## Multimedia Installations

(1 - 6 June 2015)

## International electroacoustic composition contest

(2 June 2015)

## Call for sound and multimedia work

(3 June 2015)

event accredited « 2015, Year of light in France »

2015 was proclaimed the International Year of Light by the General Assembly of the United Nations. Musinfo already organized events (lectures and concerts) linking light and sound.

We collaborated with the Plasma Laboratory (PIIM) from University of Marseille on the plasma spectrum data sonication project.

It is therefore natural that we defined light as the general theme for Art & Science Days 2015.

We are glad that the call for work, expanded this year to multimedia works, was accredited by the National Committee of the Year of Light in France.
