SENSEX DAILY CHART

Source: Advanced Get

Outlook for the day

Markets opened with a downward gap on the back of the weak global cues but sharp recovery was witnessed which pulled the indices to the days high. However, selling pressure at higher levels drag the indices to close at lower levels. The coming trading session is expected to trade with negative bias. Below, 13543 / 4118 levels, indices may slip further up to 13400 - 13190 / 4050 - 3990 levels where at such levels a bounce back cannot be ruled out. On the upside, 13980 - 14098 / 4224 - 4300 levels may act as resistance for the day.
