aesthetics have guided psychological research, and discuss the physical and aesthetic perception of music, film, and art. Part Three presents an overview of how the senses interact for sensory evaluation.

[Price Theory, Milton Friedman](#) , 2009, 1412809657, 9781412809658. Economics is sometimes divided into two parts: positive economics and normative economics. The former deals with how the economic problem is solved, while the latter deals with how the economic problem should be solved. The effects of price or rent control on the distribution of income are problems of positive economics. The desirability of these effects on income distribution is a problem of normative economics. Within economics, the major division is between monetary theory and price theory. Monetary theory deals with the level of prices in general, with cyclical and other fluctuations in total output, total employment, and the like. Price theory deals with the allocation of resources among different uses, the price of one item relative to another. Prices do three kinds of things. They transmit information, they provide an incentive to users of resources to be guided by this information, and they provide an incentive to owners of resources to follow this information. Milton Friedman's classic book provides the theoretical underpinning for and understanding of prices. Economics is not concerned solely with economic problems. It is a social science, and is therefore concerned primarily with those economic problems whose solutions involve the cooperation and interaction of different individuals. It is concerned with problems involving a single individual only insofar as the individual's behavior has implications for or effects upon other individuals. "Price Theory" is concerned not with economic problems in the abstract, but with how a particular society solves its economic problems.

[Finding Mecca in America: How Islam Is Becoming an American Religion, Mucahit Bilici](#) , 2012, 0226049566, 9780226049564. The events of 9/11 had a profound impact on American society, but they had an even more lasting effect on Muslims living in the United States. Once practically invisible, they suddenly found themselves overexposed. By describing how Islam in America began as a strange cultural object and is gradually sinking into familiarity, Finding Mecca in America illuminates the growing relationship between Islam and American culture as Muslims find a homeland in America. Rich in ethnographic detail, the book is an up-close account of how Islam takes its American shape. In this book, Mucahit Bilici traces American Muslims progress from outsiders to natives and from immigrants to citizens. Drawing on the philosophies of Simmel and Heidegger, Bilici develops a novel sociological approach and offers insights into the civil

rights activities of Muslim Americans, their increasing efforts at interfaith dialogue, and the recent phenomenon of Muslim ethnic comedy. Theoretically sophisticated, *Finding Mecca in America* is both a portrait of American Islam and a groundbreaking study of what it means to feel at home.

[Transforming Vision: Imagination and Will in Kierkegaardian Faith, M. Jamie Ferreira](#) , 1991, 0198263317, 9780198263319. The metaphor of a "leap of faith" is probably the element most widely recognized as a distinctive characteristic of a "Kierkegaardian" account of the transition to religious faith. Both in popular and scholarly circles this "leap" has usually been understood in terms of an act of will-power. Challenging such a volitionalist view, as well as some current alternatives to it which see instead only an ineffable "miracle" of grace, Ferreira argues that Kierkegaard's striking appreciation of a variety of roles of imagination supports a reconceptualization of the "leap" or "decision" in terms of a reorienting shift in perspective, an imaginative revisioning. Exploring the relation between passion and paradox in several of Kierkegaard's accounts of selfhood, and developing an account of transitional choice in which imagination is a constitutive element, Ferreira elaborates an understanding of the faith-transition in terms of such imaginative activities as "suspension," "synthesis," and "engagement." The analysis of imaginative activity in these ethical and religious transitions has, moreover, implications which go beyond Kierkegaard scholarship, for it bears importantly not only on other "conversion" accounts, but also on the question of transitions to alternative or incommensurable conceptual frameworks in general.

[Love and Providence: Recognition in the Ancient Novel, Silvia Montiglio](#) , 2013, 0199916047, 9780199916047. From the Odyssey and King Lear to modern novels by Umberto Eco and John le Carr, the recognition scene has enjoyed a long life in western literature. It first became a regular feature of prose literature in the Greek novels of the first century CE. In these examples, it is the event that ensures the happy ending for the hero and heroine, and as such, it seems, was as pleasing for Greek readers as the canonical Hollywood kiss is for contemporary movie goers. Recognitions are particularly gratifying in the context of the ancient novels because the genre as a whole celebrates the idyllic social order to which the heroes and heroines belong and from which they have been harshly severed. In spite of their high frequency and thematic importance, novelistic recognitions have attracted little critical attention, especially in relation to epic and tragedy. With *Love and Providence*, Silvia Montiglio seeks to fill this gap. She begins by introducing the meaning of recognitions in the ancient novel both within the novels' narrative structure and thought world--that is, the values and ideals propounded in the narrative. She pursues these goals while examining novels by Chariton, Xenophon of Ephesus, Achilles Tatius, Longus, Heliodorus, Apuleius, and Petronius, as well as the Life of Apollonius of Tyre, the pseudo-Clementine recognitions, and the Jewish novel Joseph and Aseneth. In addition to addressing questions brought about by the recognitions--What does it mean for lovers to recognize each other at the end of their adventures? Is recognition the confirmation of sameness or an acknowledgement of change?--Montiglio addresses the rapport novelists entertain with their literary tradition, epic and drama. The book concludes by emphasizing the originality of the novels for the development of the recognition motif, and by explaining its influence in early-modern European literature.

[Ovid, the love poems, Ovid](#) , 1990, 0198147627, 9780198147626. Ovid's love poetry, like everything else he wrote, was original and innovative. Yet under the surface of the poet's characteristic wit runs an undercurrent of serious meaning--the theme of the poet's complete control of his medium and his art and a proud consciousness of achievements registered and yet to come. Ovid claimed to be the "Virgil of elegy" and in such poetry as *Amores*, *Ars Amatoria* and *Remedia Amoris*, he largely succeeded. These accomplished translations of the love poetry adopt a highly entertaining modern idiom, yet maintain the sophisticated elegance of Ovid's Latin. Melville, the acclaimed translator of the *Metamorphoses*, employs rhyme throughout and evolves an original metrical system that gives a greater sense of Ovid's elegaic couplets than earlier systems. He also includes, with some revisions, B.P. Moore's brilliant version of *Ars Amatoria*, published over fifty years ago and still unequalled.

A futurist novel in the tradition of Wells, Huxley and Orwell, the Crowd Dreams of Love is a comic meditation on individual and social love, time and the inevitability of change. A reclusive composer of modern music is drawn inexorably into the tumult of his times by three women: Marie, an immigrant waitress with connections to the murky Sisterhood; his student the beautiful pianist Eva; and his ex-lover Caroline, now one of the most famous movie stars in the world - as famous for her political opinions as for her movie roles. The Crowd Dreams of Love asks: What does it take to start a Revolution? In the heart, and in the streets? Its world is not very different from our own, where technology has made privacy impossible, where crowds have minds separate from those in them, where massive forces overwhelm the individual, where the government rounds up dissidents and the news is mere propaganda, where people know that something terrifying is happening, without knowing what it is, where time can be traversed by longing - and where love pervades all we do.

It provides a communicative approach to learning, supported by a well-structured grammar syllabus. Level 1 gives students a solid introduction to the basics of English grammar. In levels 2 and 3 the grammar syllabus helps students analyse language and master more complex structures. There is a grammar summary at the back of each Student's Book. The three levels of the course reflect a steady increase not only in language level but also in cognitive maturity. In level 1 new language is presented through a colourful fantasy cartoon. In levels 2 and 3, this is replaced with a more appropriate focus on topics from the real world. A special focus on vocabulary helps students to develop strategies for vocabulary acquisition and coping with unknown words. Simple rubrics and a clear layout make the course easy to teach and easy to follow. The 'Think about it!' sections at the end of each unit encourage students to reflect on what they have learned and promote learner autonomy.

Most leaders know that a winning, engaged culture is the key to attracting top talent and customers. Yet, it remains elusive how exactly to create this ideal workplace one where everyone from the front lines to the board room knows the company's values and feels comfortable and empowered to act on them. Based on Ann Rhoades years of experience with JetBlue, Southwest, and other companies known for their trailblazing corporate cultures, Built on Values reveals exactly how leaders can create winning environments that allow their employees and their companies to thrive. Companies that create or improve values-based cultures can become higher performers, both in customer and employee satisfaction and financial return, as proven by Rhoades work with JetBlue, Southwest Airlines, Disney, Loma Linda University Hospitals, Doubletree Hotels, Juniper Networks, and P.F. Chang's China Bistros. Built on Values provides a clear blueprint for how to accomplish culture change, showing: How to exceed the expectations of employees and customers How to develop a Values Blueprint tailored to your organization's goals and put it into action Why it's essential to hire, fire, and reward people based on values alone, and How to establish a discipline for sustaining a values-centric culture Built on Values helps companies get on the pathway to greatness by showing the exact steps for either curing an ailing company culture or creating a new one from scratch.

[Mental Health of Carers.](#) , 2002, 0116215542, 9780116215543. This report presents the findings of a survey of the mental health of carers living in England. The survey was commissioned by the Department of Health and was carried out between March and July 2001. It is one of a series of surveys of different population groups which began in 1993. The sample for the survey was obtained from people who were identified as carers on the basis of questions included in the 2000 General Household Survey. This report describes the extent to which carers experience mental health problems, such as depression, anxiety and phobias, and identifies a number of factors which are associated with increased levels of such symptoms. It considers a range of factors, such as the socio-demographic characteristics of the carer themselves, their health, the characteristics of those they care for, and the support they receive in their caring role. The report also considers to what extent those carers with mental health problems receive treatment. The report includes a description of the survey methods used and aims to provide an overview of the main topics covered.

'Modest, caring for each other, when a couple thus carry on, their mutual love will never fade' The word 'kama' means the desire, especially for sensual pleasure, in Sanskrit. Its proper pursuit was considered an essential part of the well-rounded education of a young patrician. Treating enjoyment as an art, Kama Sutra is a handbook covering every aspect of love, sex, the social life and relationships, from increasing virility to seducing a new partner. It also gives a fascinating insight into the pampered world of the Indian elite nearly two thousand years ago. This acclaimed new translation takes the Kama Sutra away from its familiar image of an erotic Oriental curiosity, and reveals it as a pithy and wry account of human behaviour. A. N. D. Haksar's introduction discusses the work's origins, authorship and influence, and this edition also contains extensive notes and a bibliography. [Institute of Historical Research](#) , 1979, 019722752X, 9780197227527. The volume covers a large area at the southern end of the Yorkshire Wolds, lying west of the city of Hull and the town of Beverley. It is concerned with the history of fourteen parishes which comprise the greater part of the Hunsley Beacon division of Harthill wapentake. Though the rolling chalk hills of the wolds dominate the area, several of the parishes extend into the low- lying ground of the Hull valley to the east and the Vale of York to the west. In South Cave parish the reclamation of Broomfleet Island from the river Humber adds further variety to the agricultural history of the area. There are several deserted medieval villages. Much of the countryside described here is still wholly rural in character, but some of the settlements lying on the eastern

slopes of the wolds, like Cherry Burton and Skidby, have become commuter villages for the near-by towns. The large medieval vil-lage of Cottingham became a popular place of residence for Hull merchants in the late 18th century, and much of the parish has since been absorbed within the city; the village now houses many of the students of the University of Hull. Notable country houses described in the volume include Dalton Hall and Houghton Hall, and the churches include an outstanding Norman building at Newbald. Many of the villages consist of brick houses of the 18th century and later, but 17th-century timber-framed houses survive at South Dalton and Cot-tingham. In other villages, however, much use is made of the local Jurassic limestone which outcrops below the wolds escarp-ment. At Leconfield there survives the moated site of a seat of the Percy family, earls of Northumberland, and it was from Rowley that the rector emigrated in the 17th century to found a town of the same name in Massachusetts.

[The Road to Nab End: A Lancashire Childhood, William Woodruff](#) , 2001, 1461733154, 9781461733157. A bestseller in England and celebrated as one of the great memoirs in many years, The Road to Nab End is a marvelously evocative account of growing up poor in a British mill town. From William Woodruff's birth in 1916 (in the carding room of a cotton

mill) until he ran away to London at the age of sixteen, he lived in the heart of Blackburn's weaving community in the north of England. But after Lancashire's supremacy in cotton textiles ended with the crash of 1920, his father was thrown out of work. From then on, Billy and his family faced a life blighted by extreme poverty. For the ordinary families of Lancashire, unemployment was an ever-present fear: "If you worked you ate. If there was no work you went hungry." Billy's boyhood was not all misery. Working-class pride and culture made for tight family and neighborhood bonds and added savor to the smallest pleasures in life. Mr. Woodruff writes with an understated lyricism and an eye for telling details that effortlessly pulls us into another time and place.

[Forensic Mental Health Assessment: A Casebook, Kirk Heilbrun, Geoffrey R. Marczyk, David DeMatteo](#) , 2002, 0195145682, 9780195145687. Forensic mental health assessments are evaluations conducted by individuals from different disciplines on a variety of questions in civil, criminal, and family law. A growing number of mental health professionals, including psychologists, psychiatrists, and social workers, are being called upon to assess everything from an individual's competence to stand trial to the risk or threat of future violence, and asked to weigh in on cases ranging from murder and assault to malpractice and child custody." General principles have emerged to guide professionals conducting forensic mental health assessment. Forensic Mental Health Assessment: A Casebook illustrates those principles using relevant, real-world case material. Built around actual case reports from expert forensic psychologists and psychiatrists, the volume probes a broad range of legal questions through the detailed examination of more than 40 cases. Topics include Miranda rights waiver, competence to act as one's own attorney, competence to stand trial, juvenile commitment, sanity at the time of the offense, child custody, termination of parental rights, guardianship, and malpractice. This is the first casebook focusing specifically on forensic assessment. It contains cases from a broad range of civil, criminal, and family legal questions, described in case reports contributed by expert forensic psychologists and psychiatrists. It will be useful for anyone involved in assessments for the courts and attorneys, including psychologists,

psychiatrists, social workers, and attorneys.

Russia has recently strengthened its diplomatic relations with its Northeast Asian neighbors--China, Japan, and North and South Korea. Author Chikahito Harada shows how Sino-Russian detente has effectively stalled, although Russian arms sales to Beijing are of growing concern to the West. Harada asserts that Russia remains excluded from the great-power politics surrounding the Korean Peninsula, and that, while Russo-Japanese relations are improving, they remain bedeviled by Russia's domestic problems. *Russia and Northeast Asia* assesses the reasons for Russia's policy towards Northeast Asia and offers key policy recommendations.

[Ode to Precious, Priceless, and Irreplaceable African-American Men, Yolanda Miller](#) , 1995, 0965085201,

9780965085205. The book of poetry entitled ODE TO PRECIOUS, PRICELESS & IRREPLACEABLE AFRICAN-AMERICAN MEN: A COLLECTION OF POEMS uplifts, honors, salutes & renders tribute exclusively to African-American men. In contrast to many works, these men are portrayed in a positive light. They are described as responsible, compassionate, courageous & demonstrate admiration for their families, children & communities, even in the last decade of the twentieth century. The poems range from the positive feelings that African-American women express toward these men; how they love, appreciate, want & value them to complimenting them for being involved in their communities as daily heroes who make a significant difference in other people's lives. There are poems that range from elaborating extensively on African-American men as being dependable fathers who possess a deep love & concern for their offspring to those that categorize these men as hardworking in numerous occupations at different income levels; from meager, middle & upper class to millionaire status. A unique poem recognizes elderly gentlemen for their outstanding accomplishments on earth, while the final work encourages African-American men to be enthusiastic as they prepare for the twenty-first century. However, as this era begins, planetary interests threaten to disrupt this time of relative peace and Luke is plagued by visions of an approaching darkness. Melding the galaxy into one cohesive political whole after the savage war with the Yuuzhan Vong is not the easiest task, and already some worlds are chafing under the demands of the new government. Civil war may be brewing, and the Skywalker-Solo clan find that they might not all be on the same side. Meanwhile, evil is rising again--out of the best intentions--and it looks like the legacy of the Skywalkers may come full circle...

[Having it So Good: Britain in the Fifties, Peter Hennessy](#) , 2007, 0141004096, 9780141004099. Having It So Good evokes Britain emerging from the shadow of war and the privations of austerity and rationing into growing affluence. Peter Hennessy takes his readers into the front-rooms where the Coronation was watched on television, to the classrooms and now coffee bars of 1950s Britain and also into the secret Cabinet rooms in which decisions about the British nuclear bomb were taken and plans made for the catastrophe of nuclear war. He brings to life the ageing Churchill, in his last faltering spell as Prime Minister, the highly-strung Anthony Eden taking his country to war in the teeth of American opposition and world opinion, and the rise of Supermac Harold Macmillan, gliding over problems with his Edwardian insouciance. Above all, Having It So Good captures the smell and the flavour of an extraordinary decade in which affluence and anxiety combined to produce their own winds of change.

[Lost Property: The Woman Writer and English Literary History, 1380-1589, Jennifer Summit](#) , 2000, 0226780139, 9780226780139. The English literary canon is haunted by the figure of the lost woman writer. In our own age, she has been a powerful stimulus for the rediscovery of works written by women. But as Jennifer Summit argues, "the lost woman writer" also served as an evocative symbol during the very formation of an English literary tradition from the fourteenth through the sixteenth centuries. Lost Property traces the representation of women writers from Margery

Kempe and Christine de Pizan to Elizabeth I and Mary Queen of Scots, exploring how the woman writer became a focal point for emerging theories of literature and authorship in English precisely because of her perceived alienation from tradition. Through original archival research and readings of key literary texts, Summit writes a new history of the woman writer that reflects the impact of such developments as the introduction of printing, the Reformation, and the rise of the English court as a literary center. A major rethinking of the place of women writers in the histories of books, authorship, and canon-formation, *Lost Property* demonstrates that, rather than being an unimaginable anomaly, the idea of the woman writer played a key role in the invention of English literature.

Quotes are drawn from sources ranging from practising horsemen and horsewomen, to psychiatrists such as Viktor Frankl, sports figures like Tiger Woods, characters in novels, and even jokes and word puzzles. The author accompanies each quote with thoughts on how the quote relates to working with horses, including anecdotes from her own horse life as well as insights gleaned from horse clinics around the country. None are intended to be prescriptive, but instead to provide jumping off points for each reader to come up with her or his own thoughts on how the quote might apply to horsemanship and how it might better the reader's own understanding of and ability to be aware, to be mindful, to be in the moment. Horses are masters at mindfulness, experiencing their lives one moment at a time. They have a lot to teach humans if we are only willing to explore their world on their terms and expand our own awareness to better understand these gracious animals. Keep this book by your bedside or next to the place where you have your morning coffee for a daily dose of inspiration.

This is the first detailed history of musical activities at Venetian lay confraternities. Based on over two decades of research in Venetian archives, the book traces musical practices from the origins of the earliest confraternities in the mid-thirteenth century through their suppression under the French and Austrian governments of Venice in the early nineteenth century. The first section of the book treats the scuole grandi, the largest and most important of the Venetian confraternities, and the only ones to maintain musical establishments for long periods. The second portion of the book is concerned with the scuole piccole, the numerous less-important confraternities, sometimes as many as 300 of which were active simultaneously, located in churches throughout Venice. Appendices include an attempt to reconstruct a calendar of musical events at all Venetian confraternities in the early eighteenth century, demonstrating the vital role they played in the cultural and ceremonial life of this great city.

[New Sources of Development Finance, A. B. Atkinson](#) , 2004, 0199278563, 9780199278565. As their Millennium Development Goals, world leaders have pledged by 2015 to halve the number of people living in extreme poverty and hunger, to achieve universal primary education, to reduce child mortality, to halt the spread of HIV/AIDS, and to halve the number of people without safe drinking water. Achieving these goals requires a large increase in the flow of financial resources to developing countries - double the present development assistance from abroad. Examining innovative ways to secure these resources, this book sets out a framework for the economic analysis of different sources of funding, applying the tools of modern public economics to identify the key issues. It examines the role of new sources of overseas

aid, considers the fiscal architecture and the lessons that can be learned from federal fiscal systems, asks how far increased transfers impose a burden on donors, and investigates how far one can separate raising resources from their use. In turn, the book examines global environmental taxes (such as a carbon tax) the taxation of currency transactions (the Tobin tax), a development-focused allocation of Special Drawing Rights by the IMF, the UK Government proposal for an International Finance Facility, increased private donations for development purposes, a global lottery (or premium bond), and increased remittances by emigrants. In each case, it considers the feasibility of the proposal and the resources that it can realistically raise. In each case, it offers new perspectives and insights into these new and controversial proposals.

[Language Networks: The New Word Grammar: The New Word Grammar, Richard Hudson](#) , 2006, 0199267308, 9780199267309. This book argues that language is a network of concepts which in turn is part of the general cognitive network of the mind. It challenges the widely-held view that language is an innate mental module with its own special internal organization. It shows that language has the same internal organization as other areas of knowledge such as social relations and action schemas, and reveals the rich links between linguistic elements and contextual categories. Professor Hudson presents a new theory of how we learn and use our knowledge of language. He puts this to work in a series of extended explorations of morphology, syntax, semantics, and sociolinguistics. Every step of his argument and exposition is illustrated with examples, including the kind mainstream theory finds it hard to analyse. He introduces the latest version of his influential theory of Word Grammar and shows how it can be used to explain the operations of language and as a key to understanding the associated operations of the mind.

Back in London, the couple is subjected to an interrogation by the British Secret service who also need their help. [Pull Up a Chair: The Vin Scully Story, Curt Smith](#) , 2009, 1597974242, 9781597974240. In 1950, Vin Scully broadcast his first major league baseball game for the then-Brooklyn Dodgers. Nearly sixty years later he still invites a listener to "pull up a chair," completing a record fifty-ninth consecutive year of play-by-play. Recruited and mentored by the legendary Red Barber, the New York-born Scully moved with the Dodgers to Los Angeles in early 1958. His instantly recognizable voice has described players from Duke Snider to Orel Hershiser to Manny Ramirez, with hundreds in between. At one time or another, Scully has aired NBC Television's Game of the Week, twelve All-Star Games, eighteen no-hitters, twenty-five World Series, and network football, golf, and tennis. He has made every sportscasting Hall of Fame; received a Lifetime Emmy Achievement award and a Star on the Hollywood Walk of Fame; and been voted "most memorable [L.A. Dodgers] franchise personality." In 2000, the American Sportscasters Association named Scully the Sportscaster of the 20th Century. The first biography of Vin Scully is long overdue. Curt Smith--to USA Today, "The voice of authority on baseball broadcasting"--is the ideal man to write it. Scully opens each broadcast by wishing listeners, "A very pleasant good afternoon." Pull Up a Chair will provide a reader with the same.

[Death from the Skies!: These are the Ways the World Will End--](#), Philip C. Plait , 2008, 0670019976, 9780670019977. A

lively astronomy primer that uses cataclysmic scenarios to explain the universe's most fascinating events. According to astronomer Philip Plait, the universe is an apocalypse waiting to happen But how much do we really need to fear from things like black holes, gamma-ray bursts, and supernovae? And if we should be scared, is there anything we can do to save ourselves? With humor and wit, Plait details the myriad doomsday events that the cosmos could send our way to destroy our planet and life as we know it. This authoritative yet accessible study is the ultimate astronomy lesson. Combining fascinating—and often alarming—scenarios that seem plucked from science fiction with the latest research and opinions, Plait illustrates why outer space is not as remote as most people think. Each chapter explores a different phenomenon, explaining it in easy-to-understand terms, and considering how life on earth and the planet itself would be affected should the event come to pass. Rather than sensationalizing the information, Plait analyzes the probability of these catastrophes occurring in our lifetimes and what we can do to stop them. With its entertaining tone and enlightening explanation of unfathomable concepts, *Death from the Skies!* will appeal to science buffs and beginners alike.

[Mine Eyes Have Seen, Dr. Martin Luther King JR.'s Final Journey, D'Army Bailey](#) , 2008, 0942683110, 9780942683110. In the unusually cold spring of 1968, Dr. Martin Luther King, Jr. spent several weeks shuttling between the Sanitation Workers' Strike in Memphis and his home in Atlanta. Memphis' black sanitation workers had walked out in February demanding union recognition and the same benefits as whites. The city's only offer to their demands thus far had consisted of paternalism, condescension, and silence at the bargaining table. There would be no municipal workers' union in Memphis while Henry Loeb, who was avidly anti-union, was mayor. Despite months of peaceful protest and, finally, a violent confrontation that left one dead, scores injured, and hundreds jailed, both camps remained convinced that theirs was the truly just cause. Dr. King entered the fray with the intention of proving that his passive, non-violent methods were not only morally proper, but also effective as well. With riots across the country the previous three summers, Dr.

King knew that his methods were under close scrutiny. In Memphis, where the strikers and the city were at an impasse, he would face the ultimate test during what would become his final, tragic journey. D'Army Bailey draws on his own experiences in the Civil Rights Movement to reflect upon the actions that led to Dr. King's involvement in the Memphis strike. Bailey details the final weeks, from King's disillusionment with persistent strike-bred violence to his steadfast search for an affirmation that the non-violent methods he had preached and practiced throughout his life were, in fact, effective. Using archival photographs from the period, Bailey tells the story of his personal journey from disillusionment with King's tactics to his position of leadership as the person who spearheaded the reclamation of the Lorraine Motel (where Dr. King was assassinated) and the construction of the National Civil Rights Museum. In addition, Bailey challenges the citizens of Memphis and the world to embark upon their own journey of truth that will, Bailey writes, lead them to the realization that Dr. King's non-violence is necessary for all who abhor social injustice of any kind, anywhere.
