### HDFC Bank (HDFCB)

### Banks/Financial Institutions

In line; growth momentum remains strong. HDFC Bank 2Q earnings remained on track, with key highlights being: (1) Strong loan growth of 38% yoy (YTD growth of 26%), (2) margins decline by 10 bps qoq to 4.2%, (3) gross NPLs ratio flat qoq; provisioning coverage healthy at 78%, (4) CASA ratio at 51%, and (5) provisions higher due to creation of floating provisions. Growth and earnings outlook remains strong for HDFC Bank, but expensive valuations at 3.8XFY2012E PBR leave little room for upside. Maintain REDUCE with TP of ₹2,500.

#### Company data and valuation summary **HDFC Bank** Stock data 52-week range (Rs) (high,low) 2.540-1.549 Market Cap. (Rs bn) 1.084.3 Shareholding pattern (%) **Promoters** 23.6 FIIs 45 2 MFs 4.0 Price performance (%) 1M 3M 12M Absolute (1.3)15 7 39.1 Rel. to BSE-30 (3.2)3.8 20.6

### In-line performance for the quarter; outlook strong but valuations pricing current performance

HDFC Bank continues to show strong performance on all counts. Loans grew by 38% yoy (26% YTD). Retail is witnessing a steady turnaround, with all segments driving growth, including the unsecured loans as well. Margins declined 10 bps qoq, but remain healthy at 4.2%. We expect a marginal decline going forward as the proportion of mortgages/corporate assets increases. Declining pace of new NPL formation will result in lower loan loss provisions cushioning any pressure on margins or fee income. Fee income growth will remain weak as pricing of wealth management products remains under pressure.

We believe that HDFC Bank has enough cushions on costs and provisions to maintain its impeccable earnings momentum. We have maintained our earnings and TP at ₹2,500. We find valuations expensive at 3.8X FY2012 PBR leaving very little upside (6%) from current levels. Maintain REDUCE.

### Sequential growth in loan book impressive at 8%; retail grows 31% yoy and 8% qoq

HDFC Bank's loan book grew 38% yoy (8% qoq) to ₹1.59 tn as of September 2010 mainly due to higher growth in corporate loans. Over the past 6 months, loan growth for HDFC Bank has been at 26%, one of the highest in the industry. We are revising our loan growth assumptions to 28% CAGR for FY2010-12E given the strong 1HFY11 performance.

Corporate loans grew by 46% yoy (9% qoq) while retail loans grew by 31% yoy (8% qoq) and now is about 52% of loan book. Corporate loans saw one large short-term lending during the quarter. Retail loans were largely driven by auto loans (up 36% yoy at Rs232 bn), and commercial vehicles (up 42% yoy at Rs112 bn). HDFC Bank has not bought any loans (housing loans declined 4% qoq) from HDFC Ltd in the current quarter. Unsecured loans (personal loans and credit cards) to total loans were flat qoq at 17% in the current quarter but growth is visible with the run-off from CBoP largely completed.

### REDUCE

### OCTOBER 19, 2010

#### RESULT

Coverage view: Attractive

Price (Rs): 2,369

Target price (Rs): 2,500

BSE-30: 19,983

### **QUICK NUMBERS**

- YTD growth in loans at 26%. NII growth at 29%; net profits growth at 33%
- Fee income growth at 16% yoy
- Maintain TP at ₹2,500

Manish Karwa manish.karwa@kotak.com Mumbai: +91-22-6634-1350

M B Mahesh mb.mahesh@kotak.com Mumbai: +91-22-6634-1231

Nischint Chawathe nischint.chawathe@kotak.com Mumbai: +91-22-6634-1545

### CASA ratio improves 140 bps qoq to 50.6%; savings growth at 38% yoy

CASA ratio, which declined by 280 bps qoq in the previous quarter (seasonal trend), improved 140 bps qoq in the current quarter. CASA % at the end of 2QFY11 stood at 50.6% compared to 49.2% in June 2010 and 51.7% in March 2010. Savings deposits grew impressively by 38% yoy (11% qoq) while current account grew by 22% yoy (9% qoq). Deposits growth remained well ahead of industry at 30% yoy and 7% qoq. CASA ratio continues to grow impressively giving HDFC Bank a structural advantage compared to peers in a rising rate environment.

### Margins decline 10 bps qoq but CD ratio cushions decline

NIMs for the quarter was at 4.2% (sequential decline of 10 bps) as lending yields have remained flat (KS calc.) while cost of funds (KS calc.) have increased by 20 bps. CD ratio expanded marginally to 80.4% from 79.9% in June 2010. On a calculated basis, investment yields have seen a sequential increase (investment yields on SLR has improved in the past few quarters, especially for shorter maturity). NII grew by 29% yoy in 2QFY11 to ₹25.3 bn, in line with our estimates.

We expect margins to moderate further as the bank would need to raise deposit rates sooner as the outlook on credit remains strong and the bank has little cushion on its investment book. The bank strives to maintain margins at 4-4.2%.

### Asset quality trend healthy; coverage ratio healthy at 77%

Gross NPLs which have been declining continuously over the past four quarters reversed in 2QFY11; increasing by ₹0.5 bn to ₹18.4 bn. However, we believe that the increase is not material in nature as new NPL formation continues to remain low over the past few quarters. Despite lower NPL formation, loan loss provisioning for the quarter continued to remain high at 120 bps for the quarter. Nearly a third of these provisions were floating provisions. These provisions are not adjusted towards net NPA but are computed for tier-2 capital. We are building in provisions of 120 bps for HDFC Bank in FY2011-12E.

The bank continues to make higher provisions and write-offs (compared to regulatory norms) resulting in much lower net NPLs at 0.3%. Provision coverage ratio improved marginally by about 100 bps qoq to 78%, well ahead of 70% as mandated by RBI. The total restructured continued to be low at 0.3% of loans.

### Fee income growth slower at 16% yoy; exchange income flat yoy

Non-interest income declined 9% yoy to Rs9.6 bn, as HDFC Bank reported a treasury loss of ₹0.5 bn, against a gain of ₹1.6 bn in 2QFY10. Core fees growth was slower at 16% yoy in 2QFY11 at ₹8.6 bn as pricing pressure remains on retail fees, especially third party products and selectively on corporate products (LC/BG etc). The bank has revised its fee income for the previous year adjusting ATM expenses in non-staff expenses as against netting off from other income. Exchange income was flat yoy at ₹1.5 bn. We are factoring 17% CAGR for FY2010-12E.

### Others key highlights

- ▶ Operating costs have increased by 19% yoy mainly due to sharp increase in staff expenses (28% yoy). Cost-income ratio for the quarter was flat gog at 48%.
- ▶ The bank has opened 40 branches and 328 ATMs in the current quarter taking the total branch network to 1,765 branches and 4,721 ATMs, respectively.
- ▶ Tier-1 capital has improved qoq to 12.7% (total CAR is 17%) from 12.4% (total CAR is 16.3%) in 1QFY11 as 2QFY11 have been audited. Improvement in tier-2 capital is mainly due to floating provisions created during the quarter.

# Bajaj Auto (BJAUT)

### **Automobiles**

Higher revenues and in-line margins deliver marginal upside. Bajaj Auto's 2QFY11 PAT came in 6% above estimates, driven by sequential improvement in realizations, higher financial income and lower depreciation. However, a seasonal increase in working capital saw in a smaller proportion of earnings reach the bank. We tweak our EPS estimates upwards but maintain our REDUCE rating as the stock is discounting the continuation of the strong demand, pricing environment and a strong product cycle.

#### Company data and valuation summary Bajaj Auto Stock data 52-week range (Rs) (high,low) 1,615-683 Market Cap. (Rs bn) 438.2 Shareholding pattern (%) **Promoters** 49.7 FIIs 18.7 MFs 3.0 Price performance (%) 1M 3M 12M Absolute 3.8 26.3 101.7 Rel. to BSE-30 3.4 13.0 73.9

### Bajaj Auto reported slightly better than expected PAT on higher realizations; margins were in line

Bajaj Auto reported PAT for 2QFY11 of Rs6.8 bn, up 69% yoy and 16% qoq. The reported PAT came in 6% better than our expectations of Rs6.4 bn with the upside being driven by higher-than-expected revenues. Revenues for the quarter came in at Rs43.4 bn compared to our estimate of Rs41.5 bn. Realizations for the quarter were up 4% qoq and came in better than expectations. The sequential increase in realizations was driven by price increases taken during the quarter and a richer mix consisting of a higher proportion of 3-wheelers and Pulsars.

### Margins were in line with estimates; up 70bps gog but down 130 bps yoy

EBITDA margins for the quarter came in at 20.7% compared to 20% reported in 1QFY11 and 22% in 2QFY10. The 70 bps of sequential margin improvement was driven by lower raw material costs and higher realizations. Raw material costs as a percentage of sales declined to 73.5% from 74.1% as the company's raw material contracts reflected the pullback we saw in commodity prices during the May-June period. The sequential decline was offset by increases in tire prices and certain components.

### Tweaking up FY2011E and FY2012E EPS estimates by 3%, largely reflecting 2QFY11 beat

We are raising our FY2011E and FY2012E EPS estimate to Rs91 and Rs104 from Rs88 and Rs101 prior. The increase primarily reflects higher financial income and lower depreciation expense. We expect depreciation expense to be flat or even trend down from 2QFY11 levels as the company's Chakan plant assets gets fully depreciated. Our FY2011E and FY2012E earnings estimates reflect volume growth of 38% and 15%, respectively, and margins in the20% range.

### Tweaking target upward to Rs1,450, maintain REDUCE

We raised our target by Rs30 to Rs1,450 to reflect the higher earnings estimates. We maintain our REDUCE rating as the stock largely reflects the strong demand fundamentals, product cycle and pricing power being enjoyed currently. Our earnings estimates assume a continuation of these favorable factors into FY2012E and could prove aggressive in the event of a mean reversion in growth to the 10-12% range, given increasing competitive intensity in the motorcycle segment.

Automobiles Bajaj Auto

### Balance sheet and cash flows

The company ended September 30, 2010 with cash of Rs1.9 bn. Total net cash and investments totaled Rs47.8 bn an increase of Rs4.8 bn from FY2010 levels compared to the Rs12 b in net income generated in 1HFY11. We notice an Rs8 bn increase in receivables and loans and advances as of the end of September from end FY2010 levels. The company attributed the higher receivables to the increased inventory at the dealer level ahead of the festival season.

## Container Corporation (CCRI)

### Infrastructure

Broadly in-line results. Concor reported revenues of Rs9.4 bn, down 1.6% yoy and 3.8% below estimate. Low rail freight expenses led the 130 bps yoy margin expansion; in line with estimates. Exim segment led the revenue disappointment (5.7% below estimates) likely led by lower-than-expected volume growth and shorted lead distances. Domestic segment reported a revenue growth of 13% yoy while the exim segment led the margin expansion. PAT at Rs2.06 bn was marginally below estimates of Rs2.1 bn.

### Results broadly in line with estimates; revenues decline on a yoy basis

3M

(8.7)

(18.8)

**12M** 14.7

(1.5)

- ▶ Revenue records de-growth: Concor reported 2QFY11 revenues of Rs9.4 bn, down 1.6% on a yoy basis and marginally below our estimate (by 3.8%) of Rs9.8 bn (see Exhibit 1). We had expected the company to report a marginal revenue growth of about 2-3%. The slight revenue disappointment is likely to have been led by a slower-than-expected pick-up in exim volumes.
- ▶ EBITDA margin expansion—in line with estimates: Concor reported a 130 bps yoy expansion in EBITDA margin to 27.7%, in line with estimates. The margin expansion was led by lower rail freight expenses as a percentage of sales (down 150 bps yoy to 56.7%). The revenue miss led to a net PAT of Rs2.06 bn in 2QFY11, marginally (2%) below our estimate of Rs2.1 bn.
- ▶ Half-year performance: For the half year ending September 30, 2010, Concor reported flat revenues on a yoy basis of Rs18.6 bn. EBITDA margin expanded by about 50 bps yoy to 27.4% in 1HFY11 from 26.8% in 1HFY10, while net PAT remained relatively flat at Rs4 bn.

### Domestic segment leads revenue growth while exim segment leads margin expansion

Exim revenues of Rs7.3 bn were about 5.7% below our estimate while domestic revenues of Rs2.1 bn (up 13% yoy) was 3.5% above our estimate (see Exhibit 2). Our estimates were based on 7-9% yoy growth in volumes and flat realizations on a sequential basis. Apart from lower-than-expected volumes the exim revenues could also have been impacted by lower average lead distances in 2QFY11 versus 2QFY10. Note that this trend was seen in 1QFY11 as well. The margin expansion was, however, led by the exim segment which recorded a 150 bps expansion in EBIT margins, while the domestic segment recorded a 290 bps yoy decline in EBIT margins.

### Reiterate REDUCE with a TP of Rs1,300; will revisit estimates post today's conference call

We retain our estimates of Rs73.1 and Rs84.6 for FY2011E and FY2012E, respectively (see Exhibit 4). We reiterate our REDUCE rating with a target price of Rs1,300/share based on relatively expensive valuations and increasing competition likely to partake market share.

We will revisit our estimates post today's conference call at 11:00 am.

### Cadila Healthcare (CDH)

### **Pharmaceuticals**

In-line results, on track to achieve FY2011E US\$1 bn sales target. PAT was 2% higher than our estimate due to better-than-expected operating margin at 21% despite higher R&D and staff cost versus our estimate. Sales were in line with our estimate, marked by recovery in Latin America and strong growth continuing in domestic business (up 19% yoy). We leave our estimates largely unchanged. At current price, Cadila is trading at 18X FY2012E earnings. We maintain REDUCE rating due to rich valuations, PT at Rs600.

### Sales at Rs11 bn were in line with estimates marked by outperformance in India and US

Sales were in line with our estimate marked by (1) 19% yoy in India branded business, higher than 17% seen in 1QFY11. India growth rate has picked up YTD due to marketing push and benefits from added field force (400 MRs added in FY2010) in cardiovascular, respiratory (30% of sales), (2) US sales of US\$48 mn, flat qoq and likely to ramp up in 2HFY11E on account of new product launches, (3) 26% yoy sales growth in Latin America post weak IQFY11 and (4) 50% yoy increase in Hospira JV sales on account of Docetaxel supplies.

### PAT was Rs1.7 bn, 2% higher than our estimate

PAT was 2% higher than our estimate due to higher EBITDA margin at 21%, 40 bps higher than our estimate despite higher R&D expenses and staff costs this quarter. Materials cost at 32% was 100 bps lower than our estimate due to strong growth in the high-margin segment of domestic formulations while other expenses at 28% was 200 bps lower than our estimate.

### Cadila on track to FY2011E sales guidance of US\$1 bn

We forecast net sales growth of 22% in FY2011E with margin expanding 200 bps. We believe Cadila is very close to attaining its sales guidance for FY2011E with sales of Rs44 bn in FY2011E. We leave our estimates largely unchanged.

#### We maintain REDUCE due to rich valuations with PT at Rs600 (was Rs580)

At current price, Cadila is trading at 18X FY2012E earnings. We maintain REDUCE rating due to rich valuations, PT at Rs600 (15.5X FY2012E est.).

### REDUCE

### OCTOBER 19, 2010

#### **UPDATE**

Coverage view: Attractive

Price (Rs): 682

Target price (Rs): 600

BSE-30: 19,983

### **QUICK NUMBERS**

- Sales at Rs11 bn was in line with estimates
- PAT was Rs1.7 bn, was 2% higher than our estimate
- Cadila on track to FY2011E sales guidance of US\$1 bn
- We maintain REDUCE rating due to rich valuations

Priti Arora
priti.arora@kotak.com
Mumbai: +91-22-6634-1551

Anmol Ganjoo anmol.ganjoo@kotak.com Mumbai: +91-22-6634-1160

### Key takeaways from conference call

- ▶ Cadila is confident of maintaining India sales growth at 15% in FY2011E, YTD growth in branded segment is 17-19%. India growth rate has picked up YTD due to marketing push and benefits from added field force in key segments of cardiovascular, respiratory. Cadila is growing at 30-40% yoy in these two segments (30% of sales) outpacing market growth of 25%. Cadila added field of around 400 in these two segments in FY2010 and has expanded doctor coverage.
- ▶ Sales from Hospira JV will ramp up in 2HFY11E on account of Docetaxel supplies which commenced this quarter.
- ▶ Sales from Abbott deal will start in 12-18 months from now. Additional licensing income is also expected from Abbott based upon reaching pre-defined milestone; however, company did not indicate timing or amount.
- ▶ API plant at Navi Mumbai for Nycomed will get inspected by US FDA in Jan-March quarter. Sale of API supplies in Nycomed JV (8 APIs) will commence in FY2012E.

## Mindtree (MTCL)

### Technology

Reiterate REDUCE, this time on core business concerns. Even as course correction on the (costly) mis-step to invest in handset products business is welcome, we note reasons for concern on the core business and would be wary of any re-rating in a hurry. In its acquisitive and bold pursuits (into unrelated areas), MT appears to have taken its eye off the ball on core business – underperformance on revenue growth as well as margins, the unpleasant outcomes. We cut our TP 18% to Rs450; reiterate REDUCE.

### Products (3G Android handset) investments – a costly mis-step...

What started as an unnecessary diversification into an unrelated area (in our view) is ending as a costly (~US\$20 mn) mis-step. MindTree has decided not to pursue its 'white-labeled handsets' (products) ambitions any further. The company has already invested close to US\$5 mn on this foray and indicates that closing this business would entail a further US\$12-14 mn charge over the next 2-3 quarters. This charge would be on account of (1) some fixed-asset write-off, (2) non-cancellable purchase orders for handset/prototype components, (3) severance pay for a few employees who will be let off, and (4) penalty on cancelling sub-contracting commitments.

### ...adds to the previous disappointments

The product investments mis-step adds to the list of disappointments from MindTree as a public listed company, which includes among others – (1) entering into exotic forex derivative contracts – this continues to lend volatility to the company's reported quarterly financials, (2) weakly timed acquisitions, and (3) poor guidance management – the company had to do away with giving annual revenue/EBITDA/PAT in beginning-FY2011E.

### Moving on – core business margin concerns drive EPS and target price cuts; REDUCE

MT's revenue performance for the Sep 2010 quarter was marginally better than expectations, however, and more importantly, core business margin performance disappointed. The 120 bps qoq improvement in core (ex-product investments) margins was aided to the tune of 330 bps on account of provision reversals, indicating a 210 bps underlying decline in margins. In a quarter with strong tailwinds in the form of strong volume growth and currency benefits, such margin performance is disappointing and reflects the pricing/wage pressure facing the company.

Even as we remain positive on revenue growth for MT (in line with our sector view), our margin outlook for the company has weakened further. We take our FY2012E margin estimates down 220 bps (in effect a 450 bps downgrade, as we remove the earlier assumed product investments). We cut our (pre-exceptional) FY2011E and FY2012E EPS estimate to Rs27.4 and Rs39.3, respectively. Reiterate REDUCE with a revised target price of Rs450/share (Rs550 earlier).

Technology Mindtree Mindtree

### Sep 2010 quarter – beats expectations; on one-off provision reversals, though

MT's reported headline numbers beat our expectations at the revenue, EBITDA, as well as PAT level. Revenues at US\$82.4 mn came in 0.7% ahead of estimates, EBITDA of Rs447 mn 12% above estimate, and PAT of Rs232 mn beat our expectation by 8.8%. However, the underlying driver of the positive variance on EBITDA takes the sheen away from the headline beat – at a consolidated level, better-than-expected EBITDA was aided by lower-than-expected products investments. More importantly though, the 120 bps qoq improvement in ex-products OPM was aided to the tune of 330 bps by provision reversals (bad debt and foreseeable loss on contracts).

Revenue growth was once again led by IT services, which grew 12.8% qoq; product engineering services were up by a modest 0.3%. The company reported strong growth in Europe (+14% qoq), among geographies. Net headcount addition was 572. LTM attrition increased 410 bps qoq to 21.9%.

### Margins - several headwinds ahead

High offshore leverage (69.4% of revenues offshore) makes MT's margins more sensitive to the Rupee as compared to most other companies in the sector. Rupee appreciation risk aside, we see a few fundamental headwinds to MT's margin outlook over the coming quarters, the key ones being – (1) high attrition – reported LTM attrition masks the worryingly high 35% quarterly annualized attrition for MT (see Exhibit 3); the company has effected wage hikes for its employees in the Jun and Sep 2010 quarters, but we do not rule out the possibility of another out-of-turn wage revision for select skill-sets, (2) sub-contracting costs could hurt further – high-attrition, especially if its is in the high-demand skill sets, could keep subcontracting costs high in the coming quarters, and (2) sustained pressure on offshore billing rates; see Exhibit 4.

# Sustaining valuation premium requires consistent strategic decisions and execution

Disappointments on issues like forex contracts, guidance, and product investments as well as sustained operational underperformance is likely to (and should) dent MT's hitherto premium positioning with the mid-sized IT universe, in our view. More disappointing to us has been the inconsistency in decision making and lack of a common long-term underlying thread behind the company's acquisition and investment decisions in the past three years. Some of these may have been excellent tactical moves in their own right, but do little to signal the company's long-term ambitions, in our view.

We expect earnings downgrades as well as multiple contractions ahead, and reiterate our negative stance on the stock with a reduced target price of Rs450/share (Rs550 earlier).

## Polaris Software Lab (POL)

### Technology

Margin improvement impressive but sustainability a concern. Polaris reported revenues of US\$83.6 mn (+6% qoq), in line with our estimates, but surprised positively on margins. EBITDA margins improved 220 bps sequentially versus our expectation of flat margins. We retain our negative stance on the stock given our concerns on weak positioning and margin sustenance due to (1) rupee appreciation headwinds, (2) increasing supply side cost pressures. Maintain SELL and target price of Rs180/share.

### Modest revenue growth – given the demand unconstrained environment

Polaris reported revenues of US\$83.6 mn (+6% qoq, +19.5% yoy), in line with our expectations. A 6% US\$ revenue growth when the industry is operating in a demand unconstrained environment is just about par for the course, in our view. We expect the Tier-II pack including Polaris to lag the Tier-I companies on revenue growth in the current growth phase for the Indian IT industry. Cut back in investments and running on a very thin bench during the downturn may have robbed companies like Polaris to participate in the strong growth phase. Under-investments during the downturn and not being ready for the growth phase is evident from the management commentary that they were unable to fulfill demand for the past two quarters.

### Strong margin performance – but sustainability is the question

A sharp 220 bps improvement in margins versus our expectation of flat margins drove outperformance at EBITDA and net income level. Company reported an EBITDA of Rs606 mn (+26% qoq) and net income of Rs484 mn (+3.5% qoq). Although a 220 bps improvement in margins is commendable, sustainability of the same is a question. The industry is operating in a supply constrained environment and cost pressures on the employee front are bound to have an impact on margins. The company recruited more than 900 people in 2QFY11, mostly during the end of the quarter which would keep the margins under pressure in the next quarter. Appreciating Re is another major concern – rupee has appreciated 4.6% in 3QFY11 till date vs 2QFY11. Mid-sized companies including Polaris have a greater sensitivity to the movement of Re/US\$.

### Weak positioning and margin sustainability concerns drive our negative view

We increase our EPS estimates for FY2011E/FY2012E to Rs19.4 and Rs19.8 from Rs19.1 and Rs18.8 earlier. Increase in estimates is driven by increase in OPM assumptions for FY2011E/FY2012E by 60 and 20 bps given the better-than-expected performance. Despite building in 20% revenue growth in FY2012E, the EPS broadly remains same due to (1) increase in tax rates, (2) pressure on margins due to rupee and (3) supply side constraints. Weak positioning in multivendor situations and questions on margin sustainability drives our negative view on Polaris. Retain SELL rating with a target price of Rs180/share.

# DishTV (DITV)

### Media

Towards blue-sky valuation; REDUCE. Dish TV's near-term operating performance remains robust—(1) strong volume growth, (2) price increases in Sep 2010 (effective 3QFY11E), (3) operating leverage given large fixed costs and (4) potential regulatory drivers. However, the stock is nearing its blue-sky valuation scenario and factoring in (1) simultaneous strong growth in volume and pricing (unlikely, in our view) and (2) expectations of regulatory upsides (running ahead of reality). Downgrade to REDUCE with 12-month DCF-based target price of Rs55 (Rs47 previously).

### Strong operating performance continues; FY2011E may not be right benchmark, however

Dish TV's (and DTH's) strong operating performance continues with (1) strong volume growth YTD-FY2011E (0.46 mn additions in July-August 2010 to cross 8 mn gross subscriber landmark, one month ahead of our expectation), (2) price increases of Rs10-15 in September 2010 (effective 3QFY11E; in line with average 3-5% price growth expected in FY2011E) and (3) positive operating leverage as volume and pricing growth likely outpaces large semi-fixed (content) and fixed (marketing, distribution) cost base (see Exhibit 1).

However, we highlight that FY2011E may not be the right benchmark given (1) strong sports calendar in FY2011E (see Exhibit 2), which has been leveraged well by organized DTH operators, (2) likely continued shift of rural subscribers from FTA DD Direct platform to commercial pay-TV DTH operators (see Exhibit 3; limited potential given peak claimed subscriber base of ~6-7 mn) as well as (3) one-off technical issues with Sun Direct, which have been resolved with Reliance Big TV sharing some of its transponders with Sun Direct.

### Trade-off between volume and pricing, rising competitive intensity are the key risks

The competitive intensity in the DTH segment has returned as seen by the aggressive pricing of the new schemes launched. (1) Tata Sky started off by reducing the price of its basic DTH service to Rs990 and (2) Dish TV followed by launching a similar offer; (3) Sun Direct and Videocon countered by reducing the price of their basic DTH service to Rs890 and (4) Dish TV has reacted by offering Rs990 worth of free content with the basic DTH service. We believe there may be both structural (equity infusion in Tata Sky and Sun Direct by strategic investors) and cyclical (festival season in Oct-Nov 2010) elements to the new schemes.

However, we are more concerned about the sub-Rs100 basic package re-introduced by Sun Direct. We note that price increases by Dish TV recently (Rs10-15 on its Rs125-210 packages) had raised expectations of pricing power returning to the DTH industry. However, the price-volume trade-off highlighted in our note "Weak Dish TV 3QFY10 reveals certain ARPU myths" dated January 25, 2010 remains in place. Dish TV may be able to meet its ARPU guidance for FY2011E but its ability to take further price hikes remains uncertain.

### Regulatory upsides exist: Content cost and license fee regulations

Reduction in license fee to the government currently at 10% of gross revenues (GR) In response to a petition filed by Sun Direct and Bharti Telemedia (Airtel Digital TV) on May 28, 2010, the broadcasting appellate authority TDSAT has come out with a ruling that mandates the government to charge license fees at 10% of adjusted gross revenues (AGR; gross revenues excluding items of a pass-through nature such as content costs, sale of hardware and taxes paid). This would result in effective license fee reducing to ~4-5% of GR versus 10% currently. However, we note that the government has the option of legally challenging the ruling in a higher court of law.

We note that TRAI/MIB have considered reduction in license fee to 6% of GR in the past; we believe the worsening fiscal position of the government in FY2010-11E precluded any definitive action on its part (potentially in FY2012E as well). Thus, we have already factored in the license fee paid to the government at 6% of GR starting FY2013E (versus 13% of GR currently) into our estimates/valuation. The acceptance of the TDSAT scheme by the government will result in ~100-200 bps increase in long-term margins and ~Rs2-5 increase in our valuation of the stock (see Exhibit 5 for sensitivity).

TRAI mandates channel rates on DTH at 35% of analog cable rates (50% currently)
The broadcasting regulator TRAI, in its Telecommunication (broadcasting and cable) services (forth) tariff order on July 21, 2010, has mandated pay channel rates for addressable systems at 35% of channel rates on non-addressable analog cable systems (versus 50% currently). This helps reduce the content cost burden of DTH operators and promotes a level-playing field between the various C&S platforms (effective declaration rate of subscribers is only 12-15% on analog cable systems). However, Dish TV had signed fixed fee deals with broadcasters in FY2009 and we estimate its pay channel rates to be ~35-40% of analog cable rates, with limited benefit of the new regulation. Moreover, the regulation has been legally challenged by broadcasters and its implementation is uncertain.

### Towards blue-sky valuation: Leaves limited room for upside currently

Dish TV stock has outperformed the benchmark BSE-30 Index by over 32% in the past 6 months on the back of continued positive operating drivers: (1) Strong volume growth, (2) price hikes in Sep 2010, (3) positive operating leverage given large fixed costs and (4) potential for regulatory upsides. We expect (1) strong volume growth (notwithstanding FY2011E being a unique year) and (2) operating leverage to continue but (3) price hikes and (4) regulatory drivers are beyond the control of the company. Our blue-sky valuation scenario for Dish TV stock is Rs61—(1) 10% higher-than-base volumes, (2) another 1% reduction in license fees and (3) no change to ARPUs—but still leaves limited upside from current market price of Rs54. Downgrade to REDUCE.

We have adjusted our estimates and valuation (Rs55 versus Rs47 previously) of Dish TV to factor in (1) strong volume growth (has certainly surprised on the upside) and (2) resultant positive operating leverage with (3) modest reduction in our ARPU estimates. We model FY2011E and FY2012E gross Dish TV subscriber additions at 2.8 mn (2.2 mn previously) and 2.4 mn (2.0 mn). We have reduced FY2011E and FY2012E content cost for Dish TV to Rs5.25 bn (Rs5.35 bn previously) and Rs6.2 bn (Rs6.3 bn). We model FY2011E and FY2012E net Dish TV ARPU at Rs144 (Rs146 previously) and Rs154 (Rs157). Our 12-month DCF-based target price is revised to Rs55 (Rs47 previously). Our FY2011E EBITDA estimate remains unchanged at Rs2.3 bn as higher volumes are negated by higher subscriber addition costs. Our FY2012E EBITDA increases to Rs5.2 bn (Rs4.4 bn).

### Sesa Goa (SESA)

### Metals

Expansion plans hit an air pocket. Sesa lowered FY2011E volume growth guidance to 10% from 20%. In addition, the path to expansion of iron mining capacity to 50 mn tons is also unclear on account of regulatory hurdles. We incorporate Cairn India financials in our model, lower iron ore volumes by 13% to 21.7 mn tons and TP by 6% to Rs320. REDUCE on (1) delay in capacity expansion plans; (2) regulatory hurdles; (3) expensive valuations and (4) value destruction from acquisition of stake in Cairn India.

### Lowers volumes growth guidance; capacity expansion may be at risk

Sesa lowered FY2011E iron ore volume growth guidance to 10% from 20% earlier citing (1) impact on ban of iron ore exports by the Karnataka Government; and (2) continued logistics constraints for iron ore shipments in Orissa and Goa. We believe that even the revised volume growth guidance is dependent on the lifting of ban on iron ore exports imposed by the Karnataka Government by November '10. Note that Karnataka contributed to ~20% of iron ore shipments in FY2010.

Further, Sesa's plans to expand iron ore production capacity to 50 mn tons by end-FY2013E may be at risk on account of delays in getting environment clearance from MOEF. Sesa currently has EC approval to mine up to 25 mn tons per annum. Sesa indicates that the Goa Government is not taking up any mine expansion request pending further announcements on revised MMDR draft. Expansion of Orissa mine has also hit an air pocket. We lower our iron ore sales estimates to 21.7 mn, 24.1 mn and 29.7 mn tons for FY2011E, FY2012E and FY2013E from 25 mn, 30.5 mn and 29.7 mn earlier.

### Cairn transaction may be EPS accretive but value destructive

We assume that Sesa's open offer to acquire 20% in Cairn India at Rs355/share is fully subscribed and consolidate earnings starting FY2012E. Note, in case of a shortfall in open offer, it will acquire the balance shares from Vedanta at Rs405/share. Our FY2012E and FY2013E EPS estimates increase by 11.1% and 20.2% for this consolidation. Our energy team values CAIR at Rs280/share as compared to Rs355 paid by Sesa for the stake; this leads to value destruction of 21%.

### Maintain REDUCE rating; multiple headwinds ahead

Delays in iron ore capacity expansion by the non-Big 3 miners underpin our outlook for iron ore prices—we now model iron ore prices of US\$120, US\$115 and US\$105/ton for FY2011E, FY2012E and FY2013E, respectively; this partially offsets the decline in our volume assumptions. Our core EBITDA estimates reduce by 17.2%, 2.2% and -0.6% to 53.1 bn, 55.9 bn and 60.8 bn for the next three years. EPS estimates increase to Rs52.5, Rs54 and Rs61.5 per share on proportionate earnings consolidation of Cairn India. We value Sesa's core business at Rs197/share and stake in Cairn India at Rs119/share. We lower our fair value to Rs320, from Rs340 earlier.

### Core business valuations based on generous assumptions

We find Sesa Goa's valuations expensive even after building in (1) aggressive long-term iron ore price of US\$90/dmt (long-term benchmark price, fob basis) and (2) further reserve accretion of about 90 mn.

Sesa faces multiple headwinds in the form of (1) imposition of ban on iron ore exports by the Karnataka Government. Near-term volumes may be hit by this ban, while medium-term expansion plans may be impacted by lack of environment clearances (Sesa has EC approval for iron ore mining up to 25 mn tons); (2) potential changes in MMDR Act that may call for sharing of 26% of profit generated with the population displaced from the mine and (3) unrelated and value destructive move to acquire 20% in Cairn India. Not only Sesa is overpaying for the asset, the move appears to be driven to fund group aspirations.

### Key highlights from 2QFY11 earnings call

- ► Cost of iron ore production (including royalties) was US\$90-95/ton for the Orissa mine and US\$40/ton for the Karnataka mine.
- ▶ The company reassessed profits for FY2011E after ban on iron ore exports from Karnataka and reversed provision for taxation created in 1QFY11 during the quarter. This led to ETR of nominal 4.6% in 2QFY11. The company has also lowered FY2011E ETR guidance to 15-16% from 18% earlier. Note that Sesa's ETR will move to 33.5% after EOU tax benefits expire in FY2011E.
- ▶ Total iron ore inventory stands at 5.3 mn tons—2.5 mn tons in Goa mines, 2.3 mn tons in Karnataka and 0.5 mn in Orissa. Volume impact from Karnataka iron ore export ban was 1 mn ton.
- ▶ Environment clearance for mining is 25 mn tons, broken up in to 17 mn tons for Goa, 6 mn tons for Karnataka mine and 2 mn tons for Orissa mines.
- ▶ Capex guidance for FY2011E is Rs14 bn broken up into Rs2 bn for sustenance capex and Rs12 bn for pig iron and mine capacity expansion.
- ▶ No clarity on expansion of borrowings limits to Rs150 bn over and above the aggregate of the paid-up share capital and free reserves of the company. Sesa had indicated that it would fund acquisition of stake in Cairn India through internal accruals; the company has cash and cash equivalent of Rs75.7 bn on end-September '10.

# Bharat Petroleum (BPCL)

## Energy

Gas provides buffer. An Anadarko-led consortium with BPCL as a 10% partner has made another discovery in Area 1 in the Rovuma basin in Mozambique. This is the consortium's fourth successful discovery in the same block. Reserves and PSC data are not yet available but a consortium partner (Cove Energy) has put the resource potential of the block as exceeding 10 tcf. We do not ascribe any value currently to BPCL's E&P assets in our 12-month fair valuation of ₹855.

### E&P portfolio could be meaningful

Exhibit 1 gives details of discoveries in BPCL's E&P assets. The available data is quite sketchy currently for us to ascribe value to BPCL's E&P assets. However, the value of the E&P portfolio could be meaningful in the context of BPCL's current market capitalization of US\$5.8 bn. Preliminary estimates put gross resource potential of over 300 mn bbls oil in BM-C-30 block in the Campos basin in Brazil (BPCL's stake: 12.5%) and over 10 tcf of gas in Area 1 in the Rovuma basin in Mozambique (BPCL's stake: 10%).

## Downside risks to earnings exist for FY2011E but too early to take a call

We do not rule out earnings risks to our FY2011E earnings given (1) continued delay in deregulation of diesel prices; we currently model deregulation from January 1, 2011 and (2) higher-than-expected FYTD crude oil prices. We would note that FY2011E earnings would depend on the amount of compensation from the government and net under-recoveries to be borne by the downstream oil companies. We assume that the government-owned downstream oil companies will bear net under-recoveries of ₹54 bn in FY2011E.

### We base our BUY rating on FY2012E earnings anyway

We assume full deregulation of auto fuel prices in FY2012E and assume that the downstream oil companies would bear ₹53 bn of net under-recoveries in FY2012E; the latter compares with ₹56 bn in FY2010. We currently assume US\$75/bbl crude price and ₹46/US\$ exchange rate for FY2012E. The recent spike in crude oil prices poses risks to earnings of the downstream oil companies; however, the recent increase in crude oil price seems to be largely driven by increased speculation in crude oil futures (see Exhibit 2).

# Value exists but realization will likely test patience

Exhibit 3 gives our computation for the fair valuation of BPCL and other downstream oil stocks while Exhibit 4 shows our fair valuation under a blue-sky scenario of full deregulation. We use 10X FY2012E EPS (less dividends from associates and subsidiaries valued separately) plus fair value of investments to arrive at our 12-month fair valuation of ₹855 for BPCL.

KOTAK INSTITUTIONAL EQUITIES RESEARCH

"Each of the analysts named below hereby certifies that, with respect to each subject company and its securities for which the analyst is responsible in this report, (1) all of the views expressed in this report accurately reflect his or her personal views about the subject companies and securities, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report: Sanjeev Prasad, Kawaljeet Saluja, Manish Karwa, Jairam Nathan, Lokesh Garg, Amit Kumar, Priti Arora."

#### Ratings and other definitions/identifiers

#### Definitions of ratings

BUY. We expect this stock to outperform the BSE Sensex by 10% over the next 12 months.

ADD. We expect this stock to outperform the BSE Sensex by 0-10% over the next 12 months.

REDUCE. We expect this stock to underperform the BSE Sensex by 0-10% over the next 12 months.

SELL. We expect this stock to underperform the BSE Sensex by more than 10% over the next 12 months.

Our target price are also on 12-month horizon basis.

#### Other definitions

Coverage view. The coverage view represents each analyst's overall fundamental outlook on the Sector. The coverage view will consist of one of the following designations: Attractive, Neutral, Cautious.

### Other ratings/identifiers

**NR = Not Rated.** The investment rating and target price, if any, have been suspended temporarily. Such suspension is in compliance with applicable regulation(s) and/or Kotak Securities policies in circumstances when Kotak Securities or its affiliates is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.

**CS = Coverage Suspended.** Kotak Securities has suspended coverage of this company.

**NC = Not Covered.** Kotak Securities does not cover this company.

**RS = Rating Suspended.** Kotak Securities Research has suspended the investment rating and price target, if any, for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon.

NA = Not Available or Not Applicable. The information is not available for display or is not applicable.

NM = Not Meaningful. The information is not meaningful and is therefore excluded.

Kotak Securities Limited and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group. We along with our affiliates are leading underwriter of securities and participants in virtually all securities trading markets in India. We and our affiliates have investment banking and other business relationships with a significant percentage of the companies covered by our Investment Research Department. Our research professionals provide important input into our investment banking and other business selection processes. Investors should assume that Kotak Securities Limited and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may participate in the solicitation of such business. Our research professionals are paid in part based on the profitability of Kotak Securities Limited, which include earnings from investment banking and other business. Kotak Securities Limited generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, Kotak Securities Limited generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of intere

This material should not be construed as an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. We are not soliciting any action based on this material. It is for the general information of clients of Kotak Securities Limited. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, clients should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur. Kotak Securities Limited does not provide tax advise to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment.

Certain transactions -including those involving futures, options, and other derivatives as well as non-investment-grade securities - give rise to substantial risk and are not suitable for all investors. The material is based on information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are our current opinions as of the date appearing on this material only. We endeavor to update on a reasonable basis the information discussed in this material, but regulatory, compliance, or other reasons may prevent us from doing so. We and our affiliates, officers, directors, and employees, including persons involved in the preparation or issuance of this material, may from time to time have "long" or "short" positions in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. For the purpose of calculating whether Kotak Securities Limited and its affiliates holds beneficially owns or controls, including the right to vote for directors, 1% of more of the equity shares of the subject issuer of a research report, the holdings does not include accounts managed by Kotak Mahindra Mutual Fund. Kotak Securities Limited and its non US affiliates may, to the extent permissible under applicable laws, have acted on or used this research to the extent that it relates to non US issuers, prior to or immediately following its publication. Foreign currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies affectively assume currency risk. In addition options involve risks and are not suitable for all investors. Please ensure that you have read and understood the current derivatives risk disclosure document before entering into any derivative transactions.

This report has not been prepared by Kotak Mahindra Inc. (KMInc). However KMInc has reviewed the report and, in so far as it includes current or historical information, it is believed to be reliable, although its accuracy and completeness cannot be guaranteed. Any reference to Kotak Securities Limited shall also be deemed to mean and include Kotak Mahindra Inc.
