

## Neighborhood Roots Program

# Support Street Tree Plantings

The Corvallis Sustainability Coalition is partnering with Corvallis Parks & Recreation on a project that aims to increase “tree equity” through planting trees in parts of town with the least tree cover and residential trees. Street trees provide many benefits including increased property values, home energy savings, and a beautiful natural buffer from the street. The area of 210—392 NE Conifer has been selected as the first Neighborhood Roots planting area.

We would like to work with residents and property owners in this area to select specific planting locations, and tree species to be planted, as well as to engage them in the project. The desired planting time frame is December 2021 through February 2022. Please contact Emily Bowling at [eebowling@gmail.com](mailto:eebowling@gmail.com) to learn more, provide input, or get involved.
