VIEW POINT: BSE SUPPORT CRACKS AS WELL

After successfully torpedoing Nifty's January low of 4448 on Monday, the bears targeted the Sensex Tuesday and pushed the benchmark lower than its March low of 14677. While lower lows have been formed for both the indices now, they have gone into an over sold zone, and therefore the risk reward ratio in terms of further shorting of the markets is not favourable.

We did see some shorts being covered and the Nifty discount, which went upto 37 points one stage, came back to a more acceptable 9 points at close. Positions were built across the board in Pharma stocks, while Reliance and ONGC recovered from their lows. The outlook for banking remains negative and some select buying had emerged in cement stocks after a prolonged spell of selling. The markets may be in a recovery mode today in the absence of any sharp cuts in Asia.

THE INDICATOR**ACROSS THE ATLANTIC**

US markets were mixed Tuesday as hawkish words from the **Federal Reserve** chief left stocks unable to sustain any sincere forays into positive territory, notwithstanding a leaping dollar and an encouraging development in the blistering oil market.

The **Dow Jones Industrial Average** roamed in and out of the green throughout the day before closing up 9.44 points, or 0.1%, to 12,289.76.

The index enjoyed particularly strong support from **Coca-Cola**, which was upped to buy from hold at Deutsche Bank, and financial components **Citigroup**, **JPMorgan Chase** and **AIG**.

Broader indices, meanwhile, returned to negative territory following a bit of short-lived strength earlier, though both closed off their lows for the day. The **S&P 500** surrendered 3.32 points, or 0.2%, to 1358.44, and the **Nasdaq Composite** lost 10.52 points, or 0.4%, to 2448.94.

crude oil earlier soared to a new high shy of the \$138 mark, but reversed to slide \$3.04 at \$131.31 a barrel after news broke that Saudi Arabia's oil output was boosted by nearly 500,000 barrels a day this quarter at 9.54 million. The network cited sources in the Saudi Oil Ministry.

Still, gas prices at the pump hit another record high, jumping 2 cents from yesterday to \$4.043 a gallon, according to AAA. That's nearly a dollar higher than last year.

Rising oil prices were among the main factors driving up April's **U.S. trade deficit**, or the amount by which imports outweighed exports, to \$60.9 billion. Analysts were looking for minus \$60 billion, and that compares with March's upwardly revised figure of negative \$56.5 billion

However, on sabre rattling by Fed governors, the **U.S. dollar** jumped by more than a percent against the euro, the yen, and the pound, and barreled 1.6% higher against the Swiss franc.

Gold futures slid \$23.50 to \$871.20 an ounce. On the U.S. corporate front, chipmaker **Texas**.

Instruments narrowed its second-quarter outlook, partially citing weak demand for handheld devices. Shares fell 2.9%.

Elsewhere, both Citigroup and Lehman Brothers bumped up their **Apple** price targets a day after the company released its 3G-enabled iPhone, after which the stock added 2.2%.

Separately, shares of **Lehman Brothers** tumbled 6.7% after Wachovia downgraded the stock to market perform from outperform.
