enactor

retail systems for a digital world

Want to join a company at the forefront of enterprise systems and technologies?

Enactor is a successful and growing software company providing enterprise systems to leading UK, North American and European retailers. Enactor systems drive the instore, mobile and online channels that make up a modern retail organisation.

We currently have the following opportunity to join a small team in our Colombo office:

Senior Software Engineer – Java/J2EE

You must have an outstanding academic and industrial track record with a recognised BSc, MSc or PhD in Computer Science or Mathematics; excellent analytical and problem solving skills; a good command of the English language; good communication, interpersonal and team working skills and you must be willing to travel. Most of all you must have a passion for developing high quality software.

Experience & Skills

- Minimum of 5 years experience in developing Java/J2EE systems
- Database development on MSSQL, Oracle or MySQL using SQL and JDBC
- Extensive knowledge of XML, XML Schema and XSLT
- Web development experience with JSP, Servlets, JavaScript and a working knowledge of a J2EE container
- Experience in a J2EE application framework such as Spring, Struts
- Effective use of design patterns, MVC and unit testing frameworks
- Experience in unit and integration testing and use of mocking frameworks
- Eclipse plugin development and Flex skills are highly desirable
- Experience in Web Services, SOA, OR Mapping, BPEL or related technologies would be advantageous
- A passion for Agile methodologies and knowledge of SDLC

Responsibilities

- Develop high quality, testable, well-documented software
- Ensure adequate test coverage at unit and integration levels
- Work closely with the Technical Architects and Development Managers to convert functional and technical specifications to production quality software
- Participate in the configuration, testing and release processes
- Contribute to design and specification processes
- Research and learn new technologies
- Train new and junior developers

If you think you have the right attitude and skills to take on the above role with Enactor, please email your CV (no more than four pages, please) to **sl-careers@enactor.co.uk** at your earliest. We are looking to schedule interviews in the next few weeks.
