SENSEX DLY CHART

Markets opened on a positive note but were unable to sustain the gains which led the indices to close on a flat note. On the daily charts, we are observing a narrow range body formation which reflects cautious approach at higher levels. At present there is no weakness on the daily chart but just a consolidation of the gains. In the coming trading session if indices trade convincingly above 18355 / 5513 level then it is likely to test 18480 / 5550 levels. On the downside, 18152 - 18027 / 5450 – 5400 levels may act support for the day.

Stocks +ve Bias

Stocks -ve Bias

The stocks mentioned above are given considering the general direction of the trend expected over a period of 2 or 3 days. Investors / Traders are expected to use their own discretion while taking any action related to the stock.
