EDUCATION

- **BML Munjal University** Haryana, India
Bachelor of Technology - Computer Science *August 2016 - June 2020*

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, Java, Python, SQL
- **Frameworks:** ReactJS, NodeJS, ExpressJS, NextJS, Svelte, Tailwind CSS, Material UI
- **Tools:** Redux, MySQL, MongoDB, Socket.io, Git, Jira

EXPERIENCE

- **Louper.io** London, Remote
Full Stack Developer *June 2023 - Present*
 - **Front-end:** Proficient in building dynamic and responsive user interfaces using React and Svelte. Translate designs into interactive components, utilize React hooks and functional components for reusability, and integrates Redux DevTools for efficient debugging. Experience in creating smooth and interactive Svelte-based dynamic web applications.
 - **Back-end:** Designed and developed robust RESTful APIs using Node.js to handle user information securely and efficiently.
 - **Tools Used:** React.js, Node.js, Express.js, MongoDB, TypeScript, Socket.io, Svelte, GitHub
- **Cognavi India Private Limited** Remote
Frontend Developer *Apr 2023 - May 2023*
 - **End-to-End:** With the aid of Next.js and Typescript, we are developing a comprehensive web application designed to function as talent management, which will help hire talent with the help of data.
 - **Landing Page:** Build the landing pages for student and corporate sites from scratch.
 - **Tools Used:** TypeScript, Next.js, Tailwind CSS.
- **FuelCab India** Remote
Frontend Developer (Full-time) *Jan 2023 - March 2023*
 - **State Management:** Refactor the code and used Redux Toolkit for better state management.
 - **Tools Used:** JavaScript, React.js, Redux .
- **USMLESarthi** Remote
Web Developer *Jan 2021 - Jan 2023*
 - **Web Application:** We designed a bus ticketing application that allows users to book their bus tickets with just a tap of their fingers. Spearheaded the creation of a web application empowering users to effortlessly construct their customized ERP systems without coding.
 - **Tools Used:** JavaScript, React.js, Redux, Material UI, Node.js, MongoDB, Firebase .

INTERNSHIP

- **Goodera** Gurugram, India
Intern, Data Analyst *Feb 2020 - Jul 2020*
 - **Developing Dashboard:** We created dashboards that utilize input from source data to generate dependable and uniform real-time reports. The Query Builder application was used to allow non-technical clients to independently generate their own inquiries. This service was provided to clients such as 3M, Capgemini and Amazon.
- **BHEL** Noida, India
Intern *May 2018 - Jul 2018*
 - **Smart Lighting System:** Built a smart lighting system to monitor electricity consumption. This project aimed to keep the wastage of electricity under control and to find a solution for sustainable development. A reduction of 27% in electric consumption was achieved using this system in a single room.

PROJECTS

- **Food Delivery Application (link):** End-to-end customer-based food ordering from home. Users can log in, add their favorite dish to the cart, and place the order. Firebase as well as a real-time database have been used for authentication. Tech: React.js, Redux, Firebase, Tailwind CSS. (Nov '22)
- **New Voice-Over Application (link):** End-to-end customer-based website for listening to real-time news. Users can ask for their favorite section of news, latest web updates are scraped and played just like Alexa. Newsapi has been used to retrieve news and Alan AI for speech. Tools used: React.js, Alan AI, Material UI. (Oct 22)

HONORS AWARDS AND ACHIEVEMENTS

- Awarded title of Goodera Innovator - May, 2020
- Secured 1st Position in BMU Hackathon among 1200 students, Feb 2018
- **Halls of Summer, Founder** Gurugram, India
Organized workshops for 5000 children and funded arts supplies for 120 underprivileged students. Jan 2017 - Present
- **Team, Lead** Gurugram, India
Head of hospitality for Lotus League, a healthy sports competition (2017). *Jan 2017 - Jan 2020*
