

Revenge of the Electric Car

Movie Information:

"In 2006, thousands of new electric cars were purposely destroyed by the same car companies that built them. Today, less than 6 years later, the electric car is back... with a vengeance. In "Revenge of the Electric Car," director Chris Paine takes his film crew behind the closed doors of Nissan, GM, and the Silicon Valley start-up Tesla Motors to chronicle the story of the global resurgence of electric cars. Without using a single drop of foreign oil, this new generation of car is America's future: fast, furious, and cleaner than ever." -- (C) Official Site
