

GENIES FOR GENIUSES!

"It's much more fun to see tech as magic, programming as casting spells, and software as genies we create to obey our every wish"

-Dan Mailman, Studio MindStride

INTRO PYTHON PROGRAMMING

WHEN: July 24th & 26th: 6:30p-8:30p

WHERE: BDC, 100 Cherokee Blvd.

COST: \$45

SIGN-UP: StudioMindStride.com/g4g
(or at the door)

Chatt*Labs and Studio MindStride present this class as a good starter for Python or programming in general if you want to move on to other languages. In beginning to "think like magicians", we'll cover: Development Environments, Modules, Files, Variables, Control Flow, Exception Management, Input, Output, Return Values, Parameters, Arguments, Functions, and Calls. If any of these are mysterious or if you'd like to learn the python versions, this is your course. The class will develop and debug several programs that can be built on for more complex tasks.

Come to class with [Python 3 from PYTHON.ORG](http://PYTHON.ORG) already installed!*

*Email mindstride@gmail.com if you need personal assistance installing Python
