Location:

**Orthopaedics Male Ward
Hospital Sultan Ismail**

**Dear sir,
to whom it may concerned,
ATT : University Teknologi Petronas Staff/Lecturer**

I, hereby would like to state that Mr MOhd ABd Hafiz Bin Abu Tahir (NRIC : 880824-01-5415), currently is admitted in our ward for spinal problem which due to trauma during jumping down the cliff at beach. He is post trauma day six, sustained:

**1/ Spinal shock secondary to Burst fracture C6
sustained bilateral lower limb weakness + numbness since incident
on skull tong D4**

**2/ Mild Head Injury with SAH
CT Brain 25/5: Subarachnoid hemorrhage within the interpeduncular
cistern.**

**Above diagnosis as stated make patient paralyse & the outcome is
uncertain. We need to wait at least 6 month to see wether he able to
regained normal or near normal function or he will become paralyse for the
whole life.**

**He need to be in hospital for continuation of above condition & in view of
that he is unable to attend classes during treatment period.**

I highly appreciate your understanding regarding patient current condition.
