

Meet FirstBuild.com

Join the new co-creation community that brings together the digital and physical worlds to build the next generation of major home appliances. This global online community connects engineers, designers, makers and home enthusiasts to solve design and engineering challenges associated with creating tomorrow's appliances with a micro-factory for rapid prototyping and short run production in Louisville, KY.

Join the community today and help tackle the first two design and engineering challenges:

- Creating the ultimate micro-kitchen to optimize living in a smaller space.
- Solving for indoor grilling: Bring the flavor of outdoor grilling inside.

Prizes and sales royalties are rewarded to community members with significant contributions.

Join us at FirstBuild.com

We need big ideas for small spaces. Design a micro-kitchen and win \$2,500. Entries accepted at firstbuild.com from May 15 to June 23.

Design the indoor grill of your dreams and win up to \$2,500. Entries accepted at firstbuild.com from May 15 to July 7.
