Updates

Sun Pharmaceuticals: Acquires Taro at 11X CY2005 EBITDA

News Roundup

Corporate

- In its third acquisition of an overseas company, Sun Pharmaceuticals, India's most valuable drug maker, is buying Israel's Taro Pharmaceutical Industries for US\$ 454 mn in an all-cash deal. The two companies today signed a definitive agreement to this effect. (BS)
- Reliance Industries is on the prowl again, this time for a rig operating company that will help it bring out oil and gas from its oilfields. The acquisition may turn out to be an expensive proposition given the current market dynamics where demand far outstrips supply. (ET)
- The Vietnam government gave the go-ahead to Vietnam Steel Corporation to work with Tata Steel to set up a US\$ 3.5 bn steel complex in the country's central region.
 Essar Steel along with South Korea's Posco and China's Bao Steel was also vying for the project. (ET)

Economic and political

- The Revised foreign direct investment (FDI) norms that could impact several crucial sectors like telecom, real estate, banking and retail may finally be out by July.
 Commerce minister said that a host of pending issues like direct and indirect holdings and beneficial ownership would be addressed in the revised guidelines (ET)
- Despite the tempering effect of an appreciating rupee, the Indian basket of crude oil touched its highest level this fiscal year — US\$ 67.40 a barrel — on May 18, a steep rise of 74 cents over the previous day's US\$ 66.76 per barrel. (BS)

Jindal Steel & Power: Sales, EBITDA growth marginally lower than expectations, Maintain Outperform

Aman Batra: aman.batra@kotak.com, +91-22-6634-1231 Abhijeet Naik: abhijeet.naik@kotak.com, +91-22-6634-1220

- 4Q net profit at Rs2.0 bn grew 35% yoy, lower than our estimate of Rs2.4 bn
- Maintain OP with a revised target price of Rs2,975

Jindal Steel & Power (JSPL) reported 4Q net profit at Rs2.0 bn (35% yoy growth) and 15% lower than our estimate of Rs2.4 bn. Lower-than-expected sales growth of 62% yoy (we expected 78% growth), additional cess levied on electricity sales levied for the full year during 4Q and marginally higher-than-expected operating cost accounted for much of the variation vis-'-vis our estimates. EBITDA margins for 4QFY07 at 37.2% (we estimated 38.7%) fell by 270 bps yoy and 20 bps qoq. Our consolidated EPS estimates for JSPL for FY08 remains unchanged at Rs317.2. Our revised consolidated EPS for FY09 at Rs430.2 (Rs445.4 previously) reflects higher interest costs for Jindal Power Limited. We have revised our SOTP-based target price to Rs2,975/share (Rs2,660 previously). We use 1.4X FY09 P/ ABVPS (1.5X FY08 P/ABVPS) for valuation of steel business. We have also adjusted the valuation of Jindal Power Limited for a higher interest rate environment (affecting both interest costs and cost of equity). Though our target price is below the current stock price, we maintain our Outperform rating on JSPL noting two potential triggers'(1) tie-up of merchant sale of power at higher rates and (2) change in debt: equity structure of Jindal Power Limited.

Steel business benefiting from improved realizations. JSPL's finished steel sales in 4Q grew 64% yoy on the back of higher production in its expanded capacity and improved steel prices. Sponge iron sales declined 17% yoy as the company is now using a greater proportion of its sponge iron production for internal production of steel. Sale of surplus power also declined 10% yoy in 4Q.

4Q operating performance continued to be robust with EBITDA margins at 37.2% declining 20 bps qoq. The segmental EBIT of power business during 4QFY07 is impacted by additional cess (of Rs0.02/unit) levied on external sale of electricity charged for the full year during this quarter. 4Q profits were also boosted by lower than expected interest costs and higher other income of Rs201 mn.

Our revised SOTP target price for JSPL now stands at Rs2,975/share. We value the steel business at Rs1,600 (Rs1,270 previously) at 1.4X FY09 P/ABVPS equivalent to 5X FY09 P/E and 5.3X FY09 EV/EBITDA. Our valuation of power business comprises Rs1,244 for Jindal Power Ltd based on DCF-to-equity methodology and Rs127/share as 50% of the potential value enhancement from surplus cash generated by power business. Our valuation of the 1,000 MW power project (first unit to likely commission by September 2007) now factors in a higher interest rate regime. We use (1) cost of debt at 10.5% compared to Rs8.5% previously and (2) higher cost of equity at 11% (10% previously).

Maintain Outperform rating noting potential upside triggers. (1) Higher tariffs for merchant sale of power. We note that 650 MW of power sale is yet to be tied up and could likely fetch a higher realization as compared to our estimate of Rs2.25/unit. We note that JSPL is currently selling power to the industrial units in the industrial estate. Jindal Power Limited will sell 350 MW to JSPL (for onward sale to industrial units at Rs2.5/unit. (2) Financial re-structuring of Jindal Power Limited could result in higher value enhancement for invested equity. JSPL has so far invested Rs6.5 bn out of the Rs12 bn equity investment required for completion of the 1,000 MW power project. JSPL will likely use subordinate debt to fund the balance equity requirement for completion of the power project, leaving surplus cash in JSPL for value accretive projects.

Kalpataru Power Transmission: 4QFY07 result update: Margins surprise positively; we raise estimates and target price

Jigar Mistry: jigar.mistry@kotak.com, +91-22-6749-3571

- 4QFY07 reported EBITDA margin of 18.1% is highest in KPT's history; and higher than competing companies in India. We expect margins to sober down going forward.
- Over 100% growth in net earnings FY2007 was driven by 80% growth in revenues and 270bps expansion in operating margins.
- KPT acquired 65% equity stake in Shubham Logistics'to focus on agriculture warehouses in phase 1 and 3rd party logistics in phase 2 at estimated investments of Rs500mn. We await concrete plans for deployment of US\$75 mn raised through QIP last year.
- We raise FY2008E and FY2009E earnings by 30% each following higher than
 expected margins and execution. Also raise TP to Rs1,495 from Rs1,150 earlier.

Kalpataru Power Transmission (KPT), in its 4QFY07 results, reported a PAT of Rs644 mn, up 112% yoy. OPM at 18.1% was higher by 430 bps, whereas revenues grew 45%. KPT ended the year with net earnings of Rs1.6 bn, up 102%. We expect 25% CAGR in net earnings over the next two years as strong growth in order-flows will likely more than offset the lower margin expectations. We raise our estimate of net earnings for FY2008E and FY2009E by approximately 30% each. We raise our SOTP-based target price to Rs1,495 per share and maintain Outperform rating on the stock.

4QFY07 OPMs at 18.1% positively surprised us. We expect OPMs to sober down over the next few years. For a tender-based, non-monopolistic contracting business, these margins are way too high and not sustainable over prolonged period of time. Although there are only a few pre-qualified domestic EPC contractors for transmission lines, we believe tender-based bidding and presence of enough competition will ensure margins trending to long-term sustainable levels of 12-15%. For the next two years, we model lower margins by 40bps.

Order-backlog of Rs23 bn is higher than Rs18 bn last year, which is commendable given an 81% growth in revenues for FY2007. We expect KPT to secure more orders from Powergrid Corporation in the domestic markets and expand its presence in the international front. We note the difference in reporting of order-backlog position. Whereas KPT and Jyoti Structures report order-backlog that includes L1 positions (orders where the company's bid is the lowest), KEC reports only confirmed orders as backlog.

KPT acquires 65% equity of Shubham Logistics for an undisclosed sum. We understand from the management that the sum paid is not material, but KPT will eventually invest close to Rs500 mn for developing its presence in the logistics management space. In the first phase, the company plans to build Agriculture warehouses and later move on to 3rd party logistics management in the second phase. KPT has raised US\$75 mn through QIP last year, which reside in short-term investments as of now. We await concrete plans from management on utilization of the amount raised.

We raise FY2008E and FY2009E earnings estimates by 30% each. Following higher-than-expected revenues and margins in FY2007, we raise our FY2008E and FY2009E revenue growth and margins expectations.

We raise our SOTP-based target price to Rs1,495 from Rs1,150 earlier. Our SOTP-based target price comprise of Rs1,358 in standalone business of KPT, Rs89 as stake in JMC projects and Rs49 in cash. The raise is partly owing to rolling target price forward to FY2009 estimates and partly owing to increased earning expectations. We have valued KPT's standalone business at 25% discount to target multiples of Kotak Institutional Equities' Electrical Equipment coverage universe. This implies a target multiple of 10X FY2009E EV/EBITDA. We have valued KPT's 52.2% stake in JMC based on market capitalization of JMC projects. We have valued net debt/cash at 1X book.

We believe incremental order-flows from Powergrid Corporation as well as announcement of plans for utilization of QIP proceeds are potential triggers for the stock. KPT has outperformed the benchmark Sensex over the last year and we maintain an Outperform rating on it.

Sun Pharmaceuticals: Acquires Taro at 11X CY2005 EBITDA

Pawan Nahar: pawan.nahar@kotak.com, +91-22-6634-1461

- Sun agrees to acquire Taro at 1.5X CY2005 revenue and 11.2X EBITDA
- Payback criterion is 5 years; seems possible with synergies and cost efficiencies
- · Portfolio is complimentary and seems to be a positive deal
- Our estimates are under review

Sun, together with its subsidiaries, has signed definitive agreements to acquire Taro Pharmaceutical Industries Ltd. Deal price of US\$454 mn (including US\$224 mn in net debt) implies multiple of 1.5X CY2005 revenue and 11.2X EBITDA. Taro had operating margin of 14%. It has yet not reported its CY2006 results, barring an indication of substantial losses. Separately, Sun has agreed to provide interim financing, which would help keep Taro from default on its debt. Combined entity would have revenues of US\$765 mn; half of it from the US market. The combined entity, based on last reported numbers, is trading at a multiple of 5.3X revenue and 21X EBITDA. We think this is a good acquisition ' Taro brings a niche portfolio (ointments and creams) and Sun will help it compete (cost efficiencies and resources).

Taro is a generic manufacturer with operations in U.S., Israel and Canada. North America represents more than 90% of Taro's sales. Sun intends to build on Taro's expertise in dermatology and pediatrics, along with specialty and generic pharmaceuticals, and overthe-counter products.

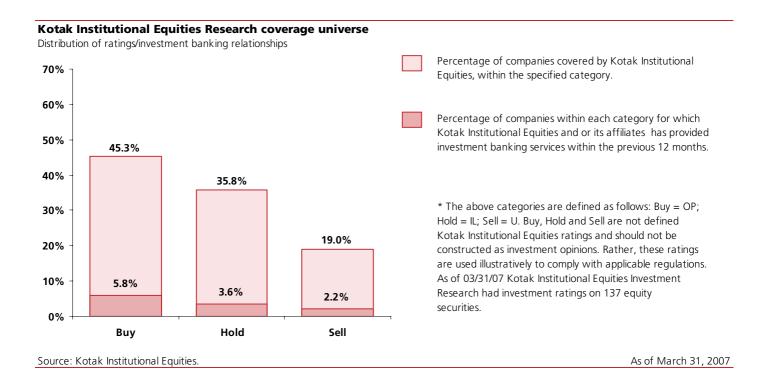

This all-cash deal is subject to Taro shareholder approval and requisite regulatory clearances. Sun intends to fund this US\$454 mn acquisition with internal accruals and proceeds from its earlier US\$350 mn FCCB.

Taro had recently reported 2005 sales of US\$298 mn and profit of US\$5.7 mn. Taro's financial statements were restated in view of errors in estimating the chargebacks from wholesalers.

Taro has large sites with necessary regulatory approvals in Canada and Israel that manufactures topical creams and ointments, liquids, capsules and tablets dosage forms. Additionally Taro manufactures APIs, including complex chemistry and steroids that are made at its site in Israel. Over US\$225 mn has been invested by Taro in capex in the last three years, and the working capital was approximately US\$79 mn (excluding cash of US\$80 mn). It has more than 100 ANDA approvals in the US alone. One NDA as well as 26 ANDAs are awaiting approval with the USFDA.

Two shareholders have opposed the deal on count of differential treatment versus key shareholders: On May 10, Franklin Advisors and Templeton Asset Management (own 9%) filed a motion in Israel to prevent what they allege to be discrimination against minority shareholders and over the weekend filed for an injunction to prevent Taro from entering into any deals.

"Each of the analysts named below hereby certifies that, with respect to each subject company and its securities for which the analyst is responsible in this report, (1) all of the views expressed in this report accurately reflect his or her personal views about the subject companies and securities, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report: Abhijeet Naik, Jigar Mistry, Pawan Nahar."

Ratings and other definitions/identifiers

Current rating system

Definitions of ratings

OP = Outperform. We expect this stock to outperform the BSE Sensex over the next 12 months. **IL = In-Line**. We expect this stock to perform in line with the BSE Sensex over the next 12 months. **U = Underperform**. We expect this stock to underperform the BSE Sensex over the next 12 months.

Our target price are also on 12-month horizon basis.

Other definitions

Coverage view. The coverage view represents each analyst's overall fundamental outlook on the Sector. The coverage view will consist of one of the following designations: Attractive (A), Neutral (N), Cautious (C).

Other ratings/identifiers

NR = Not Rated. The investment rating and target price, if any, have been suspended temporarily. Such suspension is in compliance with applicable regulation(s) and/or Kotak Securities policies in circumstances when Kotak Securities or its affiliates is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.

CS = Coverage Suspended. Kotak Securities has suspended coverage of this company.

NC = Not Covered. Kotak Securities does not cover this company.

RS = Rating Suspended. Kotak Securities Research has suspended the investment rating and price target, if any, for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **NA = Not Available or Not Applicable.** The information is not available for display or is not applicable.

NM = Not Meaningful. The information is not meaningful and is therefore excluded.
