PROFILE

Motivated and skilled Computer Science and Engineering student with expertise in Python and Web Development, and a keen interest in AI and ML. Successful mentoring experience has honed my leadership and communication skills. I am confident in my ability to develop innovative solutions, and drive business growth, and eager to apply my skills to a progressive organization that values ingenuity and progress.

PROFESSIONAL EXPERIENCE

Software Engineering Intern MTAB Technology Center PVT LTD - MTC 🔗	06/2023 Remote
Robotic Process Automation Intern Palmate Technologies Co. Ltd. 🔗	05/2023 Saudi Arabia
Robotics Engineering Intern Inker Robotics Pvt Ltd 🔗	04/2023 Kerala, India

PROJECTS

Interview Portal with Personality Prediction

Built an interview portal with personality prediction and skill extraction for efficient candidate assessment.

Real-Time Sign Language Recognition with SVM and MediaPipe

Developed a real-time sign language recognition system using SVM and MediaPipe, facilitating fluid communication for the hearing-impaired.

Hair Scalp Disease Detection with Transfer Learning

Developed a hair scalp disease detection system using transfer learning techniques, enhancing early diagnosis and treatment of scalp conditions.

EDUCATION

BTech in Computer Science and Engineering College of Engineering, Thalassery	2020 – 2024
--	-------------

SKILLS

Python | Django | HTML & CSS | Machine Learning | Javascript | SQL (PostgreSQL)
NoSQL (MongoDB) | Git | Flutter | C

CERTIFICATES

- Python Programming Masterclass [🔗](#)
- Python Web Developer [🔗](#)
- Web Application Security [🔗](#)

ORGANIZATIONS

Hack Club 🔗 Execom Member	01/2021 – 12/2021
---	-------------------

Served as an Executive Committee Member for Hack Club, organizing multiple successful tech events.

IEDC 🔗	06/2022
-------------------------------	---------

I served as a student mentor for an IEDC-conducted hackathon at our college, providing guidance to participants in backend web development.
