## News Roundup

## Corporate

- Private equity giant TPG Capital is among several suitors who have lined up to invest over US $\$ 400 \mathrm{mn}$ for asubstantial stake in Kingfisher Airlines. (ET)
- In an effort to bail out the bleeding airline, Jet Airways plans to raise capital through a stake sale of up to $10 \%$. (BL)
- Mahindra Holidays and Resorts (MHR) has announced two acquisitions: Taj Garden Retreat Resort at Thekkady in Kerala and a heritage property at Ooty in Tamil Nadu. Financial details have not been disclosed. (ET)
- Infosys Technologies appears to have decided to forego its right to make a counter-offer for the UK-based SAP consulting firm Axon within 60 hours of the bid made by HCL Technologies. The latter had made a counter offer of GBP441 mn to acquire Axon (around 8\% higher than Infosys' August bid). (FE)

## Economic and political

- US stocks plunged and the S\&Ps 500 Index tumbled $7.2 \%$ to 1,125.99, the most since 1987, after the House of Representatives voted down a US $\$ 700$ bn plan to rescue the financial system. (BS)
- India and the European Union agreed to conclude a broad-based trade and investment agreement by 2009 and double their trade turnover to Euro100 bn in the next five years. (BS)

## Current account deficit set to widen amidst pressure on rupee

Mridul Saggar : mridul.saggar@kotak.com, +91-22-6634-1245

- CAD/GDP ratio likely to widen to $4.5 \%$ for 1QFY09
- Trade deficit may exceed $\mathbf{1 0 . 0 \%}$ of GDP in 1Q as oil imports surge $\mathbf{6 6 \%}$ yoy
- We expect capital flows to moderate $22 \%$ yoy in 1Q on account of FII outflows, lower ECB and neutral banking capital flows
- BOP more or less in balance with reserve accretion of about US\$1.0 bn

1QFY09 balance of payment (BOP) estimates set to be released by RBI today (September 30) evening are likely to see a considerable widening of trade and current account deficit (CAD). Our estimates suggest that trade deficit may be in the vicinity of US $\$ 32$ bn, more than 10\% of GDP in the 1QFY09. CAD may turn out to be around US $\$ 13$ bn ( $4.5 \%$ of GDP). These wide gaps still appear sustainable. In our calculation, with total capital account flows of US\$13-14 bn, the overall BOP balance may be only marginally positive (see Exhibit 1). We expect BOP to come under greater strain in 2QFY09 with some loss in reserves, but still withstand the external shock in FY2009.

## Oil price shock to drill a gapping hole in merchandise trade deficit

The oil import bill mounted in 1QFY09 by $66 \%$ yoy, on back of a $80 \%$ surge in average oil price for the Indian basket of crude. Though we estimate exports to grow at an impressive $34 \%$ yoy in 1Q and non-oil imports to grow $20 \%$, the merchandise trade deficit may be in the vicinity of US\$32 bn and exceed $10 \%$ of the GDP.

## Resilience to come from invisibles

We expect invisibles to continue providing resilience to BOP, offsetting a substantial part of the wide merchandise trade deficit. We do not see any significant dent in software exports or private remittances in this quarter.

## Total capital account flows to moderate significantly

Total capital account flows may moderate to below US\$15 bn in 1QFY09 from US\$25 bn in 4QFY08 and US\$17 bn in 1QFY08. In FY2008, India received total capital account flows of US\$108 bn. There are indications that:

- FDI inflows may hot a new high of about US\$8.0 bn in 1QFY09

However, moderation may come through

- FIl net outflows of 5.2 bn in 1 Q on top of US $\$ 3.9$ bn of outflows in 4QFY08
- Banking capital may show a marginal outflow of less than US\$1.0 bn in contrast with strong inflows of US $\$ 5.8$ bn in 4QFY08
- Lower ECB net inflows of about US\$3.0 bn (US\$7.0 bn in 1QFY08; U\$4.8 bn in 4QFY08)

## We expect overall BOP to be in balance

We expect overall BOP in 1QFY09 to be more or less in balance with perhaps a small surplus of about US $\$ 1.0$ bn

## Rupee to remain in pressure in the near term

The rupee exchange rate versus the US dollar (INR/USD) could remain under pressure in the near term in view of the 1QFY09 data which is expected to show a significant widening of trade and current account gaps. INR/USD hit a new low since mid-July 2006 of 46.96 at close of September 29, 2008 (see Exhibit 2). The rupee is likely to remain under pressure till either the US dollar starts weakening against global currencies in a big way or strong capital flows into India resume.

## GSPL: Use recent correction on concerns of profit-sharing as buying opportunity

Sanjeev Prasad : sanjeev.prasad@kotak.com, +91-22-6634-1229
Gundeep Singh: gundeep.singh@kotak.com, +91-22-6634-1286

- Reiterate positive view given favorable risk-reward balance; potential upside (41\%) from current levels
- Concerns on profit sharing with Gujarat government and inimical regulations may be overdone
- Upgraded to BUY (from ADD) with 12-month DCF-based fair valuation of Rs65 (Rs69 previously)

We reiterate our positive view on GSPL and would that recommend investors use the recent correction in the stock price as a buying opportunity. GSPL stock has declined by $26 \%$ over the past one month on concerns of (1) likely sharing of $30 \%$ of pre-tax profits with Gujarat government for socio-economic development, (2) delay in production of gas from RIL's KG D-6 block and (3) likely negative impact of impending regulations. However, we believe that risks arising from the above-mentioned concerns are largely overdone and factored in our estimates and the current stock price. Even if we assume that the Gujarat government takes away $30 \%$ of PBT of GSPL in perpetuity, our DCF value would decline to Rs46 (the CMP coincidentally) from Rs65. Key downside risk stems from lower-than-expected gas supply.

Attractive risk-reward balance. We believe GSPL stock offers a good entry opportunity after its recent steep correction. GSPL stock has declined by $26 \%$ over the past one month and now offers $41 \%$ potential upside to our 12-month DCF-based target price of Rs65. At 1.6X P/B (FY20010E book) and 10.9X FY2010E EPS, GSPL's valuations appear reasonable given the nature of its accounting (high upfront depreciation of pipelines). We focus on cash flow valuation parameters (P/CEPS or DCF) and find the valuations attractive with the stock currently trading at 1.2 X FY2009E GCI (EV/GCI) and 1X FY2010E GCI.

Addressing some key concerns- $26 \%$ correction in the past one month reflects key concerns and more

Profit sharing with the Gujarat government—stock has corrected to reflect 'lost' profits in perpetuity. We believe that GSPL's current stock price is already discounting this eventuality. Our DCF value would decline to Rs46 if we assume that the Gujarat government takes away $30 \%$ of PBT of GSPL in perpetuity. We note that the issue of sharing profits with the government has not been included in the agenda of the annual general meeting of shareholders as against certain other Gujarat government-owned companies.

We note that GSPL is not directly owned by the Gujarat government but by a government-owned company (GSPC). However, this need not preclude GSPL from the ambit of the profit-sharing proposal of the government. We highlight that shareholders of Gujarat Mineral Development Corporation (GMDC) have decided to file a case against the Gujarat government's decision to take away $30 \%$ of PBT GMDC for socioeconomic development.

Delay in gas from RIL's KG D-6 block-not material for DCF valuation. We see a modest impact on FY2009E earnings but do not see this as material in the context of GSPL's DCF-based fair value. We doubt that GSPL would invoke the take-or-pay agreement with RIL for its supply of gas from KG D-6 block for a delay of 1-2 months; the take-or-pay agreement becomes operational from November 2008. We factor supply of gas from RIL KG D-6 from 4QFY09 in our earnings model. RIL management has stated that gas production from KG D-6 block (D1 and D3 discoveries) will commence from 1QCY09, which would suggest a delay of 1-2 months versus previous disclosures. However, we do not rule out further delay in the supply of RIL's gas to GSPL.

Imminent regulations. We see limited downside risks to our earnings estimates from imminent regulations. We expect $14 \%$ post-tax ROCE on capital employed (gross block less accumulated depreciation plus normative working capital) for gas transmission as has been fixed by the regulator for city gas distribution business. We see no downside risks to our earnings estimate for GSPL if the regulator allows 14\% post-tax ROCE or $21.21 \%$ pre-tax ROCE. On a capital employed base of Rs30.5 bn for FY2009E (gross block plus working capital), we compute, GSPL's EBIT at Rs6.5 bn, which is significantly higher than our FY2009E and FY2010E EBIT of Rs2.9 bn and Rs4.8 bn. Even if the capital employed used by the regulator factors in reasonable depreciation (GSPL has an aggressive depreciation policy with a rate of $8.33 \%$ ), we compute that 'allowed' EBIT will likely be higher versus our estimates.

## Earnings revision

We have revised FY2009E, FY2010E and FY2011E EPS to Rs3, Rs4.2 and Rs5.1 from Rs3.6, Rs5.1 and Rs6.3 previously to reflect (1) delay in supply from RIL's gas, which impacts FY2009E EPS, (2) higher volumes and corresponding capital expenditure on expansion of pipeline network for subsequent years and (3) information in FY2008 annual report. We expect gas transmission volumes for FY2009E-12E to scale up to $24.8 \mathrm{mcm} / \mathrm{d}, 47.1 \mathrm{mcm} / \mathrm{d}, 62.6 \mathrm{mcm} / \mathrm{d}$ and $75.6 \mathrm{mcm} / \mathrm{d}$ versus $16.8 \mathrm{mcm} / \mathrm{d}$ in FY2008.

## ICICI Bank: Valuations based on long-term RoE and dividend projections do not warrant downside, retain ADD

Ramnath Venkateswaran : ramnath.venkateswaran@kotak.com, +91-22-6634-1240
Nischint Chawathe : nischint.chawathe@kotak.com, +91-22-6749-3588

- Significant correction in ICICI Bank stock likely on the back of developments in international financial markets
- Street assuming very low long-term profitability and growth, unwarranted in our view
- Retain ADD rating with price target of Rs650

ICICI Bank stock has corrected sharply by $13 \%$ yesterday and $23 \%$ over the past week on likely concerns of its exposure to the international banks and high NPLs in its domestic retail book. It is difficult to estimate the precise quantum of losses for ICICl Bank from the international financial markets given the nature of inter-linkages amongst various institutions and the fast unfolding developments. We believe that the market is assuming rather low levels of normalized profits in perpetuity even if the company writes off (1) most of the investments in international financial markets (US $\$ 2.5$ bn out of US $\$ 4.6 \mathrm{bn}$ ) and (2) $50 \%$ of current net NPLs (incl. restructured assets) and Rs25 bn of likely additional NPLs in remainder of FY2009E. The financial impact in more normal times would have been market-to-market (MTM) and NPL provisions rather than write down these assets. While we believe that there may be near-term pressure on stock price, valuation of the company based on long-term projections of RoE and growth in dividends do not warrant a downside. Our stress case analysis of the company's valuations suggests that the market is assuming RoE of around $9.7 \%$ in perpetuity for the standalone banking business (for a cost of equity of $14 \%$ ) while assuming no growth in dividends. We retain our ADD rating with a target price of Rs650.

Our base-case valuation of ICICI Bank is conservative. In our base case, we have assumed that ICICI Bank would have to take a hit of US $\$ 2.5$ bn on the investments in the international markets and that there would be no value accruing to the parent company on account of investments in the international banking subsidiaries (UK and Canada subsidiaries). Further, we have also assumed that the company will write down, (1) $50 \%$ of incremental NPLs of Rs 25 bn, i.e. Rs 12.5 bn (retail gross NPL book was Rs63 bn as of June 2008), (2) $50 \%$ of Rs 88 bn of net NPLs and restructured assets as of June 2008 against its networth in the current year, without changing the credit provision assumptions for the future years. We find that the current stock price of ICICl Bank is below the value of the company derived after these adjustments.

Details on the investments by ICICI Bank's UK subsidiary. ICICI Bank's UK subsidiary has US\$4.6 bn of non-India investments as per the company's press release. This includes:

- US\$1.1 bn of investments are in the inter-bank and commercial deposit market and none of these is to American banks
- Profile of the remainder - US\$3.5 bn
- 98\% of investments are in investment grade (by S\&P, Moody's and Fitch)
- There are no exposures to credit derivatives, i.e. CDO/CLN in this book
- Exposure to US financial sector is $18 \%$
- Capital adequacy of the UK subsidiary is $17.4 \%$ as of June 2008

Assuming that the investment book of US\$3.5 bn (excluding US\$1.1 bn of investments in inter-bank and commercial deposit market) has a duration of 3-3.5 years and the yields on these securities widen by 100-150 bps compared to June 2008, MTM losses will likely range between US\$100-200 mn on this book in 2QFY09.

The market is currently factoring low profitability and high of cost of equity in perpetuity. ICICI Bank's current stock price implies a normalized RoE of 9.7\%, assuming a cost of equity (CoE) of $14 \%$ and nil growth in dividends. The sensitivity of normalized RoE to varying levels of dividend growth is shown in Exhibit 4 based on Gordon Growth model. The market also appears to be assuming a $17 \%$ of cost of equity against our current estimate of $14 \%$, implying high levels of risk aversion in perpetuity, which is not justified, in our view.

- Valuations look more reasonable now; 16.1X FY2010E standalone EPS
- Ad revenue visibility in radio improves post ad rate hikes across the industry
- Upgrade rating to ADD; DCF-based 12-month TP of Rs245 (Rs260 previously)

We upgrade the Sun TV stock to ADD rating (from REDUCE), noting significant underperformance versus the BSE-30 Index over the past three ( $-25 \%$ ) and six ( $-11 \%$ ) months. We do not believe Sun has overcome all issues on broadcasting (competition) and distribution (political uncertainty) but we have assumed moderate and belowmarket $14 \%$ and $19 \%$ ad and subscription revenue CAGR (FY2008-FY2011E). We highlight (1) Sun's leadership position in key South Indian broadcasting markets and the launch of niche channels to support the existing bouquet, (2) impressive traction in subscriber addition volume for its sister DTH concern, Sun Direct, as well as Dish TV and (3) improved visibility in its radio business post ad rate hikes across the industry as key positives. We have revised our 12-month DCF-based TP to Rs245 (Rs260 previously) and reduced our FY2009E and FY2010E earnings estimates to Rs9.5 (Rs9.7 previously) and Rs11.6 (Rs12) on moderate changes to our ad revenue estimates. Key risks include stronger-than-expectation competition and political uncertainty.

Reward-risk balance in favor after steep correction. Sun TV's stock price has declined significantly from its peak in January $2008(-56 \%)$ and has underperformed the local index (BSE-30 Index) in the past three ( $-25 \%$ ) and six ( $-11 \%$ ) months, largely due to weaker-than-expected 1QFY09 results that disappointed with a $33 \%$ qoq decline in domestic pay-TV revenues due to (1) likely impact of start of competing cable TV services-Arasu Cable, an MSO started by the Tamil Nadu government, and Royal Cable and (2) the start of Sun Direct (the group's DTH operations) and aggressive pricing tactics that may have upset cable operators, who have been hitherto loyal affiliates of Sun Group's MSO company, SCV; these LCOs reduced payments to Sun TV.

We do not believe that concerns over competition (and its impact on Sun's ad revenues) and Sun's domestic cable subscription revenues have disappeared; however, a number of cable operators have lately restarted payments for its popular bouquet of channels. However, we do believe several factors uniquely position the company to benefit from strong double-digit ad revenue growth in regional TV and radio broadcasting markets and increasing addressability in the Indian C\&S segment-
(1) continued leadership of Sun channels in key markets, to be further reinforced by upcoming launch of niche channels (kids) and exclusive content agreement with Balaji Telefilms, (2) renewed traction in DTH subscriber additions (Sun Direct and Dish TV) and (3) improved visibility in the radio business post ad rate hikes across the industry.

Continued leadership of Sun's channels in South India. We note that Sun TV has maintained its leadership position in key South Indian markets despite strong competition from new and existing broadcasters (see Exhibit 1-4). We note that Sun TV and KTV retain the number one and two positions in the lucrative Rs6.5 bn Tamil ad revenue market. Sun TV channels also dominate the Rs 4.5 bn Telugu and Rs2.5 bn Kannada ad revenue market, largely on the basis of a very strong content slate as it does not enjoy the benefits of a strong distribution network such as sister company SCV in the Tamil market. Sun also plans to launch niche channels (kids) to complement its strong bouquet of general entertainment (GE) and films in all its markets, which will enable it to better monetize its existing network.

Increasing addressability in Indian C\&S segment. We highlight the strong ramp-up in DTH subscriber additions in the South Indian market with (1) over 1.3 mn subscribers added by Sun TV in the first nine months of its operation, (2) Dish TV quarterly run-rate increasing to about 0.5 mn subscribers with $25 \%$ coming on South India regional language packages versus 15\% previously and (3) launch of Big TV DTH service, with region-specific South India packages, in August 2008. We expect strong growth in DTH subscriber base in India (see Exhibit 5) driven by the demand for niche, premium (including regional) content. Moreover, the digitalization policy of the Indian government may provide further upside to Sun's domestic subscription revenues.

Radio-looks promising given industry ad rate hike, improving utilization levels. Three large metro-based radio networks—Radio Mirchi (ENIL), Radio One and Red FM—have recently announced ad rate hikes of about 15-20\% in their respective key markets. The ad rate hikes are driven by (1) improving inventory utilization levels and (2) ad rate increases in print media, which competes with radio for local ad revenues. We note that Sun TV owns a 49\% stake in Red FM, which has three radio stations in the metro markets of Delhi, Mumbai and Kolkata that are performing well (see Exhibit 6). Sun TV has been a laggard as regards its own radio station rollout (South-Asia FM and Kal Radio) but it has now completed the launch of all its stations. We expect Sun's radio business to report losses of Rs631 mn in FY2009E on account of the delayed launches, but achieve breakeven by FY2010E.

We see radio's presence increasing in media planning of large metro-oriented advertisers following the rollout of Radio Audience Measurement (RAM) system. This has helped advertisers measure the efficacy of their radio campaigns. The sharp increase in the number of FM radio players had previously led to a deluge of ad inventory into the market, which resulted in existing players being unable to increase ad rates for a very long period of time.

Moderate revisions to earnings estimates; valuations look promising now. We have revised our FY2009E and FY2010E Sun TV earnings estimates to Rs9.5 (Rs9.7 previously) and Rs11.6 (Rs12) on (1) modest reduction in Sun's FY2009E and FY2010E ad revenues to Rs6.2 bn (Rs6.3 bn previously) and Rs7.7 bn (Rs7.8 bn) and (2) modest increase in FY2009E and FY2010E employee costs to Rs1.21 bn (Rs1.16 bn previously) and Rs1.44 bn (Rs1.39 bn), largely due to intensifying competition in the South Indian broadcasting market. The stock looks fairly valued at 20.4X FY2009E and 16.7X FY2010E consolidated EPS estimates. We note that consolidated valuations are exaggerated by radio business losses; Sun TV is valued at 17.7X FY2009E and 16.1X FY2010E standalone EPS estimates.

Kotak Institutional Equities Research coverage universe
Distribution of ratings/investment banking relationships

Percentage of companies covered by Kotak Institutional Equities, within the specified category.

Percentage of companies within each category for which Kotak Institutional Equities and or its affiliates has provided investment banking services within the previous 12 months.

* The above categories are defined as follows: Buy = OP; Hold $=\mathrm{IL}$; Sell $=\mathrm{U}$. Buy, Hold and Sell are not defined Kotak Institutional Equities ratings and should not be constructed as investment opinions. Rather, these ratings are used illustratively to comply with applicable regulations. As of 30/06/2008 Kotak Institutional Equities Investment Research had investment ratings on 143 equity securities.

## Ratings and other definitions/identifiers

Rating system
Definitions of ratings
BUY. We expect this stock to outperform the BSE Sensex by $10 \%$ over the next 12 months.
ADD. We expect this stock to outperform the BSE Sensex by $0-10 \%$ over the next 12 months.
REDUCE: We expect this stock to underperform the BSE Sensex by $0-10 \%$ over the next 12 months.
SELL: We expect this stock to underperform the BSE Sensexby more than $10 \%$ over the next 12 months.

Our target price are also on 12-month horizon basis.
Other definitions
Coverage view. The coverage view represents each analyst's overall fundamental outlook on the Sector. The coverage view will consist of one of the following designations: Attractive (A), Neutral (N), Cautious (C).

Other ratings/identifiers
NR = Not Rated. The investment rating and target price, if any, have been suspended temporarily. Such suspension is in compliance with applicable regulation(s) and/or Kotak Securities policies in circumstances when Kotak Securities or its affiliates is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.
CS = Coverage Suspended. Kotak Securities has suspended coverage of this company.
NC = Not Covered. Kotak Securities does not cover this company.
$\mathbf{R S}=$ Rating Suspended. Kotak Securities Research has suspended the investment rating and price target, if any, for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon.
NA = Not Available or Not Applicable. The information is not available for display or is not applicable.
NM = Not Meaningful. The information is not meaningful and is therefore excluded.

Kotak Securities Limited and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group. We along with our affiliates are leading underwriter of securities and participants in virtually all securities trading markets in India. We and our affiliates have investment banking and other business relationships with a significant percentage of the companies covered by our Investment Research Department. Our research professionals provide important input into our investment banking and other business selection processes. Investors should assume that Kotak Securities Limited and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may participate in the solicitation of such business. Our research professionals are paid in part based on the profitability of Kotak Securities Limited, which include earnings from investment banking and other business. Kotak Securities Limited generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, Kotak Securities Limited generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of interest. Additionally, other important information regarding our relationships with the company or companies that are the subject of this material is provided herein.

This material should not be construed as an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. We are not soliciting any action based on this material. It is for the general information of clients of Kotak Securities Limited. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, clients should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur. Kotak Securities Limited does not provide tax advise to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment.
Certain transactions -including those involving futures, options, and other derivatives as well as non-investment-grade securities - give rise to substantial risk and are not suitable for all investors. The material is based on information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are our current opinions as of the date appearing on this material only. We endeavor to update on a reasonable basis the information discussed in this material but regulatory, compliance, or other reasons may prevent us from doing so. We and our affiliates, officers, directors, and employees, including persons involved in the preparation or issuance of this material, may from time to time have "long" or "short" positions in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. For the purpose of calculating whether Kotak Securities Limited and its affiliates holds beneficially owns or controls, including the right to vote for directors, $1 \%$ of more of the equity shares of the subject issuer of a research report, the holdings does not include accounts managed by Kotak Mahindra Mutual Fund.Kotak Securities Limited and its non US affiliates may, to the extent permissible under applicable laws, have acted on or used this research to the extent that it relates to non US issuers, prior to or immediately following its publication. Foreign currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies affectively assume currency risk. In addition options involve risks and are not suitable for all investors. Please ensure that you have read and understood the current derivatives risk disclosure document before entering into any derivative transactions.
