Coal India (COAL.BO)

Alert: Mgmt Meeting Takeaways – Still Going Strong

- **Citi hosts Coal India (CIL)** — We hosted CIL’s senior management today. Below we highlight key takeaways.
- **Impact of the Draft Mining Bill** — According to the Draft Mining Bill, 26% of coal mining profits should be shared with the local population. If the bill is passed in its current form, CIL estimates ~10-11% impact on profits assuming 1) purely mining profits; 2) tax benefits; 3) set-off against existing social spend. CIL believes profit-sharing would benefit them as it should expedite the land acquisition process.
- **More rakes in 2HFY12** — CIL requires 175 rakes/day in FY12 to be able to despatch 452mt of coal (+6.5% yoy); 190 rakes/day to achieve 473mt (+11.4%). Rake availability has been 168/day in 1QFY12 (+9% yoy). CIL expects higher availability in 2HFY12 and despatch at least 452mt during the year. It has liquidated 14.5mt of inventory (out of 69mt) during April-July11 (production growth 1.6% yoy, despatches 5.5%).
- **Coal price revision** — CIL’s wage revision was due in Jul11. Despite the delay, CIL will have to make a provision with effect from 1Jul11. CIL mentioned the price increase in Feb11 was in anticipation of the wage hike. The company will examine margins at the end of the year and may consider a price review so as to maintain margins.
- **E-auction diversion unlikely** — E-auction coal currently accounts for 11-12% of CIL’s volumes (~50mt) and the realisation is ~80% higher than notified price of raw coal. CIL believes e-auction sales are unlikely to be diverted to the power sector as 1) it meets requirements of non-linkage consumers; 2) 80% of e-auction volumes are transported by road over short distances and can’t feasibly be diverted to the power sector as rail capacity is inadequate.
- **CIL meeting its FSA commitments** — Despite production and evacuation constraints, CIL has been able to supply 93% of the quantity committed under the Fuel Supply Agreements (FSAs) to the power sector and ~83-84% to the non-power sector. The penalty clause for the power sector is triggered at 90% and for non-power at 60%.
- **Coal washeries: long-term plan** — CIL expects to set up 20 washeries (111mtpa) over the next 5-6 years (3 tenders awarded), another 165mtpa in 8-9 years and gradually enhance the proportion of washed coal to ~50% (from 4-5% currently).
- **Auctioning of coal blocks** — An amendment to the Mines and Minerals (Development and Regulation) Amendment Bill, 2010 has paved the way for auctioning of coal blocks for captive use through competitive bidding (guidelines under discussion). However, the process is not applicable to CIL which will be given coal blocks without having to participate in the auction process.

Coal India

Valuation

Our target price incorporates a 30% wage hike in FY12 and 2% raw coal price hike in FY13. We believe the proposed 26% profit sharing burden is likely to be lower but unlikely to be zero. Hence our TP is derived using the average of two scenarios: #1 assumes no profit sharing – derived price Rs488; #2 assumes 26% profit sharing, derived price Rs372. CIL does not have a long valuation history since it listed only in November 2010. We arrive at our target price of Rs430 using: (1) a valuation based on DCF + 30% premium (Rs552) and (2) 11x Sep12 PE based valuation (Rs247), with a 60/40 weighting. The 11x PE multiple that we use is at the upper end of the PE band for the Indonesian and Chinese producers, which are currently trading in a PE band of 8-12x.

Risks

We rate Coal India shares Low Risk based on our quantitative risk rating system. We believe CIL's stable margins, mine life visibility, limited risk of coal price downside, low costs and net cash position warrant a Low Risk rating. Downside risks that could prevent the shares from reaching our target price include, but are not limited to: risks of restrictions imposed by regulators related to forest clearance and environmental safeguards; difficulties in obtaining reserves/resources; a proposed 26% profit-sharing requirement contained in the New Mining Bill; land acquisition; ban on e-auction coal; logistical constraints including rail transport bottlenecks; restricted ability to raise coal prices; higher wages than anticipated; disruption of operations in politically unstable areas; auction for future reserves; and non-availability of critical equipment.

Guide to Citi Investment Research & Analysis (CIRA) Fundamental Research Investment Ratings:

CIRA's stock recommendations include a risk rating and an investment rating.

Risk ratings, which take into account both price volatility and fundamental criteria, are: Low (L), Medium (M), High (H), and Speculative (S).

Investment ratings are a function of CIRA's expectation of total return (forecast price appreciation and dividend yield within the next 12 months) and risk rating.

Analysts may place covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and/or trading in the company's securities (e.g. trading suspension). Stocks placed "Under Review" will be monitored daily by management. As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis.

To satisfy regulatory requirements, we correspond Under Review to Hold in our ratings distribution table for our 12-month fundamental rating system. However, we reiterate that we do not consider Under Review to be a recommendation.

Relative three-month ratings: CIRA may also assign a three-month relative call (or rating) to a stock to highlight expected out-performance (most preferred) or under-performance (least preferred) versus the analyst's coverage universe over a 3 month period. The relative call may highlight a specific near-term catalyst or event impacting the company or the market that is anticipated to have a short-term price impact on the equity securities of the company. Absent any specific catalyst the analyst(s) will indicate the most and least preferred stocks in his coverage universe, explaining the basis for this short-term view. This three-month view may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of NASD/NYSE ratings-distribution-disclosure rules, most preferred calls correspond to a buy recommendation and least preferred calls correspond to a sell recommendation. Any stock not assigned to a most preferred or least preferred call is considered non-relative-rated (NRR). For purposes of NASD/NYSE ratings-distribution-disclosure rules we correspond NRR to Hold in our ratings distribution table for our 3-month relative rating system. However, we reiterate that we do not consider NRR to be a recommendation.

For securities in emerging markets (Asia Pacific, Emerging Europe/Middle East/Africa, and Latin America), investment ratings are: Buy (1) (expected total return of 15% or more for Low-Risk stocks, 20% or more for Medium-Risk stocks, 30% or more for High-Risk stocks, and 40% or more for Speculative stocks); Hold (2) (5%-15% for Low-Risk stocks, 10%-20% for Medium-Risk stocks, 15%-30% for High-Risk stocks, and 20%-40% for Speculative stocks); and Sell (3) (5% or less for Low-Risk stocks, 10% or less for Medium-Risk stocks, 15% or less for High-Risk stocks, and 20% or less for Speculative stocks).

Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At other times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.
